Un relato muy tierno, nunca he querido tener mascotas pues me encariñaba con ellas y si morian me daba un buen disgusto.Ayer me regalaron un loro pequeño y me siento como cuando era niña en la mañana de Reyes.
No he leído nada de Durrel y esto que nos has traido me ha parecido bello.

LAS ASOCIACIONES CULTURALES Y VECINALES, SON LA GARANTÍA DE NUESTRA DEMOCRACIA

Ya sé que podría hablar del aniversario de la muerte de Franco, pero a lo largo de mi vida he aprendido a desconfiar de la importancia que se le suele reconocer a los jerarcas.
Ahora se nos habla de los Padres de la Constitución, de aquellos que firmaron en el Congreso de Diputados y en el Senado la Ley de Leyes para el Estado español; y se olvida que fueron los movimientos vecinales, los ateneos de barrio, las asociaciones reivindicativas, las iniciativas culturales, los grupos de teatro no profesionales los que nos convirtieron en ciudadanos capaces de defender la Democracia y consolidarla.
Sí, en los cimientos de nuestra Democracia, formando parte de la sociedad civil, también está el Ateneo de Ourense, y si dejamos que, con nuestra indiferencia, desaparezca, cada día estaremos más lejos de merecer el respeto como ciudadanos.
En este enlace está el llamamiento que hace el Ateneo de Ourense, y al encender una vela, también alertamos de la desestructuración que ha mutilado poco a poco nuestro protagonismo como ciudadanos responsables de nuestra inmediata realidad: http://www.salvemosalateneo.com/web/
No los dejemos solos.porque en cualquier lugar del mundo donde unos hombres luchen por aprender y comprender está la semilla de un futuro mejor.
Secunda este llamamiento en tu bitácora, por favor.

LOS DESIGNIOS DE DIOS

Terminé la carrera de Psicología peligrosamente inclinado hacia el estudio de los minerales, fascinado por la interrelación de átomos que no exhiben su narcisismo y son bellísimos. No soy un gemólogo al uso, y en mi colección coexiste el hematite con un canto rodado que tiene la forma exacta de una avellana, y una amatista sin tallar, con la piedra que el ácido úrico fabricó en mi riñón.

Una vez tuve una consulta profesional que me daba dinero, y en la que penalizaba a mis clientes según el aburrimiento que me produjeran durante los sagrados cincuenta y cinco minutos por sesión. Siempre grababa las consultas con el micrófono y el interruptor discretamente ocultos en el almanaque de mesa.

Luego, a solas, tenía que rebobinar las cintas, escucharlas a doble velocidad para no dejarme influir por el timbre de su voz, y tomaba notas. Era un sistema como cualquier otro para captar lo esencial.

Un día, escuchaba a una jovencita de diecisiete años, llamémosle “Ella”, bajo tutela judicial y procesada por tenencia de drogas. Hablaba hasta ese momento de lo que denominaba su “primera experiencia fuerte con un hombre” y yo me preparé para escuchar uno de esos sórdidos encuentros sexuales entre adolescentes... Ella apagó la grabadora, dejó su mano apoyada en el interruptor, y siguió hablando:

—*Cuando llegó el patrón de la patera a la discoteca, y vio que era yo quien tenía que recoger la mercancía, trató de robarme el dinero. Siempre vuelve a sorprenderme que un hombre tenga tanta sangre. Nunca he podido dejar de mirar cuando mueren, aunque sepa que tendría que alejarme cuanto antes... Hay ráfagas de luz que parecen encenderse y apagarse en sus ojos cuando ya están muertos, pero aquella fue la primera vez, yo tenía quince años y creo que no estaba preparada para eso...”*

—*¿Me estás diciendo que mataste a un hombre a los quince años... y que después has matado a otros?...*

—*Si, creo que no es peligroso contárselo porque voy a dejar de venir a su consulta, pero necesito que usted haga una factura cada mes como si estuviera tratándome... Ya sabe que mi anterior psicólogo murió cuando volvía de noche a su casa... no quiso hacer facturas falsas... y yo necesito tiempo libre y dinero para mis asuntos... quiero contratar un profesor para examinarme libre. Quiero a ir a la universidad y mi familia no puede pagármelo. Todos estos años he ahorrado para eso.*

Y me miró con una expresión tan infantil y tan dulce que literalmente me cuajó la sangre en las venas. No soy un héroe ni podré serlo jamás. El sufrimiento físico me aterra. Acepté.

Durante tres años hice aquellas facturas, pero no pude evitar que me aterrorizara pasar por una calle oscura, entrar al portal, abrir la puerta del ascensor... Sabía que antes o después querría eliminar a cualquiera que pudiera acusarla. Al final la tensión pudo conmigo.

Noche tras noche permanecí oculto en el rellano de su azotea, y la oía llegar, escuchaba el

repiqueteo de sus tacones un piso más abajo, el sonido de la llave en la cerradura, que abría en la semipenumbra que creaba la luz del ascensor, el portazo, y el golpe seco cuando ponía la cadena de seguridad... Creo que en realidad acabé por enloquecer de ansiedad y de angustia, enfermo de miedo y de odio...

No pude soportarlo.

Me marché, cambié de ciudad, dejé mi especialidad, y busqué trabajo en la construcción, porque las piedras me gustan.

Al cabo de quince años, cuando estoy escribiendo esto, tengo motivos para sentir aquel frío terror de entonces.

Hoy la he vuelto a ver: mi caso es lo suficientemente difícil y desesperado como para interesarle. Ha estudiado mi historial tan a fondo que incluso ha rectificado algunos datos a los neurólogos que diagnosticaron la causa de mi afasia. Mañana me operará a vida o muerte.

—*Hay que confiar en los extraños designios de Dios*.— me ha dicho.

Y me ha sonreído con la misma dulzura escalofriante de sus diecisiete años. Escribo esto sabiendo que no servirá de nada, lo encontrarán demasiado tarde.

Ahora me pregunto cómo me pude confundir así... Debería de haber imaginado que me daría una dirección falsa...

¿A quién tiré aquella noche por el hueco de la escalera desde el décimo piso?

ya se que Picasso no lo es, pero si lo es la ausencia de algo...p.ej. de un asesor de imagen.. pero buenooo ¿quien puede vivir hoy día sin ese elemento tan útil?
¿Quien no tiene al menos 1 guardaespaldas?

Pues somos muchos los que carecemos de esos privilegios.....
de tenerlos, otro gallo cantaría... harían evidentes cambios en esa imagen de espontaneidad que consigolleva a la evidencia de una situación de tristeza, desazón y sometimiento.
Tristeza porque es triste verse a si mismo en tu peor momento, desazón porque nunca se dice lo que realmente se quiere decir con una aceptación del 100% y sometimiento por el anillo, ese anillo de imparcialidad \"relativa siempre\" pues el anillo de compromiso siempre compromete a la parte distal del dedo donde te lo pongas....nunca compromete al resto del cuerpo.
Es decir.... ande yo valiente... ríase la gente....

CUANDO SE HACEN NEGOCIOS CON LAS CONSTRUCTORAS CON ESTA SENSACIÓN DE IMPUNIDAD POR ALGO SERÁ...

BOADILLA DEL MONTE

"*El negocio del urbanismo degrada nuestras ciudades y nuestra calidad de vida presente y futura*". Es el lema de ***Ciudadanos contra la especulación Urbanística***, una plataforma de defensores del medio ambiente a la que está asociada ***Boadilla Ecológica***, cuya representante denuncia sin paliativos: "*El monte de Boadilla está condenado a muerte por los obras y construcciones que han proyectado y que el Ayuntamiento impulsa en nuestro municipio".*
Entre estos "*proyectos*" juega un papel primordial una urbanización de chalets de superlujo, en el entorno del **Palacio del Infante don Luís**, conocido como **Palacio de Godoy**. Todavía no está fijado el precio al que saldrán al mercado los chalets, pero se calcula que ninguno costará menos de dos millones de euros. Se levantaran sobre el terreno que ahora ocupan miles de encinas, bastantes de ellas centenarias.
Arturo González Panero, militante del PP y alcalde de Boadilla, niega que vayan a destruir el medio ambiente. Se aferra a lo que dice la Web oficial, donde hay un párrafo donde se proclama que "m*ás del 50 % del municipio estará formado por parques, áreas ajardinadas y zonas verdes*", pero hay muchos –incluida ***Boadilla Ecológica***- convencidos de que ese 50% verde es sólo una cifra escrita en un papel.

Para evitar ese tipo de cosas, hace ahora un año, veinticuatro grupos ecologistas y asociaciones vecinales se han reunido para intentar hacer frente conjuntamente al voraz modelo de crecimiento urbanístico que se impone en la ***Comunidad de Madrid***.
Entre los que se agruparon bajo el paraguas de ***Ciudadanos contra la Especulación*** estaba ***Boadilla Ecológica***, que coincidía con el resto de los colectivos en señalar que la actual expansión urbanística no está facilitando el acceso a la vivienda y, sin embargo, está deteriorando aceleradamente el entorno natural y la calidad de vida de los ciudadanos.
En los últimos meses ha saltado la alarma entre vecinos y ecologistas de decenas de municipios de la ***Comunidad de Madrid*** por el acelerado deterioro ambiental y territorial que está ocasionando el actual modelo de crecimiento urbanístico.
Los objetivos esenciales de los planeamientos urbanísticos: cubrir necesidades sociales y vertebrar el territorio se están obviando para convertirse en una mera fuente de financiación de los ayuntamientos. Esta situación está provocando que se aprueben actuaciones urbanísticas aberrantes fuera de toda lógica ambiental, social y territorial.
A esto hay que añadir los numerosos casos de prevaricación y delito urbanístico cometidos por responsables municipales. Hasta la fecha hay veintidós municipios en los que alcaldes, ex alcaldes y concejales están siendo investigados por delito urbanístico.
Sin ajustarse a la normativa municipal ni autonómica, se conceden licencias para construir en zonas protegidas, se incrementa la edificabilidad permitida, se reducen o eliminan las cesiones obligatorias para zonas verdes y equipamientos, se favorecen operaciones que incrementan las plusvalías del suelo, lo que a su vez encarece el precio final de las viviendas, etc.
A pesar de que en una gran parte de los casos las irregularidades urbanísticas son evidentes, los responsables actúan en un estado de impunidad muy alarmante.
Ciudadanos contra la Especulación Urbanística subrayaba que, hasta la fecha, los jueces no están siendo lo suficientemente sensibles a los delitos urbanísticos y ambientales lo que contribuye a fomentar esta sensación de impunidad. Añadía en su manifiesto que ni ayuntamientos, ni ***Comunidad de Madrid***, ni los diferentes partidos políticos están mostrando interés por racionalizar el modelo de crecimiento urbanístico ni por frenar las irregularidades urbanísticas y que si era preciso y no lograba que el ***Gobierno*** autonómico de **Esperanza Aguirre** tome cartas en el asunto, recurriría incluso a la ***Unión Europea***.
Ha transcurrido un año de todo eso y la especulación continua devastando el pulmón verde de **Madrid**.
En el caso de **Boadilla**, el terreno recalificado para ser urbanizado se encuentra justo enfrente del **Palacio del Infante don Luís** y en el lindero del monte protegido.
El alcalde **Arturo González Panero** asegura que parte de esos terrenos han sido ya adquiridos por el ***Ayuntamiento*** y están destinados a la construcción de una depuradora para las viviendas del municipio, "*que ya está hecha*", y parte, en uno de los lugares más bonitos de la zona, "*está destinada precisamente a la construcción de un aula de la naturaleza".*
Afirma **Gonzáles Panero** no entender las críticas y dice que en el suelo donde se va a construir la urbanización "*en ningún caso existen árboles que vayan a ser talados ni arrasados".*
No es del todo cierto, porque árboles hay y algunos son encinas centenarias, que ya estaban allí antes de que Godoy se dedicara a conspirar en la *Corte* y de que **Goya** pintara sus cuadros.
En el registro no figura que el terreno al que alude el alcalde **Panero**. Ahí, quien lleva la voz cantante es la constructora **AZATA SA** . Su proyecto lleva como nombre ***La Alcazaba de Boadilla***. Ha sido diseñado por el arquitecto **Leopoldo Arnaiz**, quien sólo hace dos años apareció como imputado, junto al ex alcalde de **Alcorcón**, **Pablo Zúñiga**, en un affaire de recalificaciones fraudulentas, que se conoce como el *Escándalo*

de Compodón.
En aquel asunto y como figura en el escrito del fiscal **Emilio Valerio**, estaban también implicados los constructores **Francisco Bravo** y **Francisco Vázquez**, a su vez relacionados con la espantada que dieron los tránsfugas **Eduardo Tamayo** y **Teresa Sáez** en la ***Asamblea de Madrid***.
Conocedores del terreno y la situación en la que se encuentra esta zona, desde ***Boadilla Ecológica***, no obstante, temen que "*esta urbanización sea el primer mordisco al monte*", y que "*de ahí a continuar talando no hay nada, como ya ocurrió al otro lado con el humedal al que iban gran cantidad de aves en verano, y que ahora se llama Urbanización Los Fresnos, pegada al campo de golf de Majadahonda".*
Temen los ecologistas que no sirva de nada que el bosque figure como protegido, cuando "*con una revisión del Plan General de Urbanismo se puede recalificar de nuevo, si sigue en el poder quien está ahora, y no tiene visos de cambiar",* ya que el ***PP*** gobernó en esta localidad desde el principio de la democracia.
Arturo González Panero, el alcalde, insiste -con voz suave y maneras educadas- que eso no es así, ya que "*el monte está declarado de Utilidad Pública, por lo que no es objeto de una posible recalificación, aunque quiera el Ayuntamiento no lo permiten las leyes".* Y tratando de tranquilizar a quienes teman por ello añade: "*esa es la mejor garantía, los ecologistas pueden estar tranquilos, porque no hay intención de recalificar el monte y, aunque la hubiera no podríamos hacerlo*".
Puntualiza que, cuando se recalificó el terreno donde se construirá esta urbanización, "*el proyecto pasó por Medio Ambiente sin mayores problemas*", y añade que las únicas dificultades procedieron de **Patrimonio**, "por *estar la urbanización junto al Palacio de Godoy".* Añade como argumento final que no se construirán bloques de pisos "*sino viviendas de una sola altura*".
Preguntado acerca del inicio de las obras, momento en el que la oposición socialista y los ecologistas tienen pensado "*hacer ruido para que todo el mundo se entere*", **González Panero** aún lo ve lejano, pues se encuentra aún en la aprobación del ***Plan Parcial*** y aún no hay "*ni proyecto de urbanización ni de compensación*".
Aunque el alcalde no hace mención alguna al respecto, en **Boadilla** se afirma que está en marcha un **recurso contencioso administrativo** por parte de algunos particulares que se oponen al ***Plan Especial*** y que el Tribunal ha ordenado que se paralice cualquier acción hasta que revisen los detalles de dicho ***Plan***, para lo cual han ordenado que se les haga entrega de una copia de lo planificado. Seguiremos informando.

Espero que se consiga algo de verdad. Porque a mi me parece casi un milagro luchar contra esa especulación en la que estamos atrapados. Aquí en Marbella y en general en la costa del sol es algo vomitivo, y vergonzozo hasta límites extremos. Lo que queda de costa sin edificiar es cero patatero. Que hacer? si dirigimos las miradas al ayuntamientos y comunidades es para caerse de espanto, de la de comisiones bajo manga y negocios que hay. Yo trabajé con abogados (contabilidad) y lo que ví no lo pude aguantar más de 4 meses. Pero como luchar cuando la gente está removiendo demasiado dinero negro entre las páginas de este drama? Es realmente penoso lo que está ocurriendo en la Comunidad de Madrid con la especulación. Ahora es Boadilla, y llevo años leyendo en prensa local cartas de protesta de ciudadanos denunciando talas indiscriminadas de árboles, sobre todo. Nada parece pararles. ¿QUIÉN DICE QUE ESTA DECISIÓN DEL AYUNTAMIENTO DE BOADILLA DEL MONTE ES JURÍDICAMENTE IMPECABLE?

Fragmentos del Acta del Pleno del Ayuntamiento de Bobadilla del Monte de 28 de noviembre de 2003:

(...) Tras serle concedido por el señor Alcalde el uso de la palabra, intervino el Concejal Delegado de Urbanismo, señor Díaz Latorre, quien dio lectura a la propuesta presentada, favorablemente dictaminada por la Comisión Informativa de Urbanismo y Vivienda. El Concejal Portavoz de APB, señor Galindo Álvarez, intervino a continuación para reiterar lo que ya dijo en la Comisión Informativa en el sentido de que su grupo entiende, y así ha quedado acreditado por escrito de explicación de voto que facilitó en la Comisión, que se está incumpliendo el régimen transitorio establecido en la nueva legislación del suelo de la Comunidad de Madrid (Ley 9/2001, de 17 de julio, del Suelo de la Comunidad de Madrid), que obliga a que la adaptación a la misma del Plan General se hubiese realizado, como fecha tope, en agosto de 2003, por lo que entendiendo que con esta no adaptación se pueden crear situaciones de reconocimiento de derechos urbanísticos que, posteriormente se vuelvan contra los miembros de la Corporación como demandas de responsabilidad patrimonial, su grupo, por un criterio estricto de legalidad, si bien no está en contra de que los propietarios patrimonialicen sus derechos, va a votar en contra de la propuesta presentada por imperativo legal, voto que, anuncia, hará extensivo a todos los puntos de contenido urbanístico incluidos en el orden del día de la presente sesión.
A la intervención del señor Galindo Álvarez respondió el Concejal Delegado de Urbanismo que en todos los expedientes presentados figuran tanto los correspondientes informes jurídicos como la aprobación definitiva del estudio de detalle correspondiente a cada una de las dos iniciativas formalizadas incluidas en el orden del día, por lo que considera que el equipo de gobierno está actuando conforme a la legalidad vigente, por lo que el señor Galindo Álvarez sólo ha expresado una opinión, respondiéndole éste que ninguno de los informes jurídicos recoge lo que él ha dicho, por lo que cree que en los mismos se da clarísimamente una omisión respecto al contenido económico y a los derechos urbanísticos de estas iniciativas, por lo que reitera el anuncio del voto negativo de su grupo.
Acto seguido intervino el Concejal Portavoz del Grupo Socialista, señor Hernández Fernández, quien para explicar el voto de su grupo, manifestó entender que el artículo 106 de la nueva Ley del Suelo de la Comunidad de Madrid tampoco se cumple en esta propuesta de ejecución directa por los propietarios, ya que no se acredita la representación por los solicitantes de, al menos, el 50 por ciento del suelo, pues sólo se presenta una nota informativa del Registro de la Propiedad que, de acuerdo con el artículo 225 de la Ley Hipotecaria no supone garantía alguna y lo que se debe presentar es un certificado expedido por el Registro de la Propiedad por el que la garantía quede cubierta; por otra parte, tampoco se acompaña el proyecto de urbanización, preceptivo según el apartado 1, c) del artículo 106 de la Ley 9/2001, del Suelo de la Comunidad de Madrid, por todo lo cual su grupo votará en contra de la propuesta presentada, a lo que el señor Flores López, Arquitecto Municipal, respondió que, según el informe jurídico que obra en el expediente, la iniciativa formalizada presenta toda la documentación requerida por el mencionado artículo 106 de la Ley del Suelo, replicándole el señor Hernández Fernández que no ha encontrado en el expediente la certificación citada.
El Concejal Delegado de Urbanismo manifestó que el equipo municipal de gobierno actúa de conformidad con los informes emitidos al respecto por los Servicios Técnicos y Jurídicos Municipales, en los que se señala que procede la estimación de la iniciativa formalizada y, al preguntar el señor Alcalde si se debatió en la Comisión Informativa este punto, el señor Arquitecto Municipal le respondió que no se debatió, pero que la cuestión, en todo caso, es que las iniciativas privadas se informan sólo jurídicamente porque el Alcalde tiene la obligación legal de estimarlas o desestimarlas en un plazo máximo de un mes, añadiendo, para mayor información, que, respecto al punto de que ahora se trata, todo el mundo conoce que existe un convenio urbanístico suscrito con la Junta de Compensación del Olivar de Mirabal, que casi es propietario único ya que, en su día, compró todos los derechos de la tercera fase de dicha Urbanización y los otros propietarios son minoría.
Tras todo lo cual, el señor Alcalde, dio por terminado el debate de este punto y sometió a votación la propuesta presentada, obteniéndose el siguiente resultado: Por mayoría de trece de los veintiún Concejales asistentes a la sesión, total que legalmente integra la Corporación Municipal y de conformidad con el dictamen favorable de la Comisión Informativa de Urbanismo y Vivienda, se

adoptó el siguiente acuerdo:
PRIMERO.- Estimar la iniciativa formalizada por don José Antonio Ruiz García, en su calidad de Presidente del Consejo de Administración de la Junta de Compensación de la Colonia “El Olivar de Mirabal”, para la ejecución del planeamiento en el sector SUR-2 “El Olivar 3ª Fase”, en virtud de lo dispuesto en el artículo 107 de la Ley del Suelo de la Comunidad de Madrid, Ley 9/2001, de 17 de julio, al haberse cumplido todos los requisitos previstos en el artículo 106.1 y 2 de la citada Ley.
SEGUNDO.- Notificar a los interesados en el expediente el presente acuerdo, en virtud de lo establecido en el artículo 58 de la Ley 30/1992, de 26 de noviembre, reguladora del Régimen Jurídico y Procedimiento Administrativo Común.
TERCERO.- Iniciar los trámites necesarios para la aprobación, si procede, de los Proyectos de Reparcelación y Urbanización del Ámbito.
3.- Estimación de la iniciativa formalizada, para ejecución directa por los propietarios, para el desarrollo del Sector SUR-3 “Camino Bajo-Depuradora”.
Leído por el señor Alcalde el enunciado de este punto y una vez le fue concedido el uso de la palabra, el Concejal Portavoz del grupo APB, señor Galindo Álvarez, intervino para recordar al señor Secretario, solicitándole lo haga constar así en acta, la misma motivación de voto de su grupo, expresada al punto 2 del orden del día, a todos los acuerdos de contenido urbanístico, en el sentido de que si en los informes jurídicos no se refleja el cumplimiento del régimen previsto en las disposiciones transitorias de la Ley del Suelo de la Comunidad de Madrid, su grupo entiende que el Plan General no está ajustado a dicha Ley y, por lo tanto, las iniciativas que se están tramitando son acuerdos nulos de pleno derecho. Tras lo cual el señor Alcalde Presidente sometió a votación la propuesta presentada, obteniéndose el siguiente resultado:
Por mayoría de trece de los veintiún Concejales asistentes a la sesión, total que legalmente integra la Corporación Municipal y de conformidad con el dictamen favorable de la Comisión Informativa de Urbanismo y Vivienda, se adoptó el siguiente acuerdo:

PRIMERO.- Estimar la iniciativa formalizada por don José Domingo Rodríguez Losada, en su calidad de administrador único de la sociedad mercantil “LA ALCAZABA DE BOADILLA”, para la aplicación efectiva del Sistema de Compensación en el sector SUR-3 “Camino Bajo-Depuradora”, en virtud de lo dispuesto en el artículo 107 de la ley del Suelo de la Comunidad de Madrid, Ley 9/2001, de 17 de julio, al haberse cumplido todos los requisitos previstos en el artículo 106.1 y 2 de la citada Ley. AVISO DE UNA AMABLE LECTORA: casi todos los domingos se recogen firmas en la plaza donde cruza la Avda. Siglo XXI con la calle Infante Don Luis.
Al principio era sólo por la barbaridad de trazado por el que YA están haciendo llegar el metro a Boadilla; ahora también porque esa escasa vegetación que rodea el pueblo (que durante años ha estado protegida por Ley) va a desaparecer para doblar el ancho de la carretera con Pozuelo. Así que quien tenga una mañana de domingo sin planes, puede pasara por ahí, firmar, y dar un paseo por ese maravilloso bosque mixto de encina y pino "con escasa vegetación dispersa".
Nosotros sólo somos los administradores del mundo que hemos de entregar a nuestros sucesores.

Los colores de la ciencia es una muy buena página, sí que sí.

La imagen me ha hecho reir que ni te cuento, está super simpatica. Sería muy bueno poner un letrero así, se evitaria estar lavando la tapa cada que va un susodicho al baño, junto al mensaje que señala en “Un soporte de papel higiénico "habla" con los usuarios" ;)

LA MAFIA DEL LADRILLO PRETENDE TENER VENIA EN LA COMUNIDAD DE MADRID

ADIÓS AL SEGUNDO PULMÓN DE MADRID
Hay lugares que parecen intocables. Nadie imaginaba pasar por **Boadilla del Monte** y en lugar de encontrar el bosque mediterráneo que lleva ahí cientos de años ver una especie de *Los Ángeles de San Rafael* para banqueros. Ya pasa y ahí la *Ciudad de la Banca* hecha por **Don Emilio Botín**. Por si eso fuera poco, ***Azata S.A***. -una empresa denunciada por los ecologistas por construir en el Parque Natural de **Cabo de Gata** un hotel de 800 habitaciones- va arrasar el histórico encinar para levantar una urbanización para *super-ricos* madrileños. Todo ello con el apoyo de **Arturo González Panero**, alcalde del ***PP***.
Dicen que **Boadilla** se ha convertido en el pueblo "*todo a cien*", porque no hay vivienda en el municipio que cueste ahora menos de 100 millones de las antiguas pesetas y **José Domingo Rodríguez Losada**, dueño de ***Azata S.A***. parece empeñado en que pase a llamarse "*todo a trescientos*".
Si los sufridos ecologistas y el respeto al medio ambiente no lo impiden, **Rodríguez Losada** sembrará de mansiones lo que es todavía el segundo *pulmón verde* de **Madrid**. Del día a la noche, con el respaldo aparente de **Arturo González Panero** -el mismo alcalde que facilitó al banquero **Botín** uno de los *pelotazos* urbanísticos más espectaculares que se recuerdan en la ***Comunidad de Madrid***- miles de árboles desaparecerán y con ellos una pieza esencial en el equilibro medioambiental de la capital de **España**.
El proyecto lleva como nombre ***La Alcazaba de Boadilla***. Ha sido diseñado por el arquitecto **Leopoldo Arnaiz**, quien sólo hace dos años apareció como imputado, junto al ex alcalde de Alcorcon, **Pablo Zuñiga**, en un *affaire* de recalificaciones fraudulenas, que se conoce como el *Escándalo de Compodón*.
En aquel asunto y como figura en el escrito del fiscal **Emilio Valerio**, estaban también implicados los constructores **Francisco Bravo** y **Francisco Vázquez**, a su vez relacionados con la *espantada* que dieron los transfugas **Eduardo Tamayo** y **Teresa Saez** en la ***Asamblea de Madrid.***
El **Monte de Boadilla** es un impresionante paraje de bosque mediterráneo, un encinar centenario con ejemplares únicos alguno de los cuales ya estaba allí cuando la **Duquesa de Alba** posaba para **Goya** en el ahora deteriorado **Palacio de Godoy**, donde próximamente se rodará la película "*Los fantasmas de Goya".*
No han dudado en llamar a este bosque vegetación escasa con arbolado disperso

En ese privilegiado lugar –no sólo por su belleza, sino por su valor ecológico en el noroeste de la capital de **España**- es donde la Inmobiliaria AZATA SA se dispone a construir la Urbanización para Altos Ejecutivos más lujosa y exclusiva de toda la ***Comunidad de Madrid***.
La zona, como demuestra lo ocurrido en la vecina **Majadahonda**, ha sido ya de sobra devastada por la construcción, pero la voracidad no parece tener límites. Dispuesto a pasar por donde sea, **José Domingo Rodríguez Losada** no ha dudado en calificar este bosque *"vegetación escasa con arbolado disperso",* evitando así todos los informes preceptivos, entre ellos el de ***Medio Ambiente***.

Por **Elena de Regoyos** vía **Periodista Digital**

Por favor, con mucho respeto, sin insultar a la familia, digánle al Alcalde de Boadilla del Monte, don Arturo González Panero, que es muy posible que hayan olvidado cómo acabó Napoleón cuando vino con chulerías con los *gatos*.

En este enlace están son los ediles de Boadilla del Monte: escríbanles con toda cortesía que vamos a vigilar sus ingresos y sus gastos el resto de sus vidas y no van a poder disfrutar de lo que no ganen honradamente.

¿Límites, dices, Francisca?

¿Cuándo se ha visto un capitalista neoliberal y "..." que los tenga? ¿Tiene límites, para ese tipo de personajes, la avaricia, el egoismo, el menosprecio de los semejantes y sus ansias de enriquecerse caiga quién caiga?

Me temo que no, que no tienen más límites que los que la ciudadanía logre establecer. ¡Y estos son tan escasos, tan débiles!

Seguiremos en la brecha, luchando.

Esto me suena. Mi pueblo ya no tiene campo, apenas unos jardines, lo demás casas unifamiliares, montones de casas extendiendose por todo el terreno que hasta hace pocos años eran olivares.
Alguien está ganando mucho dinero con los ladrillos y aunque el sueldo de los albañiles no es lo que era...no son precisamente ellos los beneficiados.
Si no, que pregunten a Monteseirin de donde sacó los 8 millones de pesetas, en dinero contante, que repartió a cada familia del "Vacie" para que abandonara las chabolas un día antes de que entraran a saco las maquinas excavadoras...

Un abrazo, Gatopardo.

Bosques y zonas protegidas desvastadas. Tránsfugas, políticos corruptos, o políticos lo son para enriquecerse.
Podría decir que esto pasa por votar a los que votan, y que no tenían que haber ganado las segundas elecciones.
Pero en mi pueblo (de 80 mil habitantes) pasa algo parecido con una zona protegida que quieren urbanizar... y no con chalets. Aquí gobiernan socialistas con IC.

¿Qué pasará cuando ni siquiera tengamos 'escasa vegetación dispersa'?

Municipios como Las Rozas, Majadahonda, Alcorcón, Boadilla del Monte, Villaviciosa, Navalcarnero, Pozuelo, Villanueva del Pardillo, Villanueva de la Cañada, y ahora Móstoles, son y han sido feudos de dominio popular. Y en ellos, desde su cargo de secretario regional, Romero de Tejada habría actuado como valedor de promotores y ayuntamientos amigos. El promotor Francisco Bravo Vázquez, sobrino y socio de Vázquez Igual, y Romero de Tejada mantuvieron una reunión en la que el primero quería presentarle a `su´ candidato independiente para la Alcaldía de Sevilla la Nueva, e incluso ambos llegaron a visitar la sede central del PP en la calle Génova para tratar el asunto pero no se llegó a un acuerdo, según una emisora de radio.Otro de los rodamientos que componen esta red sería la parte empresarial. Pocos creen dentro de las filas socialistas que solo Vázquez sea el alma mater de tal entuerto. Importantes promotoras, como Azata, Icasa o el holding de los hermanos San Román, están bajo la lupa de los sabuesos del PSOE. Y con estas compañías, la sospechosa parición de un nombre, el de Leopoldo Arnáiz, como arquitecto redactor de los planes de desarrollo urbanístico de todos estos municipios.

He trabajado durante varios años en la ciudad financiera, y tengo que decir que si eso fué un bosque, entendemos por "bosque" cosas diferentes, otra cosa es la concesión de las licencias de obra y la adquisición de las tierras, que según tengo entendido, fue bastante escandaloso, si donde se tiene proyectado construir esa ciudad para ricos es donde hay ahora un bosque que une Majadahonda con Boadilla es un autentico atentado ecológico

YO Y MI GATO PANGUR BAN

Yo y mi gato Pangur Ban
Seguimos parejo plan;
Mientras él caza ratones
Cazo yo las emociones.

Lejos del loor mundano
siéntome, lápiz en mano;
Pangur mira y, sin rencor,
Pone en obra su labor.

¡Cuán gozoso vernos es
disfrutando del placer,
cada uno en el hogar
con su deleite y solaz!

A menudo un ratón pasa
ante Pangur, y lo caza;
una palabra a menudo
en la red cae, y la anudo.

Frente al muro, la mirada
fija él feroz, descarnada;
frente al muro del saber

templo yo mi parecer.

¡Para el gato, qué gentil
si un ratón deja el cubil!
¡Para mi, qué regocijo
si alguna duda corrijo!

En la casa, sin boato,
yo y Pangur Ban, mi gato,
cada uno por su parte
afinamos nuestras artes.

(Poema anónimo del siglo IX, atribuido a un estudiante irlandés, discípulo de San Patricio, patrono de Irlanda, y escrito en el margen de un manuscrito de las Epístolas de San Pablo).

Me dio la pista **gatofeliz.org**

DOS PERIODISTAS "SUICIDADOS" POR DESCUBRIR LOS ASUNTOS DE LA SAGA BUSH (1)

Hay biografías de George W. Bush escritas por los encargados de la información y comunicadores propagandistas de la Casa Blanca. Hay aquellas escritas por periodistas «*amigos*» del presidente y existe: «***El Nerón del Siglo XXI***» de **James Hatfield**, la biografía no autorizada, la mejor biografía del, por entonces, inquilino de la Casa Blanca, la investigación que explora en detalle su vida, el entorno del presidente de los Estados Unidos, sus negocios, sus cambios de chaqueta, la financiación de sus campañas electorales, su adicción a la cocaína, al alcohol...

Un fascinante libro con una historia doble

El libro tiene un doble contenido. Por un lado la sorprendente historia que nos cuenta Hatfield del personaje presidencial (orígenes, pasado y presente). Por otro la represión, la censura que conoció este libro y su autor en los Estados Unidos, hecho muy revelador del actual proceso social y político que vive este gran país. Hatfield nunca imaginó que su trabajo lo llevaría a la muerte.

James Hatfield, escritor norteamericano, fue el primero en investigar a fondo y de manera minuciosa la vida de George W. Bush hijo -y de su familia-, cuando éste era aún gobernador en el estado de Texas. Las relaciones de sus abuelos con el nazismo, la búsqueda y la ambición por el petróleo de sus padres, las relaciones de conveniencia con los Binladen, como evitó la Guerra del Vietnam de joven y mucho más. Todo esto hace que hoy en día sea el libro más exhaustivo y el trabajo investigación más interesante sobre el gobernante estadounidense.

Al presentarse Bush por primera vez como candidato presidencial, James Hatfield pensó que era el mejor momento para dar a conocer la verdadera naturaleza de George W. Bush a la opinión pública americana, pero el lobby del candidato presidencial lanzó una poderosa campaña para desacreditarlo y amenazó a la casa editorial original de hacerle un proceso por difamación ante la justicia si publicaba ese libro.

El editor St. Martin Press se asustó con las amenazas y aceptó quemar los 80.000 libros que tenía listos para ser distribuidos en las librerías, a fin de evitar un conflicto con este poderoso *lobby*. James Hatfield es abandonado y Bush gana de manera fraudulenta las elecciones en 2001.

Primera edición en las librerías en los Estados Unidos

Hatfield pensaba que su carrera como escritor estaba terminada, cuando un pequeño editor de nombre Sander Hicks (Ediciones Soft Skull, New York) le dio una nueva oportunidad para volver a lanzar el libro. Habían encargado a la imprenta 45.000 ejemplares. Es en ese momento cuando Hatfield le contó que ha sido amenazado de muerte, -él, su esposa y su niña de dos meses-, por dos consejeros del presidente trabajando en la Casa Blanca, si insiste o mantiene la idea de publicar el libro.

Hatfield tiene miedo y quiere abandonar todo, pero su nuevo editor le asegura que ya está todo

listo y que es muy tarde para bloquear el lanzamiento. Sin embargo una nueva y misteriosa queja ante la justicia paralizará la difusión y distribución del libro por un cierto tiempo.

La muerte de James Hatfield

James Hatfield fue encontrado muerto en una habitación del motel «Days Inn» en Springdale (Arkansas), el 18 de julio 2001.

Según el parte policial se trata de un suicidio. Pero un amigo de Hatfield, el periodista David Cogswell, que conocía todas las dificultades y amenazas que tuvo que afrontar Hatfield, ha escrito dos excelentes notas finales en «El Nerón del Siglo XXI», donde explica toda la rareza y el misterio de su muerte, la manera como Hatfield era vigilado y acechado, hecho que levanta muchas interrogantes.

La obra fue ganando poco a poco un gran reconocimiento de la crítica, hasta que se habló de ella en la primera plana de los diarios, fue seleccionada por el *New York Times* como best-seller, se ubicó entre las mejoras ventas de libros en los EEUU y levantó una intensa polémica.

El libro es un documento exhaustivo en tono mesurado y dentro de los límites de la comprensión de la personalidad de George W. Bush. Presenta igualmente una visión aterradora de la vida pública norteamericana.

Sin embargo, de este extraordinario trabajo, se ha retenido mucho un pasaje secundario, pero sensible: el candidato Bush había sido detenido por posesión de cocaína en 1972. Ahora bien, según las leyes locales, este delito hubiera debido valerle una privación de los derechos cívicos, de modo que no debió haber tenido el derecho a presentarse como candidato al puesto de gobernador del estado de Texas ni a la presidencia de los Estados Unidos.

Gary Webb, 49 años, Premio Pulitzer, asesinado por la CIA en un rocambolesco "suicidio"

¿Cómo es posible que alguien reciba dos heridas de bala diferentes y aún se considere como suicidio la causa de su muerte? Primero eran múltiples heridas de bala, después era una sola herida y ahora múltiples otra vez. ¿Cómo es posible que alguien que trate de robarte termine involucrándote en el robo? ¿De veras cree Ud. que alguien pueda dispararse un arma en el rostro dos veces?

¿Quién mató a Gary Webb?

Gary Webb demostró la prueba de la implicación directa de la CIA en el tráfico de drogas. Su cuerpo sin vida fue encontrado con dos disparos en la cara.

Para leer cuál fue la información que consideró que teníamos derecho a conocer, aun a costa de su vida, leed los enlaces siguientes:

* **Crack, cigarrillos y la llegada de Gary...**

* **Gary Webb, ¡Presente!**
* **Como la CIA creó la epidemia del crack**
* **LA HISTORIA SECRETA DEL CRACK**
* **Las evidencias que indican que Gary Webb fue asesinado.**
* **Gary Webb, Mark Lombardi, J.H. Hatfield y Danny Casalaro son los 4 'suicidios ' de investigadores periodisticos que tenían una comprensión detallada de la estructura y de la función de la familia BUSH en el crimen organizado en Estados Unidos y el mundo.**
* **La conexión de la CIA con el crack**

¿No sería maravilloso que los periodistas españoles hicieran investigaciones de este calado, en vez de ejercer como editorialistas políticos de derechas o de izquierdas?

12 Consejos en una catastrofe por James Nolan . Son las conclusiones de este escritor de New Orlenans después de pasar el Katrina, y especialmente de estar en una situación límite sin atención de las autoridades. A todos nos puede servir, ya que no sabemos que nos puede pasar, y sobre todo donde nos puede "pillar" una catastrofe.

AL ENFÁTICO ORADOR

Qué pasión, cuánta vehemencia
desarrolla con verbo incendiario,
dignas de un pobre sin herencia,
dignas de un cura mesetario.
No sabría decir si sus rugidos
se deben a estar muy estreñido
o al lavarlo, el slip ha encogido
y le tiene los dídimos reñidos,
y por eso da esos berridos.
Yo lo conocí cuando era maoista,
pro-chino, contestatario, disidente,
impío, melenudo, antifascista,
y era un energúmeno incipiente
canijo, feo, nanejo y arribista.

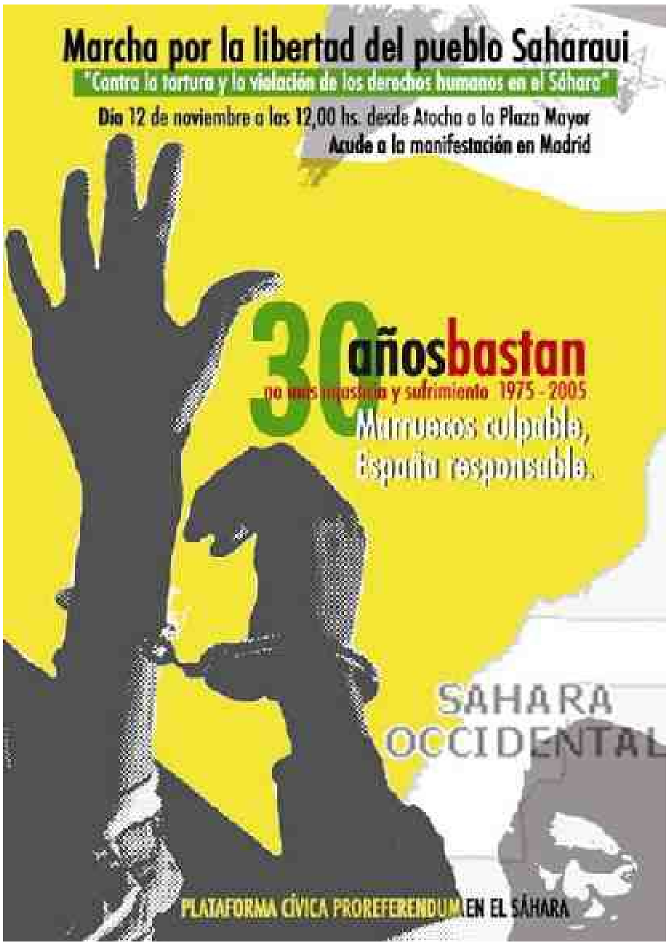
UN MUNDO LOCO



Creo que vale la pena leer el artículo que ha escrito mi admirada Tautina en EntreTlineas, "Un mundo loco", porque, como casi siempre, ha hecho diana.

Y también vale la pena leer a Pedro Fernández Barbadillo, en Bokabulario, "Periodistas españoles asisten a una sesión de tortura marroquí."

Acude a la maifestación contra la tortura y la violación de los derechos humanos, que sufre el pueblo saharaui

Por cuestiones de trabajo viví unos meses en Las Palmas, Gran Canaria, esto fue hace unos cuatro años, y ya me tocó ver este problema tan grande y triste del pueblo Saharaui, del que poco se sabe por acá, los periódicos casi no publican nada, igual que los noticieros. Recuerdo que los estudiantes de la universidad tenían un módulo vendiendo muchas cosas para ayudar a este pueblo (me traje una camiseta muy linda), y están con ellos un grupo saharaui, personas guapas físicamente y más bellas de espíritu, pero muy tristes, escucharlos me fue impactante, nunca podré olvidarlos. Sentí mucha impotencia y tristeza de no poder hacer absolutamente nada, sólo enterarme...

Ojalá que muchas personas vayan a esta manifestación, y que se repitan cuantas veces sea necesario. Ojalá que esta realidad se pueda abolir, demasiado injusta...

Un abrazo para ti.

SIGILO PROFESIONAL

Al cabo, mi director de tesis se apiadó de mí, y me recomendó como correctora de estilo a un editor amigo suyo. La editorial tenía tiradas formidables, y sus instalaciones apenas ocupaban dieciséis metros cuadrados en el despacho de la casa particular de Don Flavio y cientos de metros de una imprenta moderna, a pleno rendimiento. Después de hacerme jurar que por sigilo profesional jamás hablaría de la verdadera personalidad que se escondía tras los seudónimos de sus autores, Don Flavio me contrató, me ofreció un buen sueldo y un consejo:
-*Corrija sólo las faltas de ortografía y si ve una palabra que se repite ocho veces en una página, déjela, porque los lectores no suelen ser más exigentes que el autor. Si usted se deja vencer por la tentación de corregir su estilo, tendrá un trabajo de mil demonios...y me dejará en la ruina.*
Yo creí que sería un empleo transitorio hasta que encontrara algo mejor, pero hace diez años que me dedico a intercambiar bes y uves y quitar las haches, que se prodigan generosamente junto con las descripciones de mujeres que entrecierran los ojos con un beso viril, y las de hombres que sienten la dureza de su miembro como preludio de los pormenorizados embates eróticos. Nunca hubo un protagonista que midiera menos de un metro ochenta y cinco, y nunca hubo mujeres en sus brazos que no tuvieran pechos turgentes y ojos sombreados por larguísimas pestañas. Y si alguno de los amantes era pobre se subsanaba haciéndolo hijo secreto de un conde o heredero de una gran fortuna.
Trabajaba en casa, un piso compartido con mi amiga Ana, que fue mi compañera de pupitre durante el bachillerato en el Colegio de monjas. Nuestra profesora de Literatura, Sor Angustias, se apiadó de ella y le dijo que su inteligencia era incompatible con la Gramática, que no se empeñara en aprender algo de un libro; pero Ana se divertía como una loca con las imaginativas tramas que yo me guardaba bien de corregir.
-*¡Él está pescando truchas con el yate en alta mar!* –relinchaba de risa. Y al rato:
 - *Ha roto la cremallera del pantalón vaquero con una formidable erección…*
Pero a los cinco minutos soltaba la novela como si le diera urticaria. Independientemente de la inteligencia que tenga, hay mucha gente como Ana, para la que leer es un suplicio. Así es que cuando me dijo que se había enamorado del crítico literario más temido del país, e iban en serio, me dio por reír.
-*¡Pero, Ana, te aburrirás con él!*
-*¡Qué pérfida eres, bonita, tú lo que quieres decir es que se aburrirá conmigo!* – y luego con su característico tono jocoso me explicó lo evidente: -*¡No hace falta ser Unamuno para resultarle interesante a un hombre culto! ¡Es más, es mejor no parecerse nada a Unamuno!*
Ana tiene una salud física y mental insultante que le permite trabajar diez horas de cajera, e irse a continuación en bicicleta al pueblo cercano, meterse en una de sus interminables timbas de póquer, organizar una cena para sus amistades o ponerse a coser uno de sus escuetos modelitos

exclusivos, que me cortan la respiración de envidia… Para hacerse perdonar por un plantón de dos horas, Ana me suele contar su último “drama”, como cuando la peluquera se olvidó del líquido rizador en su cabeza y se lo dejó como un trasplante del pubis, y le tuvo que cortar el pelo. Y mostraba un rapado que subrayaba la perfección de sus rasgos. Nunca logré guardar mi seriedad y mi mal humor más de cinco minutos con ella, y cuando estallaban las carcajadas, ella pontificaba:
- *¿Te das cuenta que nadie se toma en serio mis problemas?*
Pero conforme avanzaba su idilio vi como mi compañera de piso se volvía tensa y angustiada y, periódicamente, se empeñaba en leer y se sentaba con un café, un cuaderno, el Diccionario, y el autor que recomendase su novio en la sección de Cultura del periódico más serio del país.
-*Creo que para leer a los autores que la crítica ensalza me haría falta una incipiente tuberculosis, una anemia perniciosa, algo que me deje lánguidamente destrozada…* -me dijo
Yo bromeaba:
-*Vas a conseguir parecerte a Unamuno como sigas leyendo esos tostones…*
- *¿Por qué usan esas frases casi interminables, esos recovecos adonde salta un verbo, asoma entre comas el sujeto y diez líneas más allá, resuelven con un pretérito de subjuntivo el quid de la cuestión? Cuando llego a comprender lo que dice estoy exhausta, y ya no me acuerdo de qué iba el argumento…*
-*¡No me digas que no es excitante cuando persigues como geisha por arrozal las pistas del astuto disfraz con el que el autor ha escondido su mensaje!…*
- *Yo ya sé cuando un texto es bueno y cuando no vale. Sé que cualquiera puede escribir: “Anochece”, pero sólo un gran escritor podría decir: “El cosmos pierde su áurea lividez y se cubre con su manto azul cobalto “. Yo comprendo la superioridad de esa prosa, admiro locamente una frase así y a quien es capaz de idearla, pero me sacia de tal manera que no puedo seguir leyendo, como si me hubiera atiborrado con una tarta de nata y chocolate, almendrada con frutas confitadas. ¡Esta buenísima... pero me basta una ración pequeña para quedar ahíta!*
Y al cabo, sinceridad por sinceridad, tuve que confesarle que no es necesario leer a esos autores que forman parte del Olimpo de la Crítica, y basta con saber que existen, más que nada para poder seguir el hilo en una conversación, pero nadie los ha leído y mucho menos los críticos que los recomiendan. Es tan inculta, la pobre idiota, que eso que sabemos todos los que tenemos cierta cultura, ella ni lo sospecha…
-*Ana, a mí no me engañas: tiene de ser un amante excepcional para que haya logrado comerte el coco de esa manera...*
-*¡Uf, no, qué va... como es tan intelectual, al pobre esto del erotismo lo pilla un poco a trasmano!*
Y me he tenido que morder la lengua para no decirle que algunas de las novelas eróticas que tanto nos han hecho reír, las escribe su novio.

CANTOS DE AMOR DE AUSIÀS MARCH

CANTO LXXX
MES VOLUNTATS EN GRAN PART DISCORDANT

Mis voluntades que antes discordavan,
por sola vos, señora, he concordado:
por vos están en paz, si en guerra estavan,
por vos conozco el yerro en lo passado;
conozco el bien que de antes me quitavan.
Mis pensamientos cierto se han holgado
de ver concordes tantos enemigos,
que pueden ya escrevillo a sus amigos.

No es menester bivir imaginando,
juntando confusión al pensamiento;
de gran firmeza va de hoy más usando,
de dos affanes sólo el uno siento.
No es menester de hoy más andar buscando,
pues ha hallado el alma su contento,
y un arma tiene ya con que defiende
de qualquier daño al cuerpo, si le offende.

Y si dispensa acaso la Fortuna
que pierda el alma mía esta batalla,
la vida serme triste e importuna
es cosa cierta, y no hay poder negalla.
No acierta el cuerpo en tomar arma alguna,
tiene temor si piensa executalla;
y assí las offensivas ha dexado,
las defensivas solas le han quedado.

Del todo no he perdido mi esperança,
con ella (en fin) espirará mi vida;
qualquier peligro siento por bonança,
según mi alma está fortalescida.
Doleos de mí por lo que no se alcança,
no de la pena, no, que es bien çufrida;
jamás un buen encuentro dio contento
tan grande como en ver la tela siento.
Si no puedo quebrar mi triste hado
con fuerça agena y ando vagamundo,

llamar no me ose alguno desdichado,
que tan buen puerto no se vio en el mundo.
Gran parte del desseo he alcançado,
y aun otro bien mayor y más profundo:
si no le tengo aún, no se me ha ydo
sin darme otro deleyte más subido.

Señora, en esto que he de vos tratado,
no me hagáys si os plaze mentiroso,
y aquel que çufre amaros y es forçoso,
por mal respecto no sea mal pagado.

Autor: Ausiàs March (1397- 1459)
Traducido al español por Jorge de Montemayor (1520- 1561)

Mes voluntats, en gran part discordants,
dona, per vós les he fetes concordes;
per vós han pau solent ésser discordes,
per vós conech l'error on era·bans.
Per vós conech tot lo delit de viure;
mos penssaments concòrdia·n conexen,
ja de contrast, sí com dabans, no·s vexen,
ans, als amichs, de pau poden escriure.

A ymaginar no·m cal d'uymés assiure
per aplegar ma pensa molt confusa:
de la virtut de fermetat molt usa;
de dos afanys, del primer só deliure.
Per encercar, no·m cal treball de penssa:
trobat és ja tot obs de la mi·arma;
e per guanyar ses flaques mans fort arma,
e per haver al cors de mals deffenssa.

E si del cors ma fortuna dispensa
que per son mal m·arma perda batalla,
ja sab qué fer e ma lengua no u call:
viur·en lo món aver en gran offenssa.
Mal consellat, mon cors volch pendre lança,
e, ple de por, ab ses armes volch noure,
mas pres consell que les tornàs al foure;
prenint escut, armes d'offendre lança.

No m'ha jaquit del tot ma esperança:
ab ella·nsemps espirarà ma vida;
mas yo conech la mi·arma·nfortida,
que tot perill se té·n molt gran bonança.
Dolga's tot hom com yo bé no atench,
no·s dolga·lgú de mon terrible mal;
null junyidor no féu encontre tal
d'on fos content com yo veent lo rench.

Si mos mals fats ab força·ltra no tench,
malauyrat no·m vulla·lgú jutjar;
si vagabunt me veu lo món anar,
en tan segur port home jamés vench.
Mon desig és en molta part complit,

trobant molt més del que fuy desigós;
si no atench, no pens algú que fos
ab tal dolor sens molt major delit.

Tornada

Lir entre carts, lo que de vós he dit,
plàci·a Déu no·m faça mentidor,
y el qu·é sufert essent-vos amador,
per mal esguart no·m sia malgrahit.

P.S. DOMINGO, 30 DE NOVIEMBRE 2005

Finaliza el plazo de Recogida de firmas en torno a los graves sucesos de Ceuta y Melilla

Recibido de **Andalucía Acoge**
El próximo martes, día 1 de noviembre, concluye el plazo de recogida de firmas. Si tu asociación no se ha sumado aún, no dudes en hacerlo. El jueves 3 de noviembre todas las firmas de organizaciones serán presentadas al Parlamento español.
Recientemente se han celebrado en Larache las Jornadas organizadas por Chabaka y Apdha “Migración y Derechos Humanos” con asistencia de 120 personas de esta orilla y un buen número de colectivos de la zona norte de Marruecos. Entre los resultados del encuentro está la aprobación por el plenario de asistentes de las dos orillas de una Declaración en torno a los graves sucesos de Ceuta y Melilla. Se pretende que a esta declaración se puedan sumar cuantos colectivos europeos y marroquíes lo deseen para ser presentada a los respectivos parlamentos. Para ello necesitamos vuestra colaboración. Más de 700 colectivos se han sumado ya a esta iniciativa.
Vuestro apoyo es importante. Podéis firmar en la página de [Andalucía Acoge] o en la de [Derechos Humanos]

Gatopardo... gracias por estar aki... me haces recordar que cuando llegué a España pensé en lo enormemente confiados que eran los españoles, por dejarme las llaves de sus hogares, de sus empresas, y si hubiera estado interesado en apoderarme de algo, lo hubiera podido hacer. Sin embargo, nunca ni lo he hecho, ni lo haré... esto me confirma, por mi parte, que no todos los inmigrantes venimos a montar la marimorena, y segundo que no todos los españoles, y afortunadamente muchos europeos se sienten cercanos a compartir su buenaventura... gracias porque estas bases sólidas de nuevas generaciones, están terminando por convertirse en puertas abiertas para todos.

UN NUEVO EPISODIO DE LA INVETERADA ENVIDIA HISPANA

Octubre, 2005

Leo el apabullante documento de Manuel García Viñó denunciando las incorrecciones gramaticales de Javier Marías. El informe destila odio hacia el triunfante escritor, pero al mismo tiempo demuestra que su investigador le ha echado horas a la lectura con lupa de cada uno de sus libros. Un admirador inverso, de los que tantos tenemos en España. Los errores son de todo tipo, desde anacolutos hasta uso inexacto de vocablos, desde reiteraciones hasta frases incomprensibles. Leídos así, uno tras otro –Viñó entresaca mas de un centenar– producen vértigo y alguna que otra risa, pues la verdad que en algunos casos se trata de auténticas burradas. Y ante ninguno de ellos –salvo las voluntarias reiteraciones léxicas– cabe decir que se trate de opciones estilísticas pues tal como aparecen son verdaderos atentados contra la lengua. Si acaso, para amortiguar tanta burricie, podríamos decir que las frases están fuera de contexto, pero ni así. Viñó denuncia *el caso Marías* como una estafa y acusa a los medios críticos, universitarios y académicos por haber alzado a los altares a un escritor que es incapaz de juntar las palabras con corrección. Pienso que algún motivo oscuro, quizá la envidia, ha debido mover al denunciante, un escritor profesional sin éxito y un excelente lector, según demuestra.

El problema que plantea es peliagudo, ya que al tiempo que desacredita a un escritor famoso desacredita también a los lectores que han leído con placer sus libros. Como yo mismo. Después de leer el listado de gazapos no he podido por menos de sentirme avergonzado, ya que yo he sido lector de todos esos libros y he sido incapaz de detectarlos. Pienso, al hilo de la cuestión, que hay varias maneras de leer un libro, la académica y la popular. Ricardo Senabre, por ejemplo, pertenece a la primera tendencia, pues en sus críticas siempre añade una coda con los errores encontrados en sus lecturas. Yo me incluiría en el segundo grupo, ya que me dejo llevar por la historia y no reparo en los deslices de un escritor salvo que sean muy llamativos (últimamente me estoy fijando en el uso que hacen algunos autores del adjetivo *incierto* como sinónimo de *falso*, pero poco más). No es por defender esta última postura, la mía, acomodaticia y perezosa, lo reconozco, pero yo creo que tampoco se debería exigir al escritor un cumplimiento estricto de las normas, pues todos, empezando por Cervantes, han metido la pata, y de cada cien lectores sólo uno ha reparado en la metedura, con el orgullo un poco rastrero de rebajarle la gloria al infractor y aumentar la suya de escritor frustrado. Y esa táctica de desmenuzar textos de cualquier autor estrella con el ánimo de pillarle en flagrante delito se nos puede volver contra nosotros en cualquier momento.

Convencido estoy de que si la obra de Viñó, un esforzado escritor a destajo, se sometiera a un escrutinio riguroso, se le encontrarían también atentados gramaticales, pero seguro que nadie está por la labor, ya que a Viñó no lo conoce ni dios. Así que se trata más bien, o así lo intuyo, de arremeter contra el triunfador, en un nuevo episodio de la inveterada envidia hispana. Ello me lo confirma la respuesta de los participantes del blog, que celebran la gracia de Viñó y descargan su artillería rencorosa contra Marías, al que casi todos confiesan, vaya por Dios, no haber leído.

Adenda:

Y ahora el exorcista la emprende con Almudena Grandes señalando tópicos en su escritura. Uno de ellos es: *hizo una pausa*. Hombre, yo creo que no es para tanto. Por ese camino, el simple *dijo* que anuncia o termina un diálogo, también es tópico, ¿no? Propongo un análisis exhaustivo de las obras de Manuel García Viñó, aunque es pronto para la empresa. Habrá que esperar a que sea famoso para entrarle a degüello.

En España es tan habitual ayudar y aplaudir al vencedor que, cuando alguien pone pies en pared y denuncia el fraude, lo normal es pregúntarse qué oscuro odio secreto, qué venero de resentimiento y envidia moverá a quien expone, con razones y argumentos, que el genio es tonto por esencia, presencia y potencia. El "ingobernable" pueblo español lleva diciendo "amén" desde los Reyes Católicos a los que mandan por la cuenta que le corre, y eso marca, hace callo, licúa el cerebro y la lucidez.
Así es que estóy feliz pudiendo abrir Gatopardo a la polémica, y quien considere que el espacio de comentarios no es el apropiado para desarrollar sus argumentos, ya sabéis que podéis contar con el de portada: será un placer.

García Viñó me parece un crítico nada serio, al menos en esta crítica que hace a Marías. Cuando dice acerca del escritor "Sólo escribe novelas en primera persona", en ese momento la verdad me dio risa y ya tomé su texto son ninguna importancia, no se le puede dar crédito a alguien que no está haciendo crítica, está destilando resentimiento y poco profesionalismo.

Lo que mencionas de la envidia es igualmente aquí, un jugador de futblol mexicano, Hugo Sánchez, cuenta lo siguiente: en dos cubetas hay cangrejos, una cubeta está tapada y otra destapada. A lo que uno le prgunta al otro: "¿por qué una está destapada? es que en ésta no hay problema, sólo hay cangrejos mexicanos, y si uno intenta salir, el de abajo de inmediato lo jala de la pata...

Admirada Magda: de tu rigor lector tengo pruebas, y sé que esta objección quizás se base en que olvidas que García Viñó durante ocho folios expone cientos de ejemplos de las limitaciones literarias de Javier Marías, y creo que esa utilización exclusiva de la primera persona no la aduce como única razón.
Sin ir más lejos, García Viñó reconoce y admira la obra de Marcel Proust, escrita en primera persona. Y no temas, que aquí se dé el caso de los cangrejos mexicanos, porque aquí se apoya incondicionalmente al vencedor, al que triunfa, y nadie sabe cuánto lo quieren en su pueblo hasta que le toca el primer premio de la Lotería.

...No conozco a este crítico y antes me callo que enjuiciar, dicho sea con todo respeto. Pero personalmente considero que la crítica que no mueve a la invitación a la lectura, o que no salva ni construye la valoración de su informe sobre un proyecto positivo de alguno de los aspectos que conforman al autor o a su obra, me hace no sólo desconfiar ante tanto negativismo sino que también me aburre de tanta dedicación a algo que -según predican- no lo merece. Me ocurre igual que con algunos mensajes o textos que leo en la red: algunos son imbebibles, pero no por eso envío mensajes o chateo destruyendo e insultando como si de un chat de barbaridades al uso se tratase. Muchas veces no comento y ya está; y le dejo mi valoración positiva a alguien que por un detalle al menos salvable sé que le motivará o creará buen ambiente.
Y esto no es cerrar los ojos, ni mentir, ni fingir, ni no saber encajar críticas que son ataques. Si te has atrevido a esbozar unas letras sabrás la dificultad que entraña este arte y que no hay manual perfecto para quien quiera escribir. Así, que vendría mejor algo más de humildad, de valorar lo bueno, que algo habrá salvable, de animar al autor e invitar al lector. Y si no gustó, pues no redundar en la ofensa y pregunten otros criterios; incluso al autor, que sería lo idóneo. Y si así tampoco, pues no lo lean... ¡Pero ya está bien de tanta mala siembra,
hombre! Disculpen, no estoy enfadado, es que hoy llaman crítica a cualquier cosa, pero que ofenda y haga daño a ser posible...

Tamargo: si García Viñó en vez de exponer detalladamente por qué el lector no va a encontrar el producto literario que la publicidad engañosa aconseja, lo hiciera con un electrodoméstico o un coche os parecería no sólo aceptable, sino conveniente, y nadie diría que lo mueve el resentimiento o la envidia. Callar ante lo que no gusta es una opción muy general, y así lo aconseja el sentido común en esta sociedad que ha perpetuado las leyes de supervivencia de la dictadura. Basta con leer La revista de Occidente y otras revistas culturales de antes de la guerra. Esto que tanto choca aquí, ahora, es normal en la vida intelectual de cualquier país europeo, como por ejemplo, en el programa de Bernard Pivot de la televisión francesa, "Apostrophes",(1975-1990),donde en horario de máxima audiencia se presentaba, analizaba y debatía el contenido y la calidad de la producción literaria sin censura: las polémicas con Regis Débray o Bukowski, Sartre, Simone de Beauvoir, y otros autores "consagrados" se realizaban en estos términos.
Sí, creo que la sociedad civil y cultural española sigue en el paréntesis que la dictadura impuso.

Pues yo no estoy de acuerdo ni siquiera con García Muñoz (y mucho menos con G. Viñó), porque no creo que esos ejemplos sean en realidad ejemplos de incorrecciones(en general, repito), y porque creo que su forma de juzgar la calidad literaria es ridículamente precisa, como si contase los adjetivos y los dividiese por el número de verbos y extrajese alguna conclusión. Yo había leído su crítica antes de que surgiese esto (creo que en la página/blog de Marías), y me pareció, como dije ayer, sencillamente ridícula, risible.

La lista, vale, está bien, supongo. Efectivamente, no han puesto a Corín Tellado (aunque Cabrera la defendía) ni a escritores facilones. Y, de los autores que conozco (no todos ni mucho menos), no han optado por su libro más famoso y punto.

Pero:
1) ¿Por qué ningún autor repite?, ¿era condición de la lista o ninguno tiene dos títulos entre las dos mejores (muy extraño, ¿no?)?

2) No estoy de acuerdo ni de coña con que no aparezca nada de Borges ni de Cela, por ejemplo (los primeros que se me han ocurrido, por obvios para mí).

3) La crítica de Javier Marías (y que conste que no es de mis escritores preferidos ni con mucho)

Señor avergonzado ajeno: he incluido a Borges, aun sabiendo que escribió cuentos, por haber visto "Pedro Páramo"; sé que éste es más largo, pero aun así lo considero cuento y no novela (creo que como todo el mundo).

Por otra parte, no entiendo por qué tanto usted como (de nuevo) el redactor-jefe de alimaña news destilan tanto odio, desprecio, rabia o qué sé yo, hacia mí, sólo porque no estén de acuerdo con lo que digo (si me conociesen de algo más, lo podría comprender, pero creo que no es el caso). Aun suponiendo que de nuevo crean que metí la pata con lo de Borges (si lo hice, lo sigo haciendo, pues ya he explicado cuál fue y es mi razonamiento), no entiendo que eso los encienda así, y vean en ello la excusa perfecta, ambos, para atacar. Sobre todo el tal redactor-jefe, que, a juzgar por cosas que le he "leído decir", se supone que es una persona tan buena, tan preocupada por el mal en el mundo, por los demás, etc.; no creo que aquí haya dado mucho ejemplo de buena intención y actitud positiva.

Autor: Lector de Juan Rulfo a Portorosa

"El Pedro Páramo de Juan Rulfo", de Alí Chumacero (México): esta crítica apareció al ser publicado Pedro Páramo. Chumacero era el gerente editorial del Fondo de Cultura Económica (responsable de la publicación del libro). Su texto expresa un negativismo condescendiente ante la novela de Rulfo, afirmando que "…se advierte, entonces, una desordenada composición que no ayuda a hacer de la

novela una unidad (…) Sin núcleo, sin un pasaje central en que concurran los demás, su lectura nos deja a la postre una serie de escenas hiladas solamente por el valor aislado de cada una. Más no olvidemos, en cambio, que se trata de la primera novela de nuestro joven escritor. " Cuando Rulfo le reclama, él responde que no se preocupe; que, al fin de cuentas, el libro no se venderá mucho."
Ni siquiera aquel maldito botarate de editor dejó de reconocer que Pedro Páramo era una novela, por Dios.

pues yo le agradezco al crítico la labor, como lectora me sentia en cierto modo limitada, frustrada, por ser incapaz de rematar siquiera, salvo alguna excepción, sus artículos en el suplemento del país. Me aburrían antes de llegar al segundo párrafo.
De todos modos, tenia curiosidad por leer alguno de sus libros, movida precisamente por ese halo de escritor actual consagrado. Y lo habría hecho antes o después.

Ahora, digo más bien antes en oposición al después, pues el después sería si no contase con que, movida por esa curiosidad conspicua que mueve al género femenino, y que se manifiesta en cualquier actitud, ya sea de espera incauta del novio que no acude a la cita o de la amiga que se ha ido de rebajas al corte inglés a la hora en que a los niños los envían a la escuela y sus madres se quedan libres para emplear esas necesarias horas en dedicárselas a ellas mismas y por tanto se queda horas esperando (desesperando) a que llegue quien no va a llegar, ni acuda quien no va a acudir,
digo, que he empezado a leer Corazón tan blanco, y de las primeras cuarenta páginas solo he leído escritura acumulativa, que no sé si se dice así en crítica literaria, pero es lo que a mi me sugiere. Mucho relleno.Y a veces suena como si estuviese leyendo una obra mal traducida.

No creo haberme quitado la razón. A no ser que explicar qué pensé, y aceptar que otros consideren mi razonamiento equivocado sea quitarme la razón (veo que en lo del tono ofensivo no quiere entrar el aludido).

Ahora bien, acabo de repasar las dos ediciones que tengo y le doy la razón al lector: en ambas se habla de novela, en contra de lo que yo había dicho (seguramente pensando en los cuentos de "El llano en llamas", lo cual no pretende ser una excusa).
Así, está claro que Borges no tiene cabida. Envaino por completo.

Pero bueno, creo que ese error, en mi opinión bastante irrelevante una vez explicado, no merece la excomunión de los temas literarios. Por tanto, mantengo mi opinión sobre la cuestión inicial y el artículo que la originó.

...La cuestión, Gatopardo, es si realmente alguien puede con total rigor "exponer detalladamente por qué el lector no va a encontrar el producto literario que la publicidad engañosa aconseja" y en base a qué criterio se atiene para afirmarlo. Si esto se hiciera con algún electrodoméstico seguramente nos engañarían, porque se trata de vender y rentabilizarlo en dinero. Confío en que la literatura no lleve el mismo destino que estos utensilios domésticos. La dictadura no existe -a no ser que andemos cerca de cumplir el centenario-, ni tiene parte en este asunto cultural donde debe de sobrar suficiente margen de inteligencia para dejar despotismos pasados atrás, sean políticos o intelectuales.
Se trata de un tema cultural, Gatopardo, es decir, de educación: es mucho el camino por recorrer para que criticar halle el equilibrio entre el respeto y el aporte serio de ideas. Porque en Literatura es cuestión de matices, pero de muy delicados matices, amiga.

Por partes: ¿en base a qué criterio se atiene García Viñó para afirmar que Marías no es un escritor? Léase crítica de García Viñó, donde expone ejemplos palmarios de la inepcia de Marías con la lengua española. Confías en que la literatura no lleve el mismo camino que los electro-domésticos y no nos engañen porque en este asunto cultural "debe de sobrar suficiente margen de inteligencia para dejar despotismos pasados atrás..." Nunca he discutido las creencias de nadie y no voy a empezar contigo, Tamargo. Pero si quieres plantear una discusión en el campo de las ideas, no tendré inconveniente.
A mí me consta que la ferrea dictadura de las grandes empresas editoriales ha creado un tipo de literatura-mercancía que el lector medio, que no sabe leer con criterio, trata de leer o sobrellevar, para, a continuación, sumarse a los que dicen que es genial en las cenas de matrimonios.
Recuerdo con congoja el caso de "El nombre de la rosa" de Umberto Eco, una novela donde las claves del argumento están en las citas en latín de los escritos teológicos heréticos y los de sus detractores y perseguidores, sin entender las cuales la novela de Eco queda lastimosamente mutilada de sentido. Se vendieron millones de ejemplares, y me fue recomendada calurosamente por todos: a mi ingenua pregunta ¿pero es que tú sabes latín? Todos me decían ufanos que, naturalmente que las frases en latín se las habían saltado, pero que la novela era buenísima.

Nadie me demostró la honestidad suficiente que le hiciera confesar que le faltaba base para apreciar la obra de un semiótico que utilizaba textos en latín. No eran conscientes. Tamargo: la premisa primera de la inteligencia que tú presupones a todos, es la lúcida comprensión de nuestras limitaciones: ese desparpajo con el que aquí se opina sin leer, se ataca sin saber el qué, se defiende argumentando al buen tuntún, y se pontifica sobre la crítica y la escritura, es como para echarse a llorar de vergüenza ajena. Y la incapacidad de ponderar, valorar y reflexionar sobre lo que efectivamente se está diciendo, porque ni os molestais en leerlo y comprender su contenido, es como para carcajearse del nivelazo intelectual de los adversarios de García Viñó. Tenríamos que buscar "el equilibrio entre el respeto y el aporte serio de ideas"-dices- pero el respeto no se regala ni se obtiene en un supermercado: se gana a pulso, con honestidad y rigor intelectual, que no demuestra quien picotea a tontas y a locas sin argumentos, y del rigor intelectal, creo que en estos mísmos comentarios se ha dado una muestra de que hay una carencia absluta.

Portorosa: no es serio objetar que la lista es sospechosa porque no cita a un novelista de los más obvios para ti, Borges, y luego en vez de reconocer con hombría que te has marcado un farol, trates de explicarlo diciendo que “Pedro Páramo” para ti es un cuento “como para todo el mundo” y a continuación sin despeinarte digas que no tiene importancia porque quizás lo confundías con “El llano en llamas” y no seas consciente de lo que eso signfica para quien ha dedicado la mayor parte de sus 77 años a estudiar, investigar, comprender, y ser un erudito lingüista reconocido internacionalmente; pero, ay, se confunde ser "famoso" con ser "popular", y como no sale en los magazines en couché del domingo...
La ira que muestra Alimaña cuando responde es la que sentiría yo si hubiera dedicado la mayor

parte de mi vida al estudio riguroso, y me viniera con insolencias de objetor quien no es capaz de molestarse en basar sus afirmaciones mirando en el Google.
Afortunadamente yo soy una cantamañanas y no me afecta tu inconsistencia, sólo la compruebo y me pego la carcajada. Me divierte porque a mí me gusta la picaresca española, el quiero y no puedo, pero me empeño, los timadores, los que tratan de demostrar que son de buena cuna porque hablan de vinos, y los que en las discusiones literarias tratan de dar el pego de que saben. Gatopardo: no he reconocido el farol, porque no lo hubo (¿pero en serio tú te crees que yo necesito venir aquí a discutir, y que si discuto quiero ganar, y que si necesito mentir para quedar bien lo voy a hacer?; yo no tengo 64 años, pero tampoco soy tan niño). Será penoso, pero sinceramente tenía la idea de que \"Pedro Páramo\" (que he leído, bla, bla, bla, y que no confundí con \"El llano en llamas\", sino que esta colección de cuentos me hizo caer en ese error, que es distinto) se consideraba también un cuento; comprobarlo habría sido muy fácil, sin usar Google. Metí la pata,sí, pero esa fue la verdadera razón de pensar que Borges podía haberse incluído.
Por otra parte, en más de una lista de ese estilo (creo -insisto, creo- que en una que hace años publicó Babelia o ABC cultural) aparecía, considerado a efectos de la clasificación como una novela (pues de novelas se trataba), \"El Aleph\" o \"Ficciones\", no recuerdo cuál. Esto, que es comprobable y no pretende ser una disculpa, sí pretende explicar que, aun sabiendo que Borges no era novelista (¿o es que, de nuevo, piensas que no lo sabía pero tampoco lo reconozco?), no me parece nada del otro mundo que yo haya hablado de él. Y la reacción, Gatopardo, por muchos años de estudio que yo haya ofendido, me parece exagerada, casi infantil, propia del que, como no le gusta de qué va el otro, está esperando cualquier fisura para atacar e intentar desacreditarlo. Como en una discusión de instituto: a ver quién gana. Pero me parece todo fuera de lugar, en serio.

Resumo, por si alguien quiere volver a atacar sin leer todo: ya sé que me equivoqué en lo de Rulfo, Y sé que me equivoqué en lo de Borges, pero creo que, una vez explicado el porqué, no es para tanto.
Y, por otra parte y sobre todo, Gatopardo, aun no estando de acuerdo con lo que acabo de decir, yo soy el que no encuentra serias ese tipo de reacciones, desproporcionadas y como al quite, a ver a quién dejo callado con un buen corte.

Y, por último, si piensas que yo, en una discusión con desconocidos por internet en la que participo porque me apetece, voy a mentir, a "hacer trampas", para quedar bien, para parecer listo, o por cabezonería, estás completamente equivocada. Yo me meto aquí, siempre, con buena intención y con la pretensión de encontrar cosas que valgan la pena; no para discutir (que ya tengo bastante con las discusiones en persona), no para superar traumas ni complejos, no para autoafirmarme ni para buscar pelea, ni mucho menos para dar el pego de que sé. A eso me refería, Portorosa, no tenéis la honestidad intelectual suficiente como para leeros a quien vais a desautorizar y atacar. Es grave desde el punto de vista ético y desde el punto de vista intelectual. Me gustaría que lo reflexionaras. Y no, no me perdonas la apuesta, es que no la has aceptado, porque si no, me deberías un bolígrafo Bic.

Gatopardo, a lo mejor has sido tú la que no se ha leído los artículos de Viñó completos.

Fecha: 30/10/2005 20:33.

Autor: Javier Marías

En la página 362 de Malena es un nombre de tango, nos encontramos con un respetable trasero y sus circunstancias, que Almudena Grandes describe así: "Aprecié la calidad de su carne, su espalda inmensa, lisa, un trapecio perfecto, y las huellas circulares de los riñones como dos hoyos casi colmados, sobre un culo perfecto, el mejor, el más hermoso de todos los culos que he visto nunca, redondo y rotundo y carnoso y plano y duro y firme y elástico y claro y suave y amasable y mordible y engullible y deglutible como ningún otro culo haya existido jamás".

El carnoso trasero de tan apetitosas características es sujeto caro a la autora, que ya lo había tocado en la página 9 de Las edades de Lulú, donde se enfrentaba a un hombre desnudo y en la poco airosa postura que señala: "Un hombre, un hombre grande y musculoso, un hombre hermoso, hincado a cuatro patas sobre una mesa, el culo erguido, los muslos separados, esperando. / La carne perfecta, reluciente, parecía hundirse satisfecha en sí misma sin trauma alguno, sujeto y objeto de un placer completo, autónomo, tan distinto del que sugieren esos anos mezquinos, fruncidos, permanentemente contraídos en una mueca dolorosa e irreparable".

M. García Viñó, "Los escritores más vendidos y el retraso mental".

Fecha: 30/10/2005 20:34.

Autor: Javier Marías

Dejando al margen la estupidez de las descripciones, asombra pensar en la cantidad de culos que ha tenido que contemplar esta mujer para permitirse sentencias tan rotundas y tan prolijas descripciones. Como se ve, Almudena Grandes es, además de un óptima escritora, una experta en culos, que, como ha dicho el teniente coronel Tejero, es lo más grande que se puede ser en este mundo, después de ser español. Es también culiadicta y fetichista de culos. No quisiera tener yo mi nalgar en las proximidades de su dentadura, en el momento en que a Almudena le diese el volunto de engullir glúteos y deglutirlos. No cabe duda de que, para captar las muecas de un ano y saber si es mezquino o generoso, no solamente hay que ser muy observadora, hay que haber observado atentamente muchos culos. Ante semejantes portentosas cualidades, no sabe uno qué parte descubrirse, ni si exclamar chapeau! o caleçon!"

M. García Viñó, "Los escritores más vendidos y el retraso mental".

Independientemente de que los fragmentos criticados sea o no del gusto del lector, esta crítica no sólo es pueril y poco rigurosa, sino que además desacredita todo el trabajo de documentación y análisis (por muy duro que haya sido).

Y esto me lleva a dos posibles conclusiones: o tú estás de acuerdo con este tipo de crítica impresionista más propia del siglo XIX que otra cosa, o tampoco te has tomado la molestia de leerte los artículos de Viñó, porque para defender algo así hay que ser tonto.

Por favor, señores, o hacemos crítica en serio o nos callamos. Los juegos los dejamos para el recreo.

Gatopardo, si lees de nuevo mi último comentario verás que he dicho que no me había leído todos los ejemplos uno por uno (debe de haber cientos), no que me los hubiese saltado. Y explico por qué (explicación obvia, a mi entender, pero bueno...).

Como por otra parte estoy empezando a cansarme de que de un modo a otro me acuses de deshonesto, y como considero ridículo (de nuevo esta palabra) que no sólo juzgues así mi comportamiento sino que incluso lo consideres grave éticamente, no sólo te repito que te perdono la apuesta (que gané, en mi opinión), sino que te digo que hasta aquí hemos llegado.

Ya te expliqué para qué entro yo en un blog, y qué no busco.

Casi estoy por creer que eres Javier Marías por la discordancia que metes nada más empezar en la primera frase.
Creo que el artículo que estamos comentando es el de "Javier Marías, una estafa editorial", que suscribo enteramente. Respecto al artículo "Los escritores más vendidos y el retraso mental", de donde extraes el comentario sobre anos y culos, creo que ahí García Viñó demostró no ser sensible al fetichismo de las nalgas cuando se le une una prosa poco memorable.
Sí, soy partidaria de la crítica del siglo XIX y la añoro, porque la del siglo XXI es una impostura, que lobotomiza a los lectores.

discordancia
(Del lat. discordans, -antis, part. act. de discordāre, discordar).
1. f. Contrariedad, diversidad, disconformidad.
2. f. En música, falta de armonía.

Creo que es evidente que empiezo con una discordancia nada más empezar la primera frase. Por lo demás nada hay agramatical, si es a eso a lo que te refieres.

Si menciono este artículo de Viñó es porque este es el método que el gran crítico que defiendes sigue (y te aseguro que me he leído unos cuantos artículos suyos y de sus discípulos-monstruitos). Ahora bien, se me hace más pesado leer un artículo de Viñó que cinco libros de Javier Marías.

En una cosa estoy de acuerdo con él: en la actualidad estamos viviendo una crisis en cuanto a calidad literaria. Sin embargo, la calidad de la crítica literaria normalmente suele ir pareja a la creación.

Viñó ha demostrado que estos escritores son unos incompetentes, pero él no se queda atrás. Por favor, que estas son las críticas que hago yo con mis amiguetes en el bar tomándome una caña. Repito: seamos serios.

El siglo XX ha sido el momento de mayor esplendor para la crítica literaria. Te recomiendo encarecidamente que leas a Dámaso Alonso o a Eliot para que aprendas de verdad lo que es un crítico y que te olvides de estas bromas, cuyo objetivo es llamar la atención y convierten la literatura en un programa de Salsa Rosa.

En primer lugar: creo que no he dicho en ningún momento que yo sea un gran crítico. Pero desde luego hay que estar ciego para no ver las deficiencias del sucio método Viñó.

En segundo lugar: el blog que utilizo realmente no te lo voy a dar, porque me he dado cuenta por tus comentarios de que eres de la escuela de Viñó, y encuentres lo que encuentres, me vas a saltar rápidamente al cuello con un escrupuloso y microscópico análisis gramatical, independientemente de que encuentres o no crítica seria. ¿Y quién sabe? A lo mejor hasta te ensañas con mi culo.

Y es curioso que siempre pidáis que leamos negándo nuestro propio criterio y nuestra capacidad crítica como lectores, quienes pretendéis que vale la pena que perdamos nuestro tiempo y nuestro dinero leyendo lo que se produce. Me pregunto cómo han llegado la industria editorial y los escritores a coincidir en el deseo de que haya más lectores y no con mayor capacidad de discernimiento, y me da escalofríos la respuesta.

Esto lo escribí en la página de un Diario donde aparece uno de los artículos de García Viñó sobre Marías. Y miren que encontré varios, algunos de ellos francamente "refriteados":

El texto de García Viñó rezuma hiel y animadversión personal. Y por cierto, también contiene errores -una acentuación indebida y la repetición de una palabra-, de esos que tanto le critican a Marías.

No entraré en mayores discusiones; simplemente me pregunto: ¿Por qué entonces nos gusta tanto a los lectores? Desde la lógica de quienes denostan a Marías, seguramente todos quienes lo leemos y lo disfrutamos somos una punta de imbéciles e ignorantes.

Con mi lógica, los que leen a Marías pertenecen a la misma ilegítima mayoría que nos han impuesto al resto de la humanidad (mexicanos y gachupines), como presidentes electos, los criminales Echeverría Álvarez, Salinas de Gortari, etc.

La falta de criterio y de rigor entre señoras ociosas y bachilleras y zangalotinos clasemedieros parece ser más común de lo que me apetecería admitir.

Me parece que Trapiello decía haber encontrado cien errores gramaticales en "El Quijote". ¿Tenemos que concluir entonces que es una mala novela?

No he leído a Marías ni lo pienso hacer, porque apenas dispongo de tiempo para la lectura; por eso prefiero leer otros libros de diversa índole que al menos gozan del aprobado general que dan los años. Aunque, bueno, uno ya duda de todo.

Por cierto, el tal Viñó ha muerto hace poco. Recuerdo que alguien lo acusó de participar en blogs y foros con seudónimos diversos; al parecer, en todos ellos su tono era como el de algunos comentaristas de esta entrada: tendía al insulto y a los comentarios groseros. Yo leí su texto sobre Marías, y la verdad es que muchos de los supuestos errores que encontró me parecieron tremendos. Pero, en fin, yo no soy experto en estos asuntos.

Un saludo.

Más allá de la envidia, el punto al cual se dirige la crítica acompasada, es descubrir la cultura del mercantilismo. ¿O se necesita decir que la publicidad es incompatible con el arte, en este caso la novela? Si así fuera, se deberá aceptar que los lectores leen lo que algunos críticos -pagos- les dicen lo que será bueno para ellos, pues en un tiempo no muy lejano reemplazarán al mismo Cervantes. ¡El mercantilismo lo dirá!

Pues,francamente,no hay que usar lupa alguna. Los errores y el estilo locuelo y absurdo se ve instantáneamente. No es envidia, es ser realista. A un escritor no encumbrado y sin contactos jamás le hubieran publicado cosa tan mala. Además, el único justificante para valorar estas obras es el valor argumental de las mismas, y nunca he encontrado que el autor cuente cosas tan profundas o novedosas como para soportar su pésimo estilo.

I don't agree, je ne suis pas d'accord, non estou dacordo, discrepo.

Con respecto al contenido, ya sabes que creo que en este tema, POR MUCHO QUE DUELA, no llega con la voluntad; no llega, porque no llega; debería, pero no llega. Y más vale renunciar algo a planteamientos maximalistas, creo yo. Por eso creo que J. Marías describe aceptablemente (en cuanto a idea) el dilema actual: la salvajada, la muerte, el abandono y la violación de los derechos humanos, por un lado; y la imposibilidad de coger todas las fronteras esta noche y sacarlas sin más.

Con respecto al estilo, aquí no me "andaré con miramientos" (que sí, por lo que te dije ayer: lo cortés no quita lo valiente): la referida vivisección del tal Manuel García Viñó a cómo escribe Marías me parece absolutamente ridícula, ridícula, y creo que no acierta en nada.

MI GORDA BELLA

.

Liza *Donut* Farelli era mucho más que una mujer hermosa. Era una mujer hermosa y con sobrepeso. Soy de esas personas que piensan que eso no es un problema. Si eres bonita y encima grande, ¿qué hay de malo en eso?
Conocí a *Donut* en el instituto. Era la mejor de la clase, sin ninguna duda. El apelativo *Donut* se lo puso ella misma. En mi clase estaban, por un lado, los *chicos Lacoste*, rubios, hermosos, deportistas y bien educados, y luego el resto, los que hacíamos lo que podíamos. En cuanto a las chicas, estaba la *pandilla biomanán*, cuerpazos, un poco insoportables, y el resto de las chicas. Liza no se resignaba a ser “el resto” y fundó la orden de los *zampadonuts*, orden unipersonal y triglicérida, y empezó a firmar en todas partes como *Donut* Farelli.
Desde el primer día me fijé en esa chica gordita y guapísima, que iba a su bola, no seguía a nadie y tenía siempre una luminosa sonrisa para todo el que se acercaba a hablar con ella. Era colombiana. Cuando yo iba al instituto una mujer colombiana no era una inmigrante, sino una mujer exótica. Lo primero que me encantó de ella fue esa forma de hablar. Como les pasa a muchos sudamericanos, su español es mucho más elegante que el nuestro, más culto, más elevado y más eufónico.
Nos hicimos muy amigos. Íntimos. Me llamaba *bocadito de nata*. Decía que no era del todo soso para ser tan blanquito. Me enseñó a besar. Y a desmayarme y a reanimar a un desmayado: cuando me propinó mi primer beso de tornillo, perdí el conocimiento. Ella jura que lo recuperé enseguida. Por lo que a mí respecta, aún ando buscándolo. Y eso que no era un beso de amor, sólo me explicaba cómo debe un chico besar a una chica. Perdí el conocimiento porque yo estaba enamorado de ella hasta los huesos. Ella era perfecta, salvo por un detalle: estaba loca por Rubén *Cementoenelpelo* Casposillo, sí, un *chico lacoste*.
Pasábamos muchas horas juntos. Iba a su casa y me contaba cosas divertidísimas de su país, y la acompañaba en esas tardes de llanto por el cretino de Rubén. Yo le prestaba mi hombro e intentaba meterle mano con disimulo mientras ella lloraba de desamor.
Entonces yo no era como hoy, era esbelto y más de una cabeza se volvía a mi paso. Pero no salí con nadie, porque estaba loco por *Donut*. La universidad nos separó. Ella estudió Bellas Artes y yo, pues eso, periodismo. En su facultad había un montón de gente interesante y bohemia, gente flipante y gente flipada. Mira que había gente admirable en esa facultad, pero *Donut* tenía debilidad por los gilipollas. Y un ojo especial para detectarlos en un mar de gente decente. Salió con todos los idiotas de Bellas Artes. Y había un montón, podéis creerme.
Mi primera vez fue con *Donut*. Estaba borracha como una cuba. Me dijo:
- *¡Qué mona es… tan chiquitita…*

-        ...
-   ....¡ *Pero es bonita… de veras!*
- *Anda, calla, no lo arregles, Donut*
Pero es que, entre sus muslos, dios, sus muslos... os lo juro, hasta el gran Rocco hubiera parecido un bebé. Cuando estábamos en pleno tema, *Donut*, que nunca perdía el sentido del humor, evitó mi primer gatillazo diciendo:
- *¡Hmm…! qué bien, al fin lo he logrado: ¡Soy un donut relleno…!*
Donut me presentó a un hispanista alemán que conoció en una fiesta. Desde el primer momento, yo vi que era un idiota integral, que no le llegaba a *Donut* ni al primer michelín, y que no la trataba bien. Desde ese mismo instante supe, asimismo, que *Donut* se enamoraría de él.
Cuando decidió casarse con semejante cretinoide, me pidió ayuda para preparar el tema, la fiesta, el vestido… como si fuese su amiguita. Le dije que ni lo soñara, que era muy libre de pagarse un billete al infierno, pero que no contara conmigo. Estaba muy enfadado con ella. No quise saber nada de esa celebración y ella lo comprendió pero, justo la noche antes de casarse, la pasó conmigo.
Hicimos el amor de una forma casi desesperada, pero sin arrancarnos la ropa, que yo siempre la dejo doblada en una silla. Pero, *mentalmente*, estábamos desesperados. Acabamos sudorosos, y Donut me dijo:
- *Pero Nata, mi amor, tú estás enamorado de mí…*
- …
- *¿Desde cuándo…?*
- …- *¿Por qué no me lo dijiste nunca?*
-        ¡…!
Yo estaba al borde de la congestión.
- *¿Por qué no me dices nada, mi amor?*
- *¡Bfff…!*
- *¿Es tan grande el amor que no te deja hablar?*
- *¡Messtasaplasstandoloscojonesss!*…
Porque, recordemos, ella era hermosa, pero obesa. Y después de cabalgarme, una vez terminado el *riding*, era una especie de peso muerto sobre mis... caderas.
Lars se llamaba el alemanote. Jamás volví a verle desde el día que me lo presentó *Donut*. Después de casados, *Donut* y yo apenas nos vimos un par de veces. La primera, nos reímos al principio, y acabamos llorando. *Donut* no era feliz. La segunda vez, *Donut* me dijo que no volviéramos a vernos, que a Lars no le gustaba. Yo le dije que no pensaba acostarme con él, ni dejarle que me enseñara a besar… pero *Donut* ya no se reía.
Pasado mañana será la tercera vez que vea a *Donut* desde que se casó. Será en la sala de visitas de la cárcel de mujeres de Palo Alto.
Donut es muy orgullosa, por eso no quiso reconocer que se había casado con un cerdo que la maltrataba. Le cortó las manos y los testículos. Se sentó en una silla mientras le veía morir y luego llamó a la policía. No dijo nunca que la maltrataba. Se limitó a decirle al juez:
- *Lo hice porque lo merecía.*
En las noticias dijeron que una inmigrante había sido detenida por violencia doméstica.
El mundo está loco.

Gatopardo es extremadamente amable al dejarme asomar el güito en esta fiesta de tan buen tono; normalmente no me invitan por subnormal.
Ella misma dice que "por misteriosas razones" releía el relato. Lo mismo me pasa a mí. Por misteriosas razones lo escribí, normalmente soy bastante más pedestre. Es un poco embarazoso comparecer en plan estrella invitada, precisamente, cuando se ha oído la primera voz crítica que, sinceramente, agradezco: puede que la frase final no sea lo que se dice un final redondo.
Pero es exactamente lo que pienso cada vez que oigo esa frase "inmigrante detenido por violencia doméstica" en un telediario. Es decir, ¿qué es lo relevante, la detención, el origen del detenido, o la violencia?
No es una gran frase, pero creo que, de verdad, el mundo está loco, y necesita menos palabrería hueca y más acción personal.

Un beso enorme a la sexy Gatopardo, que usa la literatura para llevarse jovencitos a la cama (con gran éxito de crítica y público, tengo entendido) y es una gran escritora y mejor persona.

Sobre bacterias se sabía muy poco o nada en el siglo XVI, pero capacidad de observación se tenía un rato. Y de agudeza y humor, andaban sobrados. La católica cultura nacional, patriarcal y machista del momento (me pregunto cuando dejará de ser ese momento), cercena la observación únicamente al campo masculino, acercándonos a los problemas prostáticos y a las venéreas... Nada de las cistitis femeninas ¡Tan molestas y dañinamente frecuentes! Simplemente, la mujer no existía más que cómo detalle ornamental o bestia de trabajo... En esto, vamos cambiando, ¡afortunadamente!

Mujer bachillera, quejosa y parlera:
1. López de Villalobos era judío y fue perseguido como tal.
2. En su "Sumario de la Medicina" también habla de los sotanillos femeninos, por si te consuela. Pero has de saber que, al hablar de próstata, ha de hacerse mención a varón, por ser el género másculino poseedor único de este órgano (ignoro si declarable o no en el régimen de gananciales)
3. Entre maullido y maullido, léete las Cartas de López de Villalobos y su autorretrato erótico y después hablas.

AL DESPERTAR

Seguramente tú tienes clara la idea que has querido expresar, pero el lector no la vislumbra. Por lo que te voy a dar el primer ejercicio. Recapacita la idea y exprésala en un papel, sin darle forma literaria, simplemente: "Yo quise decir que un dinosaurio…" Y después, aunque te parezca una tontería lo que te pido, haz una descripción minuciosa del personaje y su entorno, y luego describe a las cosas que le rodean, qué son, cuál es su relación con el mentado personaje. Todo esto es "reunir material" para el cuento, que aunque luego no lo uses todo, aunque tires muchas cosas, te va a permitir reescribirlo con un conocimiento total del ambiente donde se desarrolla el relato.
Ánimo y espero tu trabajo.
***Profesor del taller literario**.*

Cuando me desperté, después de dormir siete horas y nueve minutos, el sol primaveral iluminaba la tierra desde hacía tres horas y ocho segundos.

La primera tarea, después de hacer mis abluciones y desayunar, fue la de contarles, según las enseñanzas de mi profesor del taller de escritura, cómo es el espacio donde yazgo; un dormitorio de dimensiones reducidas, con una cama a juego con la mesilla y el armario, estilo neocolonial, que mi marido escogió porque se parecía a la alcoba matrimonial de sus padres, que en paz descansen.

He de explicarles para ser fiel a la verdad y clara en mi exposición, que mi marido es huérfano pero eso no obsta para que sus difuntos sean un punto de referencia en nuestras vidas, tan agobiantes como si sus padres, mis suegros, no estuvieran muertos, sino mal enterrados. Sepan ustedes, para que se hagan una idea del entorno, que cada vez que limpio el polvo del cuarto tropiezo con el retrato que nos hicieron a la puerta de la Iglesia y veo el gesto de profundo desagrado que impusieron en nuestra boda, en la que no se les escapó ni una lágrima ni una felicitación, sólo unos estruendosos suspiros de fuelle de herrería, acabados en estertor agónico; y también me observan sus rostros patibularios desde la foto que hay sobre el taquillón del recibidor, a juego con el espejo biselado y oscuro. Cada noche, he rezado para que desapareciera de la sala de estar el retrato al óleo, tamaño natural, de mi suegro, cuyos tonos oscuros subrayaban la palidez casi cadavérica de porte notarial y su asombroso parecido con un dinosaurio, perteneciente a un grupo extinto de reptiles, conocido tan sólo a través de restos

fósiles.

Es éste el momento de que diserte sobre el significado e importancia de estas palabras, pues el lector puede llevarse a equivoco con respecto a mi intención al utilizarlas:

Las palabras dinosaurio y fósil tienen un significado peyorativo en el lenguaje corriente; se llama dinosaurio a alguien o a alguna organización que sigue viviendo cuando ya no se le necesita; un fósil es una persona vieja, seca y aburrida. Entonces, ¿por qué tantas personas los encuentran fascinantes? Los dinosaurios responden al niño que todos llevamos dentro; amplían la imaginación y despiertan nuestro asombro. ¿Cómo es posible que fueran tan grandes? ¿Cuánto tiempo vivieron? ¿Por qué se extinguieron? Todas estas preguntas y muchas más alimentan mi fascinación por el Diplodocus y el Tyrannosaurus, y bullen en mi interior mil ideas de porqué utilicé ésta y no otra definición al hablar del retrato de mi adusto suegro, pero creo que es harto suficiente con esta breve disertación para facilitar al lector la comprensión del vocablo.

Y ahora que ya he dicho todo lo que quería decir sin palabras que falten, doy paso sin más preámbulos a lo que realmente aspiraba a contarles, y que no es otra cosa que revelarles que anoche, según costumbre, también recé para que desapareciera, se volatilizara, se fuera a la colección de la baronesa Tyssen, al vertedero municipal, me daba igual dónde, pero fuera de mi vista. Y, aunque puse especial interés en la plegaria por ver si esta vez la daba el Señor por válida, para mi desgracia, esta mañana, *al despertar, el dinosaurio aún estaba allí*.

Comparto lo de la enriquecedora experiencia, y divertidísima además. No me logro hacer una idea de lo que pretende decir Monterroso: ¿no tiene cortinas en su casa? ¿Cómo es la tapicería? ¿En qué trabaja y qué aficiones tiene? ¿Cómo se llamaban sus suegros? ¿La boda por la Iglesia se supone que es católica, protestante? Este relato deja demasiadas cosas sin explicar.

RITUALES PAGANOS

El dormita aún y ella le olfatea acariciándolo con su nariz. Es el principio de un ritual siempre nuevo.

Empieza a lamerlo hasta que extiende los dedos destensado, y recorre su lengua un camino serpenteante, sin prisa, tironeando del pelo con los dientes, y mordisqueando su carne estremecida sin seguir otra pauta que su antojo.

Él aún tiene la respiración profunda y somnolienta. Ella se esmera con su axila y su pecho y peina su pelo con la lengua, y después a contrapelo, y cuando él gime y trata de alcanzar un pezón con su boca entreabierta, ella le obliga a estar quieto con un manotazo impaciente. Y su lengua y sus dientes siguen torturándolo, hasta que gruñe, gime, se retuerce... Y ella lo sujeta firme, y da lengüetazos y mordisquea cada vez más cerca de su sexo, donde se esmera hasta dejarlo impregnado de saliva.

Él ronronea exasperado y entrecierra los ojos como si la luz lo hubiera deslumbrado. Hasta que no puede más, y puesto a cuatro patas consigue zafarse y le hace frente, busca su seno, su rosado pezón.

Ella lo aparta contundente, y empieza a lavar concienzudamente al segundo gatito de los cuatro, convertida en la diosa pagana de la higiene. Después, podrán mamar.

FÁBULA LITERARIA

En aquel país tan poco aficionado a la lectura, de pronto surgió una fiebre lectora. Ahora todos leían, incluso las folclóricas y los profesores de literatura. Pero todos leían lo mismo. La culpa la tuvo un libro llamado *El boñigo da Vinci*, de un escritor americano con peluquín, que rápidamente fue imitado por los autores autóctonos, si bien nadie reconoció su influencia en las entrevistas.
-*No, no lo he leído* -decía uno de sus más firmes plagiarios cuando se le preguntaba al respecto.
-*¿El boñigo qué?* -preguntaba extrañado el autor de *El boñigoTtiziano*.
-*No me interesa ese tipo de literatura* -contestaba indignada la autora de *La hermandad del santo felpudo* y *La Biblia en pasta*.
El caso es que, con influencias o sin ellas, poco más de la mitad de los títulos que se editaban en el país, unos 30.000, combinaron en sus títulos palabras como *clave, enigma, incógnita, código*, a las que solo faltaba añadir un nombre de lustre -Platón, Newton, Dante, Vivaldi, Espinete -para convertirlo en un best seller. Y la gente se los tragaba todos, aunque los confundía.
Salí a hacer una encuesta callejera, porque soy periodista cultural.
-¿Cuál es el último libro que ha leído?
La interpelada dudaba:
-Me encanta todo lo histórico. El enigma Mozart, no, El código Mozart, perdón, La sábana de Mozart. Joder, yo qué sé, uno de Mozart. Voy por la página 8 y es alucinante.
Y así con todos.
Entrevisté precisamente al autor de este libro -cuyo titulo exacto era *El clavo de Mozart*- que había tratado de demostrar que en realidad Mozart no fue un autor precoz. Su primera obra, sostenía con vehemencia el escritor, la había estrenado a los 52 años.
-*Pero Mozart murió a los 34* -le aclaré.
-Mentira, eso fue un bulo creado por quienes lo asesinaron.
-¿Lo asesinaron?
-Sí, los templarios.
Los argumentos venían a ser así, unas gotas de historia, unas gotas de suspense, unas gotas de escándalo, unas gotas de semen. El pobre Leonardo da Vinci fue uno de los más manoseados. No solo sus obras sino su propia vida constituyeron el centro de muchas peripecias argumentales. Laureano Asensi Rexach vendió 52 ediciones de su libro *El enigma de la última cena*. Su intención, sustentada en miles de documentos apócrifos o inventados, no era otra que demostrar que, en el famoso lienzo de Leonardo, Jesucristo era el de la izquierda, y que además hablaba en catalán.
-No hay más que verlo, se le nota en el movimiento de los labios.
En *La sábana de Mona Lisa*, Matilde Zafón se propuso buscar el posible modelo del famoso y enigmático retrato. Barajó miles de posibilidades, rastreando todas las fotos

que encontró del Renacimiento, consultó el google, la enciclopedia wikipedia, el calendario zaragozano, y tras concienzudos análisis comparativos -pigmentación, trazo, tamaño-, llegó a la conclusión de que la famosa pintura era un sello de correos, y que la dichosa Mona Lisa no existía. Era un autorretrato de Leonardo, eso sí, afeitado.
Julio Navarro llegó más lejos en sus investigaciones. Autor de éxito, a partir de su primer libro La sombra de los templarios, donde divulgó que los templarios fueron un equipo de fútbol de segunda división, confirmó sus habilidades investigadoras en *La peluca de Dante* (título para despistar, pues el protagonista era otra vez Leonardo) En el mamotreto, de 700 páginas, desvelaba con pelos y señales, sobre todo con pelos, que Leonardo da Vinci era homosexual. Tras entregar el manuscrito, el corrector de estilo le advirtió de que eso no era un enigma, sino una verdad a voces. Navarro no se amilanó y corrigió las pruebas, poniendo negro donde decía homosexual.
-*No hay problema. Eso también lo tengo demostrado*.
Así que hubo que oscurecer las portadas ya impresas.
Las polémicas, como no podía ser menos, se sucedieron, especialmente a cuento de Newton. En *La hermandad santa del enigma de Newton*, Matilde Navarro, postuló que de manzana nada, que lo de Newton fue una zanahoria -los ejemplares del libro se acompañaron con el regalo de la auténtica zanahoria de Newton-, lo que fue contestado por Julio Asensi en *La berenjena de Newton*, donde alcanzaba cotas insospechadas de veracidad histórica. La susodicha berenjena no era más que un eufemismo para designar el miembro de Leonardo, amante de Newton, de cuyas relaciones incestuosas nació Vivaldi, templario suplente.
Así anduvieron entretenidos nuestros autores durante un par de años. Hasta que al afamado autor americano de peluquín, no el mismo, sino otro cualquiera, le dio por escribir un libro sobre un desatascador de desagües contemporáneo. Ahí se acabó todo.
Volví a sacar mi grabadora a la calle.
-*¿Cuál es el último libro que has leído?*
- *El desatascador de desagües, de Matilde Zafón Asensi. Siempre me han gustado las historias contemporáneas. Voy por la página ocho y es alucinante.*

En cierta forma me alegra ser el único que va a defenderlo :-D.
En un país en el que no se lee no está de más que la gente pueda descubrir el placer de la lectura aunque sea a través del marketing. Es cierto que nos encontraremos a no

tardar mucho gente que sólo ha leído "El Código da Vinci" (no sé si también soy el primero en poner el título entero :-D), pero eso sin duda es mejor que no haber leído nada. Y si encima alguno se aficiona a la lectura ... miel sobre hojuelas. Es como ver a Induráin y coger la bicicleta durante un tiempo o aficionarse a ella durante el resto de tu vida.

En todo caso criticaría a la gente que se sube al carro a ver si también pueden sacar tajada, pero creo que ni eso. Es absolutamente lícito y si no te gustan, con no leerlos basta.

Sólo le veo un problema a todo esto. El libro lo tendría que haber escrito yo en vez de Dan Brown y ahora mismo me estaría forrando ;-).

Un saludo, Domingo.

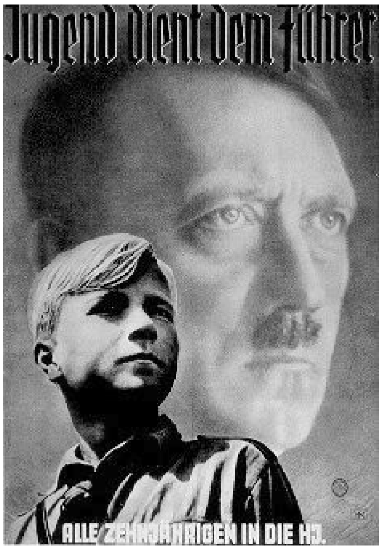
LEGALIDAD Y LEGITIMIDAD



Hubo un momento en el que los profesores progresistas consideraron acorde con la justicia otorgar un aprobado general. Alumnos que jamás se acercaron a las aulas y otros que profundizaron e investigaron con rigor se encontraron con la misma nota final de mirífica igualdad. Esta nueva pedagogia nos ofreció un respeto igualitario que no era necesario merecer, y podíamos salpicar nuestros escritos con faltas de ortografía, retorcimientos sintácticos monstruosos y desajustes lógicos, gracias al deseo de evitarnos la traumática sensación de que no todo vale, y de que no todos merecemos la misma valoración.
El exabrupto, sin más base que el momento hormonal con cierto aire carpetovetónico, se convirtió en marchamo de “sinceridad” y de “autenticidad”, y se jaleó como representante exquisito del pueblo a quien salpicara su conversación con esos hallazgos de la más pura irracionalidad. La reflexión sosegada que trata de aportar un análisis

consistente, sin hacer concesiones a lo fácil, se tomó como demostración de absurdo alejamiento aristocrático del común de los mortales, a los que hay que demostrar que se les respeta evitando las palabras que no entren en su paupérrimo vocabulario.
Los representantes electos del pueblo permiten que los ciudadanos se salten a la torera las ordenanzas municipales, y, a cambio, se aseguran la impunidad cuando ellos infringen la Ley de Administración Local. La práctica totalidad de los partidos obtiene ingresos ilegales de las empresas que concursan y desean ganar una contrata municipal sin que nadie se extrañe, porque quien más y quien menos otorga y niega favores a cambio de prebendas: el técnico del gas te firma el boletín de instalación sin revisarlo porque eres amigo o primo de su novia, el aparejador que tiene pavor a las alturas firma el acabado de la obra sin subir a revisar el tejado, el camarero te cobra una consumición simbólica porque eres el guardia de tráfico que no le pone multas, y en esta idílica arbitrariedad todos somos culpables y todos somos cómplices.
No es de extrañar que, cuando un Gobierno en España decide saltarse las Leyes y protocolos sobre detención, torturas, lucha antiterrorista o emigración, no haya una iniciativa en la sociedad civil, ni una moción de censura para deslegitimar su actuación, y que a los que exigimos el escrupuloso respeto a las Leyes aprobadas por la mayoría de nuestros representantes se nos tilde de ingenuos irresponsables o de peligrosos subversivos.
El Gobierno legal de mi país ha dejado de ser su legítimo Gobierno desde el mismo momento en que ha conculcado las Leyes. Y los ciudadanos que aceptemos, acatemos y no lo desautoricemos inequivocamente hemos perdido el derecho a ser respetados. No es la primera vez que el pueblo deja de lado su conciencia y prefiere obedecer a los que lo traicionan si están en el poder, aunque no sea demasiado popular recordarlo.
El respeto y el prestigio moral se ganan; no todos lo merecemos.

PS. El Gobierno no solo deportó a Marruecos a los 73 inmigrantes de Melilla sin permiso judicial, saltándose los trámites administrativos y sin comunicárselo a sus abogados. Lo hizo, además, invocando un reglamento de extranjería derogado hace más de nueve meses. Pero hay más irregularidades: los documentos oficiales desvelan que el Ejecutivo utilizó en sus resoluciones de devolución un artículo que el Tribunal Supremo declaró ilegal hace ya dos años y medio. La sentencia del alto tribunal prohibía las devoluciones automáticas de extranjeros que ya se encuentran en el territorio nacional, el mismo procedimiento utilizado por el Ministerio del Interior para repatriar a los "sin papeles". El pasado 6 de octubre el subdelegado del Gobierno en la ciudad autónoma, José Fernández Chacón, sin tener la autorización previa de la juez que había ordenando un día antes el ingreso de los inmigrantes en Fuerteventura, firmó de su puño y letra las 73 devoluciones de los subsaharianos que ese mismo día terminarían recluidos en un centro militar de Tánger.
Esos documentos, con todos los sellos oficiales y del registro de entrada y salida, fueron remitidos de inmediato a la Comisaría Provincial de Melilla, horas después de que los Gobiernos de Madrid y Rabat llegaran a un acuerdo, donde afirman que medió el Rey hablando personalmente con Mohamed VI, con lo que, de ser cierto, se saltó los límites de la función que la Constitución le asigna.

En una ocasión alguien que fue licenciada el año del aprobado general me explicó que eso significó estar excluida de muchas de las ofertas de trabajo de su profesión, y no poder llegar a ejercerla.
Parece ser que los legisladores legislan para los demás (como los curas, haz lo que yo digo, no lo que hago). Pero además existe como un acuerdo tácito y cómplice de la mayoría de ¿ciudadanos?: ellos lo hacen porque pueden, como si yo pudiese lo haría, pues me callo. Tanto monta, monta tanto...

¿Será por eso que cada vez somos más irrespetuosos?

Gatopardo, probablemente no me sé explicar con tanta claridad como tú, pero voy a intentarlo.

Yo nunca justifico ni justificaré esos hechos, y me parecen absolutamente reprobables. Ójala no se repitan jamás. El problema estriba en que:

a) Primero hay que depurar responsabilidades y saber hasta dónde llegan antes de dar un paso en falso. No estaría mal la creación de una comisión de investigación, aunque a la vista de cómo funcionó la del 11-M, no es como para confiar demasiado.
b) A mí no me vale con denunciar. Hay que dar soluciones.

Supongo que decir que todos los gobiernos sin excepción desde la reinstauración de la democracia en nuestro país han conculcado las leyes de forma más o menos flagrante y todos se han ido de rositas no sirve de nada. O que afirmar que el simple hecho de ser miembros de esta sociedad de consumo y comprar determinados productos o en determinados lugares nos convierte en cómplices de bastantes de las tropelías que suceden en el mundo tampoco. Todos tenemos nuestras luces y nuestras sombras y nuestro granito de responsabilidad moral en los verdaderos problemas del mundo, o al menos eso creo yo.

Y es que, vista la magnitud del problema, ¿por dónde empezamos? ¿por abolir el sistema económico mundial? ¿por romper con el sistema de partidos? ¿hacer desaparecer las fronteras?

Sinceramente no creo que la comparación entre Hitler y Zapatero sea demasiado adecuada, y no es porque les haya votado en las últimas elecciones, cosa que es cierta, aunque no milito ni siento especial simpatía por el PSOE, sino porque creo que hay un abismo sideral entre uno y otro.

Disculpa el desorden de ideas, pero pasar sueño es lo que tiene... ;) Ah, y gracias por hacerme pensar, que últimamente paso demasiado tiempo en las nubes.

Philomeno: argumentar con quien arroja dudas y preguntas al buen tuntún, mezclando churras con merinas, me parece que requiere un tipo de lógica que yo no tengo.
Si estás de acuerdo con que el Gobierno suspenda las Leyes vigentes aplicables a los inmigrantes ilegales que traspasan su frontera, dilo. Si no estás de acuerdo, dílo. Porque eso es aplicar el Estado de Excepción donde quedan suspendidas las garantías jurídicas.
No estoy planteando un debate sobre si fue primero el huevo o la gallina: estoy diciendo que eso es tan grave que sólo es posible que ocurra con el silencio de la mayoría de los ciudadanos y su indiferencia porque nuestra cultura democrática es nula y nuestra moral

es de pura supervivencia pandillera y mafiosa, sin arraigo en una conducta que no sea acudir en ayuda del vencedor. Y ese es el tipo de sociedad que permitió a Hitler llegar al poder mediante una votación y lo dejó suspender las garantías jurídicas paulatinamente, hasta en lazissmo puro y duro. Me da igual cuando lo hace Rodríguez Zapatero y cuando lo hizo Aznar o lo haga Rajoy: no personalizo porque es intolerable venga de donde venga; es peligroso sea como sea. No quiero para Saúl ni todos los ciudadanos del futuro una sociedad que ve como algo natural la utilización arbitraria de las Leyes vigentes mientras los ciudadanos garantizan su impunidad mediante el silencio mafioso. Porque si toleremos que se suspendan las garantías jurídicas hoy no sé si no se suspenderán también para perjudicarlos a ellos, por quienes tenemos la obligación moral de velar.

Que hacer ante esta impunidad? no veo nada más que denunciar, ser crítico, no callarse, darse cuenta y ser consciente. Que los gobiernos no cumplen, especialmente los socialistas, que la final se venden al mejor postor, ya lo sabemos. La gran mayoría no quiere estas hordas de inmigrantes, les da miedo lo diferente, se averguenzan de haberles despojado de todo, o ni siquiera les da para tanto la cabeza. Un abrazo

Yo no estoy de acuerdo, lo digo y lo grito bien fuerte. No estoy de acuerdo en tratar a los inmigrantes o a cuántos precisan -cómo último recurso- dejar sujs paises de muerte poara buscar alguna alternativa de vida, cómo si fuera ganado infectado por no se sabe que virús y hubiera que deshacerse de él, ya sea en el desierto o retornándolos a sus paises de origen en los que morirán por guerras, por SIDA, por hambrunas o por cualquier otra plaga de las muchas que azotan a África; máxime, cuando la situación de esos países la hemos propiciado y la mantenemos así nosotr@s -los países industrializados con sus multinacionales, su neocolonialismo neoliberal, etc. Y digo además, que todos somos corresponsables de lo que ocurre. Así que me uno a tu manifiesto. Y cómo digo una cosa, también digo la otra: Me parece desorbitado el comparar al PSOE (aunque de las siglas, haya perdido hace tiempo la S y la O) con Hitler, o con el nazismo; sin restarle por ello ninguna de las críticas precedentes.

Un saludo cordial.

Te respondo: en ningún caso he dicho que el PSOE sea igual que Hitler; si lees

atentamente digo que la sociedad que permite que desde el Gobierno se actue ilegalmente sin protestar es la clase de sociedad que permitió al Partido Nazi llevar a cabo la suspensión de las Leyes que regían en Alemania.
Y he añadido que me da igual si la ilegalidad la cometen desde un Gobierno de derechas o de izquierdas.
Ten cuenta lo que digo y trata de no recriminarme por lo que no he dicho.

El tema de callarse y no, de dejar pasar y no, es una dialectica de principios, ajena a toda transferencia. Recuerdo una anecdota que contaba Simón Wiesenthal:fue a comer a la casa de un ex-prisionero de Mauthausen ahora convertido en joyero. Después de la cena, el anfitrión le preguntó porque no volvía a construir casas como lo hacía antes de la guerra. Simón Wiesenthal le contestó:
- Vos sos un hombre religioso. Creés en Dios y en la vida después de la muerte. Yo también creo que cuando nos vayamos al otro mundo y nos encontremos con los millones de judíos que murieron en los campos y nos pregunten ¿Qué hiciste ?, habrá varias respuestas. Vos vas a decir: Yo me convertí en joyero, algunos dirán yo contrabandeé café y cigarrillos norteamericanos, otros dirán: yo construí casas.Pero yo voy a decir : Yo no me olvidé de ustedes.-

Por cierto, me resulta muy gráfica y contundente la analogía que se hace. Un genocidio empieza con una sola persona.Supongo que en la Alemania de finales de los años treinta, si alguien hubiera adelantado lo que haría Hitler años después, no lo hubieran creido. Vamos, no lo creyeron hasta ver los campos, y algunos inclusive despues de haberlos visto. Hay bofetadas cerebrales que nos duelen, pero nos despiertan. Sólo espero que todavía estemos a tiempo.

"En una sociedad democrática, la política no es sólo *aquello que hacen los políticos*, sino el ámbito en el que todos participamos en igualdad de condiciones; es lo que tenemos en común y que a todos nos afecta por igual. Renunciar a esa dimensión -la única, por cierto, en la que aparecemos como iguales- no sólo equivale a una negligente cesión de soberanía sino que nos incapacita también para responsabilizarnos de nuestro propio futuro."

Para zanjar el tema... Por supuesto que no estoy de acuerdo en que se vulneren las leyes ni los reglamentos. Tampoco deseo que esta historia vuelva a repetirse. Siendo grave el asunto, creo que la tropelía "gorda" de verdad la ha cometido Marruecos. Por supuesto, ha de haber denuncias y éstas han de seguir su camino para depurar responsabilidades. Por lo pronto, el Subdelegado del Gobierno en Melilla debería dimitir. Y por otro lado, creo que una moción de censura y un cambio de gobierno (no nos engañemos este es un país de alternancias PP-PSOE) significaría un empeoramiento en la precaria situación de la inmigración, y un conflicto unilateral entre España y Marruecos puede tener consecuencias muy serias en el equilibrio político internacional. Con mi batiburrillo de ideas de ayer quería decir que las soluciones de verdad al problema están en otro lado, aunque te doy toda la razón en que la primera de ellas es no callarse y mirar para otro lado.

Ah, un pequeño matiz para terminar: si el Rey ha mediado refrendado por el Presidente del Gobierno o el Ministro de Exteriores no se ha extralimitado en las funciones que el título II de nuestra Constitución le asignan.

Un saludo afectuoso.

Yo pienso que tienes razón en todo, pero, tambien pienso que este tema que tratas,

manipulado de igual manera e identica forma por según que partidos politicos habría tenido más o menos repercusión en los medios y en la calle y es que aquí,Andalucia es buena prueba, se tolera a unos lo que de ningún modo se toleraría a otros. Por eso yo no quiero entrar en politica(además de porque no tengo mucha idea) por que me parece todo una gran hipocresía, ya que cada cual suele ir a su habío y a los demás que los parta un rayo.Y contra más pobre o desgraciado sea ese "demás" un rayo más grande.

Phil: Después de dar todo eso "por supuesto", me imagino de que con el aviso de que con el PP irían peor las cosas, ¿me estás diciendo que mejor no meneallo y que más vale conformarse, porque al fin y al cabo estos "son unos bastardos, pero estos son nuestros bastardos"? Lo más grave de este país, lo peor, lo más detestable no es el Gobierno, sino la gente que piensa así y lo dice tan campante, sin rubor y sin conciencia de la barbarie que supone y hace crónica.
"Artículo 61 1. El Rey, al ser proclamado ante las Cortes Generales, prestará juramento de desempeñar fielmente sus funciones, guardar y hacer guardar la Constitución y las leyes y respetar los derechos de los ciudadanos y de las Comunidades Autónomas."
Ni aunque se lo diga el Papa el Rey puede mediar para que se salten a la torera las Leyes sobre emigración que han sido aprobadas por el Parlamento, mediando con el criminal Mohamed VI, hijo del criminal que Juan Carlos I consideró como un hermano.

Trini: no es verdad que no hagas política: tu política consiste en callar, otorgar y hablar de emociones inventadas sobre la luna y el amor y las flores; pero cuando a los que están a tu lado, pongamos que a tu familia para no hacerte imaginar demasiado, les nieguen sus derechos, que te dediques a poetizar liricamente sería obsceno, y seguro que saltarías como una loba para defenderlos.
Afortunadamente hay gente que para considerar que el atropello de los derechos humanos es intolerable no necesitamos que nos toquen a nuestra camada. Es decir, que, como siempre que pongo un artículo sobre derechos humanos comentas que no te interesa la política, ya sabes lo que pienso de quien deja que los canallas no tengan oposición. Es repulsiva esa postura y os considero responsables de la impunidad con la que se cometen atrocidades. Porque no "se tolera":la gente como tú, que no protesta hasta que le toque personalmente, habéis enquistado a los corruptos en el poder y eso es complicidad pura y simple.
Que quede claro por las veces que no he dicho nada antes y por las sucesivas.

Hola GATOPARDO, gracias por tu e-mail. Cierto que en el texto no hay ninguna alusión de la que se pueda extraer una comparación por tu parte entre el PSOE y Hitler... De manera que te pido disculpas si de mi comentario se desprende eso, debí ser más explicita. Mi referencia a esa "comparación" viene dada por acompañar el texto con la fotografía de Hitler, de ahí mi comentario. Jamás pongo ideas, pensamientos, palabras en textos, bocas, cabezas, si no lo están. En este caso si hay una fotografía y un texto, y esa fue mi, tal vez poco afortunada interpretación; ya que podría haber interpretado que se está haciendo con los inmigrantes africanos lo mismo que hacía el nazismo... Pero me concederás que aún así, puesto que con los inmigrantes hoy, ahora, y en España -que es de lo que se habla en el texto- quien lo está haciendo es el partido en el gobierno y Marruecos -amén de otros-, la deducción lógica estaba justificada.

Eso es todo.

¿Mi enlace no te funcionaba? Quizá lo había puesto mal, prueba ahora.

Un cordial saludo y mis disculpas por el mal entendido.

Ya algunas palabras me las ha sacado de la boca gatopardo, en cuanto a la participación.
Es cierto, mirar para otro lado es también una forma de participar, el famoso "el que calla otorga".

En cuanto a legalidad y legitimidad, quiero decir:
las leyes se han hecho para cumplirlas, y así debe ser. Pero, aquí no es un problema sólo de legalidad, sino sobre todo de ética y de política. Pues, la ley existe para poder resolver litigios, digamos, "pacíficamente", pero ella es un producto humano,y por lo tanto no es infalible. Por ello existen los jueces. Un juez puede decidir que una ley no se aplique a un caso, cuando en realidad esa ley está perjudicando a la sociedad, cuando está llendo en contra de los principios más sagrados, si se quiere, o los derechos "naturales", si no se quiere.
Para dar un ejemplo que conozco: en Argentina se había declarado en 2001 la inmovilidad de las cuentas bancarias. Por lo cual una persona de a pie no podía retirar sus ahorros. Esto era ley. Pero si esa persona estaba muriendo y necesitaba operarse urgentemente, pues el juez recurría a un amparo.

En fin, el aparto jurídico-legal de un Estado debería buscar siempre el bien de los ciudadanos, sobre todo de aquellos más indefensos.
Lo que lleva a incumplir una norma abiertamente, quiere decir que se considera como un grave atentado contra lo más sagrado. Esto me preocupa más que ninguna otra cosa. No la ilegalidad de la acción de gobierno, ni siquiera el de haberse investido de poder judicial al poder ejecutivo (gravedad absoluta para el estado de derecho) sino, el consenso tácito de la ciudadanía, que evidentemente aprueba lo que sucede, pues ve en ello un peligro inminente.
Sigo...

El no-accionar de la sociedad está legitimando al gobierno. Esto muestra que el problema es ético, pues la "gente", por generalizar inadecuadamente, hace primar unos valores (materiales-dinerarios) sobre otros valores (vida).
Esto es estremecedor. Así comenzó la dictadura en Argentina. Así comenzó el gobierno de Hitler. Así comenzaron tantas historias de horror en el mundo.
ATENCIÓN ESPAÑA!!!! Antes que se vuelva algo normal y natural, es necesario hacer oir la voz que defiende la vida, los argumentos legales son un buen principio, pero no son todo.

Saludos!!!!!

Gata mi manera de protestar es válida, quizás no tanto como la tuya, pero no voy a darle mi voto a quien considero que no defiende las cosas en las que yo creo, llámese Zapatero, Aznar o Periquillo el d elos palotes ,que para mi manera de ver son lo mismo.Que no quiera meterme en politica no sognifica que no tenga mis ideas, cuando hablo de politica, hablo de politicos no de ideas.
Y recuerda que mi amor por las hadas y la luna, por las mariposillas y las estrellas, es reciente, quizá, harta de ver tanta falsedad me refugié en los ripios que son menos falsos. Y tambien los poetas son necesarios en tiempos de "guerra"
No quiero discutir contigo pues me ganarias por goleada y no estoy de ánimos, piensa lo que quieras estás en tu derecho.

Supongo que tod@s conoceréis el siguiente texto, pero no esto mal recordarlo:

"Primero apresaron a los comunistas, y no dije nada porque yo no era un comunista.

Luego se llevaron a los judíos, y no dije nada porque yo no era un judío.

Luego vinieron por los sindicalistas, y no dije nada porque yo no era ni obrero ni sindicalista.

Luego se llevaron a los católicos, y no dije nada porque yo era protestante.

Hoy vinieron por mí, pero ya es demasiado tarde."

ESPERO VIVIR LO SUFICIENTE

Este artículo permanecerá nueve días y nueve noches en primer lugar, actualizándolo con enlaces a las noticias y artículos que se vayan publicando.

Espero vivir lo suficiente para ver en el banquillo del Tribunal Internacional de la Haya a Rodríguez Zapatero y Mohamed VI, acusados y condenados por crímenes de lesa humanidad. Y con ellos, a todos los que acataron sus órdenes y las cumplieron.
Y espero que los ciudadanos infectados por esta lepra moral, que miraron hacia otro lado y se encogieron

de hombros, reciban el estigma de su cobardía hasta la cuarta generación.

Son muchos los que miran a otro lado, demasiados, de hecho una gran mayoría de la población le está pidiendo también a la oposición que meta guerra en lo de las fronteras, que están demasiado !abiertas!. Es un problema internacional del que se tienen que hacer responsables todos los paises ricos que han provocado estas pobrezas y hambrunas. La política se tiene que dirigir hacia este punto tan esencial, ya que se está cometiendo otro genocidio dirigido especialmente hacia las masas pobres de color. Un abrazo.

Qué solución le podemos dar al problema.
Yo solo leo como se queja la gente, como se desgarran las vestiduras, pero no hay nadie que dé una buena o mala idea para solucionarlo.
Y pienso que lo mejor sería abrir las fronteras, hacerlas desaparecer de una puñetera vez. Porqué hemos de aceptar que gente como esta muera por el camino o en las alambradas. Porqué hemos de aceptar de buena gana a los que saltan y no lo podemos hacer con los débiles que no pueden?
Aceptamos la mercancía del tercer mundo por causa de la globalización, pero no aceptamos a las personas.
Nadie quiere de vecino un inmigrante. Mal vamos.

Los jueces españoles pueden actuar contra quienes cometan crímenes de lesa humanidad, aunque se cometan en el extranjero y aunque no haya víctimas españolas.

Hace poco en el Blog de Magda leí sobre algo que Zapatero le había concedido a Rigoberta Menchú. Y que eso lo quería hacer en todos los paises que se lo pidieran y yo le dije a Magda que claro, es normal eso, ya que Zapatero no tiene nada que solucionar en su propio país ya que todo marcha sobre ruedas...
En verdad Gata en algunas cosas estoy de acuerdo con Pau, aquí mucho tirarnos de los pelos paro nadie coge el toro por los cuernos. Yo personalmente no veo fácil y buen arreglo para esto.

Gracias por el enlace, Gatopardo.
Estoy de acuerdo con parte de las cosas que aquí se dicen, pero no con todas. Estoy de acuerdo con la indignación y con la tristeza, y yo también creo que hay injusticia e hipocresía. Pero hay comentarios que me parecen un poco infantiles (no quiero ofender a nadie, es sólo una manera de hablar), muy poco realistas, y eso no es bueno, eso no vale para nada, porque son fácilmente rechazables como locuras de chavales, de ilusos. Defender la apertura de fronteras es tan útil como decir que juntemos todo el dinero del mundo y lo repartamos equitativamente entre la población. No digo que de actitudes así no surjan acciones valiosas, pero en general son planteamientos tan de grupo de jóvenes con una guitarra charlando en la playa (repito que no quiero ofender, sólo quiero dar una idea clara de la impresión que uno puede llevarse), que nadie con

capacidad de acción va a prestarles ninguna atención (menos todavía que a otras menos radicales).

No es hipocresía intentar cambiar las cosas "desde dentro", desde posiciones que parezcan más "razonables". No es hipocresía, es práctico; es lo único práctico, lo único que tiene alguna posibilidad de dar frutos. ¿Pensáis hacer la revolución? Porque si no lo pensáis, es mejor que intentéis avanzar paso a paso.

Espero que lo que he dicho no siente mal a nadie. Nada más lejos de mi intención.
Un saludo.

¿Por que será que hay tanta pobreza y violencia en el llamado tercer mundo, que hace que las gentes salten las alambradas fronterizas jugandose la vida? ¿Cómo es posible que el continente africano, con sus diamantes, sus reserbas de hidrocarburos, gas y coltan (Colombio-Tántalo) este sumido en la miseria, la enfermedad y la guerra? Pensad en eso cuando hableis por vuestro movil, mientras bebais una Coca-Cola o escucheis música en vuestro mp3. Nosotros aquí nos peleamos por la igualdad de género, allí se pelea por subsistir. Es la escalera de las clases sociales del sistema capitalista, y ahora, a comienzos del siglo XXI, cuando la globalización parece que no tiene freno, salvo en algunos puntos de resistencia de Latino-América, nosotros los europeos de clase media seguimos preguntandonos si deberíamos dejarles entrar o no. El mundo está en manos de las grandes corporaciones transnacionales y su puño aprieta cada vez mas. El BM y el FMI son responsables de más muertes que las producidas por toda la historia del terrorismo. La concentración transnacional del capital y del poder político es la causante de todos estos males. Mientras nuestro sistema se base en la propiedad privada y existan las naciones-gobierno las clases sociales seguirán existiendo;desde el pobre africano que no tiene nada hasta el oficinista europeo, todos somos esclavos en mayor o menor medida.¿Qué vamos a hacer al respecto?

Gatopardo , has planteado un asunto muy complicado que requiere una intervención internacional para acabar con esta situación que se cobra a diario la vida de gente que busca una vida mejor . La respuesta que se está dando es escalofriante :cerrar puertas (fronteras) y ya está ,cuando lo lógico sería AYUDARLES a conseguir una vida digna en su país ,¿por qué los que gobiernan no lo ven así ? ¿por qué se hacen los ciegos ? Ya digo, de todas formas, el asunto es internacional , lamentablemente todos y cada uno de nosotros no podemos hacer gran cosa .Saludos

Por eso le parece que somos una pandilla de ingenuos jovenzanos. Pero vamos a ver cómo le rellenamos esa oquedad interparietal que otrora ocuparon(?) unos sesos. Métase esto en la cabeza:
- Se está hablando de derechos humanos
-Se está acusando a quienes los violan consciente y sistemáticamente
-Se está defendiendo a trabajadores que son deportados en condiciones de tortura.
Y quien no se rebele ante esto es un hijo de puta. Punto y final

En esta parte del mundo todos tenemos suficiente información sobre lo que pasa, y una enorme capacidad de acción para intervenir. Si no se interviene por los muchos caminos que tenemos (el voto, la presión, el boicot a ciertos productos, etc.) es porque la mayoría de la gente no quiere, prefiere dedicarse a otra cosa. Zapatero y el resto de los gobernantes representa a la mayoría que les vota.

no sé si viviré para verlo, y tampoco estoy segura de que ninguno de ellos acabe en tribunal alguno. Cumplen bien su cometido de contención en las fronteras del mundo más favorecido. España ya está en el club, y a Marruecos le pagarán por sus servicios. Poco a poco van alejando más las fronteras, Argelia, Mauritania...dentro de nada los encerrarán en su territorio y acabarán pagando a sus gobernantes para que no les dejen salir. Con lo cual...represión a tope.

Pero tampoco está claro, son muchos, están desesperados y a este mundo de barrigas llenas no nos va a quedar otro remedio que buscarle solución al asunto. Por muy parche

que sea. Demasiada inestabilidad mantener a 30.000 subsaharianos rondándonos las fronteras.

Por alusiones (que ya son varias):
Ya he aclarado lo que tenía que aclarar con Gatopardo, que es con quien
me siento obligado. Lamento, pues, volver a aparecer por aquí a dar la lata (y más con este retraso, pero es que Blogia no me aceptaba el comentario, quizá con buen criterio), pero es que no quiero irme con este mal sabor de boca, que a mí me parece injusto.

A pesar de los insultos (no tengo sesos, y debo de ser un hijo de puta), y de que hay

quien ya ha declarado punto y final (lo cual dice mucho de él), no me importa decir que no entiendo por qué a algunos les ha sentado tan mal mi comentario.

¿Están hablando de DD. HH.? ¿Se está denunciando? ¿Se está acusando? Sí, sí, lo hacen, pero lo malo es que ustedes se crean que están hablando con alguien que no estaba ya convencido de antemano, que crean que están denunciando de verdad a alguien ante alguien, que crean que su acusación es oída por alguien que vaya a hacer algo. Porque eso me parecería una limitación.
Estoy de acuerdo con casi todo lo que he leído aquí, pero efectivamente hay cosas que me parecen tan utópicas que estoy convencido de que servirán para lo que siempre sirven los discursos encendidos: para aislar aún más a los que estaban ya de acuerdo, y para espantar al resto (que es a quienes hay que convencer, le recuerdo).

Estoy de acuerdo tanto con la gravedad del asunto como con la indignación que les provoca, y estoy de acuerdo con que cada uno debe hacer lo que esté en su mano para mejorar la situación.
Ahora bien, no estoy de acuerdo con ALGUNAS cosas que he leído aquí, y no
lo estoy porque me parecen irrealistas y poco prácticas. Es decir, que son ciertas, son verdades como puños, pero no valen para nada dichas y planteadas así. Y lo único que importa es que valgan para algo, no que nos vayamos a la cama contentos por lo claras que vemos las cosas y lo buena gente que somos.

Pero no se preocupen, no volveré a molestarles. Pueden ustedes (algunos) seguir arreglando el mundo como quieran, sin tener por qué oír críticas ni matizaciones.

(Y, ojo, he generalizado, pero en realidad sólo me refiero a intervenciones puntuales)

(Siento, Gatopardo, haber vuelto con el tema. Creí que ya estaba todo claro. Pero, de verdad, no volverá a ocurrir. No me volveré a dar por aludido, para no prolongar más una discusión que se adivina sin salida. Lo siento de veras).

También coincido en que se deberían hacer cosas concretas pero sucede que cada uno llega al mismo punto desde su propio camino, desde lo que puede hacer o lo que sabe. Habrá algunos que toquen puertas, otros que hablen y corran la voz para despertar a los dormidos. Por una vez se tendrá que cumplir que en la unión está la fuerza! No es que los paises ricos tienen que hacerse cargo de los inmigrantes porque ellos provocaron eso. Es peor, ellos son ricos porque les robaron a ellos su riqueza. Nuestro bienestar tiene olor a sangre de negro y de indio. Cómo se puede vivir alegremente sin que nuestra conciencia nos recuerde cada noche a ese ser humano baleado con nuestro dinero y para nuestro bienestar? Las iglesias, no tienen nada que decir? Porque la verdad, escuché poco de ellos hasta ahora. O los negros que no tienen religión, no merecen trato humano?

Por (felices) circunstancias que conoces ahora vivo con otro ritmo, pero eso no significa que viva de espaldas al mundo o que no me indigne lo sucedido.

Enhorabuena por tu post, principalmente por la actitud valiente y decidida que muestras y por la prolija información que aportas con todos esos enlaces, aunque he de decirte que no sé si estoy muy seguro de que las soluciones que se aportan sean las más adecuadas. Siendo prácticos pienso que crear un conflicto internacional de consecuencias desconocidas y una crisis de gobierno que el ala más rancia del PP no desaprovecharía no sé si serviría de mucho…

Lo primero y principal: lo sucedido es una auténtica vergüenza. Un escándalo penoso y lamentable del que sin duda han de derivarse responsabilidades. Unas graves, que deben comportar una seria reflexión y un cambio decidido en la política de inmigración de España y, por ende de la UE, y otras gravísimas y dolosas, a mi juicio, por parte del Reino de Marruecos, donde se han cometido los principales atropellos contra los derechos humanos.

Aún así estoy convencido de que las políticas de inmigración siempre serán parches mal puestos que no solucionan un problema global más grave de injusticia: la pobreza. Nadie abandona su tierra en esas condiciones si no tiene nada que perder, si no es la única esperanza para la supervivencia de su familia al completo. La solución pasa por una política global de desarrollo, de competencia leal, de freno a los abusos de las multinacionales, de educación, de descabalgamiento de las mafias locales y de los dictadorzuelos que masacran a estos pueblos.

Un abrazo y mi solidaridad

Para ser breve y no reiterarme: las Leyes, gusten o no, están para cumplirlas; y el Gobierno de mi país no puede saltárselas respecto a la emigración y al asilo cuando se aturulle o se sienta desbordado, suspendiendo las garantías jurídicas.

Y si señalarlo le da fuerzas a la oposición o callarlo deslegitima a los ciudadanos que lo votaron, no es cosa mía. El Gobierno ha de ser el garante de las leyes y su cumplimiento. Ha aplicado de facto el Estado de Excepción sin consultarlo y aprobarlo donde es preceptivo. Que los ciudadanos no se den cuenta de lo grave que es esto dice mucho de la imbecilidad moral de los ciudadanos y de su falta de cultura democrática. Dejémonos de pamemas.

Si es posible
no me regales un caudal de emoción,
tu fe y tus convicciones,
ni una sima de pasión inmarcesible…
Regálame tu silencio,
tu risa ya cansada,
tu pudor olvidado

y tus nostalgias.
Ofréceme tu mano sin anillos,
tu abrazo destinado a un amigo
y este amor que comparto con tu gato.
Si es posible
cuéntame sin prisas una historia
y dime qué ocurrió cuando no estaba,
qué lejano país reconociste
y qué amaste en mi ausencia
que te hizo ser tú.

SEÑORES DIRIGENTES DE LOS GOBIERNOS DE MARRUECOS Y ESPAÑA

Señores dirigentes de los gobiernos de Marruecos y España, y quienes les apoyan y ejecutan sus órdenes: antes o después, los organismos internacionales y la Corte Penal Internacional, los procesarán a ustedes como máximos responsables de crímenes de lesa humanidad contra los inmigrantes africanos que han sido detenidos al margen de la legalidad internacional, secuestrados, deportados, y abandonados en el desierto sin agua ni alimentos.
Hasta que ustedes no sean procesados y condenados, los ciudadanos que callemos y otorguemos, mereceremos todo lo que nos ocurra, incluido lo peor, que es tenerlos a ustedes en el poder.
No hay deuda que no se pague ni plazo que no se cumpla.

Es indignante. Su único problema es que no lo han podido esconder.
Nuestro problema es conseguir que los dirigentes no sean tan mediocres, hipócritas, inhumanos... simplemente se merecen vivir las peores situaciones que son capaces de consentir.

Hace un par de semanas se emitió un en Informe Semanal .En el reportaje se decía que la policía marroquí no repatriaba, hacía redadas y daba palizas con la única intención de precipitar a los pobres diablos contra la famosa valla en su desesperación por llegar a lugar seguro.

Después incluso se intentó echar la culpa a la Guardia Civil de algunas muertes. Un comportamiento propio de hermanos ... cainitas.

En el programa 59 segundos todavía había quien decía que la colaboración de Marruecos en este tema era ejemplar.

Y ahora esto que debería ser la gota que colmase el vaso.

El aprecio por otro país no debería cegar nuestros ojos en temas como éste. Menos mal que está la prensa para denunciarlo.

Sin embargo todos sabemos que no pasará nada. Ni a este lado, ni menos al otro.

Un saludo, Domingo.

LOS MARROQUÍES ABANDONAN EN EL DESIERTO A UNOS SEISCIENTOS INMIGRANTES APRESADOS EN LA FRONTERA ESPAÑOLA

Viernes, 7 de octubre de 2005, 14 horas. Cadena Ser. Entrevista al doctor Gabaldón, de Médicos sin Fronteras: habla desde el desierto, lejos de cualquier enclave habitado, donde han abandonado a su suerte, sin agua, alimentos, ropa para protegerse de las temperaturas extremas, ni medicinas, a unos 600 subsaharianos; entre ellos hay niños, mujeres embarazadas y heridos graves por disparos,

aplastamiento, alambradas de espino y torturas.

Amnistía Internacional pide que se respeten los derechos de los inmigrantes que llegan a Ceuta y Melilla, y emprende una "ciberacción", a través de su página web, para pedir a los gobiernos de España y Marruecos que protejan y respeten los derechos humanos de estas personas.
No te hagas cómplice de los malnacidos que deciden desde los despachos el exterminio de miles de personas que huyen de las guerras y del hambre y sólo tienen la légitima aspiración de trabajar en Europa, en los peores puestos, en los más duros, aunque sean profesionales cualificados.
Al mismo tiempo, la ONU alerta de que más de doce millones de personas morirán por la hambruna que asola el continente africano, causada por la sequía y las plagas de langosta que han arruinado sus cosechas. Mientras las compañías multinacionales y los tiranos designados por ellos, esquilman la fabulosa riqueza en oro y diamantes que existe allí, condenando a los pueblos africanos al exterminio.
Protesta por estas atrocidades porque somos cómplices de los criminales métodos de Marruecos, que cobra un presupuesto extraordinario, otorgado por nuestro Gobierno, por encargarse de alejar de allí a los inmigrantes que rechazan en la frontera española, para que mueran lejos de los medios de comunicación.
La objección fiscal en este casos es un caso de conciencia: no con nuestros impuestos, no con nuestro silencio cómplice.
No te cruces de brazos, vamos a detener esta atrocidad: firma: Amnistía Internacional

Eso es lo que hicieron los marroquíes en 1.975 con los saharauis y los persiguieron y bombardearon con napalm hasta que los argelinos los acogieron.
Treinta años después España sigue sin solucionar el problema saharaui.
Los sultanes marroquíes tiranizan y esclavizan a su propio pueblo impunemente y luego lo niegan.
Mis amigos y yo hemos firmado la acción de Amnistía. Es lo menos que se puede hacer, pero deberíamos presionar más a cualquier gobierno para que no consienta tanto terror contra seres humanos indefensos.

Hola gatopardo, es un placer volver aquí luego de esta larga ausencia. Estoy un poco desjuiciado, pero si lees lo que estoy viviendo, seguro que lo entenderás. No ha habido esta semana noticia que más me toque que la que hay en este post que has hecho, y claro, no hay más que decir que hay que participar en la manifestación. Es algo que seguro que no le hace gracia a mucha gente, y a aquellos que miran hacia otro lado, pues al menos poderles decir algo. Esto es algo que requiere solución, y acción no solamente de parte de España, sino de Europa entera, y quizás si se despierta lo suficiente, de la gente de todo el mundo. Ahora le doy gracias a mi vida, por haberme puesto en el rol de inmigrante, porque si de algo estoy seguro es que en lugar de hundirme, lo que ha hecho es voverme fuerte... y muchísimo más visceral y consciente... gracias por escucharme y un beso muy grande.

DIATRIBA DEL VIEJO JESUITA

¿Sabe cuál es el problema de la gente como usted? Defiende su punto de vista, defiende sus ideas contra todo y contra todos, usted moriría por alcanzar la realización de sus ideales... y eso siempre es sórdido.

Las convicciones no tienen ninguna importancia, la mente es demasiado primaria y el hombre demasiado frágil para defenderlas si no es con su vida, que no vale nada.

Yo sólo defiendo la posibilidad de que la gente pueda pensar y creer lo que le dé la gana sin tener que demostrar que es verdad; defiendo la alegría de aprender y saber, aunque no sirva de nada, porque la única certeza que me llevaré a la tumba es que sólo amé a quienes eran mejores que yo, y sólo aspiré a lo inalcanzable. A mí el fracaso me legitima, a usted lo aniquilará.

No entiende usted nada; cree que defiendo el celibato porque soy enemigo de la sensualidad: es necesario tanto despojamiento y tanta pureza para amar a otro ser humano con su miseria y su grandeza como para amar a Dios. Pero son ascesis diferentes, que se excluyen.

Quienes pueden amarse plenamente, inmersos en su dicha, sin dejarse enturbiar por miserabilismos, son tan raros como los místicos que han podido contemplar el rostro

terrible de Dios. Los que aman a la criatura humana sacralizan el Reino en este mundo; y si tuvieran que trascenderla y renunciar, caerían rotos como títeres faltos de sustentación. Pero, para los que nos consagramos a Dios, la sed de absoluto nos hace encontrar tediosas a sus criaturas.

¿Cree que los preceptos de mi fe son inhumanos? ¿Usted acaso cree que ser hombre puede ser fácil para alguien? ¿Cree que los que se rompen y maldicen el pecado que los angustia y la impureza que los tortura no son sacerdotes representativos de la verdadera fe? ¿Cree que puede condenársenos por ser pecadores?

Lo único que sé es que nuestra tarea no es separar la grama del trigo, ni al virtuoso del pecador, porque quién sabe si cuando un hombre peca se condena o descubre la humildad balbuciente que lo acercará a Dios... Quién sabe si cuando un hombre permanece puro e incontaminado no estará petrificándose en el orgullo que lo alejará de la salvación.

Se nos ha dicho: "Ama y haz lo que quieras", incluso niégate al amor, pero no te escudes en tu temor a Dios para fornicar tristemente, porque el mayor pecado que existe es la falta de alegría y de gratitud. Si tus sentidos son el medio para alcanzar ese estado de gracia sobrenatural en el que se descubre que "todo lo que es, está bien", sé fiel a tus sentidos porque ellos te acercan a Dios; si el dolor logra acercarte a esa humildad aceptante, lacérate; si tu serenidad la encuentras en soledad, huye del mundo, pero no ofrezcas los despojos de nuestra humanidad inacabada y castrada como si fueran un logro de nuestra exquisita sensibilidad.

Hay muchos caminos que conducen a la autenticidad y a la integridad, y todos son transitables.

Un sacerdote no debería sustituir al mismo Dios para establecer una ascesis única, porque somos hombres tan vulnerables como todos y, como pocos, podemos caer en la tentación de creer las añagazas del demonio, que es astuto y sólo discurre de acuerdo con lo que cada uno quiere creer.

Dios siempre será infinitamente más misericordioso con nosotros que nosotros mismos, porque Él sabe que no podemos ser mejores, pero siempre podríamos ser infinitamente peores.

No hay una sola frase en la revelación cristiana que condene a los pecadores Cristo sólo estableció un baremo para merecer la salvación: "... *tuve hambre, y me disteis de comer; tuve sed, y me disteis de beber; fui forastero, y me recibisteis*."

El arrepentimiento nos purifica; pero cuando nos dejamos arrasar por los remordimientos es por ese orgullo que nos impide aceptarnos como seres grotescos, dignos de piedad. Por eso soy piadoso con los pecadores que desde la Iglesia escandalizan a la gente como usted, que tiene un policía en la cabeza, y un juez del Tribunal Supremo en el alma.

Pero usted no lo entenderá, no sabrá jamás de qué le hablo. Lo único que usted aprenderá con la gente como yo es a tener paciencia hasta que terminemos de hablar para volver a decir que en la Iglesia hay abusos y pecadores: porque no escucha.

A mí, sin embargo ya se me ha agotado la paciencia, ya no puedo soportar más su mezquindad, que no tiene más horizonte que el de su lastimosa miopía.

No sé qué pensará usted de los jesuitas, pero no se le olvide preguntarse si Dios —o el teorema de Bell [1]— permitirían que nos hayamos cruzado en vano.

Y no es a mí a quien ha de dar la respuesta.

Gatopardo

1 El teorema de Bell afirma que cuando dos partículas interactúan, para a continuación perderse en direcciones opuestas, toda interferencia que afecta a una de las partículas incidirá *ipso facto* sobre la otra, con independencia de la distancia que las separe.

Concuerdo con Muralla sobre el teorema de Bell. Tan apasionante como las redes

EL PIYAYO

¿Tu conoces al ”Piyayo”
un viejecillo renegro, reseco y chicuelo;
la mirada de gallo
pendenciero
y hocico de raposo
tiñoso...
que pide limosna por "tangos"

y maldice cantando "fandangos"
gangosos?

¡A chufla lo toma la gente
y a mi me da pena
y me causa un respeto imponente!

Ata a su cuerpo una guitarra,
Que chilla como una corneja
Y zumba como una chicharra
Y tiene arrumacos de vieja
Pelleja.
Yo le he visto cantando,
Babeando
De rabia y de vino,
Bailando
Con saltos felinos
Tocando a zarpazos,.
Los acordes de un viejo"tangazo"
Y, a sus contorsiones de ardilla,
Hace son con la sucia calderilla.

¡ a chufla lo toma la gente
y a mi me da pena
y me causa un respeto imponente!

Es su extraño arte
su cepo y su cruz,
su vida y su luz,
su tabaco y su aguardientillo...
y su pan y el de sus nietecillos:
"churumbeles" con greñas de alambre
y panzas de sapos.
Que aullan de hambre
Tiritando bajo los harapos;
Sin madre que lave su roña;
Sin padre que "afane"
Porque pena una muerte en santoña;
Sin mas sombra que la del abuelo...
¡poca sombra, porque es tan chicuelo;
en el altozano
tiene un cuchitril
¡a las vigas alcanza la mano;
y por lumbre y por luz, un candil.
Vacia sus alforjas
Que son sus bolsillos,
Bostezando los siete chiquillos,
Se agrupan riendo.
Y entre carantoñas les va repartiendo
Pan y pescao frito,
Con la parsimonia de un antiguo rito:
¡chavales!
¡pan de flor de harina!

Mascarlo despasio.
Mejo pan no se come en palasio.
Y este pescaito, ¡no es na?
¡sacao uno a uno del fondo del má!
¡gloria pura él!
Las espinas se comen tamié,
Que to es alimento...

Asi....despasito.
¡no llores, Manuela!
Tu no pués, porque no tiés muelas.
¡es tan chiquitita
mi niña bonita!..
así, despasito.
Muy remascaito,
Migaja a migaja, que dure,
Le van dando fin
A los cinco reales que costo el festín.
Luego entre guiñapos durmiendo,
Por matar el frío, muy apiñaditos.
La Virgen María contempla al "Piyayo"
Riendo
Y hay un Angel rubio que besa la frente
De cada gitano chiquito.

¡A chufla lo toma la gente!...
¡y a mi me da pena
y me causa un respeto imponente!

Llevo años estudiando la figura de Rafael Flores Nieto \"El Piyayo\". El que refleja José Carlos de Luna en su poema (El Rabúo un pordiosero con mal vino en la realidad y sin nietos) no se corresponde ni de lejos al verdadero que fue un creador de un cante melodioso y de unas letras magnificas. Agradeceré cuantos datos me aporten y responderé a todos los mensajes.
Aquí va una letra del Piyayo:

\"Eres lo mismo que el cúco,
pájaro que nunca anía,(anida)
pone el huevo en nío (nido) ajeno
y otro pájaro lo cría.

El Piyayo no sabía leer.

Recuerdo a mi abuelo,que aunque llevaba 50 anos en barcelona,y cuando hablaba en catalan no se le notaba nada,era de Almeria,de la serrania de Seron,y que cuando

hablaba en castellano lo hacia con ese gracejo caracteristico de la zona,con un acento poco marcado,pero,indudablemente andaluz.Cuando llegaban las fiestas de fin de Ano siempre elegia el dia de San Esteban (26 de Diciembre),que en Catalunya es festivo, para venir a nuestra casa.Su condicion invariable,y anual,era que mi madre tenia que hacer paella,si no no venia.Despues de la comida y de una breve siesta,con ronquidos,que eran los que al final los despertaba, siempre,cada San Esteban le pediamos lo mismo,\"Yayo,cuentanos el Piyayo!!\".Nos sentabamos los cuatro hermanos mis padres y mi abuela alrededor de el y comenzaba a contarnos el poema/cuento/historia, que para los chiquillos es lo que era.Yo creo que el agregaba algo de su propia cosecha,lo cual no se le daba nada mal,porque recuerdo que lo hacia muy largo, y asi, con mi abuelo recitando mientras los cristales se volvian traslucidos por el vaho a causa del frio en la calle,pasabamos una tarde calida con mi abuelo.Para mi,la imagen de mi abuelo,la persona que mas he querido y admirado en toda mi vida,y el Piyayo siempre van unidos en el recuerdo.Por eso el Piyayo me llena de gozo y me duele,me trae bellos recuerdos y grandes ausencias,pero creo que es el poema mas importante de mi vida y mi recuerdo.
Abuelo,donde quiera que estes,seguro que estaras recitandole el Piyayo a alguien.

"Medianoche. Sobre las piedras
de la calzada, hay un caballo muerto.
Aún faltan cinco horas
para que venga el carro de "La Única"
ÿ se lo lleve. Ese caballo viejo,

hedoroso de sangre coagulada,
ese pobre vencido, fue un obrero.
Un hermano del pájaro. Un hermano del perro.
Fue el hermano caballo, que anduvo bajo el sol,
que anduvo bajo el agua, que anduvo entre los vientos,
tirando de los carros,
con los ojos cubiertos.
Fue el hermano caballo. Ninguno irá a su entierro."

Yo tuve una compañera en el Instituto Beatriz Galindo de Madrid, en los años 50, que se llamaba Josefa Gómez Juarranz y que recitaba El Piyayo maravillosamente. Siempre recurríamos a ella para "aflojar" tensiones en alguna clase que se nos hacía cuesta arriba. Dios mío estoy hablando de hace más de cincuenta años. Nunca la olvidaré subiéndose las mangas del jersey para darle fuerza a su expresión.

Este poema nos lo hizo aprender un profesor de literatura q tuve en octavo de EGB y hoy de repente me he acordado de él, no se por qué, y es una maravilla. Lo gracioso es q todavía m acuerdo de memoria de los 10 ó 12 primeros versos. Cuando nos lo obligaron a memorizar creo q nunca hice el esfuerzo de intentar entenderlo y ahora me sorprende lo precioso que es...

MARRUECOS EMPUJA A LOS INMIGRANTES COMO ARIETES CONTRA LA FRONTERA DE CEUTA Y MELILLA

Los inmigrantes se sienten utilizados y víctimas de una encerrona cuyo fin último desconocen. Aseguran que la policía marroquí les empujó hacia la frontera española y, una vez allí, les dispararon. Varios jefes de comunidad aseguran que ellos desaconsejaron el salto de la valla del pasado miércoles debido a lo que había ocurrido días antes en Melilla, pero que aparecieron en sus campamentos subsaharianos a quienes no conocían de nada alentando el intento con el argumento de que era su última oportunidad antes de que la valla subiera hasta los seis metros. Después, cuando se aproximaban a la frontera con las escaleras, los policías marroquíes les animaban a seguir. Finalmente, llegó la masacre ya conocida. No faltan voces que aseguran que todo ha sido urdido por Marruecos para presionar a España y obtener dinero en la cumbre que hasta ayer se celebró en Sevilla.

"Sabíamos que no era el día", aseguró uno de los líderes. Los inmigrantes se organizan por país de procedencia y mantienen una estructura jerarquizada que normalmente les ayuda a sobrevivir, pero el miércoles se dejaron llevar por voces de hombres "que no eran del bosque", en alusión a posibles manipuladores. Ignoran si mandados por las autoridades marroquíes. El sistema de saltos masivos instaurado en Melilla no les gusta a los que buscan entrar por Ceuta, porque entraña, como se ha visto, demasiados riesgos. La otra explicación que circula entre los inmigrantes es que se trataría de gente huida de los montes de Melilla y que intentaban abrir el frente de Ceuta para distraer la atención. Si fuera así, lo habrían conseguido a costa de cinco vidas humanas. En cualquiera de los dos supuestos, los dirigentes de las comunidades están seguros de haberse equivocado. De ahí el desaliento.

Algunos inmigrantes añaden que los disparos que les sorprendieron en el salto procedían de ambos lados de la verja, aunque reconocen que en la confusión del momento es difícil saber algo a ciencia cierta. Cuando se les pregunta si alguien conoce a alguno de los muertos, la respuesta es que en esos momentos lo único que importa es correr hacia delante. Nadie mira para atrás a ver quién es el caído. De hecho, ayer pocos se acordaban de que hubo cinco muertos. En los despachos, lo único que parecía importar era si los disparos vinieron de uno u otro lado. Entre los que consiguieron llegar a Ceuta, dominaba la alegría sin matices porque después de meses y hasta años de penurias, habían ganado "el paraíso". Para los que fracasaron, lo vital era escapar de las redadas.

Los dos días de acoso continuo y el desánimo por el sentimiento de estar siendo políticamente utilizados llevó a varios grupos a entregarse a la gendarmería. Aprovecharon la presencia de la prensa española para evitar los golpes de los agentes. Ocurrió a primera hora de la mañana de ayer en los bosques cercanos a la frontera. Nada les importaba más que ganar una tregua, comer algo y conseguir agua potable. Desde el salto del miércoles, que concluyó con cinco muertos y decenas de heridos, la policía marroquí no ha parado de realizar batidas por los montes. De hecho, los agentes comunicaron ayer que en la mañana de hoy quemarán los campamentos que utilizaban los subsaharianos para evitar que los vuelvan a ocupar otros inmigrantes.

Es casi imposible saber la cifra de capturados, pero el jueves habrían sido 120, y ayer, otros 150. Eso supone que Marruecos ha detenido a 250 y la Guardia Civil a los 214 que lograron pasar la valla fronteriza. Son cerca de 500, lo que hace suponer a los investigadores que en el bosque quedarían ya muy pocos. A lo sumo, un centenar.

Los inmigrantes abandonaron los campamentos desde el primer momento y se refugiaron en los lugares que ellos denominan *tranquilos*,cuevas y hondonadas boscosas de difícil acceso. El problema es que en esos refugios, sin agua ni comida, tienen pocas posibilidades de resistir un asedio largo. Entre ellos hay algunas mujeres y niños de corta edad. Las ONG que habitualmente les llevan alimentos tampoco los encuentran para ayudarlos.

Habitualmente se citan por teléfono en un lugar de la carretera y son ellos los que salen al encuentro. Ayer salían a los cruces de carretera a entregarse a los gendarmes, que los transportaban en furgones al tribunal de Tánger para su inmediato envío a Uxda, en la frontera argelina. La gendarmería ha utilizado un helicóptero y perros para localizar a los pocos que todavía se esconden en los bosques de Beliones, una pequeña localidad limítrofe con Ceuta. También el Ejército español ha sobrevolado la zona para intentar detectar posibles movimientos en el monte.

La noche del jueves al viernes, por primera vez en todo el año, no hubo ni un intento de saltar la valla. El despliegue de fuerzas a ambos lados de la frontera hubiera hecho imposible cualquier amago. La presencia del ejército tiene carácter auxiliar, para cubrir los huecos dejados por la Guardia Civil. Los soldados tienen orden de no disparar un solo tiro. Sin embargo, al contrario de lo que ocurrió la vez anterior que el ejército acudió a reforzar la frontera, los soldados están equipados con material antidisturbios.

En Ceuta están, además de los dos cuerpos sin vida, de los que se ignora la identidad, nacionalidad y edad, 214 subsaharianos que lograron saltar la verja con éxito, varios de ellos con heridas que han precisado hasta 10 intervenciones quirúrgicas.

En el Centro de Estancia Temporal de Inmigrantes, con capacidad para 512 personas, había ayer 668, entre ellos veinte niños. El ejército ha prestado cien camas para los recién llegados. Entre los que participaron en el salto del miércoles se escuchan historias de todo tipo, aunque en sus rostros se dibuja la alegría del éxito. El guineano Dinis Amadé echa de menos a tres amigos, pero no sabe si están entre los muertos, entre los heridos que todavía no han sido llevados al CETI o entre los que fracasaron. Él preferiría que estuvieran entre los heridos del lado español.

Dinis Amadé asegura que sus padres y todos sus hermanos fallecieron en un bombardeo que sufrió su aldea en una de las interminables guerras de su país.

La esperanza media de vida entre los habitantes del África subsahariana, según los datos de la página web de la CIA, The world fadtbook, no llega a 45 años.
Estamos hablando de un continente rico en materias primas, que fue colonizado, y es saqueado por las grandes potencias, donde se desarrolla un genocidio sistemático, mediante guerras, hambrunas y enfermedades endémicas, y exportadas, que bien pudiera ser la primera parte de un experimento para aniquilar a la población de amplios territorios, y creo que mis lectores de Latinoamérica saben que no me dejo llevar por el dramatismo.
Si la sociedad civil permanece paralizada y muda, nos mereceremos lo que nos pueda sobrevenir, con la misma indiferencia del resto de la humanidad que nosotros mostramos.

Yo que soy persona sencilla como una ameba verde, y que no entiendo (ni quiero) de políticas y orgullos patriotas, hace días que imagino un mundo distinto, una nueva globalización en la que los grandes no expriman a los minúsculos sino que los adopten. Qué no daría un país pobre por convertirse en rico de nombre y rango, y qué nos cuesta a nosotros adoptar como nuestros países pobres. Qué delito hay si un saharaui viene a España soñando ser un ciudadano medio, que el pueblo saharaui sea la España del

Sahara (suena precioso) y como tal lo tratemos e infraestructuremos ¿es más justo explotar sus nimios recursos a cambio de deudas millonarias que jamás podrán pagar? ¿Es más ético que otros pasen hambre porque nacieron en un mundo tercero?
Qué absurdo se me antoja el sueño mío, que quisiera que adoptemos, que no explotemos, los países del tercer mundo, y seamos al fin globales e innovadores, sí, pero coherentes.

Son un asco, y se les ve en primera plana muy trajeaditos y presumiendo de potencias... grrrrrrr

BLOGIA.2

Ya sé que habéis tenido problemas para entrar en las bitácoras que estamos alojadas en Blogia ultimamente, pero acaban de migrarme al sistema Blogia.2 y pronto se solucionará.

He probado el sistema de edición de otros alojamientos, y Blogia reune las condiciones que necesito: es fácil de utilizar, las instrucciones están en español, me deja hacer modificaciones en el aspecto de mi

bitácora sin tener ni idea de programación, y además, Blogia no tiene detrás una multinacional sino a un empresario español que invierte su ocio y su dinero en crear una plataforma de expresión en Internet. Y cuando he tenido problemas, y los he planteado, Roberto Abizanda estaba ahí, no he recibido una respuesta automática en inglés con soluciones esterotipadas ni indicaciones para que consulte en un foro abandonado.

Os recomiendo confiar en Blogia.

De nada, ya sabéis que me gusta ser útil.

Bueno, gatopardo, como dije, para gustos los colores. A mí en bitacoras no me sale nada nada en inglés, y cuando he preguntado algo en el foro me han respondido enseguida. Tardaron unos días en darme de alta en el directorio. Qué más, ah, la plantillas prefabricadas de todos los sitios son un poco... pues eso, prefabricadas. Hace una semana que han cambiado de servidor y ahora funciona otra vez estupendamente. Sencillamente bitacoras me da funciones que no me da blogia, y es complicado según lo complicado que lo quiera hacer uno, o el nivel que tenga, por supuesto. Pero como digo, no es que bitacoras sea mejor que blogia, sencillamente, a mí me parece mejor y más completo. Supongo que cada cual cuenta la película como le ha ido, y mi alojamiento me da cosas que blogia no me dio cuando lo tenía. Tu blog está muy bien así, y si tú estás contenta y no te quieres "complicar" más pues ya está.

No me gusta que esté en inglés, preferiría uno más de la tierra, pero al ser el que me abrió la puerta a este mundo hasta le he cogido cariño, es como mi macdonnald doméstico.

ARTES MÁGICAS Y ESPIRITISMO

Llámese genéricamente espiritismo la doctrina que aspira a la comunicación directa e inmediata con los espíritus buenos o malos por medio de ciertas prácticas teúrgicas. Hasta aquí no pasamos de la magia, vulgarísima en todas edades. Pero la originalidad del espiritismo consiste en haberse enlazado con la doctrina de la transmigración de las almas y con ciertas hipótesis astronómicas, de donde ha venido a resultar una doctrina burdamente filosófica, cuyos cánones son la pluralidad de mundos habitados, la pluralidad de existencia del hombre, la reencarnación de las almas y la negación de la eternidad de las penas. Hay, pues, en el espiritismo una parte especulativa y una parte teórica, una superstición y una especie de sistema demonológico. No han de confundirse con el espiritismo otros procedimientos sin doctrina (el magnetismo animal, el mesmerismo, el sonambulismo, etc.) que ordinariamente andan mezclados con él, pero que también suelen ejercerse separadamente, sin que arguyan en el operante adhesión completa a la parte metafísica del sistema, así como, por el contrario, algunos espiritistas teóricos tienen por farándula toda la parte taumatúrgica.

Ni una ni otra, a decir verdad, eran nuevas en España. Quien haya leído con atención los primeros volúmenes de esta obra nuestra podrá tejer por sí mismo la historia de los orígenes del espiritismo entre las gentes ibéricas, desde los *goetas gentiles* hasta los priscilianistas, desde los priscilianistas hasta Virgilio Cordobés, Raimundo Tárrega, Gonzalo de Cuenca, Tomás Escoto y el Dr. Torralba. Enemigo yo de enojosas repeticiones, sólo añadiré a lo ya narrado que los espiritistas han creído recientemente hallar un predecesor de su doctrina en el estrafalario médico D. Luis de Aldrete y Soto, que en 1682 imprimió en Valencia un libro intitulado *La verdad acrisolada con letras divinas y humanas, Padres y Doctores de la Iglesia*, al cual libro acompaña una aprobación, más extensa y no menos singular que el texto, firmada por el doctor teólogo D. Antonio Ron. Lo mismo Aldrete que Ron, más que espiritistas, son *milenarios* e iluminados, pero de toda suerte afirman la pluralidad de mundos y «*que el paraíso donde pecó Adán no estuvo en esta tierra que habitamos*», sino en otra región más alta y pura, y, lo que es más, admiten cierto espíritu medio, especie de envoltura del cuerpo, semejante a la que llaman hoy *peri-espíritu*, que Aldrete define «*materia simplicísima, engendrada por Dios Óptimo Máximo del espíritu del mundo para la restauración de la*

naturaleza humana».

Pasó el libro de Aldrete sin despertar las sospechas de la Inquisición ni de nadie; tenido por una de tantas muestras de la desvariada imaginación de su autor, bien manifiesta en otros papeles suyos, por ejemplo, la *Defensa de la astrología* y el *Tratado de la luz de la medicina universal*; ni tuvo el espiritismo más representación entre nosotros que algunos conceptos de dos odas de Somoza (el amigo de Quintana), hasta que en estos últimos años, por influjo extranjero, abriéndole el camino M. Home en su viaje por España, comenzó a reaparecer en su forma menos científica, en la de *mesas giratorias y espíritus golpeadores* (1850). Más adelante se propagaron en traducciones las obras de Flammarión y Allan Kardec; el krausismo contribuyó a difundir una doctrina del alma y sus destinos futuros en las esferas siderales muy semejantes al espiritismo; los *leaders* de la escuela economista le dieron el prestigio de su autoridad y de su nombre, y comenzaron a formarse círculos secretos de espiritistas, que después de la revolución de 1868 se hicieron públicos. Por orden de antigüedad debe figurar, al frente de todas, la *Sociedad Espiritista Española*, de Madrid, fundada por un francés, Alverico Perón, discípulo de Kardec, en 1865, la cual en 1871 se fundió con la *Sociedad Progreso-Espiritista*, instalando su academia en la calle de Cervantes. Predominó en ella el elemento militar, y especialmente el cuerpo de Artillería. Fue presidente honorario el general Bassols, y presidente efectivo, el vizconde de Torres Solanot. Sesiones y conferencias públicas, evocaciones de espíritus, desarrollo de mediums, todo lo intentaron. *El Criterio espiritista* servía de respiradero periódico a la Sociedad, que además se dedicaba al magnetismo y al sonambulismo lúcido.

Especie de hijuela de esta hermandad fue el Centro General del Espiritismo en España, sociedad propagandista y expansiva, bajo cuyos auspicios tomaron grande incremento los cenáculos de provincias, especialmente el de Sevilla, dirigido por el general Primo de Rivera; el de Cádiz, por D. S. Marín, la *Sociedad Alicantina de Estudios Psicológicos*, la *Sociedad Barcelonesa*, la de Montoro, la de Zaragoza, la de Cartagena (director, el general Caballero de Rodas), la de Almería, la de Soria (director, D. Anastasio García López), la de Santa Cruz de Tenerife (de la cual fue alma el difunto marqués de la Florida), la de Peñaranda de Bracamonte y otras y otras hasta el número de 35, algunas en pueblos de corto vecindario y menos nombradía, como Alcolea del Pinar (diócesis de Sigüenza), Alanís (provincia de Sevilla); Almazán, Almansa, Alcaraz, Puebla de Montalbán, Quintanar de la Sierra, etc, etc. Aun existen otras más, pero han quedado fuera de la órbita del centro madrileño, gobernándose cantonalmente y en una independencia casi selvática. La *Sociedad Barcelonesa Propagadora del Espiritismo* se ha mostrado más anhelosa de la publicidad que ninguna otra, estampando, bajo la dirección de D. José María Fernández Colavida, traducciones de todas las obras de Allan-Kardec.

Los artilleros, los albéitares, o *médicos comparativos*, y los maestros de escuela normal han sido en España los grandes puntales de esta escuela. Nada más monumental en el género grotesco y de filosofía para reír que el libro *Roma y el Evangelio*, dictado por los espíritus a D. Domingo de Miquel, a D. José Amigó y a otros maestros de Lérida, e impreso por el *Círculo Cristiano Espiritista*, de aquella ciudad. En otra parte que no fuera España, tal libro hubiera llevado a sus autores derechamente a un manicomio, juzgándolos con mucha benignidad. Pero nuestro Consejo de Instrucción Pública lo juzgó sapientísimamente de otra manera, y los dejó continuar en la enseñanza, trasladándolos a otra Escuela Normal, sin duda para que pudiesen extender el radio de sus consultas. El libro es un tejido de groseras impiedades, con grande aparato de reforma religiosa y restauración del primitivo espíritu cristiano; pero lo original y curioso está en que todas las diatribas contra los curas se las hacen firmar muy gravemente los dómines

espiritistas ilerdenses a Lúculo (Luculus le llaman a la francesa), a Fenelón, a Eulogio (*necio quis*), a San Luis Gonzaga, a San Pablo, a Moisés, a Santo Tomás de Aquino y, finalmente, a la bienaventurada Virgen María y al Niño Jesús, todos los cuales en versículos lapidarios, parodiando el estilo bíblico, condenan la eternidad de las penas, afirman la pluralidad de mundos, se ríen de las llamas del infierno, increpan a los cardenales por su fausto, atacan el dogma de la infalibilidad pontificia, niegan la existencia del diablo y anuncian *el próximo fin de la Iglesia pequeña de Roma y el principio de la Iglesia universal de Jesús*. ¡Pobres pedagogos, que soñaron ser regeneradores de un mundo! ¡Cuánto mejor les estaría perfeccionarse en la letra cursiva y en el método Iturzaeta! ¡Qué semillero de D. Hermógenes han sido aquí las dichosas escuelas normales, nacidas por torpísima imitación francesa!

Ni es *Roma y el Evangelio* la única muestra de libros inspirados; los hay tan peregrinos como un tratado de política, dictado a los espiritistas de Zaragoza por el espíritu de Guillermo Pitt. El medium gallego Suárez Artazu escribe novelas bajo la inspiración de los espíritus Marietta y Estrella, que mueven el lapicero del medium con vertiginosa rapidez. Sociedad espiritista hay (creo que es la de Huesca) que tiene su reglamento redactado nada menos que por el espíritu de Miguel de Cervantes Saavedra, que, sin duda, se ha dejado olvidada por aquellos mundos la lengua castellana.

No lo creerán los venideros, pero bueno es dejar registrado que esta aberración de cerebros enfermos ha cundido en España mucho más que ninguna secta herética y cuenta más afiliados que todas las variedades del protestantismo juntas y que todos los sistemas de filosofía racionalista. Aquí, donde todo vive artificialmente y nunca traspasa un círculo estrechísimo, el espiritismo, padrón de ignorancia y de barbarie, verdadera secta de monomaniáticos y alucinados, afrenta de la civilización en que se alberga, parodia inepta de la filosofía y de la ciencia, logra vida propia y organización robusta, encuentra recursos para levantar escuelas y templos, cuenta sus sociedades por docenas y sus adeptos por millares, manda diputados al Congreso, propone el establecimiento de cátedras oficiales, inspira dramas como el *Wals de Venzano*, del infeliz y gallardísimo poeta Antonio Hurtado; congrega en torno de las mesas giratorias a muy sesudos ministros del Tribunal de Cuentas y a generales y ministros de la Guerra, y hace sudar los tórculos con una muchedumbre de libros, cuyo catálogo (todavía muy incompleto) puede verse al pie de estas páginas. ¡Triste e irrefragable documento de nuestro misero estado intelectual! ¡Cuán fácilmente arraiga el espiritismo y cualquiera otra superstición del mismo orden, vergüenza del entendimiento humano, en pueblos de viva fantasía e instintos noveleros como el nuestro, rezagados a la par en toda sana y austera disciplina del espíritu! ¡Y cómo apena el ánimo considerar que no todos esos ilusos han sido veterinarios ni maestros normales, sino que entre ellos han figurado, sin sospecha de extravío mental, poetas como Hurtado, el fácil y vigoroso narrador de las leyendas del antiguo Madrid, y prosistas tan fáciles y amenos como el artillero Navarrete, naturaleza tan antiespiritista, como lo declaran sus *Crónicas de caza*, sus *Acuarelas* de la campaña de África o sus ligeros e ingeniosos versos! ¡Y, sin embargo, este hombre ha escrito un libro de teología espiritista, que se llama *La fe del siglo XX*, hermano gemelo de *Tierra y cielo*, de Juan Reynaud!

El espiritismo nunca se ha presentado en España con el modesto carácter de superstición popular o de física recreativa, sino con pretensiones dogmáticas y abierta hostilidad a la Iglesia; por donde viene a ser uno de los centros más eficaces de propaganda anticatólica. Así lo prueban, además de *Roma y el Evangelio*, los varios libros del vizconde de Torres Solanot, actual portaestandarte de la escuela, y especialmente el que se rotula *El catolicismo antes de Cristo*, plagio confesado de los delirios indianistas de Luis Jacolliot *(La Biblia en la India)*, hoy condenados a la befa y al

menosprecio por todos los que formalmente, y sin ligerezas de dilettante, han escudriñado la primitiva historia del Extremo Oriente.

Don Marcelino siempre tan prolijo y verboso. Cuatrocientas ochenta palabras para confesar que no sabe casi nada del asunto.
Gatopardo: Eres inconstante y veleidosa. Me has cambiado el post mientras escribía el comentario. Así no se puede trabajar. En cambio insistes en poner el careto de Don Marcelino(insigne español que huía del agua casi con tanta celeridad como Antonio Machado, todo hay que decirlo)

Felipe: Hubo una confusión, y coloqué durante unos minutos el texto de don Marcelino que no iba aquí, y cuando lo subsané ya lo habíais leído.
Ay, Pendón Volteriano, la donna è mobile... lleva usted razón, una vez más, y también en esa costumbre tan cristiana de huir de prácticas higiénicas, más propias de paganos y de salvajes según la ortodoxia.
Por cierto, aviso que la "Historia de los heterodoxos españoles" fue "versionado" por Sánchez Dragó en su "Gárgoris y Habidis" y pudo ser un best seller porque los que lo ensalzaban desde las páginas literarias de los periódicos jamás habían leído a Menéndez Pelayo y se quedaban extasiados ante la "originalidad" y la "erudición" de aquel que parecía un garañón.

Con todo el respeto a la opinión del D. Marcelino Menéndez y Pelayo, me gustaría aportar un dato, después de casi un siglo de su muerte.
El Espiritismo, como ciencia, filosofía y religión ha ido prosperando al lado de la ciencia, sin que ésta, haya contradecido o demostrado alguna discordancia con los postulados espíritas.
El Espiritismo (por culpa de la ignorancia) está metido en el mismo saco de las supercherías, brujerías y esoterismos.
El Espiritismo es una ciencia seria y responsable, que antes que buscar proselitismo desea aportar conocimiento.

PIO BAROJA

En Londres o Madrid, Ginebra o Roma,
ha sorprendido, ingenuo paseante,
el mismo *taedium vitae* en vario idioma,
en múltiple careta igual semblante.

Atrás las manos enlazadas lleva,
y hacia la tierra, al pasear, se inclina;
todo el mundo a su paso es senda nueva,
camino por desmonte o por ruina.

Dio, aunque tardío, el siglo diecinueve
un ascua de su fuego al gran Baroja,
y otro siglo, al nacer, guerra le mueve,

que enceniza su cara pelirroja.
De la rosa romántica, en la nieve,
él ha visto caer la última hoja.

Precisamente he escribo en mi blog sobre Baroja , un escritor que me encanta .Estoy de acuerdo con las afirmaciones que hace Baroja en " La caverna del humorismo " referentes al ideal literario :
" Yo creo que escribir es como andar ; un movimiento que está condicionado por el ritmo interior. Claro que cuando ese ritmo tenga más cadencia , nos gustará más .
Esa cadencia , ese ritmo , tiene una determinación interior que nace de lo más hondo de la personalidad .Cierto que para revelarse necesita el intermedio de signos exteriores aprendidos [...]
Por eso , el solitario místico se habla a sí mismo. El que sienta dentro del lenguaje interior que se le revela con fuerza más tarde o más pronto , llegará a expresarlo ."

EL SECRETO DE TAUTINA

Aún hay gente que pregunta por Tautina, porque la única manera de olvidar cuánta magia e imaginación nos regaló, cuánto nos sobrecogió, sería un traumatismo craneo-encefálico grave.
Y bajo cualquier nombre que se esconda Tautina siempre será reconocible porque tiene la sabiduría literaria de las escritoras innatas: se puede aprender a escribir mejor y a perfeccionar un texto; no se puede aprender a escribir como ella lo hace, dejando su huella inimitable en lo que escribe.
Si queréis saber qué fue de Tautina, aquella mujer que escribía en **El rincón de Tau**, os aconsejo que leáis **"El secreto" en EntreTlíneas**

PARAISO PARA MITÓMANOS DEL SÉPTIMO ARTE

Juan Sánchez de Toro habla de Visconti, que adoró a Helmut Berger "como el que idolatra cualquier ciudad de Europa", de Marlon Brando, el mejor alumno de Lee Strasberg, que le enseñó a "expresar sus emociones en la soledad pública"; de André de Dienes, el fotógrafo que radiografió la pureza de Norma Jean Baker; de la conmocionante y misteriosa ternura de Liza Minelli en "Cabaret", y de tantos otros, y te pone un nudo en la garganta, porque habla con la hondura de quien ha comprendido que lo más genuino no siempre se encuentra en lo que creemos real.
Su web Cine Paraiso está en mis enlaces, y espero que la añadáis a los vuestros, y entréis a visitarla con la devoción que merece.
Y especialmente, el capítulo sobre el asesinato de Marilyn Monroe.

Vaya, pues en una cosa no vamos a estar de acuerdo: a mí el personaje de Liza Minelli en Cabaret me pone de los nervios. Sin embargo, la película me gusta mucho (por todo lo demás). Y me ha entusiasmado ver reseñada "Muerte en Venecia" (y no entiendo que en la filmografía de Dick Bogarde no incluya "Historia de dos Ciudades")

Mad, creo que este camino de perversión es el único tratamiento de belleza que funciona, y sospecho que tú sabes algo de esto por las pruebas gráficas que tengo.
Ana* la posibilidad de dejarse emocionar o de admirar la obra hecha y no lo que falta por hacer o lo que se pudiera idear es lo que me diferencia de casi todo el mundo: yo tengo la capacidad de admirar a tope con quien me muestra una faceta de la realidad que yo no hubiera percibido sola. Y mi adorada Liza Minelli como Sally Bowles y mi admirado Juan Sánchez de Toro han abierto puertas a mi percepción sin vuelta de hoja. No sabes cómo compadezco a quien no se deja embargar por la gratitud, expresada mediante la admiración, sino que busca el defecto, la falta en una obra inconmensurable realizada con dedicación, inteligencia, perseverancia, lucidez, sacrificio y una generosidad que me sobrepasa.

Gatopardo, de tu comentario deduzco que deduces del mío que no me ha gustado la página, y no es cierto; sí que lo es que aun habiéndome gustado (los amigos de Visconti son mis amigos), no he puesto sobre ella un comentario elogioso, y ese ha sido mi error. Cuando uno publica algo en Internet se expone a la crítica, es lo que tiene, y eso vale para tí al publicar el post, para mí al hacer el comentario y para el autor de la página. Y si entro y me encuentro una página que dice (parafraseo): "filmogafía completa de Dick Bogarde" y encuentro que falta una de mis películas favoritas y que él protagoniza, pues me llama la atención y lo digo. A veces el que nos hagan ver nuestros

defectos nos ayuda a ser mejores, si sabemos estamos receptivos y sabemos aprender de ello.
Y sigue sin gustarme el personaje de Sally Bowles (aunque, repito, me gusta la película).

NO NOS PODEMOS PERMITIR EL LUJO DE OLVIDAR

Ha muerto Simon Wiesenthal a los 96 años: sobrevivió a trece campos de concentración, y a otras tantas sentencias de muerte. Cuando lo liberaron, al final de la guerra, pesaba 45 kg, y su estado de inanición era tan grave que si hubiera ingerido una cantidad de comida normal le hubiera perforado el estómago, como a muchos otros que murieron después de ser liberados.

No cerró los ojos ante el horror de los campos de exterminio, ni quiso olvidar, y grabó en su cerebro los rostros de los verdugos, de los torturadores, los nombres, sus crímenes, y aun sabiendo que en cualquier momento podían matarlo, luchó por guardar la información y por no olvidar.

Wiesenthal fue fundamental en la captura y procesamiento de Adolf Eichmann. Logró descubrir a Karl Silberbauer, el oficial de la Gestapo responsable del arresto de

Anne Frank; también localizó nueve de los dieciséis nazis juzgados en la Alemania Occidental por el asesinato de la población Judía de Lvov, la ciudad natal de Wiesenthal; Franz Stangl, el comandante de los campos de concentración de Treblinka y Sobibor, y de Hermine Braunsteiner, una ama de casa que vivía en Queens, New York, y que había supervisado el asesinato de cientos de niños durante la guerra: más de mil nazis fueron descubiertos y llevados a juicio gracias a su labor.

Esto ha ocurrido en la civilizada Europa del siglo XX. Gracias a gente como Simon Wiesental sabemos por quién y cómo se pudo hacer, después de limitar los derechos de la sociedad civil, convertiendo al pueblo en una masa aterrorizada por el peligro que representaban el enemigo, del que sólo los salvaría su líder.

Más vale que lo tengamos en cuenta y empecemos a protestar contra los recortes de las libertades civiles, porque un Congreso legislativo, elegido democráticamente, ya ha aprobado la *Patriot Act* , que recorta los derechos civiles de los ciudadanos, y ha creado campos de concentración y exterminio en enclaves secretos, sin garantías legales para los detenidos, y al Führer de turno le han dado plenos poderes.

No nos podemos permitir el lujo de olvidar, aunque pasen cien años.

Recordad.

Una revuelta de los judíos en Auschwitz—Birkenau provoca la completa destrucción del Crematorio IV.
Llega el último transporte de Theresienstadt, con dos mil judíos que son de inmediato gaseados. Se usan por última vez el 30 de octubre las cámaras de gas en Auschwitz.
Los nazis obligan a veinticinco mil judíos a caminar bajo lluvia y nieve, en noviembre, desde Budapest hasta la frontera austríaca, seguidos por una segunda tanda de cincuenta mil personas que terminaron en Mauthausen. Himmler ordena la destrucción de los crematorios de Auschwitz.
1945
A medida que las fuerzas aliadas avanzan, los nazis ponen en marcha evacuaciones en gran escala, "marchas de la muerte" de cientos de kilómetros. Los prisioneros, debilitados por las privaciones y los trabajos extenuantes, eran rematados en las cunetas si no podían caminar.
Alemania se rinde incondicionalmente. Las puertas de los campos se abren, pero un

gran número de prisioneros continúan muriendo a causa de la desnutrición, de las enfermedades y el agotamiento.

PS. Sólo en el periodo comprendido entre 1939-1945 , a consecuencia de la guerra, perdieron la vida más de sesenta millones de personas. Y esa espiral de destrucción empezó con el incendio del Reichtags para tener una excusa para exterminar a los comunistas y a los judíos. Con el ataque a las torres gemelas se ha desencadenado una espiral donde los únicos que corren peligro no son los islamistas, y deberíamos de saberlo ya.

No deberíamos de olvidar este horror, pero, el ser humano tiene memoria débil y suele tropezar en los mismos errores y repetir la historia.
Y dictadores de esta calaña desgraciadamente nacen a porrillo y sólo han de darle una masa que dirigir para que demuestren sus maldades.

Ojalá esta clase de terror desaparezca, todo el terror desaparezca, pero, eso me temo es una quimera.

Estupendo Post, Gata.

Magistral artículo. Lo más triste es que, contra el genocidio y la barbarie de las dictaduras, el único argumento que valga es que podamos ser las siguientes víctimas. Parece que somos incapaces de conmovernos por algo que no nos afecte directamente.

Menuda lección de historia. El caso es que así de detallada da una idea más precisa de lo que significa "ir a más". No es lo mismo que te digan de golpe la millonada de personas que murieron que leerlo con este detalle, y lo terrible del proceso. Y cada una sola de esas vidas es una tragedia en sí misma. Ya sé, Gatopardo, que en los fregados de los poderosos a los de abajo nos pilla siempre en medio. Estoy leyendo una novela ambientada en la Edad Media, y es la misma cosa.

Lo mismo con distintas palabras, no olvidar para evitar que se repita, lástima que tengamos una memoria volátil y suerte que sigan existiendo quienes a pesar de su dolor y su propio miedo no dejan de denunciar cualquier horror. En el libro "A fin de cuentas"

donde se narra el juicio de Nuremberg, donde termina alertando a la humanidad para que no se deje llevar por su necesidad de olvidar.

Enhorabuena por la recopilación. Es fundamental no olvidar lo que puede pasar cuando no existe una democracia liberal.

Todos somos capaces de reaccionar ante un mal repentino e injustificado. Por eso, el mal más peligroso se va incubando lentamente. Una mezcla de propaganda, violencia, dominio del sistema educativo, lenta escalada de la opresión, represión, tiempo, justificaciones (in)morales, eliminación de la libertad de expresión, equidistancias, culpabilización de las víctimas, bonitas palabras, fanatismo de la minoría y cobardía de la mayoría.

Pero no estoy de acuerdo contigo en tu moraleja. A mi me preocupa mucho más el régimen de terror que los terroristas marxistas leninistas de la ETA llevan décadas imponiendo en el país vasco que la patriot act. Me preocupa más que en Cataluña cada vez sea más difícil discrepar del nacionalismo. El comunismo ha causado muchas más muertes, más miseria moral y económica, más totalitarismo, más opresión del individuo por el grupo, más horror en definitiva, que el nazismo, y durante mucho más tiempo (que le pregunten a los cubanos, a los chinos y a los norcoreanos), y lo que es peor es que todavía para algunas personas tiene buena fama. Los comunistas han fracasado en todo menos en la propaganda. Ya dijo Lenin que la mentira es un arma revolucionaria. Y mientras haya quien crea que el comunismo es la solución y la economía de mercado el problema, las libertades individuales seguirán en peligro.

Y el gran peligro para la democracia hoy día no son los USA, sino el islamismo radical. A los USA les pilla a un océano de distancia, Europa lo tiene al lado. De hecho, lo tiene dentro. Los USA han reaccionado frente al ataque, Europa trata de apaciguar a la bestia, como ya lo hizo frente al nazismo. Se puede discrepar de los métodos USA, pero de ahí a ver más peligro en ellos que en los locos fanáticos asesinos misóginos homófobos del fundamentalismo islámico, hay o ignorancia o mala fé.

USA ha aprobado democráticamente, con fecha de caducidad, con controles democráticos, una legislación de excepción después de los ataques a las torres gemelas. España retiró sus tropas de Irak. USA ha endurecido sus controles fronterizos, España da papeles para todos. USA ataca a los terroristas para acabar con el problema en su raiz, ESpaña los justifica por "el mar de injusticia universal". USA promueve las democracias y las libertades individuales en los países islámicos, España propone

"alianzas de civilizaciones" entre las democracias liberales y las teocracias medievales. USA defiende la libertad de expresión, España condena políticamente las caricaturas de Mahoma.

¿Eres consciente de lo que está pasando en Kosovo esta última década?. ¿Has leido a Ben Laden reclamar la reconquista de Al-Andalus?. ¿Has oído hablar de la guerra de vientres?. ¿Sabes que Mahoma ordenó a sus seguidores exterminar a los infieles allá donde los encontraran?. ¿Sabes que en Arabia Saudí las mujeres ni siquiera pueden conducir?. ¿Sabes que en los países que aplican la Sharía, el testimonio de una mujer o de un infiel vale la mitad que el de un hombre musulmán en un juicio?. ¿Has oído hablar de la pena de muerte por lapidación para las mujeres adúlteras?. ¿Sabes que en Arabia Saudí está prohibido poseer Biblias o llevar crucifijos?. ¿Sabes que el presidente iraní ha amenazado con borrar Israel del mapa cuando tenga la bomba atómica?. Por cierto, ese mismo señor posee misiles capaces de alcanzar el sur de Europa alojando cargas atómicas en su interior. Si Europa ha renunciado a defender la libertad de expresión frente al Islam radical por unas manifestaciones y unas quemas de embajadas, imagina en lo que será capaz de ceder cuando la amenaza esgrimida pueda ser nuclear.

Para el Islam, el mundo está dividido en dos zonas, la primera se denomina Dar al-Islam, territorios bajo control musulmán, y la segunda Dar el-Harb, tierras que no están aún bajo control musulmán y que significa Morada de la Guerra. Todo creyente musulmán tiene que luchar, con todos los medios, donde quiera que esté, por hacer que Dar el-Harb se transforme en Dar el-Islam.

Omar Bin Bakri: usaremos vuestra democracia para acabar con vuestra democracia.

Si te preocupas por la paz y las libertades individuales, te recomiendo que le eches un vistazo a
http://noticiasdeeurabia.wordpress.com/
o http://www.jihadwatch.org/

Pero, en fín, en Europa lo políticamente correcto es hablar mal de USA. Al fín y al cabo, sólo nos salvaron del nazismo y del comunismo. Más de un millón de soldados estadounidenses murieron en Europa para evitar que la democracia desapareciera de este continente. Y, si tenemos suerte, nos salvarán también del islamismo fundamentalista e imperialista. Son así de peligrosos, los Estados Unidos de América.

Como dijo alguien "el fascismo siempre sobrevuela EEUU, pero siempre aterriza en Europa".

Agradezco tu interés por la supervivencia del pueblo judío. Espero que no se limite al pasado, y que la amenaza de Irán de borrar a Israel del mapa te provoque un horror comparable al del nazismo de hace más de 60 años. Shalom.

Voy a ser breve: su paranoica visión me repugna moral e intelectuamente, y desde luego, la suspensión de las garantías jurídicas en nombre de un peligro que puede acabar con nuestra seguridad es lo que llevó al nazismo en la Alemania de Hitler.
El peligro de la política genocida de Israel para la población civil palestina también es un peligro cierto, y no por se judía voy a ponerme del lado de los paranoicos peligrosos como usted.
Tengalo siempre en cuenta: no todos somos iguales ni justificamos todas las atrocidades, y precisamente en nombre de lo que no podemos permitirnos el lujo de olvidar.

Señor gatopardo,

también llamaron paranoico y belicista a Churchill. También aplaudieron a Chamberlain cuando pactó con Hitler en Munich "la paz para una generación". Era 1938.

Respecto al "genocidio" (¡qué abuso se hace de las palabras!)israelí contra palestina, supongo que no tiene nada que ver con los terroristas suicidas palestinos, ni con las 2 guerras que los vecinos árabes han lanzado contra Israel en menos de 60 años para exterminarlo. Supongo que lo que debería hacer Israel es dejarse atacar sin ofrecer resistencia. Al fín y al cabo, la culpa tanto en Israel como en el Pais Vasco, es de las víctimas.

¿Se ha preguntado usted alguna vez por qué los gobiernos jordano y sirio no conceden la nacionalidad a los palestinos que viven en campos de refugiados en su territorio, si tanto les interesa su bienestar?. ¿Se ha preguntado por qué los territorios palestinos viven de ayudas USA y UE, y no de las ayudas de los países árabes que tanto se solidarizan con ellos de palabra?.

Israel se retira de Gaza, y los palestinos votan a Hamás. Pero los belicosos y los genocidas son los israelíes. El presidente de Irán promete borrar Israel del mapa mientras fabrica la bomba atómica. Pero los que nos tomamos en serio la amenaza, somos unos paranoicos.

Veo que a usted le preocupa mucho el bienestar de los judíos de los años 40. Pues hablemos de los años 40. Hablemos de la colaboración entre los países árabes y los de Eje, unidos por el odio común al judío.

El Islam no es una religión de paz, los terroristas son unos asesinos, y frente a un ataque, está justificada la defensa.

Valoro mucho las libertades individuales y las garantías judiciales. Supongo que usted también lo hace. Así que estará conmigo en que Israel y USA son democracias liberales donde las mujeres son iguales ante la ley y la homosexualidad no está penada.
Hoy Irak también es una democracia. Pero imagine que la "justa" lucha palestina triunfa, y finalmente los países árabes arrojan a todos los judíos al mar (son sus palabras, no las mías). ¿Qué será de la libertad y la prosperidad en ese territorio?.

Hitler, usted mismo lo ha mostrado en su excelente recopilación, no hizo una patriot act limitada, aprobada mediante votación, y con fecha de caducidad y controles judiciales. Hitler prohibió el resto de partidos políticos, eliminó las elecciones, se autonombró Führer. Comparar la patriot act con el nazismo me parece paranoico por su parte. Y no por eso me hace gracia la patriot act, pero el terrorismo no es una guerra convencional y ya me dirá usted si tiene sentido tratar a terroristas fundamentalistas que mueren matando como si fueran ladrones de bancos. Por dar otra razón en contra de su paralelismo histórico, los judíos nunca atacaron Alemania, de hecho muchos judíos lucharon en el ejército alemán durante la primera guerra mundial. Se consideraban a sí mismos ciudadanos alemanes, y como tales querían vivir. En cambio, el terrorismo islámico es real, atacan a los países, ciudadanos e intereses occidentales donde y cuando pueden, y seguirán haciéndolo si no lo impedimos, porque no nos atacan por lo que hacemos, sino por lo que somos. No lo digo yo, sólo tiene que leer usted los discursos de Ben Laden, los comunicados de Al Qaeda o los enlaces que le dejé en mi anterior comentario. O también puede informarse de la situación actual en Kosovo. Aunque puede ser que usted también justifique lo que está sucediendo allí cada día.

Desear que el terrorismo acabe no acaba con el terrorismo, pero es que ni siquiera estoy segura de que usted desee el fín del terrorismo palestino. Espero equivocarme, espero que usted condene enérgicamente cada atentado suicida en restaurantes, calles y autobuses israelíes.

Me llama usted paranoica ¿Los 192 muertos del 11-M también me los invento?. ¿O va a decirme que la culpa es nuestra?.

Sra. Cualquiera que englobe en su odio a una raza, una religión,a un pueblo es un nazi de la peor especie. Y usted lo es. A partir de ahora, borraré todos sus mensajes por ser racistas y xenófobos.
Y usted no está segura de mis deseos, porque de lo único que está segura es de su visión paranoica del mundo. Pero le voy a decir muy claro lo que deseo, inequivocamente: que la gente como usted sea recluída a perpetuidad en un psiquiátrico para que no hagan daño.

Señora mía: Poco favor le hace al pueblo judío un César Vidal con trenzas y la lengua desatada. Antes de hablar de la Segunda Guerra Mundial, estudiese la batalla de Stalingrado desde el punto de vista estratégico y militar. Estudie autores norteamericanos para cuantificar correctamente el número de bajas de USA. Cómase, masticando lentamente, el código penal israelí y la legislación que permite el uso de la tortura. Explique en qué categoría de aberración hay que incluir una mutilación genital como la circuncisión.
Item. Efectivamente, hubo judíos que lucharon como auténticos alemanes que eran en

la Primera Guerra Mundial. Pero no pretenderá que les demos las gracias.
El problema del pueblo judío hace mucho tiempo que es el mismo: eligen lo peorcito como aliados y, cuando los aliados acaban con los enemigos, se dedican a colgar "hebreos". Pero lo peor de todo es tener a gente tan tonta y tan maligna como usted.

Hola.
Enhorabuena por esta web y en especial por el comentario en recuerdo de Simon. Y en general por la calidad de los comentarios relacionados (salvo deshonrosas excepciones). La verdad es que reflexionando, me hace pensar lo importante que ha sido este personaje y lo mucho que estamos en deuda con él, y sobretodo, en la memoria de todas las víctimas de totalitarismo en general, y del nazismo en particular. Ojalá veamos pronto la esperanza en forma de una reforma de pies a cabeza de la O.N.U. y del T.P.I., un sistema jurídico internacional que se aplique y tenga jurisdicción en cualquier territorio del planeta Tierra. Porque la propia existencia de Simones en Israel, o Armadas en Paraguay, o Galeanos en Uruaguay dice muy poco de la justicia internacional, por no decir que es una tomadura de pelo.
Tengo mucho interés en saber si alguien puede recomendarme algún libro que hable sobre las investigaciones de Simon Weisenthal (y de cualquier libro que considereis recomendable, no solo basado en la 2GM).
Mi correo es manurodferre@hotmail.com
Un abrazo.

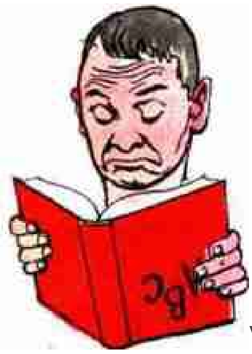
NI SIQUIERA SE MOLESTAN EN MENTIR BIEN



Vean primero esta animación Flash Players, en español, **Objetivo Pentágono**, que no sé si en cualquier momento emitirán en la televisión en sustitucion de los programas sobre famosos y cotilleos o habrá que seguir investigando y publicando en medios independientes o,quizás, en algún momento, los grandes periodistas de los poderosos medios de comunicación, terminarán por hartarse de hablar del fantasma del terrorismo internacional, y dejarán de ser cómplices de los verdaderos culpables, que han creado el terror y las condiciones psicológicas para recortar de derechos a la sociedad civil y declararse en guerra con cualquier país donde haya petroleo
Se admiten apuestas, pero desde Hearst en la guerra de Cuba-EEUU-España, los grandes medios de comunicación han secundado la política expansionista de los Estados Unidos.
Lean las tres versiones oficiales sobre los vuelos "secuestrados" que no coinciden ni por casualidad.

VERSIÓN 1 DEL 11 AL 14 DE SEPTIEMBRE DE 2001

1 – Vuelo AA11
07 h 59: despegue en Boston
08 h 46: golpe contra la torre norte del WTC
Ningún despegue de patrulla de la D.A. (Defensa Aérea)

2 – Vuelo UA 175
08 h 14: despegue en Boston
09 h 03: golpe contra la torre sur del WTC
Ningún despegue de patrulla de la D.A.

3 – Vuelo AA77
08 h 20: despegue en el aeropuerto de Washington-Dulles
09 h 38: golpe contra el Pentágono

Ningún despegue de patrulla de la D.A.

4 – Vuelo UA93
08 h 42: despegue en Newark
10 h 03 ó 10 h 06: el vuelo se estrella en Pennsylvania.
Una patrulla de la D.A. despega poco antes de la caída del aparato.

VERSIÓN 2, PUBLICADA POR EL NORAD EL 18 DE SEPTIEMBRE DE 2001

1 – Vuelo AA11
08 h 40: la FAA alerta al Neads, por consiguiente al NORAD.
08 h 46: impacto, el Neads da la orden de intercepción a la base de Otis
08 h 52: despegue de los F15 de Otis.

2 – Vuelo UA175
08 h 43: la FAA alerta al Neads, por consiguiente al NORAD.
08 h 46: orden de intercepción del Neads (a los dos mismos F15 que para el vuelo AA11)
08 h 52: despegue de los F15 de Otis.
09 h 02 (aproximadamente): impacto; los dos F15 están a 110 kilómetros del lugar del impacto.

3 – Vuelo AA77
09 h 24: la FAA alerta al Neads, por consiguiente al NORAD.
09 h 24: el Neads da la orden de intercepción a Langley.
09 h 30 : despegue de los F16 de Langley
09 h 37 (aproximadamente): impacto ; los F16 están a 170 kilómetros del lugar del impacto.

4 – Vuelo UA93
La FAA informa: N/A (no pertinente)
Orden de intercepción N/A, los F16 de Langley han despegado ya para interceptar el vuelo AA77.
10 h 03 (aproximadamente): el aparato se estrella; los F16 están a 170 kilómetros del punto de impacto (defendiendo Washington).

VERSIÓN 3: INFORME DE LA COMISIÓN SOBRE EL 11 DE SEPTIEMBRE, JULIO DE 2004, PP. 32 Y 33

1 – Vuelo AA1108 h 25: la FAA –CCA (Centro de Control Aéreo) de Boston– tiene conocimiento del desvío.
08 h 30: la FAA –CCA de Boston– informa al Neads (NORAD) del desvío.
08 h 46: orden de intercepción del Neads a la base de Otis.
08 h 46M40S: el vuelo AA11 se estrella contra el WTC.
08 h 53: despegue de los F15 de Otis.
09 h 16: American Airlines se entera de que el vuelo AA11 se ha estrellado contra el WTC.
09 h 21: el CAA de Boston informa por error que el vuelo AA11 se dirige hacia Washington.
09 h 24: el Neads da a los F16 de Langley la orden de interceptar un vuelo n° 11 fantasma.

2 – Vuelo UA175

08 h 42 – 08 h 47: indicios de secuestro.
08 h 52: un miembro de la tripulación alerta sobre el secuestro.
08 h 55: el CAA de Nueva York sospecha un secuestro.
09 h 03: el vuelo UA175 se estrella contra el WTC.
09 h 15: la FAA informa al Neads sobre el golpe, al cabo de 12 minutos.

3 – Vuelo AA77
09 h 05: American Airlines tiene conocimiento del secuestro.
09 h 24: el Neads da a los F16 la orden de interceptar el vuelo fantasma AA11, no el AA77.
09 h 34: la FAA informa al Neads que el vuelo AA77 está desaparecido (no que está secuestrado).
09 h 38: el vuelo AA77 se estrella contra el Pentágono.
09 h 38: los F16 enviados en misión de intercepción del vuelo AA11 están a 240 kilómetros de Washington (fueron enviados en la dirección errónea).

4 – Vuelo UA93
09 h 34: el puesto de mando de la FAA entra en conocimiento del secuestro.
10 h 03: el vuelo UA93 se estrella.
10 h 07: la FAA –el CAA de Cleveland– informa al Neads del secuestro.
10 h 15: la FAA –el CAA de Washington– informa al Neads la caída del aparato.

Y de cómo se activa la megafonía en el avión con la grabación de un intento de secuestro, por si no se puede hacer desaparecer la caja negra del aparato o los pasajeros llaman con el teléfono móvil a sus familiares.

Ya sabéis que Blogia ha estado descolgandose varios días, pero parece ser que en algún momento se arreglará. Espero que tengais paciencia y perseverancia.
No es raro, lo que pasa es que olvidamos la historia: Nerón necesitaba urbanizar Roma, que era un caos donde las casas se edificaban sin tener en cuenta nigún plan, y con el incendio logró crear una ciudad con un trazado "racional" y culpar a los cristianos, que creaban tensiones con sus doctrinas. Hay cientos de casos así.

¿QUIÉN SE LO PODRÍA IMAGINAR?

Suena el teléfono a las cuatro de la mañana.
—Dígame.
...
—Ya te he conocido, Toñi, ¿qué te pasa?
...
—¿Estás llorando o riéndote?
...
—Tranquilízate, apenas logro entenderte...
...
—¿Dónde estás ahora?
...
—¿Es que has discutido con Pedro?
...
—Mujer, no sé... ¿qué vas a hacer en una cafetería a estas horas llamándome si no...?
...
—¿Que quieres que sepa sobre Pedro? ¿A qué te refieres?
...
—¿Pedro con la esteticista? ¿Y tú como lo sabes?
...
—No me lo puedo creer, si Marga...
...
—Pero, mujer, tranquilízate, no llores...
...
—Ah, hija, qué forma de reír más rara...
...
—¿Pero por qué te ha dado ese ataque de histeria? Es que apenas se te entiende...
...
—¿Lo has pillado con Marga o qué?
...
—Bueno, si te da repelús hasta contármelo, ya me puedo imaginar qué es lo que ha pasado. ¡Qué hijoputa, con lo mosquita muerta que se hace!
...
—¿Cómo que quién? ¡El hijoputa de Pedro, tu marido!
...
—Ya, bueno, allá tú, si quieres lo perdonas y mañana que te lo haga con otra...
...
—¿Entonces por qué estás al borde de un ataque?
...
—¡Noooooo! ¡No me digas!
...
—¡Anda, mi madre!
...

—¿Pero te había dicho que le gustaba eso?
...
—¿Y qué tiene que ver Beckam?
...
—Ay, qué palo, hija... jjjjjjjjj
...
—¡Claro que me da la risa, no puedo evitarlo!... pero es un palo, si...
...
—Al cabo de treinta años de matrimonio...
...
—¡Y que pesará ciento veinte kilos!
...
—¿Y qué le has dicho?
...
—No me extraña que hayas salido corriendo...
...
—Pero en un mes o dos se soluciona.
...
—¡Jo!... Hasta a mí me va dar no sé qué encontrármelo... Y el caso es que me ha dicho que mañana pasará a cambiar el grifo del cuarto de baño... ¡Vaya corte!
...
—¡Qué impresión, eh!
...
—¿Prefieres venir aquí hasta que Pedro se vaya a trabajar?
...
—Ya está despierto, está en la ducha, si...
...
—No, no le diré nada. Venga, te espero...

Mi marido, apoyado en un codo, tapado hasta la barbilla, no ha perdido ripio de mis palabras. Y me mira con los ojos como platos.

—Por mucho que diga Toñi, —me dice— Pedro no le haría una cabronada— Y hace un gesto despectivo qué quiere decir *"¡mujeres!"*

Lo miré fijamente, y tuvo la prudencia de callarse.

—Toñi porque es una buenaza, pero yo te mato si haces lo que Pedro... ¡Ni se te ocurra hacerte un depilado integral, por mucho que seas del Real Madrid y por muy bien que juegue el Beckam ése!

Lo novedoso gusta .Te da ilusión y ganas de realizar las tareas más diversas , pero cuando se convierte en algo diario y cotidiano pierde esa chispa y se vuelve gris a no ser que guste mucho.Uno puede tratar con todas sus fuerzas de que esto no ocurra , pero al fina el tedio te atrapa. CUENTO DE NAVIDAD

Los mellizos participarán en el Auto de Navidad vestidos de pastores y no pueden hacer de Reyes Magos, que es lo que habrían querido; pero ni siquiera habrá camellos, así es que están rabiosos. Tienen casi seis años y están deseando ser mayores para hacer lo que les da la gana, y poder actuar en un teatro con piratas y un superman que vuele.

Ha dicho Sor Inocencia con su manía de usar diminutivos para hablar con los niños:
—Hay que adornar el escenario con globitos de colores. Tenéis que traer diez globitos cada uno.

Los mellizos no se parecen en nada, si serán diferentes que se llaman María José y José María. Les hubiera gustado ser hijos únicos; pero como no pudo ser, les hubiera gustado ser gemelos idénticos para no tener que ir los dos al colegio: habrían convencido a sus padres de que sólo tenían un hijo y se habrían turnado, no se habrían visto obligados a tragar el jarabe, acostarse a las nueve y media, lavarse los dientes, ir al dentista, hacer de pastorcitos… sin poderse escapar. Siempre "los dos".

Los mellizos han recibido el dinero para comprar globos; pero quieren comprarse huevos de chocolate con sorpresa dentro, y como hacen los deberes en la rebotica de la Farmacia de sus padres, han decidido coger los globos que venden allí, que son transparentes, pero les pintarán ojos y sonrisa con sus témperas nuevas. En vez de diez cada uno, llevaran cincuenta porque como no son de colores…

— *¡Diremos que eran más baratos y nos han dado más!* — dice ella
— *¡Buena idea!*— dice él.

No se sabe por qué, cuando ya está preparado todo, la Virgen y San José con un muñeco de Niño Jesús en la cuna, los peluches que hacen de buey, que es un león al que han puesto unos cuernos de vikingo y el asno, que parece un poco raro con tantas rayas blancas y negras, los pastores, los Reyes Magos sin camellos, todos los globitos colgados, y se abre el telón, los padres no se callan… Al contrario, cada vez arman más barullo… Y luego quieren que ellos estén calladitos cuando les mandan. De pronto, aparecen sus padres en el escenario y le dicen a Sor Inocencia que cierre el telón y como locos empiezan a descolgar los globitos pintados de los mellizos.

—¡Vosotros dos vais a estar castigados sin ver televisión todas las vacaciones de Navidad!

Cuando vuelven a abrir el telón todos están descentrados y nerviosos: la Virgen María de pronto se pone a llorar y dice que tiene sueño, le duele la barriga, y sale corriendo. Al Rey Mago Melchor, que se le ha caído la barba y la lleva como un babero, le entran tantas ganas que levanta su dedito para pedir permiso, y como nadie le dice que puede ir, avisa muy educado: "¡Tengo un pis!", y abandona corriendo el escenario. Mientras, los mellizos, vestidos de pastorcitos, lloran a más y mejor, y gritan a sus padres que no es justo, todas las vacaciones sin ver la televisión…

Todos han olvidado su papel y, al cuarto de hora de discusiones, Sor Natalia cierra el telón, Sor Pascualina les da las gracias a los padres por su asistencia, y pide un aplauso para los niños. Algunos aplauden.

José María y María José están en la rebotica, sin televisión, con un montón de sumas y muestras de escritura que han de hacer como castigo. Con los dedos cuentan tres y cinco, pero se les escapan… y no les dejan hacer palotes para sumar… A la hora de corregir les gritan

—¡Tres y cinco no son seis! — les borran lo que está mal y no les dicen cuánto es.

Mientras los padres despachan en la Farmacia, ellos se distraen con el sacapuntas eléctrico. Con la punta del lápiz bien afilada, pinchan cada una de las celdillas de globos con gesto resuelto. Lo hacen en el punto de la "i" de "Profilácticos".

Y luego con la punta roma, siguen con sus cuentas y sus muestras.

Les han dicho que esos globos no son para jugar los niños. ¡Pues cuando quieran jugar los mayores, que se fastidien que no los podrán inflar!

Y unos meses después, en el pueblo, muchas barrigas de señora se empiezan a hinchar como globos.

EX MINISTRO ALEMÁN DE DEFENSA AFIRMA QUE LA CIA ESTUVO IMPLICADA EN LOS ATENTADOS DEL 11-S

Según el experto alemán Andreas von Bülow (quien tuvo bajo su mando la Defensa y los Servicios de Inteligencia alemanes) los atentados del 11-S en EEUU fueron producto de una operación encubierta de la CIA, con destrucción inmediata de las pruebas que quedaron en el escenario de los hechos. En su programa radiofónico, Alex Jones entrevistó, el 9 de mayo de 2005, al ex ministro de Defensa y ex ministro de Tecnología alemán, Andreas von Bulow,cuya trascripción presentamos a continuación (resumida).

Andreas von Bülow: Me he pasado más de veinticinco años en la política y ahora estoy fuera. Fui Ministro de Tecnología, y antes fui Ministro de Defensa. Por aquel entonces tuve que trabajar en una comisión en transacciones Este-Oeste sobre los servicios secretos de Alemania Oriental. Y fue muy interesante, porque hacer tratos con ellos desde el lado Occidental, violaba las leyes de Alemania Oriental, de la Comunidad europea y de los Estados Unidos. Pero siempre hubo tratos entre las dos partes, desde el Este y desde Occidente, y esto me permitió acceder a un montón de información en el mundo de los servicios secretos.
Alex Jones: De hecho, recuerdo haber leído acerca de la gran investigación que hizo, y que dio grandes titulares internacionales, acerca de la Stasi (servicios secretos de la ex Alemania Oriental) y de los diferentes gobiernos que habían estado trabajando con ellos.
AvB: Estaba escribiendo otro libro cuando ocurrió el 11-S. Me extrañó al verlo, todos quedamos horrorizados por lo que estaba pasando, y me dije, bueno, esto es imposible, ¿Cómo podría un grupo de personas hacer algo tan horrible? En las primeras horas, no supimos quiénes eran, luego en cuestión de horas se informó que probablemente Osama bin Laden y al-Qaeda estaban detrás de ello. Y luego, al cabo de dos o tres días, aparecieron estas 19 personas. Y mi objeción fue al observarlo, ¿A quien beneficia? Y averigüé que mas bien estaba dañando al mundo islámico y que podría no ser sólo un ataque terrorista sino, que quizás podría ser una operación encubierta. Miré el escenario, lo que estaba pasando, que hacía el gobierno norteamericano.(...)Por ejemplo, miraba la televisión y en el mismo minuto que la televisión mostraba los aviones que volaban contra el Centro Mundial de Comercio, usted encontraba a aquellos palestinos bailando y riéndose (en los territorios ocupados). Y unos días más tarde uno podía darse cuenta que esto era falso. Fue realizado por un equipo de televisión del Ministerio de la Defensa de Israel. Ellos dieron dulces a esa gente, y se reían por eso. Y, nadie lo dijo. La pregunta para mí fue: ¿quien llevó este material filmado, justo a tiempo a las cadenas nacionales, como la CNN y la CBS?.
Luego vino la noticia de que esto lo había hecho Osama bin Laden y su Al-Qaeda, y estas 19 personas de

origen musulmán. Y usted podría mirar entre los periodistas árabes: nadie lo mostró. Ningún nombre árabe fue mostrado allí. Y entonces uno estaba interesado en ver los videos, porque estos 19 pasajeros deben de haber pasado por las cámaras de video, hay muchas cámaras de video en Dallas, en Nueva York, en Logan, en Boston, y en Portland en el Norte. Nadie pudo ver este material.
Cuando se buscan las cajas negras, no se consiguen. Y la historia de cómo estos edificios del Centro Mundial de Comercio se derrumbaron, sin embargo fueron construidos para soportar el impacto de aviones. Además, los bomberos de Nueva York pudieron subir al piso donde estaban los incendios, y el comandante de los bomberos dijo que necesitaban dos equipos, dos equipos pequeños, para combatir estos incendios y, de golpe, todo se terminó. Así que aquello de la alta temperatura, es imposible que el calor fuese tan alto como ha sido descrito en los periódicos, en todos los medios de comunicación.
Alex Jones: Y cuando los federales (FBI) afirmaron que todas las grabaciones de los bomberos habían funcionado mal, resulta que eso no era verdad; nosotros tenemos copias de esas grabaciones. En ellas dicen los bomberos que los incendios están apagados o casi apagados. Hay videos de personas que están de pie en los agujeros de los edificios, sin fuego alrededor de ellos. Vamos a revisar las pruebas que están en su libro, señor, y por qué usted llegó a estas esclarecedoras conclusiones.
AvB: Sí.
Alex Jones: Pero, primero quiero preguntarle: ¿ha escuchado los nuevos acontecimientos? El dueño del Centro de Comercio Mundial tuvo un desliz ante la televisión y dijo que ellos demolieron el WTC 7 (se trata del edificio contiguo a las Torres Gemelas, que se derrumbó "sorpresivamente" poco después que ellas, dónde funcionaba un centro secreto de la CIA). El edificio de 47 pisos que ni tan siquiera fue impactado por un avión. Esto salio a la luz hace apenas dos semanas. ¿Lo ha escuchado?
AvB: Efectivamente, lo escuché. Sigo el escenario completo (de este tema) por Internet, porque todo este material se extiende ampliamente por Internet. Allí si es muy fácil seguirlo, pero en los principales medios de comunicación no se obtiene información sobre esto.
Alex Jones: Bien, le diré algo, después, son sólo tres minutos de audio, emitiremos el documental de PBS, "La Reconstrucción de Norteamérica", donde ellos admiten que demolieron el WTC 7. Ahora, eso es importante, porque dijeron que el edificio se cayó por el incendio aun cuando no fue impactado por un avión. Y ahora, ellos mismos dan un traspié y dicen "*decidimos demolerlo el 11-S*", pero los principales medios de comunicación lo ignoraron. ¡Ésta es una admisión pública, Señor!
AvB: Sí, sí, especialmente porque la oficina principal de la CIA en Nueva York estaba allí, dentro de ese edificio. Pensé que era -cómo le llama usted- el centro de emergencia para el gobernador y para el alcalde. El alcalde estaba en este edificio. Así que no fue impactado por un avión y el incendio era poco intenso. Y las construcciones de acero circundantes quedaron y no se derrumbaron. Pero, el Edificio 7 se derrumbó en la tarde, a las 17 horas, creo.
Alex Jones: Bien, según nuestras fuentes interiores (del propio gobierno de EEUU.), ellos estaban dirigiendo los ataques fuera de los edificios y se deshicieron de las pruebas muy convenientemente con un súbito desplome.
AvB: Ésta es una teoría, podría ser. Es convincente, uno tiene que obtener todas las pruebas. Pero el problema es que los elementos de prueba se destruyeron. También, tenemos al NORAD (servicio aéreo de alarma) que estuvo inmovilizado durante una hora y veinte cinco minutos (lo suficiente para que todos los aviones impactaran en sus blancos) pero cuando el jugador de golf, Payne Stewart que se salió (con su avión) de su trayectoria durante quince minutos, fue rodeado en dieciocho minutos por cinco F-16, de modo que ¿por qué se encontraba el NORAD inmovilizado? Éste es un gran interrogante, porque en el 2001 sucedió más de 60 veces: los cazas despegaban para aclarar lo que les había pasado a los aviones que mostraban alguna irregularidad. En el 11-S, cuatro aviones pudieron dar vueltas, volando, incluso durante una hora, en dirección oeste y luego dar una vuelta y luego volver. La fuerza aérea no fue capaz de interceptarlos, ni siquiera de aproximarlos. Es inimaginable. Y la historia completa de lo que pasó entre la Agencia Federal de la Aviación (la Administración) y el NORAD es totalmente confusa.
Alex Jones: Absolutamente, ahora no sé si ha visto la Associated Press: dice que la CIA estaba ejecutando ejercicios (simulacros de ataques terroristas con aviones) a 15 millas (25 kilómetros) del Centro de Comercio Mundial, aquel día en que dos aviones impactaron en Nueva York y Washington DC. Mis fuentes internas dentro del Pentágono y los abogados que los representan (Stanley Hilton), han dicho en este programa que les dijeron que no actuaran porque era (textual) "*simplemente un ejercicio*". Así es como consiguieron que los militares leales se inmovilizasen; se les dice que es simplemente un ejercicio. Y ese ejercicio comenzaba a las 8.30 hrs. por la mañana. ¿No es obvio?
AvB: Es bastante obvio, sí, realmente, es muy extraño y lo más extraño para mí es que al cabo de dos años aún no hay un libro blanco con todo eso documentado. Si se busca el itinerario, por ejemplo, se tiene que buscar entre dos o tres o cinco periódicos, radios y programas de televisión. Así, todo es incierto. Por otro lado, el gobierno norteamericano deja correr la voz, como si fuese una llamada a una guerra mundial contra sesenta naciones, posibles responsables , sin realmente mostrar el trasfondo del 11-S. Para mí, es imposible.
Alex Jones: Ahora bien, admiten que nueve de los diecinueve secuestradores (la BBC dice siete, pero son nueve) todavía están vivos. Bin Laden no ha sido declarado culpable. Bin Laden es un conocido de la CIA, usted sabe, [George H. W.] Bush se reunió esa mañana con el cabeza de la empresa Bin Laden en

Washington DC, en el Ritz Carleton, usted sabe lo del general de Pakistán, el jefe de inteligencia de ese país, reuniéndose con la Casa Blanca y el presidente del Comité de Inteligencia del Senado a las 8:30 de esa mañana, su segundo viaje a los Estados Unidos en su vida (éste es el mismo general pakistaní que se reunió con Mohamed Atta, el presunto jefe del atentado, poco antes del 11-9 y le entregó 100.000 dólares de su gobierno).
Usted sabe, el FBI que paga por las casas, los automóviles, las tarjetas de crédito de los supuestos secuestradores. Quiero decir, señor, usted sabe que a funcionarios públicos, el Alcalde Willie Brown, Jefes de la Junta de Personal, etc., se les dijo que no volaran a Nueva York ese día. Todo ello está admitido; ¿Qué dice usted a eso?
AvB: Así es, todo eso está confirmado. Así es que para mí, la versión oficial no es en absoluto creíble, es totalmente increíble. La segunda solución según yo, es una operación encubierta. Y ésta es una forma de influir para lavar el cerebro al pueblo norteamericano en un largo, largo conflicto en curso con el mundo musulmán y todos lo que usted sabe, por ejemplo las compañías petroleras, las últimas reservas de petróleo que necesitamos durante las próximas décadas, antes de que se acabe la era del petróleo. Y probablemente detrás de esto existe un pensamiento geopolítico de que finalmente China tiene que ser sacada de la escena. China es demasiado grande y eso está diseñado en el "*Nuevo Siglo Norteamericano*" (informe) que ha sido escrito por muchos de los que están ahora en el gobierno, como Cheney, Rumsfeld y otros.
Alex Jones: Vamos a entrar en el "Proyecto para un Nuevo Siglo Norteamericano" y la "Operación Northwoods" (se conoció al desclasificar documentos secretos, era un plan que consistía en hacer bombardeos en Estados Unidos con aviones propios, camuflados como cubanos, para justificar un ataque a la isla. Kennedy finalmente no lo aprobó). ¿Estaba usted al tanto de los planes norteamericanos para llevar a cabo ataques del estilo del 11-S?
AvB: ¿Usted quiere decir, Northwoods?
Alex Jones: Sí, señor.
AvB: Sí, claro que lo conozco.
Alex Jones: ¿Ése no era una pieza clave de prueba?
AvB: Bien, es una pieza clave, un pieza clave que prueba lo que piensan, del probable acuerdo del ejército con la política. Probablemente, pienso, Kennedy decidió no hacerlo...
Alex Jones: ¿Que piensa usted que pasó realmente en el 11-S?
AvB: Bueno, nadie puede demostrar lo que pasó en el 11-S directamente, porque ha sido una operación encubierta y no se encuentran pruebas; se encuentran sólo indicios. Y uno de los indicios, el de los 19 árabes y Osama bin Laden, es que el gobierno es libre de mostrar o no todas las pruebas que están en la mesa, que están en las calles, que yacen el enclave del Centro de Comercio Mundial y así sucesivamente. Si es una operación encubierta, lo más probable, siempre, es que las piezas de prueba que puedan existir sean retiradas rápidamente y con mucho secreto. Y esto fue lo que pasó en el 11-S.
Alex Jones: Usted recuerda que el New York Times y el Chicago Tribune informaron que el FBI, en 1993, (el pimer atentado que se hizo contra las Torres Gemelas) fabricó la bomba y entrenó a los choferes y tenía un agente de seguridad egipcio trabajando para ellos. También tenía a dos musulmanes retrasados mentales, literalmente retrasados mentales, para conducir el camión, estacionarlo, y hacer estallar la bomba. En la Ciudad de Oklahoma, la misma compañía que destruyó los restos del Centro de Comercio Mundial, hizo estallar los restos del edificio Murray (atentado de 1995) y los enterraron, bajo la vigilancia de guardias con ametralladoras, en un basurero privado. ¡Y también fueron ellos los que se llevaron los escombros de las Torres Gemelas a China!, no permitiendo tomar fotografías. Sí, ¡fue exactamente así!
AvB: Sí, desde el principio no permitieron que los ingenieros se subieran a los escombros de acero [las ruinas] y tuvieron muchos problemas, porque les entregaron muy poco dinero para esa investigación. Usted sabe, para aclarar la historia de Bill Clinton y Mónica Lewinsky, la mayoría republicana entregó 60 millones de dólares, mientras quepara que esos ingenieros hicieran su trabajo con las ruinas de las Torres Gemelas, contaron con 600.000 dólares para intentar saber lo que pasó el 11-S. No se les permitió investigar, y así, sucesivamente. Los ingenieros estaban disgustados. La revista *Fire Engineer Magazine* dijo que era totalmente increíble la investigación del 11-S.
Alex Jones: En esa revista dicen que hubo un encubrimiento criminal y, ahora, nos hemos convertido en un estado policial. Se puede arrestar secretamente a los ciudadanos, pueden ejecutarnos en secreto. Ellos están construyendo campos de prisión admitidos por todo el país, esto está en nuestros noticieros. Nos estamos convirtiendo en algo como la Unión Soviética (aplicación de la Patriot Act).
AvB: Lo que está pasando en Guantánamo es eso. Pienso que el problema es que si usted pusiera a distintas personas en las condiciones en que están los presos en Guantánamo, si usted las encerrara uno o dos años sin permitirles un abogado, sin decirles por qué están en prisión, sin tener contacto con su familia, dirían ante cualquier juez lo que el FBI quiera que digan .
Alex Jones: Sí, señor.
AvB: Así, se obtienen falsas pruebas, de este tipo de personas.
Alex Jones: Y en los grandes medios de comunicación de EEUU se opina que la tortura está bien, dicen que están torturando a personas, y eso en el Washington Post. ¿No es preocupante que nuestro gobierno admita ahora que está torturando?

AvB: Estoy informado. Me dijeron que hay acuerdos con muchos Estados para llevar a estas personas secuestradas a sitios como Egipto y a otros estados dónde la tortura es aceptada, y así consiguen las declaraciones que desean, con tortura, y pueden llevar luego esas declaraciones a los Tribunales alemanes y a los Tribunales norteamericanos para intentar obtener una sentencia.
Alex Jones: Usted mencionó la CIA y personas con conocimiento interno en transacciones (financieras y bursátiles) y los ataques del Ántrax. Por favor, hable de eso.
AvB: Las transacciones económicas de personas con conocimiento previo del atentado, todos sabemos que existieron. Pienso que sumaron quince mil millones dólares en total. Y hubo especulación sobre la baja en las acciones de United Airlines y de American Airlines; ambas aerolíneas que fueron atacadas durante el 11-S y otras cosas. Así que, normalmente, se podría averiguar, porqué pienso que los norteamericanos (la CIA junto con el departamento financiero, el Departamento del Tesoro) desarrollaron esta vigilancia de los mercados para averiguar la especulación en el seguimiento de ataques terroristas. Así que ellos podrían averiguar inmediatamente si había algo detrás. En este caso, el del 11-S, las personas del NSA, que son los tipos que vigilan vía satélite todas las transacciones que se llevan a cabo en la Tierra, ordenaron destruir las cintas. Ellos tenían las cintas sobre esas transacciones bursátiles, y tuvieron que destruirlas para no hubiese ninguna prueba.
Alex Jones: Ahora nuevamente, sobre esas transacciones por quince mil millones dólares (yo pienso que es una estimación baja), en la primera semana Alemania informó de ello, Francia informó de ello, y EE.UU dijo: "¡Vamos a cogerlos!" Un record de *Put Options* contra United y American; no contra otras aerolíneas, sino específicamente contra éstas y guiados por la CIA. Y de repente, destruyen la prueba. De nuevo, otra cortina de humo.
AvB: ¡Aquí la pregunta correcta es quién tiene la responsabilidad de esto! ¿Sabe?, se ha tapado el debate público sobre cual fue el trasfondo y la razón del 11-S. Y, finalmente nada se aclaró. No tenemos ningún informe de quién fue responsable, quién lo hizo y esto es nuevamente asombroso. Y cuando el Vicepresidente y el Presidente, le piden al Congreso no entrar en demasiados detalles sobre el trasfondo del 11-S. ¿qué significa eso? Hasta ahora lo que el Presidente supo antes del 11-S es un secreto total. Pienso que no existe ningún servicio secreto en el mundo que no diera alguna indicación indirecta anticipada a la comunidad de los servicios secretos norteamericanos, la CIA, la DIA y así, y así sucesivamente. Ellos no hicieron nada al respecto. Lo más perturbador es que estos tipos que intentaron comunicar que algo sucedería el 11-S, fueron expulsados. Quiero decir, a nivel local de las oficinas del FBI, conocieron previamente mucha información e intentaron obligar a la organización central para profundizar en eso, en árabes que tomaban lecciones de vuelo en escuelas de pilotos (el caso del franco marroquí Zacarías Moussaoui) y otras cosas. Y, el tipo que decidió en la cima, pienso que fue el segundo del FBI, dijo, "no, no nos meteremos a estudiar esto", y fue ascendido después del 11-S.
Alex Jones: A propósito, las embajadas americanas que permitieron que supuestos miembros de al-Qaeda recibieran extraordinarios pagos de dinero en efectivo; los agentes del FBI que ordenaron a otros agentes que no detuvieran a al-Qaeda, obtuvieron bonos extraordinarios. Bush firmó el decreto W1991 meses antes del 11-S ordenándole al FBI que no detuviera a los miembros de al-Qaeda. Amenazaron con arrestar al agente del FBI Robert Wright si contaba lo que sabía. He entrevistado a su abogado David Schippers, que supo de antemano que ocurrirían los ataques. Él fue hasta Bush; Bush no quiso hablar con él, y Ashcroft no quiso hablar con él. Usted dijo algo muy inteligente, usted habló sobre el ántrax, como un encubrimiento psicológico del escenario.
Todas estas preguntas afloraron aproximadamente en los primeros días después del 11-S y fueron bloqueadas por los ataques con ántrax y esa es la razón por la cual sucedieron. Hemos rastreado los ataques hasta el Fuerte Detrick, Maryland. Ellos dijeron que no existe el ántrax como arma biológica, y resultó que fue el arma más militarizada que se haya visto en la vida.
AvB: Sí, eso es absolutamente cierto, justificaron las guerras por la lucha contra el terrorismo. Pero, por ejemplo, la guerra contra Afganistán para derrocar al Taliban se decidió mucho tiempo antes, pienso que en junio, antes del 11-S. El gobierno de Pakistán y el gobierno de la India fueron avisados de que habría una intervención en octubre.
Alex Jones: También, había 44.000 soldados norteamericanos y 18.000 soldados norteamericanos en Tajikistan y Uzbekistán, respectivamente. Bush tenía las órdenes para lanzar la batalla en su escritorio, dos días antes del 11-S.
AvB: Eso es exacto.
Alex Jones: ¿Y al-Qaeda?
AvB: Probablemente Al-Qaeda es una artificial... eeh...denominación de.....
Alex Jones: Una ficción de la CIA.
AvB: ...un truco, de elementos, de personas islámicas. En Hamburgo, los juicios se están cayendo, porque el gobierno norteamericano no está entregando las pruebas.
Alex Jones: Absolutamente, y, mire, hemos tenido oficiales militares y muchos otros en esto, está claro que al Qaeda es una creación de la CIA. Un brumoso monigote. Así el complejo militar-industrial puede llevar a cabo ataques y luego culparlos. Nosotros sabemos que mientras Osama bin Laden supuestamente hace volar un edificio, nuestro gobierno le paga a su familia (la de bin Laden, socia de Bush en varios negocios) para reconstruirlo.

AvB: Sí.
Alex Jones: Quiero decir que hubo un pago, directamente, a la vista de todos.
AvB: Sí, todas las personalidades, como Osama bin Laden, como al Qaeda, como el Taliban, incluso Saddam Hussein, todos son figuras que en tiempos anteriores fueron captados por la CIA. Así es que probablemente, ellos han sido reciclados en el sistema como los tipos malos. Antes, ellos fueron los tipos buenos que echaban a Rusia de Afganistán y se ocupaban de eso, consiguiendo así el dinero, y ahora son pagados para ser usados como los tipos malos. Osama bin Laden fue utilizado por la CIA , en 1995, en los Balkanes, en una operación en que los norteamericanos estaban con el UKG (guerrilla musulmana antiserbia) en Albania. Usted encuentra a estos tipos por todas partes; usted encuentra a estos tipos en Chechenia por ejemplo (guerrilleros que combaten al ejército ruso de Putin). Hay también ex-afganos, como ellos se denominan (musulmanes de distintos países reclutados por la CIA, que lucharon contra los rusos en Afganistán en los años 80, el más conspicuo de ellos es Bin Laden) , y están pilotando los aviones fletados por la CIA, por ejemplo.

Había escuchado comentarios al respecto y me resistía a creerlo...
La CIA, lo sabemos por la historia reciente, es capaz de todo, y el mangoneo del petróleo también, pero duele y cuesta creer en un mundo así...

Sabeis algo del famoso grupo Bilderberg? Dos años antes predijo en la boca de la mano derecha del pequeño y gran hijo de puta de Bush, hechos muy parecidos a los del 11-S. Esto sería necesario para que EEUU no perdiera la hegemonia militar y economica .
Seria la excusa perfecta para recuperar varias delas zonas más estrategicas tales como Afganistan o Irak. Tiembla Iran.
Y ahora una reflexión nada hipocrita. Si queremos imponer el supuestro criterio de

justicia y moderación europeo, deberiamos dejarnos de tantas palabras y asumir que mientras no seamos militarmente y economicamente más potentes que los yankis,nuestras palabras solo servirán para que ellos disfruten más cuando al final les chupamos la polla. Ejemplo el ciego Zapatitos y su emir Moratinos. Aznar, otro cabrón vidente, decidio muy a su pesar, porque siempre quiso ser él el emperador, que como tarde o temprano todos ibamos a chupar para que retrasarlo más tiempo.........

Interesante artículo, yo soy ingeniero civil y las versiones que dan sobre la caida de las torres gemelas, despues del atentado no me convencen porque no me parecen muy lógicas que digamos, la caida parece provocada por una implosión calculada para no dañar los edificios circundantes.

ROMANCE DE LA MUERTE DEL PRÍNCIPE DON JUAN

Tristes nuevas, tristes nuevas
 que se cuentan por España:
que ese príncipe don Juan
 está malo en Salamanca,
que cayó de su caballo
 a las puertas de su amada
por cortar un ramo verde
 y ponerlo a su ventana.
Siete doctores lo cuidan
 de los mejores de España;
miran unos para otros,
 dicen que su mal no es nada.
Sólo falta por venir
 aquel doctor De la Parra.
Estando en estas razones
 cuando a la puerta llegaba

cabalgando en mula prieta,
    collar de oro en la garganta.
Hincó la rodilla en tierra
    y la lengua le mirara;
trae solimán en el dedo
    y en la lengua se lo planta.
Luego que le toma el pulso
    de esta manera le habla:
—Confiésese Vuestra Alteza,
    mande ordenar bien su alma.
Tres horas tenéis de vida,
    la una ya va pasada.
Estas palabras diciendo
    el Rey su padre llegaba:
—¿cómo te va, hijo mío,
    regalo de la mi alma?
—Bien me va, mi padre, bien,
    porque Dios así lo manda;
no lo siento por mi muerte
    que de morir nadie escapa.
Pésame de mi esposita,
    es niña y queda preñada.
Ella si trae varón,
    que sea príncipe de España
y si pariera una hija
    que sea monja en Santa Clara;
si se quiere ir a su tierra,
    enviármela acompañada,
que no digan sus parientes
    que quedó desamparada;
de las arras que le di
    por Dios no le quitéis nada,
si no es el anillo de oro
    que le di de enamorada,
ése mando que lo den
    a mi hermana doña Juana.
—¡Arredraos, caballeros,
    que ahí viene la enamorada,
desmelenado el cabello,
    el rostro bañado en agua!
—¿Dónde vienes, la mi luna,
    ¿dónde vienes, la mi alma?
—Vengo de San Salvador
    de oir la misa del alba,
de pedir a Dios del cielo
    te levante de esa cama.
—Sí me levantaré, sí,
    el lunes por la mañana
en un ataud de pino
    y una sábana de holanda;
me llevarán a la iglesia
    mucha gente en mi compaña;
tú te quedarás llorando

muy triste y desconsolada.
—Amante del alma mía,
amante mío del alma,
tomarás esta perita
en vino blanco mojada
—Sí la comeré, mi esposa,
por ser de tu mano dada.
Juntaron rostro con rostro,
juntaron cara con cara.
Llora el uno, llora el otro,
la cama riegan en agua.
—¡Ay de mí, triste vïuda,
vïuda recién casada!
¡Con seiscientos caballeros
yo pasé la mar salada,
ahora la pasaré sola,
triste y desconsolada!
El suegro que a punto estaba
luego acudió a levantarla:
—"¡Arriba, arriba, mi nuera,
no quedas desamparada!
Tuvo fortuna la niña:
no quedó desamparada,
que él murió a la media noche,
la niña al riscar el alba.

Para algunos la Monalisa es el paradigma del equilibrio entre el hombre y la mujer, una igualdad en la balanza que por suerte hoy en dia es cada vez más palpable. Lo laudatorio va porque tu solamente eres imaginable detrás de ese gran retrato viejo.

En el repertorio luctuoso marroquí figura como "endecha" el romance"la muerte del príncipe don Juan":
"De Burgos partió ese rey, de Burgos pa' Salamanca,
y en mitad de aquel camino del cielo cayó una carta.
-Tomadla, mis caballeros. tomadla bien y notadla.
-Para vos, mi señor rey, para vos era mandada.
Malo y estaba ese rey, ese rey de Salamanca,
malo está de calentura, que otro mal no se le añada.
Ya mandan por los doctores. doctores de toda España,
todos dicen a una boca: -mi señor no tiene nada.
Si non era el más chiquito, que Sebastián se llamaba,
de rodillas en el suelo. el pulso le demandara:
-Perdón, perdón, mi señor rey, por estas tristes palabras
tres horas tiene de vida, la una y media ya es pasada.
Ellos en estas palabras. su madre por ahí entrara:
-dónde estabas tú, mi madre, mi madre, la desdichada?
-Rogando iba a Dios del cielo que troque alma por alma.
-Tarde recordatis madre la setencia ya está dada,
tres horas tiene de vida, la una y media ya es pasada.
Ellos en estas palabras, su esposa por ahí entrara,
un velo negro en la cara y una soga en la garganta.
Y a todo esto, señores, la infanta queda preñada:
si la infanta pare niño, rey será de toda España,
si la infanta pare niña, reina es de Salamanca."

SUMARIO

La rabia contenida no es azul.
A nadie le embellece madrugar
y decir “si señor”
mientras todo se astilla.
Pudiera ser que las palabras sean
un universo inasequible con su sueldo,
y siempre calla.
Su risa es un graznido breve
y hace muchos años que no canta.
Sin embargo,
acaricia con ternura a su perro,
un cruce de miseria y listeza
que parece venir de cualquier sitio
de camino a la nada,
donde habitan los seres de las fotos
que adornan las paredes,
al fin reconciliados con el mundo.

Señor Augusto R. la rabia que fluye es roja, como las venitas de los ojos desorbitados del que grita furioso, y también es roja la ira del que apalea a otro, como roja es la sangre del que recibe la paliza, pero la ira contenida? No, no, señor Augusto, la ira contenida no es roja, es azul, azul como su amoratado rostro cuando contiene su furia al verme replicarle.

IMAGINEMOS...

Si se confinara a diez jóvenes de treinta años, atléticos e inteligentes en un recinto de treinta metros cuadrados, con una televisión omnipresente a todo volumen, y se les limitara la actividad social a esa sala común, con un único escape para dormir en un cuarto compartido de ocho metros cuadrados, con alguien que quizás no sea adicto a la ducha, hable en sueños o ronque, es seguro que al cabo de poco tiempo presentarían alteraciones psíquicas y graves problemas de salud.
La falta de estímulos, de actividades, de retos intelectuales, de ocios creativos, anquilosaría sus músculos, desintegrarían su identidad, como si les hubiera golpeado la más devastadora enfermedad neurológica.
Hablo de la realidad que cualquier residencia de ancianos, pública o privada, y no de un refinado método de tortura china contra los criminales, ideado por sádicos especialistas en desestructuración de la personalidad.
Si bien es verdad que cuando llegan ahí ya han tenido ocasión de recibir toda la indiferencia del mundo, un tratamiento previo que los prepara para vivir este horror sin pizca de extrañeza.

Pues creo que no hay remedio a esto, cada vez son más los asilos (residencias) de ancianos que se construyen. Hubo un tiempo en que se vivia con los ancianos por amor, luego llegó el tiempo en que se los "queria" por el dinero que reportaban y ahora ni amor ni dineros. Ahora por no tenerlos se paga un dineral al mes.
Y es terrible que así sea pero la gente como yo que ronda ya el medio siglo tenemos que mentalizarnos para vivir ese futuro al menos yo, si vivo, tengo claro donde pasaré mi vejez.

Un horror más de los tantos que proporciona "la sociedad del bienestar". Se trata solamente de daños colaterales y no creo que haya que dramatizar más de la cuenta. Por cierto, la semana pasada se lanzó a la venta en España la última versión de la Play Station, esta vez portátil para que la alienación pueda llevarse consigo a todos los sitios durante todo el tiempo. Hubo jóvenes que hicieron más de doce horas de cola para comprar el maravilloso aparatito a razón de 250 euros la unidad. Luego los juegos que engulle cuestan unos 50 euros cada uno. Se vendieron 600.000 aparatos en un pis pas. ¿ Y qué tiene que ver esto con los campos de concentración de ancianos?...todo tiene que ver con todo.
Quiero decir que esto es solo el comienzo de lo que se avecina, amigos...de todas maneras no olviden que existe una solución al alcance de cualquier bolsillo: una bala bien apuntada a la sien. No se conoce mejor jubilación que esa. ¡¡Ánimo!!

En este país, el 85% de la población de cualquier edad y condición ve la televisión más

de 4 horas al día.Y a todo volumen
El españolito medio sólo alcanza su felicidad gregariamente, id est: familia, pareja, pandilla, campo de futbol, etc.
Los ocios creativos y los retos intelectuales consisten en decidir en qué bar se va a meter o qué animal va a torturar.
Las pensiones son de una miseria indignante. Pero también hay que tener en cuenta:
Que el macho, como no ha dado palo al agua en su puñetera vida en ciertas tareas de subsistencia (cocinar, lavar, etc) es un inútil integral desde que enviuda (sea cual sea la edad)
Que, en lugar de mantener hijos hasta los 40 años y ponerles piso, sería más sensato, llegada la jubilación, hacer las maletas y cambiar de país.

No dejan de ser aparcamientos de ancianos. Lo peor es que son negocios, como cualquier otra cosa: malas instalaciones, personal insuficiente que no lo trabaja por vocación (muchas veces es el cursillo que le han ofrecido con puesto de trabajo incluido) y mal pagado, tanto a los profesionales con vocación como a esa mano de obra no cualificada que está ahí porque no tiene otra salida... etc, etc, etc

Ayer, cuando escribí esto no había leído lo de las cafres que han sido procesadas por maltratar a los ancianos que tenían en su "residencia para la 3ª edad", pero las monjitas del asilo de mi pueblo tienen un método digno de una película de terror. Llega allí una persona que hasta el día anterior iba a la compra, limpiaba su casa, charlaba con las vecinos, hace ganchillo o juega a las cartas, y le preocupa mucho ni ser una persona sucia ni desastrada, pues bien, como se le ha metido en la cabeza que se va a la residencia porque no quiere ser una carga el día de mañana para nadie, entrega su pensión por escrito para que la administren las monjas y si tiene la casa en propiedad antes o después acabará siendo también de las hermanitas. Hasta ahí todo el mundo lo ve normal. El problema es que pasan unos días, y te encuentras que la han amarrado a un sillón mediante brazaletes acolchados para que no se mueva, con un pañal que le cambiarán por la noche para amarrarla a la cama, y se le cae la cabeza sobre el pecho, tiene un aire ido y balbucea de manera incomprensible, y se le cae la baba. El "Haloperidol" que es de venta libre, indicado para esquizofrenias es uno de los fármacos que podrían crear esos síntomas. ¿Alguien ha decidido hacer una investigación? No. Nadie. Y cada vez que lo comento me miran con cara de "¿pero a ésta que le va ni le viene?". Y yo no lo puedo demostrar; pero sé que una familia que decidió llevarse a una señora que estaba en esas condiciones y a los tres días volvía a recuperar el habla, la lucidez y el aspecto normal.

EL MATRIMONIO

El matrimonio fue instituido en remotas épocas por enemigos acérrimos de las relaciones lúdicas y constructivas intersexuales.
El matrimonio en la actualidad puede ser laico -con o sin ceremonia civil-, o religioso -con o sin ceremonia eclesiástica- según el misticismo de los contrayentes. En cualquier caso viene a ser lo mismo: un par -con evidente falta de lucidez- deciden que son mutuamente necesarios para ser felices y se unen.
Hay animales que no pueden vivir con autonomía de otros: se trata de los parásitos, que succionan y se alimentan de las substancias más idóneas de otros animales. En gran parte de las parejas se da este mismo fenómeno: uno de los dos llena su inconmensurable vacío existencial con los actos, gestos, dichos, miradas y deseos del otro. El dador se encuentra preso en una relación simbiótica, donde a cambio recibe la embriagadora sensación de ser necesario, imprescindible, decisivo en la vida y la existencia de otra persona, degustando así esa sensación prohibida al ser humano ("*Y seréis como dioses*") porque, héte aquí que, como los dioses, tiene poder sobre la vida y la existencia de alguien que le ha elegido para transformar, decidir su destino, y compartir intimidades harto escatológicas.
La experiencia demuestra que la pulga necesita al perro para vivir, pero cualquier perro que se deje le sirve. El error del perro sería creer que es él y no otro. Eso explica que haya parejas que se neurotizan durante un tiempo que a cualquiera le parecería eterno, adónde uno succiona la vitalidad y la alegría del otro -que se deja con alguna que otra pataleta - sin que parezca verse el final de su disponibilidad. Es el amor neurótico, en contraposición del "*amour fou*". Es mejor quedarse al margen o te pringan con sus cuitas y cuando se separan salpican.
Otro tipo de pareja muy parecida a la anterior es la de "*soy-débil-pretégeme*". El débil se afirma por su incapacidad para pedir con suficiente brío, enmedio del tumulto, un

vaso de agua al camarero, por no saber cómo rellenar un formulario, pagar la multa, o con quién debe ir y de quien se tiene que fiar, cómo tiene que contestarle a su padre cuando se extralimita, qué modelo de tocadiscos ha de comprarse, dónde venden las entradas para ver a Sabina... El sabelotodo o fuerte se realiza resolviendo cada una de las dificultades del otro, al parecer insolubles, y extrae un sentimiento desproporcionado de prepotencia, de eficacia. A la larga suele desembocar en una sensación de superioridad, algo crispante. Es ese tipo de gente que con voz engolada y mirándote desde la cima de su sabiduría y de su superioridad te dice: "*El Quijote, que lo escribió Cervantes...*" y espera que puntúes con una exclamación admirativa su excelsa perspicacia, cosa que nadie, salvo su débil particular, hace. Lo que le empuja a frecuentar con más asiduidad a su pareja, que sí que sabe apreciar sus dotes. Este tipo de pareja suele ser eterna, a ellos no les hace falta el divorcio, salvo en el caso en que el débil deje de hacer el chorras y deje la pereza mental, porque entonces todo se va al carajo.

Pero hay parejas que se apartan de estos modelos: son las que se componen de dos contendientes, que están juntos a ver quien puede más y cualquier motivo es bueno para establecer la competición. Las reglas del juego suelen ser inaccesibles para el resto de los mortales: resistencia psíquica, incoercibles deseos de camorra y como paréntesis un polvo con cardenales y arañazos, con el que marcan el final del “*round*", pero no del combate. No se aconseja intentar mediar o apaciguar parque se suele salir escaldado y vituperado por las dos partes. Sólo los dos elementos de la pareja podrá poner fin a la espiral de destrucción y ¡ay de quien se atreva a intentarlo lleno de buenas intenciones! Son parejas droga y crean hábito.

En el otro extremo están los misántropos románticos, esos para los que el mundo es un terreno minado, que desconfían de la amistad y de la bondad natural de la gente, de la hermosura que hay alrededor y se descubren en la marabunta como dos náufragos. Los lazos que les unen son la injusta maldad y la profunda crueldad de las que son victimas. Cuando los veáis hablar quedo, con las manos cogidas, mirándose a los ojos enternecidos, no interrumpáis: se están contando penas. Y cualquier cosa es una pena para ellos; el café se lo han servido frió, Mari les ha saludado mirando “*como si*” o se les ha descosido el bajo del pantalón. Se sienten víctimas con la misma fruición con que otra gente se siente concejal y con la misma base se dedican a sentirse llamados a más altos destinos que el resto. Si han sido alfabetizados, corremos además el peligro de que nos lean unos poemas horribles que hay que comentar diciendo "*qué-gran-sensibilidad-tienes*" porque no hay por donde cogerlos. Es mejor quedarse lejos porque, además, para sus calenturientos cerebros puedes ser parte de la universal conjura que existe contra ellos y contra su amor.

Pero la verdadera mezcla explosiva es la del elemento expansivo-reflexivo con reflexivo-introvertido. El uno cumple funciones de "*starlette*" y el otro de espectador; uno es bolo alimenticio y el otro estómago rumiante. Las tempestades explícitas tienen al elemento pasivo para subrayar la fogosidad expansiva del otro. El reflexivo-introvertido tiende a neutralizarse, adquiriendo con el tiempo una serenidad próxima al nirvana mientras que el expansivo-extrovertido llega a adquirir modos y maneras de divo ante la prensa, reforzado e imbuido de su papel de portavoz. Su separación puede dar al traste con un dificilísimo equilibrio interdependiente.

Una variación sobre el tema es la pareja formada por un hermano bastardo del mesías, dispuesto a catequizar y postular sobre prácticamente cualquier tema, con la insólita pretensión de elevar a categoría general cualquier acto. Su complementario suele estar provisto de un sentido común a toda prueba, y minimiza inmisericorde toda tentativa adoctrinadora. La lucha se establece con carácter épico-ético-trascendental por un quítame-allá-ese-cenicero o quién-puso-aquí-el-martillo-que-no-es-su-sitio, con eruditas alusiones a los significados ideológicos, porque , querámoslo o no, al hermano bastardo del mesías le resulta poco menos que imposible, vivir su vulgaridad sin interrelacionarla

con su monotemática -que suele ser la política y la psicología-, y al complementario le suelo resultar toda generalización teórica una burda maniobra de despiste, una manera como otra de no llamar al, pan, pan y al vino, vino. Pueden hacerse viejos intentando que cambie el otro, sin dar su brazo a torcer.
En cuanto a las posibles variaciones, son infinitas; cada pareja tiene rasgos de todas y es la proporción la que varía.

Por todo lo que antecede, el divorcio es una institución necesaria que nadie razonable puede objetar; ahora bien, no se aconseja como remedio general porque cada individuo que no este ocupado es un elemento perturbador en la comunidad, ya que, carente de su complementario busca apaños temporales en las orejas complacientes de sus amigos. Además un divorcio e separación, sólo abre un interregno hasta la próxima unión, variante aproximada de la anterior, porque "*a decir verdad, no sabemos renunciar a nada, sólo sabemos cambiar una cosa por otra, y lo que parece renuncia, sólo es en realidad una formación sustitutiva*" que dijo Herr Freud.

Agradezco a los monógamos sucesivos su falta de contención en la exposición y narración de las miserias vividas en pareja, y, sobre todo, a mi madre, que con una dieta rica en fósforo -sardinas-, y sus desvelos y cuidados me ha permitido experimentar, gracias al grado de resistencia adquirido, todas y cada una de estas parejas, pudiendo obtener así valiosísimo material de primera mano, en una sociología de campo que he intentado sea divulgativa y no exhaustiva, en beneficio de los lectores.

a mi no me gustan los clichés seudo sicológicos sobre parejas, pero me ha hecho gracia. Tranki q no te contaré mis cuitas, para mi lo peor es q ahora, muchas veces me aprece que se usan frases de las revistas femeninas, o así. Todo muy cliché o no cliché.
y a mi la burbuja q se foma entre dos personas, incluso entre los amigos, entre grupos diversos, me sigue apreciendo misteriosa, dificil de entender desde fuera.
tb pienso q cada uno sabemos de verdad nuestras vivencias, el resto es intentar ser chupasangre de vivencias, y claro, a muchos les convencieron de que hay q salpicar, a cualquiera, el caso es decirlo.

Verdaderamente prodigioso, Gato. Me ha encantado y me confirma algo que hace años ya pensaba: SE CASA DEMASIADA GENTE.
Una cosa es el amor y la líbido, y otra el matrimonio y la familia. Que te sientas atraído por alguien no implica ni de lejos que haya que unirse a esa persona, ni para siempre ni para un rato.
En realidad, yo creo que a la vida de familia está "llamada" muy poca gente. El fracaso en este sentido es generalizado (menos también de lo que se difunde), y no ha hecho más que desbordarse en cuanto que los diques de la moral y las normas han comenzado a hacer aguas. En mundo relativista y carente de referentes, la familia es un despropósito salvo para gente enamorada de las causas perdidas como yo. Yo no puedo decir más que a mí me va como anillo al dedo, pero esa es otra historia...

Muy buen católogo, sí señor, pero un poco pesimista ¿no crees? Es un hecho empírico (por tanto no un dogma de fe)que a veces la vida (pero pocas) regala uniones estables anti burocráticas que funcionan a base de amistad y complicidad y de mucho esfuerzo y ganas de dialogo (como todo). Pero, en general, es como lo pintas.

Amigo Cyránobix: infieres que a) se casa demasiada gente y yo pienso que se deberían de casar más gente; y b) que el matrimonio y la familia no es lo mismo que el amor y la líbido, y estoy de acuerdo: nada es menos erotizante que el estatus conyugal. Respecto al peligro que corren los diques de la moral y las normas que ponen a salvo la familia del ímpetu arrollador del amor libre, tranquilo, que la basca lleva tatuado a fuego en el alma "viva las caenas" porque el sentimiento amoroso es un atavismo de derechas de toda la vida.
Amigo dinosaurio: una vez estuve escarbando con un palito en las heces de un niño que cuidaba porque se había tragado un pendiente de rubíes de su madre, hasta que lo encontré. ¿HUIR DEL HURACÁN?

¿Huir del huracán?

Yo crecí en una casa de adobe y piedra, fresca en verano y cálida en invierno. Había un fuego bajo y nos solíamos sentar alrededor a descansar: mirábamos las llamas que nunca son rojas ni amarillas ni azules, sino de todos los matices, de todos los colores, y al rato, la respiración se acompasaba... hablábamos y nos escuchábamos, pero no para

huir del silencio o del vacío, porque se oía la leña crepitar y el aire que entraba por el tiro de la chimenea. Al arder la madera, se aromaba la cocina con la resina quemada. Envueltas en brasas, se asaban castañas, patatas, y en el puchero, sobre unas trébedes, cocía lentamente el potaje. En verano refrescábamos la casa abriendo puertas y ventanas para hacer corriente de aire al caer la noche, y por la mañana temprano cerrábamos bien. Mis padres habían llegado a América con sus padres desde Europa, pero éramos tan americanos como los descendientes del Myflower aunque fuéramos pobres.

Cuando me casé con un orgulloso Teniente del Ejército, creí mejorar porque nos fuimos a vivir a una casa nueva, limpia, sin fuego bajo que ahumara las paredes, que eran delgadas. Para el frío había calefacción y para el calor, aire acondicionado.

Vivíamos cerca de la base, y todos los niños jugaban a ser héroes y soldados como sus padres. Johnny y Patrick eran gemelos, nunca se separaban, risueños y fuertes como el acero y besucones y mimosos como bebés, me embromaban diciendo que su padre era mi novio y que yo me sonrojaba cuando escuchaba la llave en la cerradura.

Mis hijos fueron a la Universidad... y fueron unos maravillosos estudiantes que traían notables y sobresalientes, pero siempre tenían tiempo para salir de excursión o tocar con su grupo de folk, que sonaba como una carraca...

Hasta que unos malnacidos decidieron enviarlos a matar y a morir en Vietnam.

Johnny no volvió y Patrick llegó sin brazos, y tan diferente que llegué a dudar que fuera él durante las tres semanas que estuvo entre la vida y la muerte en el Hospital Militar. Le dieron el alta y lo trajimos a casa para "recuperarse". El brazo derecho era un muñón rojizo a la altura del codo y el brazo izquierdo había desaparecido junto con una parte del hombro. Al llegar a casa se sentó en su cama, y miró alrededor como ido. Luego vino a la cocina y nos miró a su padre y a mí como si no supiera quienes éramos, con las pupilas desenfocadas por culpa de las malditas anfetaminas, que les daban a los soldados para quitarles el miedo, y la sed, el hambre y cualquier rasgo humano.

Nos dijo en voz baja:

—*¿Sabéis que he encontrado la solución para no orinarme encima?* Y sonrió dulcemente, se acercó y puso su cabeza en mi hombro para que lo abrazara. Su padre nos abrazó a los dos y rompimos a llorar. Patrick, entonces, en ese preciso momento, volvió a ser el muchacho que se había ido: su rostro se relajó y nos dijo la frase de un cuento infantil, que se había convertido en una broma entre nosotros:

—*"¡Eh! ¿No son estos los valientes que asustan al miedo, al pánico y al terror?"*

Nos sonrió con ternura y dijo —*"Me voy a dar una vuelta"* Ya no dudé, sólo podía ser él.

Y nunca volvió. Se suicidó tirándose desde el puente viejo al paso del tren.

Enfermó mi marido y vendí la casa para pagar el tratamiento y la hospitalización. Murió en el hospital y no se tuvo que enterar que no teníamos casa a la que regresar, porque en nuestro país, una enfermedad se lleva por delante los ahorros de toda una vida. Los que habían combatido en Vietnam hacía años que eran parias para la Administración que había declarado la guerra y se les escatimó todo, menos la

humillación. Como ahora ocurre con los que mueren o vuelven mutilados de Irak, de Afganistán, evitan hasta las fotos de los cientos de ataúdes que llegan clandestinos, para ser enterrados sin ceremonias. Y a las familias se les exige que lloren a escondidas, como si hubieran muerto en una reyerta de borrachos.

Ahora vivo en una caravana vieja varada en medio de la nada, y hace años que no tengo coche adonde engancharla.

Cuando tengo frío o se me atraviesa la congoja en la garganta, me abrigo con la bandera de los Estados Unidos, la que estuvo sobre el ataúd de Johnny, que me entregaron después de su funeral.

A mi marido, a mis hijos, y a todos los patriotas que creyeron que luchaban por América esos malnacidos les estafaron su buena fe, su sentido del deber, del honor y de la decencia. ¡Maldita sea su estirpe! ...Y a mí no me han dejado ni el miedo para huir del Katrina.

CARTA ABIERTA DE MICHAEL MOORE A GEORGES W. BUSH

Las vacaciones se acabaron... Una nueva carta abierta a George W. Bush

Querido Sr Bush:
¿Tiene Usted idea donde están todos nuestros helicópteros? Cinco días después del paso del huracán Katrina y todavía millares de personas siguen atrapadas en New Orleans y necesitando transporte aéreo. ¿A qué lugar de la tierra habrá mandado todas nuestros recursos militares? ¿Necesita usted ayuda para encontrarlos? Una vez yo perdí mi coche en un estacionamiento y no me quiero acordar del mal rato que tuve.

¿Tiene Usted, además, alguna idea sobre donde están todos nuestros soldados encargados de proteger nuestra nación? Porque realmente podríamos usarlos justo ahora para el tipo de tareas para la cual ellos se alistaron, como la ayuda en desastres nacionales. ¿Cómo es que no están allí?

El jueves pasado estaba en el sur de Florida sentado al aire libre mientras que el ojo del huracán Katrina pasó sobre mi cabeza. Era solamente de categoría Uno , pero ya era bastante fuerte. Once personas murieron y, a fecha hoy, todavía hay miles de hogares sin energía eléctrica. Esa noche el metereólogo dijo que esta tormenta se dirigía hacia New Orleans. ¡Entonces era jueves! ¿Alguien se lo dijo a usted?

Sé que a usted no le gusta interrumpir sus vacaciones y sé que a usted no le gusta oír malas noticias. Además, tenía que ir a ver a sus proveedores de fondos electorales e ignorar y difamar a las madres de los soldados muertos.¡Usted si que las puso en su lugar!

Me gustó, especialmente, cómo, el día después del huracán, en vez de volar a Luisiana, usted voló a San Diego al partido con sus amigos empresarios y benefactores. No deje que la gente le critique por ello, después de todo, el huracán era muy potente y qué podría hacer usted, ¿poner su dedo en el dique?

Y no escuche a los que, en los próximos días, revelen cómo usted redujo específicamente los presupuestos para el cuerpo de ejército de ingenieros destacados en New Orleans el pasado verano y por tercer año consecutivo.

Usted les dice recortó muy poco el dinero para asegurar esos diques, además, estos ingenieros tenían un trabajo mucho más importante de construcción: ¡EL EDIFICIO DE LA DEMOCRACIA EN IRAQ!

El pasado día 3, cuando usted finalmente terminó sus vacaciones en su rancho, tengo que decir que me conmovió cómo hizo que su piloto de la Fuerza Aérea descendiera de las nubes mientras que volaban sobre New Orleans para que usted pudiera echar un rápido vistazo del desastre.

Vale, yo sé que usted no podría haber parado por alli, coger un megáfono, y entre las ruinas actuar como un comandante en jefe. ¿Para qué? ¡Si ya había pasado por alli!

Habrá los que intentarán politizar esta tragedia e intentar utilizarla contra Usted. Sólo se preocupe de que lo suyos les desacrediten. No le preste apenas interés. No les responda. Ni siquiera a esos científicos que predijeron que esto sucedería porque el agua en el golfo de México cada vez esta más caliente y más caliente, con lo que una tormenta como esta es inevitable. Ignore su cacareo sobre el cambio del clima. No haga caso a ninguno de ellos. No hay nada inusual en un huracán de fuerza 4 que de lado a lado alcanzaría desde Nueva York a Cleveland.

No, Sr. Bush, Usted ha estado en su sitio. No es su problema que el treinta por ciento de New Orleans viva en la pobreza o que diez mil personas no tuvieran ningún transporte para salir de ciudad. ¡Así es el mundo, son negros!, esto no tiene nada que ver con lo que sucedió en Kennebunkport **(1)** . ¿Puede usted imaginarse lo que es dejar a la gente blanca en sus azoteas por cinco días? ¡No me haga reír! ¡La raza no tiene nada - NADA – que ver con esto!

¡Siga en lo mismo, Mr. Bush. Trate de encontrar unos cuantos de nuestros helicópteros militares y envíelos para allá. Haga como si la gente de Nueva Orleans y de la costa del Golfo fuera de Tikrit.

Afectuosamente suyo, Michael Moore

Las fuerzas de la naturaleza son incontrolables, nadie puede culparle a usted de lo sucedido con Katrina. Su único error, señor mío, es que quede al descubierto frente al mundo la falta de operativos en caso de emergencia y el pésimo sistema sanitario de esta gran nación suya, nada más, el resto lo hizo el huracán, no es su culpa. Impresionantes testimonios.

Pero, en fin, yo he currado con ejércitos (estadounidenses, italianos, españoles,...) en catástrofes naturales y bueno, quizás, es posible que, a lo mejor, no sean, exactamente, los más eficaces para este tipo de labores de intervención en incidentes críticos. A lo mejor lo que se necesitaba ahí no era ejército....

(¿a que me ha quedado muy "polait" para ser un insumiso que ha visto meter la pata hasta los cojones (literalmente) a cientos de soldados mientras intentaban dedicarse a algo que no era lo suyo?. Es que a mí, cuando quiero ser políticamente correcto, no me gana ni Bono...).

Besos dulces.

Lo malo és que esas bolsa de pobreza esta´n compuestas por miles i miles de personas con nombres y con vida. He visto salir al sr. este y a otros dos ex-presidentes del pís más rico del mundo en televisión llamando a la ayuda de las empresas privadas y esto me hace pensar quien en realidad gobierna en el mundo. he visto una sociedad conlas pistolas en la mano y capaces de meter un tiro en la cabeza a quien se hacercase a los restos de su propiedad privada, como si en casos como estos en que sobrevivir dependé de una botella de agua aún existiera el tan aclamado y protegido derelo a la proìedad privada que aclama su constitución. terribe.

Luis, que fino y qué diplomático eres, cómo se nota que eres psicólogo: nadie diría que piensas que la inteligencia militar es un contrasentido in extremis, que si es militar no puede ser inteligencia y si es inteligencia no puede ser militar. Miclael Moore es casi tan ponderado como tú y tampoco se le nota ¿verdad?

2. Hay tontos con balcón a la calle y hay tontos con megáfono y cámara de cine. Michael Moore pertenece a la segunda categoría. Desear que, después del huracán, aterrice Bush en Nueva Orleans es ensañamiento con las víctimas. Por cierto, parece inferirse que a este memo (a Moore no a Bush) le dan patatuses por cualquier cosa. TENGO EL CABALLO EN LA PUERTA

Tengo el caballo a la puerta,
¿te quieres venir conmigo?.
Yo no te obligo.
Sólo te brindo ocasión
de darte en mi soledad
una casa, un corazón
y un cariño de verdad.

¿Qué no quieres...? Allá penas.
Mientras yo tenga en mis venas
sangre de piropo y ronda;
mientras, por mas que se esconda,
no haya mujer que resista
este pase de conquista
de los vuelos de mi capa;
mientras la flor que se tapa
con clavel y celosía
se asome a verme pasar
pensando en la Vicaría;
y mientras de par en par
se abran a mi reclamo
el corazón donde llamo
y la boca donde toco...
a mi se me importa poco
que quieras o que no quieras
ser dueña de mi fortuna.
Hay mucha espiga en las eras
para pensar sólo en una

Y mira lo que te digo:
un día deje la luna
porque no quiso venir
conmigo.

Y no me costó ninguna
fatiga romper cadenas.
Con esto quiero decir
que a ti, que no eres la luna,
me costará menos pena
dejarte, si lo prefieres.

Me sobran a mí mujeres.

De modo que tú dirás;
si me das el sí, tendrás
beso blando, brazo fuerte,
casa, cariño y corona
y, si es preciso, mi muerte
por defender tu persona.

¿Qué no quieres...?
No hay que hablar
de olvidos ni sufrimientos:
que tengo yo muchos vientos
por donde poder volar.
Y me iré calle adelante,
sin fatiga y sin desplante,
con una copla de mayo
saltando en el corazón
mientras me acompaña el son
el paso de mi caballo:

-Voy a la esquina a cambiar
por una rosa otra rosa,
y a ver quien lo va a notar;
que si una rosa es hermosa...
la otra... no se queda atrás

En fin; no quiero hablar más
de lo que ya no precisa
más explicación.

Mi corazón va deprisa
y no le gusta perder
tiempo en la conversación,
mientras se pueda entender
a besos por los balcones,
Y, torero sin fracaso,
pueda torear al paso
cinturas y corazones.

Ya lo sabes; junto al río
tengo un huerto de limones
Y un arroyito de frío
que va sembrando canciones.
Y en la loma
tengo un blanco caserío
como una blanca paloma
que se asoma
para beber en el río

Y entre arrayán y romero
un beso sin estrenar
que está diciendo “me muero”

porque no puede aguardar.

Y creciendo junto a una
rosita sin jardinero
tengo la flor de un “te quiero”
para tu pelo de luna

Todo esto, junto al río,
en mi cabaña desierta
Piénsalo bien, amor mío...
Tengo el caballo a la puerta .

COMO HAY DIOS...

Esta vez no voy a pensar en nadie, bastante he pensado en los demás...

Dejé de ir a la escuela porque había que escoger entre mi hermano y yo; me ocupé de la casa y me hice modista a domicilio para no dejar desatendida a mi familia; cuando me casé, entregué mis ahorros a mis padres en vez de comprar los muebles al contado...

Y en mi matrimonio... mi marido nunca encuentra nada y tengo que ir detrás para recoger lo que va dejando tirado; mis tres hijos me obsequian con un autismo interrumpido por exigencias y quejas. Ahora también aguanto a los dos yernos y a la nuera, que se creen que soy la niñera de sus hijos. Cuatro veces al día he de recoger y dejar a los críos en la guardería y en los colegios.

No encuentro ni un momento para mí, para andar sin que parezca participar en una maratón de marcha atlética. Tengo más de sesenta años y mientras todas mis amigas tienen celulitis, yo tengo piernas de tenista y brazos de levantadora de pesas.

Sé que debería haberlo avisado, haberlo hablado, hacerles comprender... pero llevo tantos años resignada a su egoísmo y a la incomunicación...

Les dolerá mi decisión, pero esta vez me he plantado firme como una roca y mañana es el día. No sé qué harán con mis nietos, quien los irá a buscar; no sé qué hará mi marido cuando se levante y no encuentre el desayuno ni la ropa lista; no sé qué harán mis hijos sin la niñera de guardia... Mañana no estaré. Ya no tiene vuelta de hoja y no tengo remordimientos. De lo único que me arrepiento es de todo lo que no he hecho en

mi vida por pensar en los demás. ¿Y en mí, quién piensa?

Esta vez soy yo quien les obsequiará con la política de los hechos consumados y el silencio.

Hace años que pienso "Cualquier día...", pero ya lo he decidido: será mañana, aunque se hunda el mundo.

¡Mañana, cómo hay Dios, me voy a la peluquería para que me hagan un tatuaje y me pongan mechas!

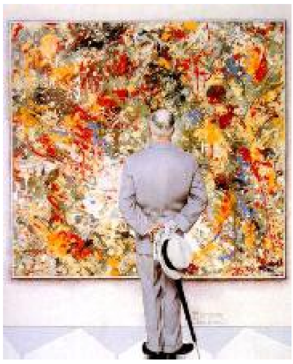
AJENO



Largo se le hace el día a quien no ama
y él lo sabe. Y él oye ese tañido
corto y duro del cuerpo, su cascada
canción, siempre sonando a lejanía.
Cierra su puerta y queda bien cerrada;
sale y, por un momento, sus rodillas
se le van hacia el suelo. Pero el alba
con peligrosa generosidad,
le refresca y le yergue. Está muy clara
su calle, y la pasea con pie oscuro
y cojea en seguida porque anda
sólo con su fatiga. Y dice aire:
palabras muertas en su boca viva.

Prisionero por no querer, abraza
su propia soledad. Y está seguro,
más seguro que nadie porque nada
poseerá; y él bien sabe que nunca
vivirá aquí en la tierra. A quien no ama,
¿cómo podemos conocer o cómo
perdonar? Día largo y aun más larga
la noche. Mentirá al sacar la llave.
Entrará. Y nunca habitará su casa.

Pero tu blog me ha dado muchos problemas para abrirse... no sé... hará falta algo más que eso para impedir que lleve a cabo mi cometido, que no es otro que el hacerte saber que tanto a ti como a otr@s os he hechado de menos, espero seguir sitiéndote latir, sé que aún no te has apagado. Hasta entonces, cuídate.

LAS FATALES CONSECUENCIAS DEL LIRISMO

Contaré toda la verdad y nada más que la verdad, lo juro.

Me casé con un hombre bueno y sensible, que escribía poesía.

Conocí a Justino en casa de mis primos cuando acababa de terminar sus estudios. Al cabo de unos días me lo encontré en el parque, llorando, y le pregunté qué le pasaba. Me contesto que era la emoción, porque era joven, había terminado Derecho, tenía un futuro prometedor y hacía un día precioso. Yo también me emocioné. *"¡Qué sensibilidad!"* —pensé.

En una de esas fases agudas de debilidad mental, típicas de la juventud, nos hicimos novios.

Me escribía cartas reflexivas desde su bufete, que empezaban siempre, siempre, con *"Mi arquetípico amor"* y me decía: *"Si las noches existen y el sueño vence mi mente y mis párpados, es porque Dios no quiere enloquecerme de amor las veinticuatro horas del día, consuetudinariamente y por siempre jamás".*

Y nos casamos con la absurda pretensión de no separarnos nunca y envejecer juntos, *“hasta que la muerte nos separe”*

Trabajé con él como secretaria en el bufete. A los dos años empecé a sentirme un poco crispada cuando en el punto y aparte de un contencioso-administrativo me lanzaba un beso con la punta de los dedos, al llegar al último *"Considerando"* me acariciaba el lóbulo de la oreja, y, al terminar el trabajo, mientras paseábamos de vuelta a casa, cogidos del brazo, me hablaba de lo importante que era el ritual de nuestro amor, refiriéndose a una sarta de cursilerías inamovibles e invariables que jalonaban el día: por la mañana, al despertarme, un beso en la mejilla y "¡Qué-guapa-estás!"; antes de comer, mientras me debatía con el sofrito, un abrazo estrujante y un beso en la nuca, y con al café, en la sala de estar, me acunaba en sus rodillas, diciéndome bobadas, imitando a un bebé de dos años con frenillo. ¡Algo horrible! A la noche, antes de cerrar: *“¿Sabes que eres mi musa?".*

Al principio, bien, pero a los dos años ya no lo aguantaba, creía que rompería a llorar, incapaz de soportar su amabilidad e incapaz de comentárselo, porque con lo bueno que era, con la sensibilidad que tenía, le haría sufrir con mis manías.

Y mira por donde, resultó que estaba embarazada y pensé, claro, que mis nervios eran la consecuencia de mi estado. Dejé de ir al bufete porque el embarazo fue difícil, y me aburría sola en casa, creí echarlo de menos; pero cuando llegaba me sacaba de quicio su melosidad. Así es que, naturalmente, decidí que eran rarezas de preñada.

Cuando nació el chiquillo y se arrodilló al lado de mi cama, llorando por ser el progenitor de aquella criatura, bendiciéndome por ser la madre de su hijo, pensé que era el ser más sensible de la tierra y yo un monstruo por no adorarlo.

Pero al cabo de un tiempo me asaltó una escrupulosa manía sistematizadora y analicé con fruición sus arrebatos líricos. Justino nunca se emocionaba porque hubiera muerto su amigo Menganito, sino que lloraba inconsolable ante *la idea* de la muerte de su amigo; no se sentía descorazonado porque a su cliente lo metieran en la cárcel diez años, sino que se iba abajo ante *la idea* de no ser capaz de salvarlo de esta suerte atroz; se despertaba angustiado, con insomnio, con *la idea* de que algún día le faltase yo. Pero no se alteraba ni se desencajaba con la visión o el relato del sufrimiento real, aunque fuese el de sus más allegados, tanto como con *la idea* del sufrimiento humano, que lo podía poner en trance sufriente hasta altas horas de la madrugada.

Siempre y cuando no tuviera que madrugar al día siguiente, porque también observé que era preferentemente viernes o sábado cuando mi adorado esposo me hacía participe de sus innegables facultades de solidaridad y me mostraba en carne viva su sensibilidad, con gran aparato de insomnio. Nunca le asaltó el prurito humanista a deshora, sin suficiente margen y sin auditorio.

El pudor no le impidió sincerarse con el bedel del Tribunal, el Juez de Primera Instancia, la señora de la limpieza del Banco, el Director de la Oficina de Registros y Patentes, el vendedor de periódicos ni con el mecánico del coche.

Todos comentaban su bonhomía, su sinceridad, su continente humano y comprensivo y su gran sensibilidad.

Cuando saludaba a alguien, da igual quien fuera, se paraba en seco, le estrechaba la mano y con la izquierda le cogía el antebrazo, como quien quiere esbozar un abrazo y

virilmente se contiene, hacía una alusión a su bondad si el saludado era proverbialmente tonto, o admiraba su tesón en el trabajo si era un malvado, y si no había por donde salvarlo, le decía mirándolo a los ojos con rendido ademán: *"Tenemos que hablar los dos".*

Una vez, que no pude más, le pregunté que por qué era tan hipócrita. Sonrió ladinamente y me dijo *"Sed mansos como palomas y astutos como serpientes".* Luego me contó: *"Pasaba Jesús con sus discípulos por un camino apartado. Iba hablando del reino de los cielos, de la misericordia divina cuando vieron el cadáver descompuesto de un perro, Juan lo sorteó sin mirarlo, con un rictus de repugnancia. Pedro dijo:-"Habrá muerto de sed, ¡pobre perro!". Lucas, horrorizado: "Hemos de vivir sabiendo que nos aguarda esto*" y así, uno tras otro, subrayaron la iniquidad del espectáculo. Sólo Cristo miró detenidamente al perro y exclamó maravillado; "¡Mirad los blancos dientes del perro!".* Así es que cuando yo decía que alguien era un imbécil o un pelmazo, me recordaba: *"¡Hay que mirar los blancos dientes del perro!"*. Así logró que todo el mundo opinase que era un hombre admirable, porque no era tan mezquino y soberbio como otros que eludían con indiferencia la inmensa morralla que cabe en cualquier grupo humano. Justino se regodeaba con ella.

Yo creo que hubiera sido menos intolerante, menos misántropa si no hubiera tenido que soportar la tolerancia de Justino, que me empalagaba.

Y por si fuera poco, escribía poesías. Llenas de sentimiento, de un lirismo arrebatado. Ningún ruego, ninguna apelación a sus más caras creencias, evitaron que padeciera el trallazo del ridículo ajeno y propio, oyéndole aquello de *"lirio de carne y llama, esposa mía"*. Dejé de acompañarlo a las reuniones donde se atisbara la posibilidad de que mi esposo recitase, pero no sé si fue peor, porque lejos de mí mirada de censura se permitía arrebatos de rapsoda que luego venían narrados en el rincón poético del periódico; *"Su sensibilidad lo traicionó y tuvo que interrumpir el poema a su esposa, y este cronista ha de reconocer que también vio alguna que otra mirada empañada entre el público."*

Tuve una temporada de *"ausente por motivos familiares"*, que se continuó con otra de estar *"delicada de salud"* y otra de *"luto"*. Se me hacia cuesta arriba salir a la calle, hablar con mis paisanos y encontrarme con lo de *"El otro día oí a tu marido; qué bonito el poema de Aniversario... ¡hay que ver cómo te quiere!"*... Me ponía roja de vergüenza, de indignación y de ridículo.

Pero yo era su auditorio privilegiado. Cuánta perorata en aquel tono delicuescente, cual émulo de San Francisco, describiendo las excelencias del hombre del tractor, del albañil "que nos hace un abrigo grande para el invierno y una sombrilla para el verano", y las bellezas de las cuadrillas de gente recogiendo ajos... Yo lo único que veía era al albañil harto de Justino, que lo entretenía de palique con riesgo de que lo viera el maestro de obras y le descontara el tiempo del salario, y que el bestia del tractor imponía a la cuadrilla un ritmo agotador. Pero entonces argüía que esa poesía, esa visión lírica transformaba el mundo y lo embellecía para quienes quisiéramos descubrirlo así. Y me daba un pellizquito en la cara.

Y un día, después de casi treinta años casados, vino a casa con un pimentero-molinillo de unos setenta centímetros de alto, muy parecido a la pata de una silla *chippendale*, con una maniobrabilidad que sólo se comprende si hubiera de servir en un refectorio de trapenses para penitencia de su gula

—"No me gusta"— le dije.

Y me espetó con semblante iluminado, beatífico:

—"¿No ves la laboriosa obra del ebanista que ha trabajado la madera, y las vetas del árbol que algún día dio sombra y cobijo a los caminantes, y que quizás fue aquél, testigo de nuestro primer "te quiero"?.."

Y le machaqué el cráneo con el pimentero, señor Juez.

Pensamientos que se me han ocurrido a medida que leía:

- A veces deseamos lo que no tenemos... pensar en que alguien, después de 2 años juntos, me dijera cariñitos al hacer el sofrito, me produce sensación de ilusión.

- Tal vez la solución para las parejas sería vivir... en pisos separados.

- No hay mayor soberbia que la que tienen los que se creen ser los más humildes. alguien dijo de unas monjas que son "castas como ángeles y soberbias como demonios". Me quedo con unas prostituta que sepa el precio de la vida.

- No hay poesía en un pimentero. El juez debe saberlo y valorarlo.

OIGO VOCES

Las primeras veces que Cosme vino de madrugada a mi cama, simplemente lo abracé y durmió conmigo.

Cuando empecé a salir del estupor que me produjo la muerte de mi marido no pude pasar por alto el comportamiento de mi hijo, que a los tres años era un niño alegre y mimoso, y no parecía haberse dado cuenta de lo que significaba la muerte de su padre.

—Papá está en el cielo— le había explicado.

—¿Está trabajando en el cielo?

El hijo de un camionero no tiene costumbre de ver a su padre a diario y para él la muerte supongo que equivalía a uno de sus largos viajes internacionales.

Después de hablarlo con su pediatra, decidí investigar porqué se venía a mi cama de madrugada.

—Oigo voces… El papá grita…

Lo abracé y con un nudo de angustia en el pecho empecé a rezar automáticamente. Esa tarde me acerqué a la Parroquia y le pedí al Padre Andrés, el amigo del alma de Antonio desde la infancia, que le dijera unas misas.

—Rezo por él todos los días… y rezo también por Cosme y por ti: me lo encargó Antonio.

— ¿Antonio...cuándo...?

—El mismo día de vuestra boda, Antonio me pidió que rezara por vosotros, y cuando nació Cosme me dijo que ahora tenía que rezar por los tres. Eso viene de cuando éramos críos y nos distribuíamos los quehaceres: el se encargaba de preparar las cañas, los anzuelo y los cebos, y yo rezaba para que nos dejaran ir a pescar el domingo; él iba a buscar morera para los gusanos de seda y yo rezaba para que no le acertaran con un tiro de sal… Antonio era el valiente de los dos...

—He estado tan encerrada en mi dolor que no he pensado que tú también lo echarías de menos… Aunque supongo que ser sacerdote te ayudará…

—Ay, Carmen, a veces creo que mi fe sólo me salva de acudir al médico para que

me atonte con algún medicamento cuando estoy a punto de romperme… Yo he perdido a mi mejor amigo, tú has perdido a tu marido y al padre de tu hijo, y no resulta fácil comprender por qué…

Todo el mundo parecía querer que cambiara de conversación cuando decía que echaba de menos a Antonio y me sentí reconfortada por su sinceridad, me sentí comprendida al fin, y pude hablar libremente.

—Echo de menos a Antonio, no siempre, no a todas horas, pero a veces estoy ensimismada dando un paseo, veo un paisaje, oigo el canto de un pájaro o escucho una canción, cualquier cosa así, y de pronto se desploma sobre mí la congoja, porque Antonio no está ahí viendo y escuchando… y no estará nunca más…

—No tengas miedo de vivir el dolor; no lo rehuyas, la única forma de salir a flote es llegar hasta el fondo…

—El hecho de poder hablar contigo me consuela… pero cuando me dicen que piense en otra cosa, que la vida sigue… me indigno, porque pienso que sería una cobardía no sentir este dolor por él…

Asintió y me abrazó con ternura. Luego me hizo mirarlo a los ojos:

—¿Me vas a contar qué es lo que qué te angustia? Hay algo más que no me has dicho ¿verdad?

—Seguramente será una tontería… Cosme se está despertando de madrugada y se viene a mi cama desde poco después de la muerte de Antonio… Es tan pequeño que no creí que se diera cuenta de nada, pero hoy le he preguntado que por qué se despierta… dice que papá grita… Me dijeron que Antonio murió en el acto, que ni se daría cuenta… pero no lo sé… o tal vez esté sufriendo donde está ahora y sólo su hijo lo oye… Quizás sólo puede comunicarse con el niño…

—¿No será más bien una manifestación de angustia del pequeñajo, que echa de menos a su padre? ¿Te pregunta alguna vez?

—No, y es tan entusiasta y tan vital todo el día que no se me había ocurrido… pero me lo ha dicho como diría que llueve o que el agua del baño quema… y, sin embargo, he sentido un escalofrío.

Pareció quedarse ensimismado un momento y sin mirarme me preguntó:

—¿Quieres que velemos el sueño de tu hijo rezando? Si Antonio… si algo nos quiere decir…

—Ven a cenar con nosotros cuando quieras, y cuando Cosme se vaya a la cama, y se quede dormido…

— Esta noche mismo, pero no hace falta que me prepares… prefiero no cenar…

Cuando Andrés llegó a casa, Cosme remoloneaba con la cena y jugaba con el pan, con el cubierto, con su pie… dispuesto a eternizarse en la mesa. Se saludaron con un "¡Hola, machote!" como siempre, y Andrés le hizo comer y reír a carcajadas. Yo tenía un nudo en el estómago. Acosté a Cosme en su camita y mientras preparaba un café, oía a Andrés contándole un cuento…

—Se ha dormido antes de que la princesa pudiera bajar del árbol…

—¿Le estabas contando el cuento del tigre cariñoso que asustaba a la princesa?

—Si… una noche que vine a cenar, oí que Antonio se lo contaba… y como también se durmió antes de terminar…la verdad es que no sé como acaba…

—Acaba con el tigre cariñoso diciéndole a la princesa miedosa: "Si prefieres hacerle caso al miedo nunca sabrás lo cariñoso que puede ser un tigre feroz." Lo inventó Antonio y no sé por qué a Cosme es el que más le gusta.

Después de tomarnos el café nos llevamos al dormitorio de Cosme dos sillas y unas velas de ánimas. Para no despertarlo rezábamos en silencio. Andrés parecía no vernos, y apenas cambió de postura, concentrado en sus oraciones que musitaba apenas. A la luz de las velas parpadeantes su rostro era el de una estatua hecha de sombras, y conforme pasaban las horas dejé de dirigir mis oraciones a Dios para rogarle a Antonio que nos dijera qué necesitaba, cómo podíamos ayudarle…

Era cerca de las dos de la mañana cuando se oyó un alarido que parecía provenir del centro mismo de la habitación de Cosme:

—¡Estas no son horas de llegar a casa!— decía una voz de hombre.

—¡Papá, ya está bien, tengo veinte años!…

—Como si tuvieras cuarenta, soy tu padre y en mi casa yo digo...

—¡Todas las noches lo mismo, papá!

Mi hijo se despertó y, dijo:

—El papá grita…

—Son los vecinos, hijo… son los vecinos… estos pisos tienen tabiques de papel…

Andrés y yo nos miramos estupefactos y al cabo de unos segundos, rompimos a reír a carcajadas, llorábamos de risa, hipando hasta dolernos el estómago, por primera vez en muchos meses...

Y en el silencio de la noche, acompañando nuestras risas, escuchamos nítidamente las contagiosísimas carcajadas de Antonio, y su hermosa risa irrefrenable, jubilosa, acompañando las nuestras, nos inundó de paz.

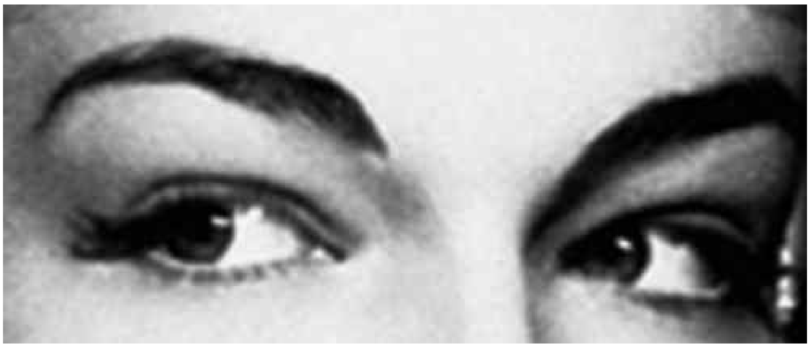
ÁGUEDA



Águeda saltó la tapia del colegio,
se bebió el vino de misa,
vio al cura sin sotana,
no confesó en Cuaresma
y se fumó la misa del domingo.
Se le nota en la cara.

Águeda se enamoró del profesor,
dibujó corazones en el mapa,
lloró de noche a escondidas,
quiso ser misionera con los negros
y tomó la determinación de ser mejor.
Se le nota en las manos.

Águeda aprendió sin recovecos,
amó como un seísmo intransitivo,
asustó la tristeza a carcajadas,
deambuló en la noche de las águedas
y danzó desnuda y sola hasta las tantas.
Se le nota en los ojos.

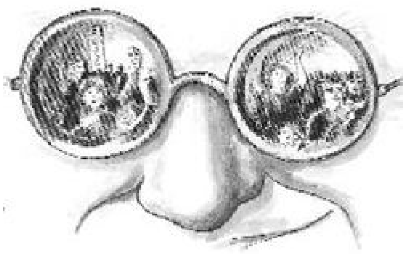
A LOS CRÍTICOS LITERARIOS.



Siempre que tengáis ocasión, salpicad los escritos que me sean dirigidos con unas cuantas alabanzas. Mi egolatría os lo agradecerá, ya que no disfruto, con la frecuencia que desearía, de halagos hechos por gente inteligente, sutil, observadora y sensible, que es la única que logra parecerme convincente en el reconocimiento de mis méritos.

Comenzar una crítica con "es magistral" probará vuestra rara perspicacia y desapasionada objetividad y, además, pareceréis mucho más inteligentes, si cabe mejora donde no hay comparación.

Dentro de los razonables límites de la más exquisita hipocresía, podéis hacerme

partícipe de los juicios que os merezca, y yo os nombro y conjuro para que deis referencias de mí, ya que una grosera creencia en la virtud de la verdad a secas ha dejado mi fama por los suelos. Durante muchos años he oído hablar de mi nefasta influencia y de mi perversidad radical, así pues, sed originales y no caigáis en el funesto vicio de la sinceridad que tanto estropea el cutis de mis coetáneos.

Y por favor, no transijáis, no penséis que una crítica constructiva haría que mi prosa fuera menos árida y el contenido más enjundioso; creedme, hasta ahora sólo he logrado extraer pedernal cuanto he querido alumbrar la esencia etérea de lo fugaz, y sólo bilis me ha procurado la inefable pretensión de señalarme lo erróneo de mi estilo.

Si, a pesar de todo, estáis dispuestos a ser veraces, sabed que vuestra indefendible pretensión no tiene más importancia cualitativa que la valoración cuantitativa que a fin de mes percibáis, ni más motivación que la ineludible mala baba que produce la pobreza, a la que estáis condenados por los cancerberos del capital social de la empresa que os paga y, en consecuencia, a esa pertinaz castidad que sólo el bienaventurado Onán suaviza, que ataca con especial rigor a los que son desagradables, pobres, pestilentes y desheredados del noble arte de Petronio. Porque ¡no me diréis de que sois elegantes y os sienta bien la ropa con el sueldo que ganáis como incorruptibles!

Bien al contrario, si mimáis a las casas editoras; si de vuestra máquina le escribir sale ambrosía para las orejas del editor —y mirad bien que no pretendo que tenga alguna importancia el escritor— si habláis con elogio de su política editorial, esos mastuerzos ignorantes que son los dueños de las editoriales sabrán recompensaros con largueza. De ahí que, en líneas generales, la dieta alimenticia os haga más lustrosos, más guapos e, indudablemente más deseables para mí, que contrariamente a mis congéneres, por lo general abnegadas y piadosas, soy proclive a encontrar más seductor y atractivo a un hombre satisfecho y listo que a un pobre patán, velando así por la preservación de lo mejor de la especie.

Por todo lo que antecede, dejo zanjada la tarea de responder civilizadamente a las críticas.

TODO LO QUE ES ESTÁ BIEN

Toda la naturaleza no es sino arte desconocido para ti,
todo azar tiene un sentido que no puedes ver;
toda discordia, armonía incomprendida;
todo mal parcial esconde un bien universal;
y, a pesar del orgullo,
y a pesar de la errada razón,
una sola verdad es clara:
todo lo que es está bien.

SE PEDIRÁ CUENTA POR LA MUERTE DE JUAN PABLO I

Capítulo 8. Violencia y terror

En convergencia con la inspección de Luciani sobre el IOR, se realizaba también la investigación del Banco de Italia sobre las actividades del Ambrosiano. Dicha investigación se llevó a efecto entre el 17 de abril y el 17 de noviembre de 1978.
"*Gelli le advirtió a Calvi que el informe estaba a punto de ser enviado por el Banco de Italia a la magistratura de Milán y, específicamente, al hombre cuyo nombre ya Gelli había anticipado en septiembre: el juez Emilio Alessandrini. De nuevo Calvi se hallaba al borde de verse expuesto a la ruina más absoluta. A Emilio Alessandrini no había forma de comprarle, Con su talento y valentía, Alessandrini representaba una amenaza muy peligrosa para Calvi, Marcinkus, Gelli y Sindona*".
El 10 de enero de 1979, Gresti, primer fiscal de la Audiencia de Milán, invita a Emilio Alessandrini a decir a un periodista lo que pueda revelar en torno al caso de Calvi. Hace pocos días que el magistrado ha recibido el informe. "*Estamos haciendo pesquisas*", informa a un redactor del semanario L'Espresso. El 26 de enero vuelve el mismo periodista: "*¿Hay noticias?*". "*Nos estamos moviendo*", dice Alessandrini. "*¿Prevé usted que se le retire el pasaporte a Calvi?*". "Podría ocurrir; eso y quizás algo más". "*¿Su detención?*". "*Me reservo la respuesta*". Tres días después, el 29 de enero, Alessandrini caía asesinado por un comando de Primera Línea.
Ciertamente, sorprende la muerte de Alessandrini. Y sorprende también la serie de asesinatos y atentados violentos con fines intimidatorios, relacionados de una u otra forma con la logia P2:
* El 21 de marzo del mismo año, es asesinado el abogado y periodista Mino Pecorelli, miembro arrepentido de la logia P2, que había publicado algunos informes sobre el escándalo del petróleo, fraude calculado en 2500 millones de dólares, cuyo cerebro había sido el propio Gelli; además, Pecorelli había elaborado una lista de 121 masones vaticanos. Pecorelli, que había prometido a sus lectores cuantiosas revelaciones sobre la P2, murió de un disparo en la boca.
* Unos meses después, el 11 de julio por la noche, al volver a su casa, es asesinado el fiscal Giorgio Ambrosoli, que, habiendo indagado sobre el "*crack*" Sindona, había comenzado a declarar el 9 de julio sobre el banquero siciliano y el día 10 había revelado operaciones ilegales de éste con un "*banquero milanés*" y un "*obispo norteamericano*", es decir, Calvi y Marcinkus, respectivamente. El 7 de julio de 1981, el gobierno italiano acusó a Sindona de ser el responsable del asesinato de Ambrosoli. En la orden de detención figuraba como uno de los tres asesinos William J. Arico, delincuente

profesional. Unas horas después del crimen, Arico estaba en Suiza. Cien mil dólares habían sido transferidos de una cuenta que tenía Sindona en la Banca del Gottardo a una cuenta que Arico había abierto a nombre de Robert McGovern en el Crédit Suisse de Ginebra con el número 415851-22-1.
*Dos días después, el 13 de julio, es asesinado, juntamente con su chófer, el teniente coronel Antonio Varisco, jefe del servicio de seguridad de Roma. Varisco seguía una investigación sobre la P2 y el 9 de julio había hablado largamente por teléfono con Ambrosoli sobre el asunto Sindona.
* El 21 de julio es asesinado Boris Giuliano, jefe del C.I.D. y superintendente de las fuerzas de la policía de Palermo. Se había entrevistado el día 9 con Ambrosoli. Giuliano fue sustituido por Giuseppe Impallomeni, miembro de la P2.
* El 12 de enero de 1981, un grupo de accionistas milaneses del Banco Ambrosiano envía al Papa Juan Pablo II una carta en la que se dice: "*Tal como ha quedado revelado por un creciente número de casos judiciales, Roberto Calvi se encuentra hoy por hoy a horcajadas, con un pie sobre la francmasonería más aberrante como es la logia P2 y con el otro en los círculos de la mafia, como resultado de haber heredado el puesto de Sindona. Todo esto se ha podido realizar a través de la actuación de hombres a los que el Vaticano protege y aplaude, como por ejemplo, Ortolani, que se mueve entre el Vaticano y los círculos más poderosos del hampa internacional. Ser socio de Calvi significa ser socio de Gelli y Ortolani, dado que ambos le guían y ejercen sobre él una vasta influencia. El Vaticano, por lo tanto, le guste o no le guste, al estar asociado con Calvi, también es un socio activo de Gelli y Ortolani*".
Calvi sabía que la carta había sido enviada al Papa y que contaba con la aprobación de su administrador general y consejero delegado Roberto Rosone. Este, que se esforzaba por limpiar el Ambrosiano, resultaría herido en un atentado el 27 de abril de 1982. En el atentado murió el chófer de Rosone, Giovanni Fattorello. Antes de que el asesino pudiera volver a tirar, el guardaespaldas de Rosone le mató de un disparo. El asesino era Danilo Abbruciati, un maleante romano, profesional del crimen organizado (secuestros, tráfico de armas y de drogas). Sólo había una explicación para que alguien a su manera tan importante hubiera ejecutado personalmente ese "*trabajo*": contentar a un cliente de gran talla. Poco después, el 18 de junio de 1982, inmediatamente después de la muerte de Calvi, el magistrado milanés Alfonso Marra le mostró a Rosone la pista que desde Danilo Abbruciati - a través de un tal Domenico Balducci - conducía a Flavio Carboni, constructor sardo, personaje turbio e inquietante que en los últimos meses se había puesto al servicio de Calvi. Rosone quedó asombrado. Para explicarse mejor, el magistrado dijo a su ayudante: "*Prepara una orden de detención contra Roberto Calvi, por intento de homicidio en la persona de Roberto Rosone*".
En una entrevista concedida al diario La Repubblica, el 22 de junio de 1982, se le preguntó a Rosone si fue su antiguo presidente quien ordenó el atentado contra él. Rosone contestó: "*No me cabe duda*". ¿Motivo? El completo desacuerdo que les separaba en todo: "*El banco, la gestión, ciertos negocios que trataba él personalmente...*".
* Unas horas antes que Calvi apareciera muerto, su secretaria Graziella Corrocher cayó desde el cuarto piso de la sede central del Ambrosiano, dejando una "*nota de suicidio*". Hay quienes piensan que fue "*suicidada*". Algo parecido sucedió unos meses después, el 2 de octubre, con Giuseppe Dellacha, ejecutivo del mismo banco.
Así pues, el año 1982 es particularmente agitado. Es el año en que estalla la crisis del Ambrosiano, el año en que muere Calvi, su secretaria y un ejecutivo del banco; el administrador general Rosone sufre un atentado. Algo muy extraño y horrible estaba pasando en el Banco Ambrosiano, una pía institución que durante años ha sido el banco de la P2: "*Calvi, su presidente, es una encrucijada de intereses que van desde Licio Gelli, el Venerable de la logia masónica, a Umberto Ortolani, banquero, especulador y brazo derecho de Gelli*".

También el año 1982 mueren Felici y Benelli, el 22 de marzo y el 26 de octubre respectivamente, "*cuando aún estaban cotejando pruebas de las enmarañadas finanzas y relaciones del IOR*". Benelli y Felici eran hombres de confianza de Juan Pablo I y estaban en el entresijo de los cambios que Luciani se proponía realizar. Se informó que murieron de infarto. Benelli, que tenía 61 años, no quiso ser hospitalizado: "*su médico le recomendó la inmediata hospitalización, pero el cardenal que conocía bien su estado, reclamó: 'Quiero morir en mi lecho'. Sólo cuando entró en coma pudo ser hospitalizado*". Tras la muerte de Felici, a la edad de 70 años, su apartamento fue sellado "*por orden de la Secretaría de Estado para proteger los posibles documentos importantes que en él se encontraran*".

*He reproducido el capítulo octavo de "**Se pedirá cuenta. Muerte y figura de Juan Pablo I**", del sacerdote católico **Jesús López Sáez**, publicado también en la página web de la **Comunidad de Ayala**, donde se puede leer completo.*
Es un libro que recoge las pesquisas llevadas a cabo por gente que se jugó la vida -los muertos son incontables entre los que preguntaron, respondieron y estuvieron cerca-, y ha quedado "olvidado" por instinto de conservación de los periodistas de investigación y por los ciudadanos, algo desbordados por la ingente cantidad de idilios y desavenencias de los famosos que fabrican en televisión.
Afortunadamente, la distancia existente entre los cristianos de base y la jerarquía católica del Estado Vaticano es abismal; sin embargo, sus métodos se asemejan a los de cualquier Estado del mundo: aniquilan a quien estorba o puede hablar demasiado.
Por eso no me extraña la orden de tirar a la cabeza sin preguntar cuando creen encontrar a quien haya ejecutado la orden de poner las bombas: podrían decir demasiado y descubrirse las extrañas conexiones con los servicios secretos, y las altas finanzas que diseñan la estrategia bélica que les interesa.
Y los cimientos de este estado de cosas están solidamente construidos con la ignorancia de los ciudadanos. .

Es indiscutible que la mafia está en el Vaticano así como la Masonería. Lo sé además porque mi mejor amigo trabaja allí en el APSA, el centro que controla todos los procesos informáticos del Vaticano. El Vaticano es una rara mezcla de santos y demonios luchando por someter o salvar el poder más antiguo de Occidente.
Hay una intención real de destruir la cultura católica, y el lugar perfecto es el Vaticano. Desde luego no se van a ir a buscar a los católicos de a pie. Aunque bastante desgaste supone ya defenderse de la bazofia sofisticada de los medios de comunicación que están arrasando con todo y tratar de mantener la fe.
En fin, ya lo decía Aquél, "el trigo y la cizaña crecerán juntos hasta el fin de los tiempos", de modo que mejor será acostumbrarse...

No se me puede olvidar como en los últimos días del Papa Juan Pablo, enfermo y muy agotado, lo obligaban a cumplir con sus obligaciones, mentira que él quisiera hacerlo, se sentía muy mal. En el vaticano está la más dura mafia católica, así como hay personas excelentes. Esta mafia, siempre sospeché (quizá es paranoia), no creo que lo enfermara y demás, pero si los creo capaces de ver que si ya era irremediable su muerte, la 'adelantaran'. En fin, las religiones son así, hechas por hombres que por mantener el poder, como los políticos, son capaces de todo.

¿CÓMO PUDE DUDAR?

¿Cómo pude dudar? ¿Cómo he podido
vivir sin vida todos estos años?
Por evitarme daños, tuve daños,
y huyendo penas, penas me han venido.

¡Cuánto tiempo, cuánto placer, perdido
en virtud, muerte, ritos tan extraños
como inflexibles, místicos engaños,
humillaciones, Dios! ¡Qué buena he sido!

Me arrepiento del tiempo en que fui buena,
viviendo sin gozar el prodigioso
fulgor del mal, quebrando mi destino.

Y ahora que su goce me envenena,
¿cómo negarse, si es tan delicioso,
o cómo retornar al buen camino?

DIRÉIS QUE ESTUVE EQUIVOCADA

Diréis que estuve equivocada
y aquel sobresalto de emoción,
el mundo asomado a su abismo,
la ternura —la irritante ternura—
aquella mano estrechada in extremis,
la risa, las miradas, las preguntas,
la voz enronquecida
—bendita sea la palabra—
y mi decisión, siempre obcecada,
de amar una vez más sin dramatismo
fue desatino, tonto interregno,
turismo emocional, frivolidad...
Y en verdad la noche es solemne,
y el sarcasmo, ungido de suicidio,
revolotea cubriendo las estrellas,
la insomne transparencia de los sueños,
su rigor y su hueco,
y ya es imposible llorar de madrugada
en el asilo tibio del abrazo
donde acojo a mi gato.

CYRÁNOBIX COMENTA A ARTHUR KOESTLER

Querida amiga: Son las 4,50 de la madrugada y no tengo nada mejor que hacer que pasarme por tu "casa".
Me encuentro con ese estupendo escrito que suscribo en gran parte y que matizo un poco.

En efecto. La adhesión incondicional hacia una ideología o religión ha generado una cantidad de crímenes descomunales y la explicación es sencilla: se trata del fanático convencimiento de haber encontrado la verdad, y por lo tanto a los demás, no les queda más remedio que aceptarla. Por las buenas o por las malas.
Lo que no comparto es que los crímenes no se cometan por egoísmo. Siempre existe el egoísmo en las acciones humanas. Siempre queremos obtener algún beneficio que nos proporcione seguridad y felicidad. Que nos permita eludir esa molesta y cruel sensación de insatisfacción que proporciona la búsqueda de la verdad, de ese modelo que permita explicar de una vez por todas esta realidad confusa, dolorosa, fragmentada. Y esa explicación da igual que se llame Dios o Lucha de Clases, lo importante es no soportar más el peso de la inseguridad. El altruísmo es puro egoísmo. Se practica en beneficio propio.
Pero sería injusto destacar exclusivamente el lado oscuro de este fenómeno y no percibir el impresionante caudal de cultura, de generosidad y de belleza que esas mismas ideologías o creencias han generado. Son muchas miles de personas las que todos los días, partiendo de su fe, entregan su vida en el mayor anonimato por todos los desfavorecidos de la tierra.
Y como no quiero seguir razonando como un S. Antonio de escayola, me paro aquí y espero que aparezcan mis enemigos sin los cuales la vida carecería del más mínimo interés.
Muchísimos besos,Gatopardo.
P.D. ¿Me permites que adoro tu cerebro?. No te alarmes, es la patochada de las 5,10. Que Dios te bendiga. Voy a ver si sumo en condiciones 2 + 2 ...
¿Te gusta Fellini?.. Lo digo por el fotograma de "Roma"...
Bueno ya me voy....

Ciránobix

Este escrito de Cyránobix me lo ha mandado por correo electrónico, y como no cabe en el espacio de comentarios, y me pirro por los colaboradores espontáneos...
En los enlaces tengo codificado a mi amigo Cyránobix como "Cristiano de guardia".
Como toda amistad que valga la pena, surgió a contrapelo, afirmándonos como jabaticos en las polémicas, pero confieso que acabó de meterme en el bolsillo cuando me soltó en un comentario: *"¡Coño! Venía a decirte que eres la primera persona de estos universos virtuales que me plantea retos. Venía a decirte que eres "una mosca cojonera", que me produces una sensación tan incómoda que me hace levantarme del sillón cada vez que apareces (...)¡No tienes consideración!¡No tienes vergüenza!¡No tienes piedad!(...)"*
Hace falta tener una osadía angelical para plantar cara a una barriobajera como yo en esos términos, con esos mimbres, tan a cara descubierta... y claro, le dije que se quejaba porque era "*más blando que la mierda de pavo*", y otras lindezas por el estilo. Y cuando la mayoría hubiera cortado la comunicación, nosotros nos empeñamos en seguir discutiendo, y acabamos siendo amigos del alma, porque "*relacionarse con el otro no es algo banal y sin consecuencias: no es cómodo, pero es lo único que nos convierte en seres humanos dignos.*"
¿O no?
PD Manuel: preferiría que la gente se pirrara por mis encantos aparentes, pero como no puede ser, me resigno a que se valore mi cerebro. Y me gustan las películas de Fellini, que modificaron mi percepción de la realidad, como toda obra de arte genuina.
Un abrazo entrañable.

El espíritu gregario es responsable de la solidaridad y la generosidad inter pares más admirable; pero no es menos cierto que también es responsable del "cooporativismo", de la anulación de los valores morales del individuo, que perdido en el grupo es capaz de realizar atrocidades que le repugnarían en conciencia estando solo: los linchamientos, las agresiones pandilleras, la imprevisibilidad destructiva de las masas, son su caricatura atroz.

Se me olvidaba: todos actuamos por compensaciones, pero el "egoísmo" no es el único componente; hay también un deseo de expiación y de sacrificio solapados en muchos actos afirmativos. Un soldado de la Legión francesa, asesino convicto y confeso en varias guerras, me confesó que despreciaba a los políticos capaces de decidir guerras pero no eran capaces de matar directamente. "Yo, al menos, he sido capaz de renunciar a la inocencia y a las manos limpias: ellos, no." Renunciar a la inocencia le parecía un sacrificio que lo enaltecía respecto a quienes se dejaban defender por él.

Agradecido que me hayas colocado en colaboraciones de lujo. Todo un honor.
Es verdad que en ciertos actos se busca una expiación, algún tipo de redención.
Otra cosa que compartimos: la afición por Fellini.
Me gusta la idea de colaborar de vez en cuando. Yo estaría encantado.
Besos.

LA PERRILLA

Es flaca sobremanera
toda humana previsión,
pues en más de una ocasión
sale lo que no se espera.

Salió al campo una mañana
un experto cazador,
el más hábil y el mejor
alumno que tuvo Diana.

Seguíale gran cuadrilla
de ejercitados monteros,
de ojeadores, ballesteros
y de mozos de traílla.

Van todos apercibidos
con las armas necesarias,
y llevan de castas varias
perros diestros y atrevidos,

caballos de noble raza,
cornetas de monte, en fin,
cuanto exige Moratin
en su poema La Caza.

Levantan pronto una pieza,
un jabalí corpulento,
que huye veloz, rabo al viento,
y rompiendo la maleza.

Todos siguen con gran bulla

tras la cerdosa alimaña;
pero ella se da tal maña
que a todos los aturulla;

y aunque gastan todo el día
en paradas, idas, vueltas,
y carreras y revueltas,
es vana tanta porfía.

Ahora que los lectores
han visto de qué manera
pudo burlarse la fiera
de los tales cazadores,

oigan lo que aconteció,
y aunque es suceso que admira,
no piensen, no, que es mentira,
que lo cuenta quien lo vio,

Al pie de uno de los cerros
que batieron aquel día,
una viejilla vivía,
que oyó ladrar a los perros;

y con gana de saber
en qué paraba la fiesta,
iba subiendo la cuesta
a eso del anochecer.

Con ella iba una perrilla,
mas, sin pasar adelante,
es preciso que un instante
gastemos en describilla:

perra de canes decana
y entre perras protoperra,
era tenida en su tierra
por perra antediluviana;

flaco era el animalejo,
el más flaco de los canes,
era el rastro, eran los manes
de un cuasi-semi-ex-gozquejo;

sarnosa era, digo mal,
no era una perra sarnosa,
era una sarna perrosa,
y en figura de animal;

era, otrosí, derrengada;
la derribaba un resuello;
puede decirse que aquello
no era perra ni era nada.

A ver pues la batahola
la vieja al cerro subía,
de la perra en compañía,
que era lo mismo que ir sola.

Por donde iba, hizo la suerte
que se hubiese el jabalí
escondido, por si así
se libraba de la muerte.

Empero, sintiendo luégo
que por ahí andaba gente,
tuvo por cosa prudente
tomar las de Villadiego.

La vieja entonces, al ver
que escapaba por la loma,
¡sus! dijo por pura broma,
y la perra echó a correr.

Y aquella perra extenuada,
sombra de perra que fue,
de la cual se dijo que
no era perra ni era nada,

aquella perrilla, sí,
cosa es de volverse loco,
no pudo coger tampoco
al maldito jabalí.

En esta pintura de Goya (inmenso Goya) vemos un uso ejemplar de aquello que "Los Que Saben" denominan "silencio pictórico".
Opino igual que Gatopardo en cuanto a la modernidad de Goya. Sordo genial, carajo.

RATON.

Debajo de un arbolito,
Cerca de la carretera.
Dentro de una ratonera,
Un día nació un ratoncito.
Su mamita y su papito,
Doña rata y don ratón,
Con mucha dedicación,
Lo cuidaban noche y día,
Y el bebecito crecía,
Sano fuerte y júguetón.

Llegó el tiempo de la escuela,
Cuadernos y borradores,
Lapicítos de colores,
Y un uniforme de tela.
Tareas hechas por la abuela.
Regaños del profesor,
Pero entre acierto y error,
Con talante y con talento,
El ratoncito del cuento,
Llegará a ser un doctor.

Al comenzar cada día,
Se amarra bien los zapatos.
Para escapar de los gatos,
Que salen de cacería.
Un perro que es policía,
Y patrulla en el sector,

Ya le ha dicho que es mejor,
Que no ande desprevenido,
Que debe ser precavido,
Si quiere un día ser mayor.

Y es que en varias ocasiones,
La muerte ha visto cerquita.
Como un día de mañanita,
Que estando de vacaciones,
Junto con otros ratones,
Al campo iban de paseo.
Cuando un gato grande y feo,
Armado con escopeta,
Con fusil y metralleta,
Formó un fuerte tiroteo.

De infarto se murió un grillo.
Y se oían gritos de miedo.
Pero el gato con su dedo,
Seguía oprimiendo el gatillo.
Nuestro amigo ratoncillo,
Pensó, de esta no me escapo.
Cuando de repente un sapo,
Bien soplado se metió,
Y tendido allí quedó,
Por querer ganar de guapo.

Celebró el gato su acierto,
Y fue a tomar la enorme presa.
Pero vaya! que sorpresa.
Que dolor. que desconcierto.
Porque el pobre sapo muerto,
Parecía una uva pasa.
A correr se dieron traza,
Los ratones del lugar,
En silencio y sin hablar,
Regresaron a la casa.

Otro día, fue una serpiente.
Que ocultando su apetito,
Se dirigió al ratoncito,
Con aire triste y doliente.
Hablando pausadamente,
Con voz trémula le dijo.
Soy un pobre lagartijo,
Que perdió sus cuatro patas,
Y vengo a ver si las ratas,
Me dan amparo y cobijo.

Obviamente el ratoncito,
No sospechaba el engaño.
Ni creía recibir daño,
De tán tierno animalito.

Se acercó poco a poquito,
Con su mirada inocente,
Pero al descubrir el diente,
Criminal de la culebra,
Saltó al lomo de una cebra,
Que dormía plácidamente.

Molesta y muy sorprendida,
Al sentir el cosquilleo,
Entre trote y corcovéo,
La cebra emprendió la huida.
Después vino la caída,
Del intrépido ratón,
Que aunque se metió un raspón,
Contra el duro pavimento,
Volvió a casa muy contento,
Dando saltos de emoción.

Una feliz circunstancia.
¡Como pocas en la vida!
Hizo que en una salida,
De las tantas de su infancia,
Encontrara en cierta estancia,
A un gracioso cachórríto.
Su pelo, era suavecito.
Los ojos, eran grandotes.
Tenía orejas y bigotes,
Mejor dicho era un gatito.

Se miraron fijamente.
El felino se acercó,
Y el ratón lo saludó,
Con un gesto reverente.
Como en casa, no había gente,
Que pudiera molestar,
Tuvieron tiempo de hablar,
Hasta que les vino en gana,
Y seis veces por semana,
Volvían al mismo lugar.

Armaban la jugarreta,
Propia de un ratón y un gato.
Después de correr un rato,
Y de sudar la camiseta,
Comían pan, comían galleta,
Bebían leche en cantidad,
El lazo de su amistad,
Era cada vez más fuerte,
Hasta que por fin la muerte,
Y lo rompió por la mitad.

Un día lleno de neblina,
Que el sol se quedo dormido,
Su amiguito tan querido,
Se murió de tos felína.
Con alas de cartulína,
Y de blanco terciopelo,
En un apacible vuelo,
Convertida en angélito,
El alma de su amiguito,
Se fue con Dios para el cielo.

Solo y ya sin el gatito,
El ratón siguió adelante.
Siguió siendo un estudiante,
Y así muy poco a poquito,
Un médico ya viejito,
Lo enseñó a ser cirujano.
A trasplantar una mano,
Una pierna un corazón,
Aprendió a la perfección,
Las técnicas del anciano.

A su consultorio un día,
Le trajeron mal herido,
Un gato viejo bandido,
Que ya casi se moría.
El ratón, lo conocía.
Cazador, de cazadores.
Que en épocas anteriores,
Le quiso quitar la vida.
Pero convocó en seguida,
A una junta de doctóres.

Es un deber del galeno,
Salvar la vida al paciente.
Muy independientemente,
De que este sea malo o bueno.
En el ejercicio pleno,
De tán noble profesión,
No cuenta la filiación,
Sexo, creencia ni raza.
La ética sobre pasa,
Toda discriminación.

A sala de cirugía
Lo trasladó de inmediato
Pero el corazón del gato
Ya ni siquiera latía
La sangre ya no fluía
Faltaba respiración

Para más complicación
Había un trauma cerebral
Todo se veía muy mal
En aquella operación

Había que hacer un trasplante
Y entre más pronto mejor
Pero el problema mayor
Era encontrar un donante
Se presentó un elefante
Un caballo y un león
Pero hecha la evaluación
No se podía con ninguno
Pues para un pecho gatuno
Era mucho corazón

Cuando ya todo indicaba
Que se iba a morir el gato
De pronto apareció un pato
Que con tristeza lloraba
Y dijo que él le donaba
El corazón de su esposa
Una pata muy hermosa
Que acababa de morir
Y más demoró en decir
Que efectuarse la cosa

Después de ocho días y un rato
De cuidados intensivos
En el mundo de los vivos
Se volvió a contar el gato
Y abrazado con el pato
Abandonó el hospital
Dejó de ser criminal
Y de matar ratoncitos
Y hoy cuida cinco patitos
Con cariño maternal

Una ratita enfermera
Asistente del doctor
Sufrió un ataque de amor
Una mañana cualquiera
Y vaya ¡quien lo creyera!
Uno pensaría que no
Mas como nadie inventó
Contra el amor la vacuna
Sin resistencia ninguna
El doctor se contagió

Y para poder curar
Tan dulce padecimiento

Solo existía un tratamiento
Que ambos debían aplicar
Fue así como en el altar
De una bella catedral
Sonó la marcha nupcial
Y gracias a san ratonio
Finalizó en matrimonio
Aquel amor sin igual

Todo es paz y armonía
Viven tiempos muy bonitos
Ya tienen dos ratoncitos
Y esperan más todavía
Deseándoles muy buen día
Aquí me despido yo
Si hubo alguien que no entendió
Debe oír con más cuidado
Y colorín clorado
Este cuento se acabó

"¿Dónde? ¿En tu cuartel o el mi ministerio?"
La foto es "antes de". Bono anda con las hormonas revueltas, hiperventilando (observad cómo está cerrando la boca para que no salga el aire propulsado por la turbina de la pasión). "A ver si hay algo más que esos ojos de mora loba con los que me retas". El reto se ve en que levanta m

El aguerrido teniente va sobrao. Es mucha la guerra, son muchas las lanzas que ha cruzado en y con el ejército."Aquí está el teniente Juan y no hay hombre para él"
Los otros dos no están a gusto. Eso se nota. La chavala está molestando. Yo creo que quiere hacerse pasar por un ficus. Y el de atrás está pensando "Mae mía del Pilar y a ver quién se escapa del teniente Juan, cuando se vaya el ministro"
¿Gatopardo, das premio?

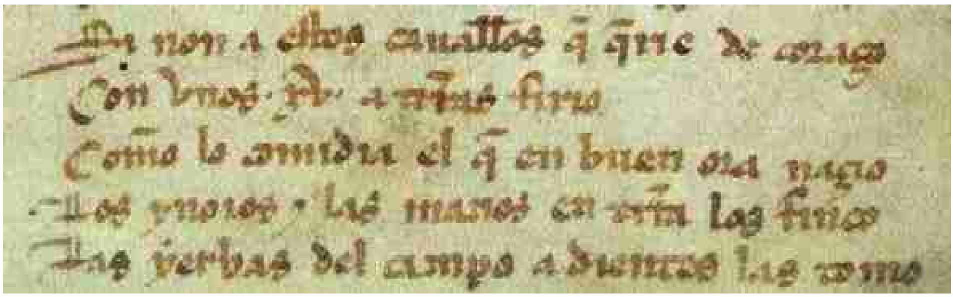
ROMANCE DEL JURAMENTO QUE TOMO EL CID AL REY



En sancta Gadea de Burgos
do juran los hijosdalgo,
allí le toma la jura el Cid al rey castellano.
Las juras eran tan fuertes, que al buen rey ponen espanto;
sobre un cerrojo de hierro y una ballesta de palo:
Villanos te maten, Alonso, villanos, que no hidalgos,
de las Asturias de Oviedo, que no sean castellanos;
mátente con aguijadas, no con lanzas ni con dardos;
con cuchillos cachicuernos, no con puñales dorados;
abarcas traigan calzadas, que no zapatos con lazo;
capas traigan aguaderas, no de contray, ni frisado;
con camisones de estopa, no de holanda, ni labrados;
caballeros vengan en burras, que no en mulas ni en caballos;
frenos traigan de cordel, que no cueros fogueados.
Mátente por las aradas, que no en villas ni en poblado,
sáquente el corazon por el siniestro costado,
si no dijeres la verdad de lo que te fuere preguntado,
si fuiste, ni consentiste en la muerte de tu hermano.
Jurado había el rey, que en tal nunca se ha hallado;
pero allí hablara el rey malamente y enojado:
Muy mal me conjuras, Cid, Cid, muy mal me has conjurado;
mas hoy me tomas la jura, mañana, me besarás la mano.
Por besar mano de rey no me tengo por honrado;
porque la besó mi padre me tengo por afrentado.
Vete de mis tierras, Cid, mal caballero probado,
y no vengas más a ellas dende este día en un año.

Pláceme, dijo el buen Cid, pláceme, dijo, de grado,
por ser la primera cosa, que mandas en tu reinado.
Tú me destierras por uno, yo me destierro por cuatro.
Ya se parte el buen Cid, sin al rey besar la mano,
con trescientos caballeros, todos eran hijosdalgo;
todos son hombres mancebos, ninguno no había cano.
Todos llevan lanza en puño y el hierro aciclado,
y llevan sendas adargas, con borlas de colorado;
mas no le faltó al buen Cid adonde asentar su campo.

EL PENDÓN VOLTERIANO Y SU COMITÉ REVOLUCIONARIO A LA CIUDADANÍA

Ciudadanos: La indolente Gatopardo, instigada por las insidias de sujeto Cyránobix y otros secuaces de la secta liberal, ha acusado al Comité Revolucionario y a su máximo representante, el Honorabilísimo Pendón Volteriano, de radicalismo, extremismo, nihilismo y misantropía. Este Comité, movido por la magnanimidad que debe presidir todo acto de justicia, ofrece a la ciudadana Gatopardo la oportunidad de retractarse, una vez haya leído y ponderado el siguiente edicto que hoy firmamos en beneficio del pueblo universal (católicos, liberales, raperos, psicólogos y flamencólogos incluidos):
I. Este Comité declara a la tropa del Duque de Ahumada, también conocida como Guardia Civil:
-Mercancía Peligrosa a efectos del Ministerio de Transportes, sujeta, por tanto a restricciones y señalización en su transporte y desplazamiento. El espíritu moderado de este comité permite que el trapo rojo de señalización, cuando hubiere lugar, sea cambiado por banderita española preconstitucional o tricornio del cuerpo.
-Enfermedad endémica del territorio español, a efectos del Ministerio de Sanidad, que aconseja a los ciudadanos mantenerse alejados de todos los lugares y acontecimientos que actúan de ecosistema de esta plaga, esto es: procesiones, desfiles militares o manifestaciones de apoyo al régimen
-Banda armada peligrosa a efectos del Ministerio de Interior, por lo cual pedimos a todo ciudadano que descubra un guardia civil o un Cuartel, lo denuncie inmediatamente a la unidad antiterrorista del Ministerio de Interior (Háganlo telefónicamente, nunca en persona)
-Colectivo de espíritu ceporro irreductible a efectos del Ministerio de Cultura que se declara vencido.
II. Considerando lo anterior, este Comité aconseja:
1. Mantenerse a prudente distancia de todo Cuartel de la Guardia Civil. Por prudente se entiende la medida de la parabólica de la trayectoria de los proyectiles de las armas que

empuñan.
2. En el caso de que, algún incauto obstinado, persista en acercarse, aconsejamos:
- Darse media vuelta
- Ir acompañado de abogado. Abogado que, a su vez, deberá ir acompañado de otro colega, que asimismo deberá también ir protegido con asistencia legal. Esto no garantiza que no los escabechen a todos a palos y patadas, pero serán más a repartir y, con suerte, el ciudadano ingenuo saldrá del Cuartel sólo con el bazo reventado.
- Llamar por adelantado a los Servicios Médicos de Urgencias, para que tengan tiempo de acabarse tranquilamente la cerveza y lleguen a tiempo de recoger los restos antes de que terminen en algún paraje de especial valor ecológico.
- Redactar sus últimas voluntades, despedirse de familiares y amigos y darle al gato una generosa ración de bonito a la plancha.

Soy el primero, amiga.
Vamos con la comida. Coincido punto por punto con tu modo de entender el placer de ingerir alimentos. Soy un auténtico artesano de la cocina. Hoy voy a preparar unas pastas absolutamente enloquecedoras. ¿Gustas?.
Y ahora la Guardia Civil.
Reconozco que nunca me han gustado los "cuerpos y fuerzas de seguridad del Estado", es decir, los garantes de que el Poder seguirá en su sitio. Los métodos varían. Por supuesto la violencia es el más antiguo y uno de los más eficaces. Sigue siendo bastante disuasorio para la mayoría. Y si no, pásate una temporada en mi instituto, y verás el método que utilizan los "líderes" de las aulas.
Pero en las sociedades democráticas y "progresistas" va siendo sustituido por otros métodos más sofisticados y que se mueven a sus anchas en los entresijos de las corrientes de opinión, es decir, de los vectores de poder que nos atraviesan cuando nuestro pensamiento está relajado (la mayor parte del tiempo).
Supongo que por eso nos enervan estas desgraciadas situaciones (van pasando de moda y se sustituyen por otras menos desagradables pero no menos eficaces ni menos repulsivas).
De todas formas, en Cuba o en China todavía te fusilan por pensar de forma diferente. Y ya ves, nuestro gobierno está la mar de contento con ambos estados.

Por si no lo sabía, el Comandante Fidel está en busca y captura y condenado por este Comité a una traqueotomía de urgencias que le impida seguir con sus discursos de 7 horas. De los chinos...Un pueblo que come perros puede fusilarse mutua, recíproca y gozosamente. No seré yo quien diga nada.

SABOTAJE A LA DEMOCRACIA

Las garantías constitucionales que impidieron en su día que la policía y la Guardia Civil actuaran en los interrogatorios mediante torturas, sin límite de tiempo, privando al detenido de los más elementales derechos humanos, no obtuvo una buena acogida entre los funcionarios acostumbrados a extraer confesiones a golpes. Exigirles un trabajo de investigación que les permita obtener pruebas que no sean meramente circunstanciales pudiendo obtener una confesión a guantazos les pareció una ofensa y una arbitrariedad. Y decidieron sabotear la democracia.

Hemos tenido ocasión de observar la irreprimible alegría con la que notifican a los propietarios de inmuebles y comercios robados, a los ciudadanos víctimas de agresiones, que no vale la pena poner denuncia porque ellos pueden detener a los sospechosos identificados por las víctimas, pero en el Juzgado los dejarán libres inmediatamente y tomarán represalias contra quien los denunció: lo cierto es que las huellas dactilares sembradas en el marco por donde han accedido los ladrones, la sangre que salpicó el cristal roto, los números de serie que identifican los electrodomésticos y el material informático robado no serán objeto de atención, análisis

y estudio por parte de los investigadores salvo en las películas, porque de lo que se trata es de crear la sensación de que estamos indefensos, de que la Ley ofrece más garantías y derechos a los delincuentes que a las víctimas, y al cabo de los años tenemos una ciudadanía que cree que este sistema de garantías procesales deja campar libremente a los criminales por culpa de unos jueces absolutamente venales, en una democracia que no vela por nuestra seguridad.

El siguiente paso lógico de los ciudadanos bienpensantes es reivindicar los derechos ilimitados para los policías y no para los detenidos.

Y sin embargo el porcentaje de población reclusa ha superado con creces la de los peores tiempos de la dictadura; y bajo custodia del Estado español en comisarías, cárceles y otras dependencias del Estado hay 261 muertes no naturales de 2001 a 2004, según el Informe de 19 de abril de 2005
Las violaciones a mujeres emigrantes en los centros de detención , los malos tratos y vejaciones a las personas más desfavorecidos de nuestra sociedad ni siquiera se investigan, a pesar de las denuncias del relator de las Naciones Unidas contra la tortura y de Amnistía Internacional.

Por eso no nos puede extrañar que las denuncias anteriores contra los funcionarios de la Benemérita de Roquetas de Mar por palizas y amenazas de muerte no siguieran su curso, y ha tenido que ser el empeño de la familia para que se le practicara la autopsia a un “*fallecido por ataque cardiaco*” en el Cuartel de la Guardia Civil, adonde había acudido pidiendo protección para denunciar amenazas de muerte, la que descubriera que fue atacado tan contundentemente por nueve guardias civiles que los forenses han encontrado cuatro causas de muerte simultáneas: rotura del esternón, aplastamiento de traquea por estrangulamiento, lesiones que provocaron fallo multiorgánico... Durante cuarenta minutos, estando en el suelo esposado de pies y manos, nueve aguerridos guardias civiles se ensañaron a patadas, golpes con porras extensibles capaces de causar las múltiples fracturas que se le produjeron, una porra eléctrica, diseñada para que con una descarga se pueda dejar sin sentido a un adulto sano, y un spray paralizante: los testigos fueron numerosos, y como es normal en un país como el nuestro donde no existe una cultura democrática se limitaron a mirar y pensar que qué bestias, lo van a matar.

Los implicados tardaron tres horas en idear la explicación más absurda posible porque no creyeron que se investigaría: había tenido un "ataque cardiaco". Cuando se les interrogó con todos los miramientos, dijeron que no hubo malos tratos, sólo intentaban esposarlo de pies y manos porque estaba con una crísis nerviosa y temían que se lesionara a sí mísmo o lesionara a los agentes...
Los ciudadanos bienpensantes que opinan que hay demasiadas contemplaciones con los delincuentes sería bueno que pensaran que les puede tocar a ellos unos cuantos energúmenos de esa calaña y con esa sensación de impunidad.

Y lo peor de todo, que sepan que ni sus gritos pidiendo socorro ni los estertores de la muerte lograrán que nadie los auxilie, porque somos un pueblo acostumbrado a secundar con nuestro silencio los desmanes de la autoridad.

¿Se acuerdan del Caso Almería?

Desgraciadamente he sido testigo y víctima de ese tipo de actuaciones, y lo único que puedo pensar es que me avergüenzo de ser español y formar parte de un pueblo desprovisto de dignidad, que es cómplice. Casi puedo entender que existan torturadores, pero que los testigos digan ahora que lo vieron todo y no se les ocurrió reacionar "porque era la Guardia Civil" dice qué clase de imbéciles morales son los ciudadanos "de orden".

Acerca del accidente de Roquetas de Mar hay que tener en cuenta que se usó la porra eléctrica solo para defender la integridad física de nueve agentes del órden ante la inusual agresividad despelegada por el agricultor esposado.
Consultad la opinión del camarero de un bar de Roquetas sobre la repercusión alcanzada por este lamentable e imprevisibe suceso, el mozo reflexionó que siendo Roquetas una populosa localidad al acto de desagravio del agricultor fallecido solo asistieron cuarenta o cincuenta personas, rematando su intervención con esta inquietante pregunta:
"¿ alguien se preguntó el por qué de la escasa convocatoria ?".
Indudablemente algo habría hecho el agricultor para verse inmerso en un episodio tan desgraciado.

Augusto: dice el valeroso Teniente que usó la porra extensible y la electrica, a pesar de estar prohibidas, porque "era lo que tenía más a mano" y que la única defensa permitida que tenía era la pistola, y no quiso usarla. Y eso a pesar de que uno de los guardias puso el dedo cuando cerraban la puerta del coche y se lo pillaron. Y el le vio el dedo espachurrado y corrió a buscar los artilugios que solía tener "más a mano"
Se nota que es un hombre ponderado y ecuánime

Claro, Gatopardo, el Teniente no hizo otra cosa que poner de manifiesto un admirable celo en la defensa y protección de la tropa a su mando. Todo un profesional. Otra cosa es que los hechos se concatenaran de una manera trágica, como sucede en tantos accidentes a los que no se les presta tanta cobertura mediática.
Además, todos coinciden en que el agricultor fallecido era un hombre corpulento...

Y mire que nos fastidia, porque es usted la demostración palpable de que no se exige un mínimo nivel cultural y de idoneidad psicológica para desempeñar su trabajo en la policía, que es lo que aquí se afirma.
Saludos cordiales

Totalmente de acuerdo, gata.
Las cosas por su nombre. Procuro no dejar mucho para mañana la vida me ha enseñado rápido. Viví deprisa como si se fuera a agotar el tiempo. A pesar de ello siempre queda algo por hacer.
Imposible, gata, que los años me dulcifiquen más la sonrisa. Tal vez lucharé para que no sea triste.

Bueno, veremos que dicen de esto tus gatas ;-)
Un abrazo cómplice y encantada de leerte a la vuelta de mi forzoso silencio.

Buenas.
Pues yo, de acuerdo, de acuerdo, no estoy.
Es decir, estoy en completo desacuerdo.
Prefiero la retórica.

Y creo que, por eso, me ha gustado este sitio.

Espero que consigan rescatar tus datos, Gata, porque el ordenador se puede sustituir, pero todo lo que puede estar almacenado en el disco duro, eso sí que duele perderlo.

Ya me extrañaba a mí que no hubieras comentado nada respecto a mi nuevo aspecto...

¿Qué me dices de la palabra "rosigar"? Provengo de una família oriunda de Caspe y esta palabra la utilizamos en frases como: "Rosiga bien las costilletas de cordero que la mejor carne es la que está más pegada al hueso". Podría también sustituirse por "rader". Un saludo!

¿Y qué me dices de la expresión:"a la remanguillé"?
:)

Un saludo!

Autor: Gabriel Veraldi-Pasquale a Mónica

Mónica: las dos palabras que aportas constan en el Diccionario de la RAE.

La palabra "rosigar", según el DRAE:

(Del lat. *rosicāre, de rosus, roído).

1. tr. Alb., Ar. y Mur. Roer, cortar superficialmente con los dientes parte de algo duro.

2. intr. rur. Ar. refunfuñar.

Y (a la)"remanguillé":

1. loc. adv. coloq. De forma desordenada. Colocaron los muebles a la remanguillé. U. t. c. loc. adj. Una habitación a la remanguillé.

2. loc. adv. De manera descuidada o imprecisa. Hizo el presupuesto a la remanguillé. U. t. c. loc. adj. Un presupuesto a la remanguillé.

3. loc. adv. De forma inadecuada. Se fueron a la remanguillé. U. t. c. loc. adj. Una despedida a la remanguillé.

En Caspe, como en otras zonas de Aragón, se usan hermosas y precisas expresiones ya arcaicas del español, que se han perdido en el resto de España por empobrecimiento del vocabulario básico.

Sigue usándolas: esas palabras fueron las que utilizaron Rojas, Lope, Quevedo...

Buenas Gabriel!
Llegué a tu página a través de la búsqueda en Google de la palabra "calcuñar" y palabra a palabra que iba descubriendo en tu recopilación provocaba un aumento en el tamaño de mi sonrisa, a la par que una vuelta a mi infancia y adolescencia. Es difícil desprenderse de palabras tan arraigadas en el vocabulario diario de uno, aunque suponga en muchos casos el desconcierto de tu interlocutor. Acto seguido y tras la risa, buscas un sinónimo que esté contemplado en el diccionario para que así te entiendan.
Cuando te has criado rodeado de expresiones como:
- Mira a fulana o mengana lo arguellá que está.
- ¡Pero qué picaraza eres! No se te escapa una; o bien,
- Ya te he avisado, como te estozoles no me vengas llorando!
es muy difícil abandonarlas.En mi caso, lo más divertido ha sido el efecto "mimetismo" que mis palabras han provocado. Quizás por el hecho de ser palabras nuevas y con una sonoridad visual muchos de mis amigos, se han adueñado de ellas. Desconocía que tu labor de búsqueda de este vocabulario era tan minuciosa y trabajada. Cosa que admiro.Así, antes de sugerirte una palabra que no he encontrado en tu recopilación y que recuerdo desde pequeña haber oído, me he asegurado de que no está contemplada

en el Drae. La palabra es: "pinganetas" que podría traducirse por terreno escarpado o bien camino de cabras. En mi casa nos decían de pequeños: No vayáis por las pinganetas que os cairéis.
Muchísimas gracias por tu respuesta e interés.
Un saludo!

Pinganetas, es una palabra derivada de "Pingar", (Del lat. *pendicāre, de pendēre).

1. tr. Apartar algo de su posición vertical o perpendicular, inclinar.

2. intr. Pender, colgar.

3. intr. Dicho de lo que está empapado en algún líquido: gotear.

4. intr. Brincar, saltar.

5. intr. rur. Ar. Alzar la bota para beber.

Pero también en bable, pinganeta se dice del caño por donde sale el chorro de una fuente; y por extensión, donde gotea y se convierte en un "esbarizaculos", una zona de "pinganetas".

Tus amistades demuestran tener mucha perspicacia al apropiarse de expresiones que otros dejaron perder para resultar "elegantes" cuando sólo son imprecisos y vulgares.

Gracias por preservar este tesoro.

SOSPECHAS RACIONALES

Desde que lo descubrí no pasa un día sin que vaya a comprobar qué parcela de la realidad ha olvidado; qué autor de mi devoción no acogió entre sus reseñas, y cuando veo nublado en cuestiones políticas y de actualidad, entro a ver qué dice y cómo lo explica. Aún no ha habido día que no salga sin un capazo de datos, parece prever qué me interesa y lo tiene ahí.
Me haríais un favor si investigáis y me contáis vuestras impresiones: cuando se os ocurra buscar algo, no vayáis a Google ni a Yahoo, mirad en la página de Miguel Moliné Escalona, o buscad en su Bitácora Almendrón, una mirada al mundo artístico, cultural y político o en los apartados de Historia y Arte, a ver si lograis detectar sus carencias, porque yo no las encuentro, y estoy con la mosca en la oreja.
Tengo sospechas racionales de que bajo esa firma individual debe de trabajar un centenar de investigadores, ensayistas y literatos de sabiduría enciclopédica y de origen extraterrestre. Otra posibilidad es que D'Alembert, Diderot y toda su pandilla no murieran y estén emboscados ahí.

Y, por favor, votadle para los premios 20 blogs, aunque tenga la culpa de que yo tenga abandonados a Google y Yahoo últimamente.

Estimado «gatopardo»:
Los elogios a la obra que intento desarrollar en la Red suelen provocarme cierta vergüenza, especialmente cuando aquéllos son tan magnánimos como los tuyos. En realidad, «recopilador» sería tal vez el calificativo que mejor me definiera.
Desafortunadamente, detrás de almendrón sólo estoy yo y de ahí la lentitud con la que avanza el sitio. En algo sí tienes razón: me persigue un sueño definido a fnales del siglo XIX, a saber, todos los saberes del mundo accesibles gratuitamente a todo el planeta. Como todos los sueños, nunca lo alcanzaré pero esta misma certeza dirige mis pasos aunque sin la ayuda de todos aquellos que, como tú, alaban mi trabajo sería mucho más dificil.
Un abrazo desde Zaragoza.

Amiga, me he pasado por aquí y me encuentro con la grata sorpresa de tus recomendaciones. He seguido la pista y acabo de colocar la página de Moliné(me encanta el apellido) entre mis favoritas.
También he podido leer tu joyita del aniversario de la Guerra Civil que me ha encantado y que te agradezco.
He leído los comentarios y me resulta entrañable que ahí sigan todos: Augusto, Roberto, Voltaire, etc...
Espero reanudar mi andadura en el blog, ¿con qué?... Esa es la cuestión.
Besos.

A cyranobix: Querido señor, yo ya sé que usted se cree San Cirano, pero yo no me creo Voltaire. Debe de ser que le sube el sofoco pío de escribir la palabra "Pendón". Quédese en paz y no despierte al confesor de guardia, porque el nombre viene de los anatemas que un correligionario suyo en Cristo me lanzó: El otrora locuaz Hermano Calavera. En fin, encantado de volverle a perseguir y, si insiste en no llamarme pendón, llámeme Diocleciano.

TODOS LOS DÍAS DE MI VIDA ME ARREPENTIRÉ...

Para Miguel Angel Aguilar y Aswad, de Albacete Literario, porque son conmovedores en su empeño.

En mi diario, una libreta de tapas azules, pegaba las noticias que me interesaban; con la furia reflexiva de los humillados respondía allí a las ofensas que la vida me hacía, escribía poemas a un amor que no existía, salvo en mi cerebro, y jugaba a describir una realidad que me sobrepasaba. Escribía mientras esperaba el metro, en los bares de barrio cuando, exhausta, me concedía un café; antes de dormir, ajustaba cuentas con la página en blanco, y a veces, releía descontenta el resultado de ese collage informe. Lo llevaba en mi bolso de acá para allá, y hoy sirve para recordarme quien fui y para no hacerle la cirugía estética al pasado: sé que no ansiaba los fines de semana para irme de fiesta, sino para dormir, escribir y leer; sé que no defendí mi libertad contra el afecto colonizador de alguna gente, sino mi soledad; sé que aceché la ternura y la amistad a descubierto, sin guardar mis espaldas, y que escapé a guarecerme de sus crueldades cuando ya estaba herida. Sé que nunca estuve de vuelta sin haber ido y he visto los

girones de esas exploraciones en las páginas amarillentas de varias docenas de cuadernos que conservo.

Sólo me falta uno: un día, al abrirlo, vi las letras escritas con saña que atravesaban el papel, hechas con un rotulador rojo de trazo muy grueso para cubrir la mayor superficie de cada página. Alguien que nunca hubiera tenido el impulso de escribir en su propio cuaderno ni consideraba que valiera la pena, se dedicó, perseverante, a cubrir mi caligrafía con una sintaxis confusa y deshilvanada para demostrar cuánto despreciaba mis ideas y mi prosa.

Todos los días de mi vida me arrepentiré de haber cogido unas tijeras muy afiladas, de quince centímetros de hoja para clavárselas hasta agotar mi rabia, hasta que la sangre, brotando como un surtidor, dejara de manar, y no haber seguido mi impulso asesino. Y como siempre en casos así, guardé mi calma helada, e hice trizas el cuaderno con las tijeras, mirándole a los ojos.

Parece ser que fue su libertad la que yo mutilé al romper aquel cuaderno en trozos minúsculos antes de tirarlo a la basura, y siempre sostuvo que al impedirle volver a emborronar mis diarios, dejándole fuera de mi vida, demostré ser una fascista redomada que practica la censura y no cree en la libertad de expresión que reivindico.

Sus epígonos siguen sin disfrutar con lo que leen y, con el equivalente de aquel rotulador rojo de trazo grueso, continuan volcando su esterilidad en las obras que serían incapaces de escribir.

Hoy pareciera que ambas miramos atrás con dolor, que quisiéramos quitarnos la espina que otros nos clavaron, que quisiéramos levantar el mentón altivas ante tanto crítico de oropel….
¿Recuerdas, amiga mía, esa ruda disertación que escribieron mis dedos arrebatados cuando yo era otra? Decía algo así: "… A estos críticos de oropel, que se orgasman de placer ante un poder majestuoso (…) quiero decirles que opinar no es utilizar como arma arrojadiza ese bien preciado que es la libertad, ni evaluar consiste en masacrar sistemáticamente cualquier atisbo de genialidad que encuentren"…
Hoy te leo la misma furia con distintas palabras y te entiendo. Y como te quiero me ofende que la lucha sea una y otra vez la misma, y que tú y yo sigamos aprendiendo doblemente las lecciones que ellos siempre ignorarán. Pero algo me ofende más aún,

amiga mía, y es que todos esos críticos te roben un tiempo, una atención y una energía, que por sus vacuas acciones y necios pensamientos no merecerán jamás.

Gato, es sorprendente como una imagen puede ser vista de mil formas distintas. La recogí hace tiempo en Internet, cuando andaba buscando mi cachorro. Y su título era "día de entrenamiento" Para mí tiene dos lecturas: el control que demuestran los perros (adistramieto aparte, hay que tener sangre fría para soportar impávidos la presencia del "enemigo" y el desprecio hacia sus "enemigos" con esos andares felinos, seguro de sí mismo y de su capacidad de huída. Yo, que quiero a los gatos y a los perros, admiro a los contendientes de la foto. Cada uno de ellos muestra lo mejor de sí mismos.
Supongo que la metáfora es muy clara para ti, llamándote Gato, pero hay otras formas de ver el mundo.

Llevo desde hace años una navaja en mi bolos, de más de cuatro dedos de larga, lo que está considerado como un arma blanca potencialmente peligrosa. He pelado manzanas, partido bocadillos y afilado lápices con ella. Y no me parece más peligrosa que una barra de labios. Esta me parece un arma más peligrosa: la astucia no tiene límites, y andar con una barra de labios en el bolso es algo que nunca he hecho. Y no llama floja a Gato, o le azuzaré a mi perro y a mi gato, que cada uno con sus armas pueden defenderla sin mayores problemas morales...
Están a tu disposición, Gato.

Hala, yo haciendo amigos como siempre: están los perros tan tranquilos y llega ese puto gato y pasa por ahí a su bola... ¡es una provocación intolerable! ¿Es que no lo veis? Es el tipo de gato que si tuviera un diario no dejaría que le escribieran con rotulador rojo y letras grandes los insultos que se les ocurriera a los analfabetos funcionales, negando así la libertad de expresión y censurándola de manera intolerable.

EL LENGUAJE DEL ABANICO

Y ahora, sinceramente, me pregunto qué ventajas tiene el ventilador y el aire acondicionado para enmascarar la idiotez, la incapacidad de decir tres frases sin meter la pata, la inteligencia de vuelo gallináceo, la conversación monotemática, la voz de pito y las faltas prosódicas...
Las damas deberíamos volver al lenguaje del abanico y los caballeros ganarían misterio, mientras lo estudian, lo aprenden, y se dedican a desentrañar el significado: cuánta vida interior , cuánta inteligencia y sensibilidad les podríamos presuponer en su expresión estupefacta.
Habría un largo periodo de gracia mientras no nos conocemos que sería recordado como la más hermosa y mágica época de nuestro amor.

Si la dama se abanica sobre el pecho lentamente, significa: *Soy soltera, no tengo novio*
Si mueve el abanico en movimientos cortos y rápidos sobre su pecho: *Tengo novio, sigue tu camino*
Si abre y cierra el abanico y lo pone en su mejilla, le indica al joven: *Me gustas*
Si coloca el abanico en su sien y mira hacia arriba: *Pienso en ti de noche y día*
Si sospecha que su amado le es infiel o lo ve hablando con otra joven, se toca la punta

de la nariz con el abanico, indicándole: *Algo no me huele bien*
Si camina impaciente de lado a lado golpeando la palma de su mano con el abanico: *Ten cuidado, cariño, por ahí viene la "carabina"*
Si abre y cierra el abanico y señala hacia el jardín: *Esperame allí mi amor, pronto estaré junto a tí*
Finalmente, si mira al joven sugestivamente cubriéndose la boca con el abanico, significa que le está enviando un beso, y obviamente, el joven sabe que él es el escogido.
Llevarlo cerrado y suspendido de la mano izquierda: *Deseo tener novio*.
Llevarlo cerrado y suspendido de la mano derecha: *Estoy comprometida*.
Abanicarse muy de prisa: *Tengo dudas de ti*.
Cerrarlo rápidamente: *Habla con mi padre, pídele permiso para verme*.
Apoyarlo cerrado en el corazón: *Te amo con locura*.
Apoyarlo cerrado en la frente: *Me eres indiferente*.
Guardar el abanico cerrado: *No salgo hoy de paseo*.
Sacarlo del bolsillo: *Saldré de casa*.
Apoyarlo abierto en los labios: *No dudes de mí*.
Apoyarlo abierto sobre el corazón: *Deseo casarme contigo*.
Dar el abanico al novio: *Mi corazón es sólo tuyo*.
Tomar el abanico del novio: *No quiero más amores*.
Abierto tapándose parte del rostro: *Todo ha concluído entre los dos*.
Dejar caer el abanico: *Sufro, pero te amo*.
Darse golpecitos en la mano izquierda: *Me eres simpático*.
Mirando con atención el paisaje: *Pienso si me convienes*.
Darse golpecitos en la mano derecha: *Te aborrezco*.
Darse golpecitos en el vestido: *Tengo celos de ti*.
Apoyarlo cerrado en la mejilla izquierda: *Soy toda tuya*.
Apoyarlo cerrado en la mejilla derecha: *Cuidado, mi familia vigila*.
Hacer como que cuenta las varillas: *Tengo que hablar contigo*.
Jugar con el abanico: *Estoy impaciente*.
Abierto, tenerlo suspendido al revés: *Sin tu amor, prefiero morir*.

¿No es sublime?

Pues está muy bien, pero falta reciclarese, amiga. Ahí va lo último en abaniqueo:
Abanicarse un callo: Soy una mujer que sufre mucho.
Abanicarse la teta izquierda:

Pertenezco a una ONG
Abanicarse el parrús (o mismísimo): Soy intercultural
Abanicarse las dos orejas: Cuénteme su vida, caballero
Sacarle el ojo al galán con el canto del abanico: No aguanta usted una broma.
Y hay más...

Cualquier lector avezado caerá en la cuenta que el texto no es mas que una componenda de otros, excusa de "Gatopardo" para excretar sus particulares fobias y humores, y, reincidente, defecar su retahíla de menosprecios gratuitos; odios que alimentan otros odios.
¿Acaso "Gatopardo" pretende ayudar a construir un mundo mejor, a recuperar ciertos valores perdidos en la actualidad en el juego de la seducción tal y como se plantea en el lenguaje del abanico? Lo dudo. La forma en que se plantea la cuestión pone el centro de gravedad en la idiotez y otras taras que, pudiendo ser compartidas, extiende urbi et orbi, como si fueran exclusivas de este tiempo y de todos. "Gatopardo", no estaría mal que hoy, mejor que mañana, se abanicara usted como quiera, desenchufara el aire, practicara algo de coherencia y se ahorrara sus ínfulas y anatemas para otros menesteres que, estoy seguro, causas de mayor fuste encontrará. Sus lectores, al menos yo, quedaran agradecidos.

AMORES CONTRA NATURA

Lo bueno que tiene esto de ser vieja es que me puedo permitir el lujo de rechazar indignada un regalo envuelto en papel de diseño personalizado, con una nota emocionada y emocionante, si al abrirlo me encuentro con un libro del pelmazo Saramago o del nefando Paulo Coelho... lo peor es que toda mi vida he gastado la misma falta de contemplaciones con los autores que odio.
Mis amores literarios siempre son contra natura, porque si tengo una fobia insuperable en esta vida es la que me provoca el trato personal con cualquiera que se dedique a la inconveniencia de escribir. Intimar con intelectuales me parece una depravación del mismo género que la coprofagia. Con esto quiero decir que cuando recomiendo a un autor no es porque sea amigo mío, y aunque adore sus textos y me arruine buscando su obra jamás he dejado de rehuir la ocasión de conocerlos, y cada vez que he hecho una excepción me he arrepentido.
Sin embargo, me pregunto de qué pasta estará hecho José Luis Alvite, me gustaría saber si tiene la voz teñida de nicotina y etilismo, la mirada amarilla de ictericia y si escucha como un sordomudo. Podría llegar a ser amiga de quien es capaz de escribir así:

El Savoy (I)

A estas alturas creo que ya todos sabemos que el jefe del Savoy es Ernie Loquasto, un tipo escarmentado por la vida que ya sólo se da prisa para perder el tiempo. Fue él quien me dijo que «*de un tipo se sabe que es tranquilo cuando entre cigarrillo y cigarrillo, aprovecha para fumar».* Una madrugada y también me dijo que «*un buen reloj sólo sirve para que las mujeres elogien tus modales».* Acerca del matrimonio las ideas de Ernie son relativamente pintorescas. Suele decir que *«el segundo matrimonio es una manera como otra cualquiera de separar el primero del tercero»*. Algo parecido le escuché al jefe cuando una noche en el club se me dio por evocar paisajes. Ernie me miró y me dijo: *«¿El paisaje? Bobadas, Al. El paisaje sólo es lo que un fugitivo necesita para cambiar de ciudad»*. Del ex boxeador Sony *«Sweet»* Sullivan os hablé unas cuantas veces. Lleva años alejado del ring pero aún conserva secuelas de los golpes. A veces se acerca al barman del Savoy y le pregunta por el andén del tren a Chicago. En el boxeo no ahorró dinero. Gastó bastante en juergas con mujeres y dice la leyenda que un buen puñado de billetes el muy idiota los guardó en el fuego. Y cuando se dio cuenta, era un pobre diablo con el dinero

justo para necesitar mucho más. Los billetes que le quedaban dicen que los gastó en pagarle al tipo que le enseñó a contarlo. También se dice de él que el hueso más duro de su rostro es la cereza del martini. Una madrugada me contó que en sus malos tiempos tras malgastar el dinero del boxeo, espesaba la saliva en la boca para tener algo que comer. Dudo que sea cierto, pero también se corrió por ahí que Sony había compartido la dentadura postiza con un ex-jugador de béisbol. ¡Pobre Sony! Dice que «en los Buenos tiempos del Madison, yo era negro como carbón a oscuras pero tenía un dinero, muchacho, así que, ¡lo que son las cosas! las chicas me confundían con Troy Donahue». Al piano suele sentarse el entrañable Larry Williams, un tipo que en los ensimismados momentos de nostalgia, toca suave como si interpretase a Gershwin con las manos en los bolsillos. Larry se casó tres veces. De sus ex esposas lo más íntimo que conserva son números de tres teléfonos cortados.

Publicado en LA RAZÓN, 22 de enero de 2003

El Savoy (II)
Del bueno de Larry el pianista escribió en una ocasión el reportero Chester Newman: «Este tipo viajó mucho antes de recalar en el club de Ernie Loquasto. Nunca paró mucho en los sitios. Se dice de él que entraba en las ciudades buscando expresamente la salida. En un local nocturno de Baltimore todavía le recuerdan como el pianista que debutó con su última actuación. A sus pies les cuesta seguirle los pasos. Pero Larry tiene una memoria emocionada de las cosas y de los lugares por los que pasó. La noche que le conocí en el Savoy, su partitura en el atril era un mapa de carreteras».
¡Chester Newman! ¡Dios Santo!, el viejo reportero del «Clarion» lleva decenios contándole a sus lectores los crímenes de la ciudad. Dice que un tipo es interesante cuando da que hablar o cuando hace sufrir. En una ocasión acudió al asesinato de un infeliz del que nadie sabía nada. A Chester le costó cubrir un puñado de párrafos con la historia de aquel desdichado. El colofón todavía hoy resulta de una expresividad indiscutible. Escribió Chester en el «Clarion»: «El caso es que el de ayer fue un crimen sin palabras, una noticia sin texto, algo así como haberle disparado directamente a mi papelera. La víctima fue un hombre irrelevante contra el que ni siquiera había una mala excusa para dejarle vivo. Nada más examinar el cadáver, el detective Fuller dijo que en un tipo así, lo único realmente interesante es el orificio de salida».
Circulan por el Savoy muchas leyendas referidas al detective Fuller. Personalmente comprendo que Fuller no es un tipo recomendable, aunque me cuesta creer que cuando nació, su madre presentase cargos contra él. Eso dice una de las leyendas que él se encarga de fomentar, como cuando en el 74 me dijo una madrugada en el club: «*Muchacho, acabo de esclarecer el doble asesinato de la Calle 46 esquina a Broadway. Detuve a dos sospechosos. Con tres bofetadas uno de ellos confesó el crimen*». Entonces le pregunté qué había sido del otro. Y Fuller me dijo: *«¿El otro? Vamos, Al, a la cuarta bofetada, el otro acabó confesando su inocencia».*

P.D.: Y ya que le interesa tanto Bucay...¿ no se ha preguntado Ud. por qué el cuentista argentino no se aplica a sí mismo su infalible autoayuda para quitarse del dulce de leche, bajar un par de arrobas al menos y abandonar ese parecido asombroso que tiene con Sammy La Foca Loca ?

Dicen que eres ambicioso,
desleal y populista
y que no eres socialista
y encima, vas de piadoso.
No te enfades, ten presente
que Dios y yo te entendemos:
yo en Monforte de Lemos,
Dios en su trono sedente.

Tú eres un buen cristiano
desde la cabeza al ano,
tú no eres un rojazo
y alabemos al Señor
de acoger en su regazo
tan ruboroso primor.
Esa frente despejada,
esa pestaña rizada,
esos ojazos bovinos,
ese morrito mohíno,
ese piquito de oro,
ese andar tan meneante
es para Cristo un tesoro,
es la Iglesia militante.
Ecuménico es tu ojo,
te es igual facha que rojo,
democrática es tu hombría,
sea Don Juan o Luis Mejía,
y tu gusto, liberal,
quinto, cabo o general...
Gran Mariscal del Salobre,
te da igual grande que chico,
forrajeas con el rico
y te forras con el pobre.
Y respecto a las mujeres,
qué bueno, que cura eres,
eres feroz adversario
del machismo y del maltrato.
Es más, eres partidario
de que no haya ningún trato.
Es fina tu diplomacia,
no manchega, vaticana.
Hay que tener mucha gana,
hay que tener corazón
para compartir la pana
con Felipe o con Garzón.
Algún gracioso de Lepe
llámate Pepa, no Pepe.
Es mentira, es inquina,
tú te llamas Josefina
y no eres Napoleón.

SIN ROPA INTERIOR

El baño formaba parte de una liturgia que le aislaba de quien era fuera de su trabajo. El aceite esencial de lavanda había dejado lunares grasos en el agua con los que jugueteó durante quince minutos, como siempre, antes de lavarse con un jabón de aceite de espliego, untuoso, especial para pieles secas. Al final, con el chorro a presión de una ducha fría, exhaló un gemido sensualísimo, y se puso el albornoz limpio, sin frotarse con las toallas que permanecían dobladas en su sitio. Su cuerpo desnudo, perfecto, se vislumbró a través de un espejo empañado, al que dirigió el aire caliente del secador, antes de alborotar su cabello ondulado.

Pasó al vestuario y desdobló la camisa de seda blanca, que abotonó sobre su pecho desnudo; luego, sin ropa interior alguna, se puso la falda de lana de cachemira plisada, que acariciaría a cada movimiento zonas de su piel infinitamente sensibles, y la fijó al desgaire con un broche, quizás un poco demasiado alto, para permitir el vuelo de la falda que dejaría entrever su desnudez, tributo a la más ancestral tradición indumentaria en su trabajo. Con maestría hizo el lazo de pajarita, y completó su atuendo con unos calcetines hasta la rodilla y unos zapatos, que frotó con una gamuza

por puro perfeccionismo.

Antes de salir, anudó el bolso a su cintura, y se puso la chaqueta, que completaba el uniforme con el que haría aflorar las emociones más viriles.

Sólo entonces miró el reloj, y fue a formar con sus compañeros del Batallón de Alabarderos Escoceses con puntualidad británica.

NO ACATO LA SENTENCIA

No acato lo sentencia.
Pudiera ser que su justicia errara,
que el Juez, enardecido,
se confunda de reo
porque vio culpa en mis ojos,
y que el Fiscal, que actúa de oficio,
haya visto en mi risa contumacia.
Juro que la Causa
tuvo un vicio de forma,
y en la Instrucción quedó contaminado
hasta el ujier,
porque se olvidó la presunción de inocencia
de vivir sin coartadas y ningún dramatismo.

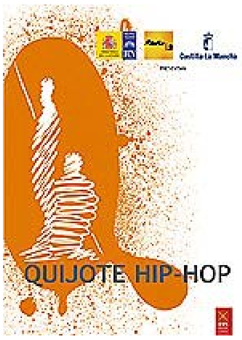
ALIMAÑA ESTUVO EN EL ESTRENO DEL HIP-JOTE



Cada día, Alimaña News trata de cubrir la información donde palpita la actualidad, y sólo la miopía elitista con la que me censura Gatopardo, evitó que se publicara en su debido momento mi crónica.

He de aclarar para los lectores, que Gatopardo tuvo a bien explicarme que "*nadie en su sano juicio creería semejante disparate*" y apostilló que ella había conocido a la que denomina "*Sosa Regás, una plasta de tía*", y a Luis Antonio de Villena, "*más empalagoso que los cruasán rellenos de crema y forrados de chocolate, untados con confitura de arándanos*", y que los creía "*capaces de cualquier necedad, pero que les atribuyas arte y parte en un Quijote en rap en la Biblioteca Nacional es excesivo*". Y para remate me dijo que los versos del poeta don Enrique del Pino los había escrito yo. (Guardo su e.mail como prueba)

Por todo lo que antecede no pudieron saber los lectores de Gatopardo que don Miguel de Cervantes ha sido superado, purgado y alicatado para llegar a colmar las expectativas de los críticos más exigentes.

Tras 20 años de trabajo, don Enrique del Pino dio a la luz 62.100 versos en décimas, de tan pristina factura como éstas:

Digo, pues, que en un lugar
de la Mancha, en un paraje
de mucho campo y paisaje
cuyo nombre no he de dar
pues no quiero recordar
semejante fantasía,
no hace mucho que vivía
un hidalgo caballero
de los que en el astillero
larga lanza se ponía...

Tenía que ser un poeta quien corrigiera el desacertado comienzo de Cervantes, tan falto de tensión dramática, y lo preñara con su lírica armonía.

Cuando se retrata la imponderable acometida de don Alonso hacia los molinos de viento, en este Quijote en verso se puede leer así:

Tras de la lanza el caballo
y tras de éste su jinete,
en menos de un periquete

y en modo tal cual si un rayo
descargara sobre un tallo
de frágil envergadura
terminó la acometida...

Al llegar a este punto, Alimaña –Redactor Jefe, lloraba transido de emoción estética.

Decía el programa de **Quijote hip hop**:

"**Organiza: Junta C-LM, Biblioteca Nacional y Radio 3. Concierto hip-hop en los Jardines de la Biblioteca Nacional**

El descubrimiento del Quijote por la cultura hip hop es el hilo conductor del espectáculo que incluye proyecciones e iluminación sobre la totalidad de la fachada del edificio.

La producción esta basada en el texto original de Cervantes y la versión en verso del poeta Enrique del Pino, e incorpora raperos, bailarines de break-dance, escritores de graffiti, djs y video jockeys.

Con la dirección musical de Frank T, el asesoramiento literario de Luis Antonio de Villena y la dirección escénica de Dani Pannullo y JmacGarin, este Quijote Hip Hop cuenta también con la participación de: La Excepción, Zenit, Korazón Krudo, Artes 1/29, el escritor de graffitti Suso 33, el polifacético Zeta a los platos y los bailarines de la Dani Pannullo Dancetheatre Co. Se trata de una producción de la Junta de Comunidades de Castilla-La Mancha, la Biblioteca Nacional y Radio 3 de Radio Nacional de España con motivo del IV Centenario de la publicación de la primera parte de El Quijote."

Los críticos, eruditos que muchas veces escatiman su admiración, no han podido sustraerse al entusiasmo y han dicho:

"Pue yo e visto el concierto y es la polla. Esta muy bien y muy buen kurrao"

PD.
Ustedes pueden recrearse en mi prosa con doblete porque a Gatopardo se le ha fundido el ordenador: pidan en sus comentarios que deje la edición de esta bitácora para los que somos profesionales, y que se dedique a otros menesteres más acordes con su edad: ganchillo, brisca, cursos de papier-maché, manualidades, Bingo en el club de Jubilados, confección de adornos con pasamanería y purpurina,tomar el fresco en la calle con las vecinas intercambiando cotilleos sobre el pueblo, y un sinfín de actividades lúdicas que no estropearían esta bitácora, que intento salvar de la mediocridad en la que

está sumida.

* **Para más información, que no mejor,"El "Hipjote" de la Mancha,"** **por Alikuekano el 7 de Junio de 2005 07:52 PM :**

Todo el mundo sabe que el Hip Hop esta de moda, los maestros de la rima y el verso callejero invaden ya muchas ondas que antes no se fijaban en ellos y ahora la cultura hiphopera esta en pleno auge (aunque como siempre muchos nada mas por moda que por verdadera afición).

Una curiosisima expresión de la nueva ola hip hop nos la ofrece el **Hipjote de la Mancha**. Tras esta idea están tres de las entidades más presentes en la efeméride de la obra de Cervantes, la Biblioteca Nacional, el gobierno de Castilla-La Mancha y RTVE, que han apostado por llevar a Cervantes donde nadie lo había hecho antes, al terreno asfaltado del verso callejero, para «desfacer entuertos» a golpe de rima. «No es una locura –adelantaba Rosa Regás, directora de la biblioteca, antes de que los periodistas le acribillaran a preguntas–, se trata simplemente de saber aprovechar las oportunidades más divertidas. Queremos introducir la cultura urbana en una novela con cuatro siglos de vida y aún con vigencia».

Titulado *«Quijote Hip Hop. ¿De qué lloras, corazón de mantequillas?»* –extraído de un fragmento del capítulo XXIX de la segunda parte del Quijote–, los resultados de este inusual proyecto podrán comprobarse en directo, en un concierto que tendrá lugar el próximo día 17 de junio en el mismo jardín y escaleras de la Biblioteca Nacional. De allí, por cierto, también saldrán la grabación de un futuro disco con los temas (que, ya han avisado los responsables, podrán oírse por separado, no como los capítulos de una novela...), un libro con textos, anécdotas y artículos, y una película documental con el material acumulado durante la producción del espectáculo. Y atentos a la nómina de colaboradores, porque la lista tiene nombres para todos, además de mucha miga. El grupo La Excepción... y los raperos Zenit, Korazón Crudo y Artes han sido los encargados de ponerle voz a los textos, que se basan tanto en la novela de Cervantes como en la versión en verso que hiciera de la misma el poeta Enrique del Pino. Y otro poeta, Luis Antonio de Villena, ha sido el encargado del «asesoramiento literario» de las canciones. La dirección musical ha recaído en el veterano Frank T (cofundador de El Club de los Poetas Violentos y productor todoterreno), que ha utilizado para los «samplers» instrumentos del Siglo de Oro tratados electrónicamente. Por su parte, el argentino Dani Pannullo –quien comenzó mezclando moda, «cabaret house», mimo, pantomima, baile japonés y otras disciplinas como el teatro y el «breakdance» y que ahora dirige su propia compañía de danza interdisciplinar– y el artista visual JmacGarin son responsables de la dirección escénica. Escritores de «graffiti» como Suso 33 –que ha participado en ARCO y en casi cualquier exposición de arte urbano que se ha hecho en los últimos años en nuestro país– y DJs y VJs (videojockeys) completan la oferta más quijotesca a la que se haya enfrentado Cervantes. ¿Se les ocurre una rima con Dulcinea del Toboso?**"**

Mi estimado señor Alimaña:
Me veo en la obligación de advertirle que parece usted haber caído presa de la dañina enfermedad egocéntrica que acaece a todos los personajes ilustres que visitan el blog de nuestra querida gatopardo, esta es, ver la paja en el ojo ajeno, que no en el propio.
Así , puedo adivinar su estado febril cuando leo asombrada que recoge comentarios para que la gata deje de escribir y no para que lo deje usted mismo, y así dedicarse a las tareas propias de su edad que entiendo serán, dedicar las mañanas a molestar a los albañiles de alguna obra cercana, y repartir las tardes entre jugar al dominó y criticar a los políticos.

Desconozco si esta enfermedad tiene cura o, como he visto en innumerables casos, le llevará irremediablemente a trasformarse en un gruñón insoportable, pero por favor, mi querido señor Alimaña, medíquese mientras aun está a tiempo.
Deseándole pronta mejoría, se despide, siempre suya… Tautina.

Venía a darte, darle, daros las gracias por el acertado comentario que acabo de leer en mi espacio.

El detalle crucial es que mi admirado Flaubert ya sabía lo que quería contar cuando escribía y que, por entregas, iba a publicarlo.

Por eso, con todo el inmenso volumen líquido en su cabeza, podía dedicarse a destilarlo lentamente, gota a gota.

Claro que dicen algunos neo-surrealistas que uno ha de escribir sin tener perfectamente claro hacia donde va.

Los -ismos y yo no nos llevamos bien.

En fin, que venía a hablar de todo esto, pero al final me importa más decirle, decirte, deciros (no sé si Alimaña y Gatopardo son...) que he sonreído y maldecido por igual al leer esta inestimable crónica.

Luis Antonio de Villena suele ser jurado de los Premios Loewe de poesía.

"Periquete" y "morrocotudo" deberían ser quemadas en la hoguera para las palabras zafias. Sobre todo si un cuento titulado "Un susto morrocotudo" gana un concurso de cuentos.

Resumiendo, la estupefacción y la rabia se hacen alambrada en mi cabeza, preparando las trincheras... porque estas ignominias hay que combatirlas.

O en otro tono, "vaya manera de tirar el dinero.... y de cagarse en Cervantes al son de las subvenciones".

No me hagan mucho caso.

Y yo que entraba a dejar la reseña del Quijote en latín macarrónico, me encuentro en mitad de una batalla de lo más salada...
Pues eso, que me lo pasé pipa leyendo el Quijote de un cura de Horche, Guadalajara, que fue castigado en su juventud a traducir al latín el primer capítulo del Quijote. Y el pater le tomó tal afición al asunto que se tradujo (resumido, eso sí) toda la primera parte. Es lectura recomendada para amantes de las versiones hunorísticas de cualquier clásico. Se recomienda tener ligeras nociones de latín. Pero si se conoce bien el Quijote, ni eso. El texto es tronchante en algunos momentos, lleno de licencias literarias. En fin,

Bueno despues de haber leido, una critica bastante falangista, me he decidido a escribir este comentario el cual espero que os abra los ojos y no como el Sr. Alimaña que os los cierra como buen falangista que es. No se te olvido acaso el "¡Arriba España!", o es que como ahora esta mal visto..?
Este señor critica aquello que nunca llegara a comprender, simple y llanamente por el hecho de pensar (si es que alguna vez lo has hecho mas de 5 minutos seguidos) que el rap, no se forma por pandilleros, y que esa gente que ves que se pegan no sienten el rap; porque debes de saber que hay mucha gente aficcionada al rap y la consideran poesia, y ademas permite competicion, porque se trata de hacer una frase una critica o un sentimiento que al otro no se le ocurriria, y siempre hay una constante evolucion.
Tambien deberias haber visto, o presenciado el Concierto HipJote para poder hablar sobre ello, y para que veas que yo te informo, no como tu que solo criticas te dejo una direccion URL y a todos vosotros para que podais apreciar lo que este tipejo, os queria esconder...

Yo no se muy bien de que cojones va este blog, pero mire en google, y salio esto y dije vamos a leerlo, pero el señorito que escribio esto hizo una critica falangista, la cual merecia ser desmentida...porque le teneis miedo al rap?? no muerde, no hace nada malo. Unica y exclusivamente es una musica de critica social, amor, y demas sentimientos como la amistad, y ademas como dije en el 1er post que escribi da rivalidad, de aver quien es mejor que el otro. Y tambien dije que el rap es poesia, y hay que valir para ello, porqueee yo una vez intente escribir una cancion (tenia motivos para ella), y la termine, la lei y la tire, y me dije a mi mismo:"Nunca mas lo intentaras".
Hay que ser bueno, muy bueno, con las palabras para hacer un buen rap...y ademas estan las improvisaciones aparte... que para eso ya hay que ser dios, y sino buscais en paginas de busqueda de informacion o videos, por ejemplo, youtube.com o google.com por batallas de gallos zatu.

Y os repito que teneis miedo a lo nuevo, darle alas y no os quedeis estancados en Chopin, que esta muy bien pero ya tienes el CD rallao.
Y para poder criticar algo hay que conocerlo, y que mejor forma de conocer la musica que escuchandola????

Y para hablarme a mi con respeto por que insultar o dejar de insultar atraves de ordenadores, cuando se le escribe a una pantalla, sin saber quien es el que escribe o el que deja de escribir, es de covardes... por que todo eso que escribiste no me lo diriais la mitad a la cara...ok???

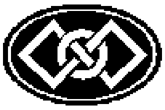
ALQUIMIA



No siempre te extrañas.
A veces conoces el exacto sentido,
la fórmula aquella escondida,
que obtuvo Cagliostro,
robó Paracelso y cinceló Cellini.
No siempre preguntas.
Miras, perfilas y grabas,
fija la mirada en ese mismo centro
—donde convergemos—
y yergues enigmas resueltos,
caducas incógnitas,
misterios sin clave.
Todo transparece, nada queda oculto.
La ternura es un universo que se sobrentiende.

A usted le he visto mirarla
arrasado en llanto y carcajadas,
solemne y frágil
como un hombre vencido y asustado
porque ella era hermosa...
Y en algún rincón de mi cerebro
le he visto escupir las palabras,
llorar de rabia y desamor,
sin aprenderse el texto ni saber el guión,
cegado por los focos
de un teatro vacío...
Yo estaba ahí
cuando usted sobrevivió a duras penas
al hueco de su cuerpo y su almohada,

insomne, acre de ausencia
porque ella pensaba en otro actor ...
Mientras usted buscaba su rastro y su mirada
borracho en algún bar de otro país,
yo he sido, para siempre,
todas las mujeres que usted no quiso amar.

NO PODRÍA DECIRLO MEJOR QUE VICTOR FLYTE

Sostengo (aunque te escucharé si piensas otra cosa); sostengo que el ser humano transciende su mera sexualidad, es decir, que la persona es más que su sexo -sea cuál sea éste y, en consecuencia, sea cuál sea su inclinación-. En este sentido, todo tipo de discriminación por razones de género o de inclinación sexual atenta contra la esencia de la persona y contra sus inviolables derechos.

Sostengo (aunque te escucharé si piensas otra cosa); sostengo que una de las diferencias básicas entre el ser humano y los animales es que para éstos últimos la procreación es una exigencia del individuo mientras que, para el ser humano, no es una exigencia del individuo sino de la especie, pudiéndose abstener de la misma determinados individuos singulares. En este sentido, es inadmisible que se califique a un gay, lesbiana o transexual -o heterosexual, en definitiva- como autor de un comportamiento anti-natura por el hecho de no orientar su vida hacia la procreación.

Sostengo (aunque te escucharé si piensas otra cosa); sostengo que el ser humano es, a pesar de los pesares, esencialmente generoso y, se mire por donde se mire, no deja de ser un acto noble que un individuo o una pareja -sea cual sea su composición- asuman el sostenimiento, educación y desarrollo de un niño o una niña que, de otro modo, se vería abocado a un orfanato, a mendigar por las calles o a morir -literalmente- de hambre.

El próximo fin de semana, y especialmente este año, la manifestación del Orgullo Gay tendrá un componente reivindicativo por la defensa de los derechos humanos. No se trata de una mera convocatoria para gays, lesbianas y transexuales sino que, entiendo, también para todas y todos los que se sientan sensibilizados por estos temas. (También tú estás convocado, aunque pienses otra cosa).

El diario de Victor Flyte

Vamos a celebrarlo: 2 de Julio: 18 horas, desde la Puerta de Alcalá a Colón y hasta que el cuerpo aguante.

Pero en Nicaragua siguen considerando delito la homosexualidad, es el único país democrático de América Latina cuya legislación castiga las relaciones homosexuales consentidas entre adultos.
Tanto Naciones Unidas como otros organismos de carácter internacional han expresado repetidamente que las leyes que penalizan este tipo de relaciones constituyen una violación del derecho a la igualdad y a la intimidad, reconocidos tanto por el Pacto Internacional de Derechos Civiles y Políticos como por la Convención Americana sobre Derechos Humanos.

El mantenimiento de esta normativa legal supone, por tanto, una violación de derechos humanos. ¡Actúa!

RESPUESTA DE PRESIDENCIA DE GOBIERNO A LAS CARTAS POR UN COMERCIO JUSTO

From: gabinete@presidencia.gob.es

Sent: Tuesday, June 28, 2005 12:00 AM
Subject: COMERCIO JUSTO

Madrid, 28 de junio de 2005

Contesto al correo electrónico que ha dirigido al Presidente del Gobierno, sobre Comercio Justo.
Quiero agradecerle su apoyo para garantizar un futuro a los pequeños agricultores de todo el mundo.
Ante todo, deseo indicarle que compartimos los valores que preconiza Intermón-Oxfam sobre el derecho de todos al trabajo y a un salario adecuado para una vida digna; la lucha contra la explotación infantil; la igualdad entre hombres y mujeres, y el respeto al medio ambiente.
Con ocasión de su intervención ante las Naciones Unidas, el pasado mes de septiembre, el Presidente del Gobierno recordó el compromiso español de incrementar la ayuda oficial al desarrollo, elevándola hasta alcanzar el 0,5% del Producto Interior Bruto al final de esta Legislatura y, así, llegar lo más rápidamente posible al 0,7%. Este esfuerzo, dijo, puede reportar beneficios a todos, porque estamos convencidos de que superar la pobreza contribuye decisivamente a establecer un patrimonio colectivo de bienes públicos mundiales. El primer bien público mundial ha de ser la paz, la salud, la calidad medioambiental, la seguridad humana, los mínimos
derechos de la condición de hombres y mujeres.
Asimismo, el Presidente añadió que: Tenemos que ser valientes, que es la única condición que se exige a los grandes esfuerzos morales; explorar reformas en las reglas del juego de la política y de la economía internacional; avanzar mucho más rápido en las normas del comercio internacional y, desde luego, dar un tratamiento mucho más generoso para resolver el problema del sobreendeudamiento externo.

Por otra parte, quiero informarle que, como consecuencia del último debate de política general en torno al estado de la Nación, celebrado en el mes de mayo, el Congreso de los Diputados ha instado al Gobierno, en
materia de Acción Exterior, entre otras acciones, a:
Continuar intensificando el diálogo político para el cumplimiento de los derechos humanos y sociales, reforzando nuestra presencia, visibilidad y un comercio justo con América Latina, e impulsando sus relaciones bilaterales
con la Unión Europea.
Trabajar activamente en la Iniciativa contra el Hambre y la Pobreza, que supone una oportunidad para recabar apoyos políticos y traducir el consenso general sobre la necesidad urgente de erradicar la pobreza y fomentar el
desarrollo humano y sostenible en acciones concretas y viables.
Finalmente, le comunico que, en los mismos términos, he escrito a todos aquellos que, como usted, se han dirigido al Presidente sobre esta cuestión.
En la confianza de que esta información pueda serle de utilidad, reciba un cordial saludo.

José Enrique Serrano Martínez.
Director del Gabinete de la Presidencia del Gobierno.

Lo que los expertos han dicho sobre el informe de Oxfam...

"Varios de los mensajes y avisos contenidos en el informe de Oxfam son objetivos de la comunidad internacional. Los gobiernos y demás actores mundiales deberían traducirlos en acciones."

- Kofi Annan, 11 de abril 2002

"Nosotros sólo pedimos reglas justas que tengan en cuenta nuestras necesidades de desarrollo y que nos permitan participar plenamente en el sistema de comercio. Oxfam ha sido activo y

útil a la hora de articular nuestras preocupaciones."

- Nathan Irumba, embajador de Uganda, Ginebra, 11 de abril

"Estoy de acuerdo con muchas de las cosas tratadas en el informe de Oxfam, pero considero que proporciona un enfoque erróneo en este momento crítico para el movimiento en contra de una globalización dirigida por las multinacionales."

- Walden Bello, director ejecutivo,
Focus on the Global South, 24 de abril

LA PARADOJA DE LOS MEXICANO-ESTADOUNIDENSES EN LA GUERRA

"En el verano de 2005, mientras miles de mexicano-estadounidenses (así como miles de nacionales mexicanos que no eran ciudadanos de EE.UU.) combatían y morían en Irak, los así llamados Minutemen cazan a trabajadores mexicanos a lo largo de la frontera y los acosan en localidades tan diversas como el sur de California y el este de Tennessee. Escudados tras el tema de la inmigración ilegal y apoyados tácitamente por políticos como Arnold Schwartzenegger, los Minutemen se suman a la larga línea de matones racistas que salpican la historia de EE.UU."

"Como dice el veterano chicano de Vietnam, Charley Trujillo: "*Nos llaman estadounidenses cuando nos necesitan para una guerra. El resto del tiempo sólo somos inmundos mexicanos*".

Así es "usados" como objetos. Y es que las crueles costumbres son dificiles de erradicar...sobre todo para estos Minutemen racistas hermanos del Ku Kuz Clan que se creen poseedores de la suprema razón y del poder; hasta ahí llegan estos barbaros.

Recuerdo que hace poco salió un comentario sobre racismo (creo que en Atlantis) y alguien dijo que todas las razas son racistas con los de otras razas. Eso es cierto, pero sigo pensando que los blancos se llevan la palma por goleada. Malo si desprecian a otros por su raza, pero peor si muestran interés, porque entonces seguro que es para explotarlos.

Fui yo, enkidu, quién lo comentó. Y apunto que no sólo los mejicanos han colaborado en las guerras americanas. Los negros en Vietnam son un recuerdo que no debemos perder de vista. Mientras en su país eran perseguidos y condenados, humillados y ofendidos, en los campos de arroz defendían a su patria o morían sin saber por qué les habían mandado al matadero.
A veces se nos olvida que las líneas ferreas americanas de principios del siglo pasado y finales del anterior se tendieron con el esfuerzo de los chino, los negros, los inmigrantes en fin, que ademas de ser perdeguido y humillados eran explotados como mano de obra barata...
Las grandes naciones se construyen, siempre, con los hombros más débiles. Por eso son ídolos de barro, que acabarán por caer...

Sabiendo cómo llegan a Norteamérica (y a España)los emigrantes clandestinos, atravesando desiertos, lanzándose al oceano con balsas y pateras, dejando cientos de

cadáveres en el camino, si crees que cuando los pilla la policía de USA y los amenzaza con dejarlos enmedio del desierto, (eso es lo que hacen) condenados a una muerte segura si no se alistan en el ejercito con comida y un sueldo, si crees que aceptan porque los hombres son una especie poco evolucionada respecto a la delicuescente sensibilidad femenina, me parece que yo no te lo voy a poder explicar. Renuncio.
Pero te ruego que preguntes y te intereses por los miles de africanos que intentan atravesar las verjas que los separan de Ceuta y Melilla y te cuenten su viaje a través del desierto, a pie, y les preguntes a ellos si alistarse en el ejercito y participar en una guerra es el destino peor que les aguarda.

Cassius Clay (o Muhamad Alí) negro y musulmán norteamericano, probablemente el más colosal boxeador de todos los tiempos (una fabulosa amalgama de poderío físico, inteligencia y arte) fué reclutado a filas para servir en Vietnam en 1967, cuando era imbatible campeón mundial de todos los pesos. Se negó a ir a esa guerra enarbolando un rotundo argumento: " a mí los vietnamitas no me han hecho nada...¿ por qué razón habría de ir a matarlos ?". Lógicamente fué vapuleado, civilmente linchado, desposeído del título de campeón mundial y se le prohibió la práctica del boxeo durante cinco años. Tiempo después y en otras circunstancias fue invitado a dar una conferencia en Harvard (o en Columbia, que más da...) y desde lo alto del estrado, frente a centenares de graduados y postgraduados en su mayoría blancos pronunció un discurso de solo dos palabras, dos palabras que muchos consideran la poesía más breve y contundente jamás dicha y escuchada. Cassius Clay (o Muhamad Alí) dijo esto: " Yo, Nosotros ".

Recuerdo a Berenice, a Trini y a Enkidu que U.S.A., Schwartzenegger (extranjero de nacimiento para más recochineo) y el Ku Klux Klan están lejos, del otro lado del oceano, al mismo tiempo que aquí en España observo que los obreros de la construcción son en su mayoría ecuatorianos, el servicio doméstico peruano y los trabajadores agrícolas magrebíes o negros subsaharianos. Casi todos explotados. Escucho a diario manifestaciones racistas en bocas de españoles "normales", "honestos" y "buenos". No nos devanemos los sesos tratando de entender el racismo y la explotación ultramarina y tratemos de resolver la que tenemos a nuestro lado o, tal vez, adentro de nosotros mismos.
Recuerdo a Gatopardo que a la guerra no solamente van hombres extranjeros y desesperados sino también nacionales bien alimentados, los mismos quizá que se alistan a las academias de policías o trabajan de porteros en discotecas, por ejemplo. La mentecatez, la fascinación por la violencia, el sadismo y la morbosa tentación de abusar de un inferior no se explica de manera tan sencilla. Y, por cierto a la guerra van tambien mujeres que disfrutan tanto como sus camaradas varones en el ejercicio de la violencia contra sus semejantes, tal como todos hemos podido ver en la abyecta invasión a Irak.

¿TOMAS E-951 SIN SABER QUE TE ESTÁS ENVENENANDO?

EFECTOS DEL E-951 EN LOS HUMANOS

Según el Dr. Louis Elsas, jefe de la Genética en la Universidad Emory en Atlanta, la fenilalanina en el E-951 puede cuadruplicarse en la placenta durante el embarazo, con el resultado de una disminución posible de 10 del cociente de inteligencia de un niño nacido bajo tales condiciones. La fenilalanina también puede provocar ataques epilépticos. El Dr. Richard Wurtman, profesor de Neuroendocrine Regulation en el Instituto Tecnológico de Massachusetts (MIT), ha presentado datos a la FDA que indican que el E-951 afecta a los niveles de fenilalanina y de tirosina en el cerebro. Esto podría afectar la síntesis de los transmisores neuronales y otras funciones corporales. En los análisis de laboratorio, el E-951 ha causado 4 tipos de tumores y muertes:

·Tumores cerebrales, Tumores de pecho, Tumores pancreáticos, Tumores uterinos.
Cuando la temperatura del E-951 excede 30 grados centígrados [la temperatura del cuerpo es de 37°C),el 10 % del metanol [alcohol de madera] en el E-951 se convierte en formaldehido [fluido de embalsamamiento] y posteriormente en ácido fórmico [toxina que se encuentra en el veneno de picadura de hormiga roja].
El E-951 puede ser el detonante ambiental no identificable para los:
Tumores cerebrales, Síndrome de fatiga crónica, Enfermedad de Lyme,PMS Síndrome premenstrual, Migraña, Depresión leve a severa, Túnel carpiano, Artritis, Vertigos de Meniere, MS [Esclerosis diseminada], Epilepsia, Desórdenes de Ansiedad / Fobia, Alzheimer, ALS (Enfermedad de Lou Gehrig), Síndrome Mialgia Eosinofilia [EMS], Tinitus, Fibromialgia, Derrame cerebral, Enfermedad del corazón, Lupus, Enfermedad Mental, Desorden de atención deficiente, y otras enfermedades "difíciles de diagnosticar".
La Diketopiperazina [DKP], un conocido portador de tumor cerebral, es un producto que se descompone del E-951. El Dr. John Olney del Washington University Medical School (Escuela de Medicina de la Universidad de Washington) en St. Louis, demuestra un 10% de incremento en las dos formas específicas de tumores cerebrales que se revelaron en los análisis de laboratorio: Astrocytomas y Glioblastomas [tumores celulares glio], ya que el E-951 salió al mercado a principios de los ochentas.
El formaldehido [fluido de embalsamamiento], un producto que se descompone del metanol [alcohol de madera] en E-951, se encuentra en la lista de químicos peligrosos del EPA.
La fenilalanina [50% de la molécula] en E-951 puede cambiar la química del cerebro y causar una convulsión, de acuerdo a los estudios realizados por el Dr. Richardo Wurtman, jefe de Ciencias del Cerebro en MIT. La fenilalanina también bloquea la producción de un neurotransmisor - serotonina, que puede resultar en un estado de ánimo cambiante; desordenes del sueño; leves depresiones de suicidio y comportamiento aberrante en algunos. Prozac y L-Tryptofan aumentan sus niveles de serotonina.
Un boletín informativo publicado por la Asociación de Niños que Nacen con Defecto demuestra que la Fenilalanina en el E-951 puede ser la responsable por los leves y severos defectos de nacimiento - incluyendo daños neurológicos permanentes.
El ácido aspártico [40% de la molécula] en E-951 puede cambiar el ADN, crea zonas huecas en el cerebro de animales de laboratorio y esta clasificado como un aminoácido neuroexcitante.
Los médicos e investigadores saben el daño que puede causar el ingerir alcohol de madera. Se ha sabido que dos cucharaditas han causado la muerte. [Cada lata de refresco ligth contiene 200 mg de E-951 puede contener tanto como 20 mg de metanol]. El efecto de metanol en los ojos, hígado, páncreas y otros órganos del cuerpo se encuentran bien documentados en la literatura científica. En la naturaleza, etanol, el antídoto de metanol, siempre esta presente para neutralizar la toxina. No existe etanol en E-951 para su protección.
El E-951 puede ser especialmente peligroso para cualquiera que tenga una condición médica preexistente, como es la diabetes.
Los fabricantes del E-951 y los fabricantes de miles de productos que contienen el endulzante falso, generosamente han financiado, en distintas maneras, las siguientes supuestas organizaciones independientes: American Diabetes Association (Asociación Americana de Diabetes), American Dietetic Association (Asociación Dietética Americana), miembros del Congreso, escuelas de medicina prestigiadas y otras. [El New York Times - 15/11/96 - informó que la Asociación Dietética Americana recibe dinero de la industria alimentaria para respaldar sus productos].

E-951 es el Aspartame o Aspartamo con que se sustituye, en miles de

productos, el azúcar , que es necesaria y beneficiosa; pero no deja tantas ganancias a las multinacionales. Informate:

- Alcohol metílico (metanol - alcohol de madera, históricamente alcohol de quemar). LA dosis letal por ingestión es de 60 a 250 ml., con toxicidad dependiente de su metabolización hepática a ácido fórmico o formaldehído. Tiene acción selectiva sobre las células retinianas pudiendo llevar a la ceguera, La expresión principal del envenenamiento es la acidosis metabólica y los síntomas aparecen por ingesta, inhalación o absorción percutánea. Alto riesgo.
El tratamiento de la intoxicación consiste en administrar otro alcohol, el etílico, que evita que se produzca el ácido fórmico, mientras el organismo va eliminando el alcohol metílico, restante, por vía urinaria, lentamente.

¿Son extrapolables los resultados obtenidos en hámsters a humanos? ¿Sí? ¿En qué medida? El experimento parece estar bien hecho, pero me pregunto, sin necesidad de experimentar con humanos, sería posible un estudio retroactivo de individuos que hayan consumido esta sustancia sustitutiva del azúcar en los últimos meses o años? Creo que difícilmente daría los mismos resultados o como mínimo algún indicio del riesgo que corren los consumidores de esta sustancia. Un saludo

Atxera: si lees el resto del artículo, donde se habla de los efectos en humanos, creo que comprobarás que los riesgos de los consumidores están en el mismo órden. Y la posibilidad de que, misteriosamente exista un sector de la población donde las patologías que eran minoritarias se hayan disparado, y coincida que sean consumidores de este edulcorante podría deberse a la casualidad... o a la ocultación de los experimentos previos de la empresa Monsanto, como han denunciado algunos científicos que trabajaron con ellos.

Gatopardo:
Si no hay experimentos con humanos no se puede extrapolar a ellos. Nosotros no somos ganster y nada indica que el empeoramiento de patologías sea causa del producto. Muchos otros productos que han producido cánceres y otras patologías en ratones de laboratorio, no han producido nada en humanos.
En pocas palabras, si no hay experimentos con humanos, no hay nada.

Bien, Juan: no se permite comercializar ningún producto de consumo humano sin los pertinentes experimentos con personas, sin embargo hay cientos de medicamentos que han pasado los controles con resultados falseados, como el que nos ocupa, o la Talidomida, que se vendió masivamente para aliviar las nauseas de las embarazadas y creaba malformaciones monstruosas en los niños. Espero que seas un maravilloso bloguero bienpensado, pero con ese "nos" que utilizas dejas pensar que estás trabajando en Monsanto, multinacional responsable del Aspartamo, del gas naranja que se usó en Vietnam como exfoliante, y que treinta años después está produciendo aún malformaciones genéticas.La lista de las atrocidades que ha auspiciado es interminable; como muestra no te pongo una página izquierdista, sino cristiana:
http://www.eurosur.org/acc/html/revista/r44/44mons.htm
La mafia y los gansteres que tú conoces por las películas son asesinos al por menor comparados con los científicos que falsean los resultados de los experimentos: y existen. Hace más de cinco años que se sabía que el Lipobay que se recetaba para bajar el colesterol creaba miastenias que llevaban a la muerte: hace sólo un año que se prohibió su venta en Europa.

Por ejemplo, el Prozac, en las pruebas previas, se demostró que, en un porcentaje nada desdeñable, inducía al suicidio y al homicidio. Tuvieron que pasar años para que el director del laboratorio que hizo las pruebas tuviera remordimientos de conciencia y contara que le obligaron a ocultar esos informes. El Prozac se receta a troche y moche y hay escritores que fueron pagados por escribir en un capítulo que un personaje tomaba Prozac para remontar la depresión. Hay cientos de productos farmacéuticos sustentados por campañas de publicidad que son nocivos. la 4ª causa de muerte en el mundo es por las reacciones adversas medicamentosas: no lo digo yo, sino cualquier médico que haya visto las estadísticas
¡Qué más quisiera yo que todo fuera mentira!

¿Por qué decís que el experimento parece estar bien hecho? Por lo que se lee, el experimento de los hamster es un chiste absoluto desde un punto de vista científico. No aparecen controles de ningún tipo. Se relatan ciertos efectos observados mezclados con la naturaleza de lo que come el sujeto, etc. Si el experimento tiene algo que ver con lo que se cuenta, el experimento no es que no sea concluyente, es que no permite sacar ninguna conclusión valiosa.

Ni siquiera se explica quién hizo el experimento, dónde se publicó, qué críticas recibió, si fue repetido en intentos independientes, etc. Así pues, no se le debe llamar experimento, sino una pérdida de tiempo.

En fin, ahora en serio, en realidad se ve que es un experimentillo de andar por casa, con pocos animales. No se pueden sacar conclusiones valiosas sobre el aspartame si la única diferencia objetiva identificable entre la alimentación de ambos grupos no es exclusivamente la presencia o ausencia de aspartame. Es de risa que a unos les den de comer una comida adaptada a las necesidades de los hamster, sus nutricubos, sus cereales... y alos otros se les da agua edulcorada con aspartame, refrescos light, galletas de consumo humano, etc, etc. Por ejemplo, el bajo peso se podría deber a la diferencia en la dieta y no tendría nada que ver con el aspartame. Otro tanto podría pasar con otros efectos.

El otro gran problema es que se identifica claramente qué comportamientos aparecen en cada grupo. Es absurdo pretender hacer un experimento objetivo si cuando observas el comportamiento o pesas a un hamster sabes a qué grupo pertenece. Las observaciones deben ser objetivas, concretas y ciegas.

Las propias hipótesis que el experimento pretende testear son una locura en cuanto a su ambición. Y no hay justificación alguna de cómo se pretende lograr. No es un experimento digno ni de una feria de ciencias infantil.

El resto de lo que se cuenta es mucho más interesante y permite tener un punto de partida para investigar y averiguar, pero el asunto de los hamster suena a un cebo acrítico absoluto.

Opino lo mismo que QQ. Leí el experimento de los hamsters y casi resulta una broma. INcluso por la redacción, me parece deducir que se trata de un ejercicio escolar. Es tendencioso decir, a priori, que se examinarán las crías que tengan «y sus defectos», sentando, de antemano, que habrá defectos. Eso NO es ciencia. Además, una prueba científica seria debe establecer una paridad e, idóneamente, aplicar un sistema de doble ciego en el que los que toman las muestras no sepan a qué animales están analizando para evitar sesgos personales. En cuanto a la alimentación de los dos grupos (que, recordemos, son hámsteres, no humanos y estos son animales muy simpáticos pero letales cuando se ponen agresivos, el que haya tenido en casa más de uno sabrá lo que es una pelea a dentelladas), es de broma. Imaginemos que ponen a doce humanos durante ocho semanas tomando dieta mediterránea y a otros doce tomando sacarina, pepsi light y mermelada. Lo raro es que sigan vivos tras ese tiempo. Y yo mataría a mi compañero de jaula. Sería mi única garantía de conseguir comida sana.

Autor: A mí también me interesa

Es un resumen de unas prácticas de laboratorio publicadas en el rincón del vago y cita la fuente. Lo que si te puedo asegurar es que el aspartame crea lesiones neurológicas espongiformes en los animales de experimentación que reciben E-951 y la misma comida que el resto, y no existe ese tipo de lesión en los que no lo ingieren.
Aquí os dejo un enlace http://presidiotex.com/asparspan/Falsificaci_n/falsificaci_n.html
Y, desgraciadamente, en Anatomía Patológica las consecuencias de ese y otros productos alimentarios y farmacéuticos se constata; pero nadie se atreverá a afirmar cuál es la causa contra todo poderoso lobby de las multinacionales a no ser que quiera acabar en el paro o acusado de buscar protagonismo por desarreglos mentales. Eso ha ocurrido demasiado a menudo.
Por cierto, los niños están tomando chucherías con aspartame (para no tener caries) y aditivos que se prohibirán en unos años: los amigos de los experimentos rigurosos pueden analizar las consecuencias metabólicas, que ya son constatables y seguir el protocolo científico, comparándolo con niños que tomen chucherías con azúcar.

DF, México — Es probable que usted, sin saberlo, esté consumiendo un maíz transgénico que es dañino incluso para las ratas. Se trata del Mon863, producido por la corporación Monsanto y autorizado en México para consumo humano. Los efectos de este transgénico fueron establecidos en un estudio realizado por la propia empresa Monsanto, que intentó ocultar los resultados, de la misma manera que se ha ocultado a los consumidores mexicanos información acerca de qué alimentos utilizan transgénicos como ingredientes.

El estudio fue revelado en Alemania por una orden judicial. En México significa un escándalo ante el cual deberá responder la Secretaría de Salud, que obsequió la autorización al Mon863 el 7 de octubre de 2003, sin realizar ninguna evaluación seria, confiando ciegamente en los datos que le proporcionó Monsanto. La dependencia responsable de este permiso fue la Comisión Federal para la Protección contra Riesgos Sanitarios (Cofepris), que estableció: "no inconveniente de comercialización para consumo humano".

Por ello, Greenpeace presentó este día una acción popular para que la autoridad aplique medidas de seguridad inmediatas y evite el consumo de este maíz en México. Esto incluye la cancelación del permiso de comercialización.

Amsterdam, Holanda — Una corte alemana ordenó al gigante biotecnológico Monsanto publicar uno de sus reportes confidenciales donde la empresa reconoce problemas con

sus semillas transgénicas. Hasta ahora, Monsanto se había negado a hacer público ese reporte, que consta de un millar de páginas y que ha estado en el centro de la atención mundial desde que sus escandolosos resultados fueron publicados por el periódico británico The Independent el pasado 22 de abril.

Con anterioridad, Greenpeace Alemania había solicitado el acceso a ese documento, apoyado en una ley europea que permite al público conocer todos los textos relacionados con riesgos asociados a los organismos genéticamente modificados. Las autoridades alemanas decidieron permitir el acceso del público al documento de Monsanto. En ese momento, la empresa entabló una demanda legal contra el gobierno, intentando congelar la publicación del texto. Ahora, con la orden judicial, el documento deberá ser publicado.

Para "Como las gasta Monsanto" Me interesa saber en qué productos se encuentra ese maíz transgénico que comentas. Y a cerca de lo demás... pues ante tanto químico, aspartame, azúcar refinada, alimentos alterados genéticamente y todo lo demás, yo confío en Dios y en sus palabras "No es lo que entra por la boca lo que contamina al hombre, pero lo que sale de la boca esto contamina al hombre... lo que sale de la boca, del corazón sale; y esto contamina al hombre, porque del corazón salen los malos pensamientos, los homicidios, los adulterios, las fornicaciones, los hurtos, los falsos testimonios, las blasfemias. Estas cosas son las que contaminan al hombre". Mateo 15:11-19
Si me pusiera a pensar de donde viene cada bocado que me como o que doy a mis hijos, si tiene azúcar, si tiene aspartame, si tiene hormonas, si tiene no sé que químicos... pues no comeríamos nada. Nosotros damos gracias a Dios por los alimentos y le pedimos que los bendiga. Muchas gracias a todos los que se preocupan por dar a conocer a los demás sus descubrimientos, el conocimiento es de provecho, pero la fe lo es aún más.
Que Dios los bendiga. Ya pasó más de un año desde que publicaron ustedes esto, pero yo apenas lo estoy leyendo. Desde Monterrey, México un saludo.

Efectivamente algunos mensajes se habian perdido, esto debido a que ahora estoy en un nuevo servidor de hosting, y en el proceso de migracion se perdieron como 200 mensajes, evidentemente solo unos cuantos corresponden a este tema, me parece que no se tomaron la molestia de ver un poco mas, se daran cuenta que tengo mas de 700 posts donde hablo de los mas diversos temas. Afortunadamente he podido recuperar practicamente todos los mensajes; asi que espero se retracten sobre sus apresuradas acusaciones.

Por si creen que es un tipo de argucia es muy sencillo verificar en lugares como netcraft la IP y el bloque donde esta alojado este dominio para que vean que no falto a la verdad, porque no tengo necesidad de hacerlo y porque honestamente el tema de los Protocolos me interesa muy poco, es solo uno mas de todos los libros que he comentado en este website.

Desde luego que no cortare sus comentarios, me resulta muy gracioso que me envien reglas de objetividad periodistica, yo no soy periodista señores, soy informatico, y he puesto esta pagina que me cuesta mucho esfuerzo y dinero! (el hosting cuesta sabian?) porque me sirve como un lugar donde anotar las cosas que hago y me interesan, cada libro que leo, cada pelicula que veo, cada programa que uso lo comento aqui, asi que basicamente escribo para mi, si le sirve a otra gente, enhorabuena; pero esa es la unica intencion de i website. Respecto a los comentarios, solo los borro cuando son sumamente ofensivos, no tienen nada que ver con el tema o son mensajes de publicidad.

Finalmente da mucho que pensar que en ambos bandos se vea tanto fanatismo, revisen bien sus ideas antes de soltar las barbaridades que he visto por alli, eso es todo.

Le miras con los ojos más bellos que haya visto
y finges ser feroz,
finge creerte,
pero buscas su mano y su sonrisa
como el único amigo que existiera.
Dejas a sus pies

CARTA DEL SUBCOMANDANTE MARCOS A LA SOCIEDAD CIVIL

Por
SCI Marcos
(CIZ) 21 de Junio del 2005

A la Sociedad Civil Nacional e Internacional:

Señora, señorita, señor, joven, niño, niña:

Ésta no es una carta de despedida. A ratos va a parecer que sí, que es una despedida, pero no. Es una carta de explicación. Bueno, eso trataremos. Originalmente esto vendría en un comunicado, pero hemos elegido esta forma porque, para bien o para mal, cuando le hablamos a usted casi siempre lo hicimos en este tono más personal.

Nosotros somos los hombres, mujeres, niños y ancianos del Ejército Zapatista de Liberación Nacional. Tal vez nos recuerde, nos alzamos en armas el 1 de Enero de 1994 y, desde entonces, hemos mantenido nuestra guerra contra el olvido y resistido la guerra de exterminio que los distintos gobiernos han emprendido, sin éxito, en contra nuestra. Nosotros vivimos en el último rincón de este país que se llama México. En ese rincón que se llama 'Pueblos Indios'. Sí, así en plural. Porque por razones que aquí no

daremos, en este rincón se usa el plural para todo: sufrimos, morimos, peleamos, resistimos.

Bueno, pues como usted bien sabe, resulta que, desde aquella madrugada del inicio del 94, hemos dedicado, primero con el fuego y luego con la palabra, nuestra lucha, nuestro esfuerzo, nuestra vida y nuestra muerte, exclusivamente a los pueblos indios de México, al reconocimiento de sus derechos y su cultura. Era lógico, los zapatistas somos abrumadoramente indígenas. Indígenas mayas, para ser más precisos. Pero no sólo, los indígenas en este país, no obstante haber sido la base de las grandes transformaciones de esta Nación, siguen siendo el sector social más agredido y más explotado. Si con alguien se han ensañado las guerras militares, y las guerras disfrazadas de ’políticas’, de despojo, de conquista, de aniquilamiento, de marginación, de ignorancia, es con los indígenas. La guerra en contra nuestra ha sido tan intensa y brutal que se ha convertido en lugar común el pensar que los indígenas sólo saldrán de su condición de marginación y pobreza, si dejan de ser indígenas... o si están muertos. Nosotros hemos estado luchando ’por no morir y no dejar de ser indígenas. Hemos luchado por, vivos e indígenas, ser parte de esta Nación que se ha levantado sobre nuestras espaldas; de la que hemos sido los pies (casi siempre descalzos) con los que ha caminado en sus momentos decisivos; de la que hemos sido los brazos y manos que han hecho dar fruto a la tierra, y han levantado las grandes construcciones, edificios, iglesias y palacios de los que se enorgullecen los que tienen todo; de la que, con palabra, mirada y modo, es decir, cultura, somos la raíz.

¿Estamos lloviendo sobre mojado? Quizás es porque estamos en Junio, el sexto mes del año. Bueno, sólo queríamos señalar que el inicio de nuestro alzamiento no fue sólo un ’Aquí estamos’, gritado al oído de una Nación sordomuda por el autoritarismo de arriba. Fue también un ’Esto somos y seguiremos siendo... pero ahora con dignidad, con democracia, con justicia, con libertad’. Usted lo sabe bien, entre otras cosas, porque nos ha acompañado desde entonces.

Desgraciadamente, después de más 7 años empeñados en ese camino, en abril del 2001, los políticos de todos los partidos políticos (principalmente del PRÍ. PAN y PRD) y los autodenominados ’tres poderes de la Unión’ (o sea la presidencia, el congreso y los jueces) se aliaron para negarle a los pueblos indios de México el reconocimiento constitucional de sus derechos y su cultura. Y lo hicieron sin importarles el gran movimiento nacional e internacional que se levantó y unió con ese objetivo. La gran mayoría, incluidos los medios de comunicación, estaban de acuerdo en que debía saldarse esa deuda pendiente. Pero a los políticos no les importa nada que no les deje dinero y rechazaron la misma propuesta de ley que habían aprobado años antes, cuando se firmaron los Acuerdos de San Andrés y la Cocopa hizo una propuesta de reforma constitucional. Lo hicieron porque pensaron que, pasado un poco de tiempo, a todos se les olvidaría. Y tal vez a muchos se les olvidó, pero a nosotros no. Nosotros tenemos memoria y fueron ellos: el PRI, el PAN, el PRD, la presidencia de la república, los diputados y senadores y los jueces de la Suprema Corte de Justicia de la Nación. Sí los pueblos indios siguen hoy en el sótano de esta Nación y siguen padeciendo el mismo racismo de hace 500 años es por ellos. No importa qué digan ahora que se están preparando para las elecciones (o sea para conseguir puestos que les den ganancias): no van a hacer nada en bien de la mayoría ni van a escuchar nada que no sea dinero.

Si de algo nos preciamos los zapatistas es de hacer honor a la palabra, a la palabra honesta y consecuente. Todo este tiempo le hemos dicho a usted que luchamos por los pueblos indios de México. Y eso hemos hecho. Le dijimos a usted que intentaríamos la vía del diálogo y la negociación para conseguir nuestras demandas. Le dijimos que nos

esforzaríamos en la lucha pacífica. Le dijimos que nos concentraríamos en la lucha indígena. Y asi ha sido. No le hemos engañado.

Toda la ayuda que usted, generosa, ha aportado para esta noble causa y por esos medios, ha sido para eso y para nada más. No hemos usado nada para otra cosa. Toda las ayudas y apoyos humanitarios que hemos recibido de todo México y de todo el mundo, han sido empleadas únicamente en mejorar las condiciones de vida de las comunidades indígenas zapatistas y en iniciativas pacíficas por el reconocimiento de los derechos y la cultura indígenas. Nada de lo recibido ha sido dedicado a la adquisición de armamento ni a prepaarativo bélico alguno. No sólo porque no lo hemos necesitado (el EZLN mantiene intacta su capacidad militar desde 1994), sino, sobre todo, porque no hubiera sido honesto decirle a usted que su apoyo era para una cosa y usarla para otra. Ni un centavo del apoyo recibido para la paz con justicia y dignidad, se ha dedicado a la guerra. Para hacer la guerra no hemos necesitado apoyo. Para la paz sí.

Claro que hemos usado nuestra palabra para referirnos (y en algunos casos para manifestar nuestra solidaridad) a otras luchas en México y el mundo, pero hasta ahí. Y muchas veces, sabiendo que podíamos hacer más, hubimos de contenernos porque nuestro empeño, así se lo habíamos dicho a usted, era exclusivamente por y para los indígenas.

No ha sido fácil. ¿Se acuerda usted de la marcha de los 1,111?, ¿de la consulta de los 5000 en 1999?, ¿de la Marcha del Color de la Tierra en 2001? Bueno, pues imagine usted lo que sentimos cuando vimos y escuchamos las injusticias y las rabias que íbamos tocando en campesinos, obreros, estudiantes, maestros, empleados, homosexuales y lesbianas, jóvenes, mujeres, ancianos, niños. Imagine usted lo que sentía nuestro corazón.

Tocamos un dolor, una rabia, una indignación que ya conocíamos porque había sido y es la nuestra. Pero entonces la tocamos en el otro. Y escuchamos que el ’nosotros’ que nos animaba quería hacerse más grande, hacerse más colectivo, más nacional. Pero nada, habíamos dicho que sólo lo indígena y eso teníamos que cumplir. Creo que es por nuestro modo, o sea que preferimos morir antes que traicionar nuestra palabra,

Ahora estamos consultando nuestro corazón para ver si vamos a decir y hacer otra cosa. Si la mayoría dice que sí, pues vamos a hacer todo lo posible por cumplir. Todo, hasta morir si es preciso. No queremos parecer dramáticos. Lo decimos nada más para que quede claro hasta dónde estamos dispuestos a llegar. O sea que no "hasta que nos den un puesto, una cantidad de dinero, una promesa, una candidatura".

Tal vez alguno recuerde que, hace seis meses, empezamos con eso de que "falta lo que falta". Pues bien, como es evidente, llegó la hora de decidir si vamos a caminar para encontrar eso que falta. Encontrar no, construir. Sí, construir "otra cosa".

En alguno de los comunicados de días pasados, le informamos que hemos entrado a una consulta interna. Pronto tendremos los resultados y se los daremos a conocer. Mientras pues aprovechamos para escribirle a usted, A usted siempre le hablamos con sinceridad, también a quienes son nuestro corazón y guardián, nuestro Votan Zapata, las comunidades zapatistas, nuestro mando colectivo.

Será una decisión difícil y dura, como de por si ha sido nuestra vida y nuestra lucha. Durante cuatro arios hemos estado preparando las condiciones para presentarle a nuestros pueblos puertas y ventanas, para que, llegado el momento, tuvieran todos los

elementos para elegir por cual ventana asomarse y cual puerta abrir. Y es que así es nuestro modo. O sea que la dirección del EZLN no dirige, sino que busca caminos, pasos, compañía, orientación, ritmo, destino. Varios. Y entonces le presenta a los pueblos esos caminos y analiza con ellos qué pasa si seguimos uno u otro rumbo. Porque, según el camino que andamos, hay cosas que serán buenas y cosas que serán malas, O sea que no hay camino que puras cosas buenas. Y entonces ellas, las comunidades zapatistas, dicen su pensamiento y deciden, después de discutir y por mayoría, por dónde vamos todos. Y entonces pues dan la orden, Y entonces pues la dirección del EZLN tiene que organizar los trabajos o preparar lo que se necesita para caminar ese camino. Claro que la dirección zapatista no mira según lo que se le ocurre solamente a ella, sino que tiene que estar pegada con los pueblos y tocar su corazón y hacerse, como quien dice, la misma cosa. Entonces se hace la mirada de todos nosotros, el oído de todos nosotros, el pensamiento de todos nosotros, el corazón de todos nosotros. Pero qué tal que, por lo que sea, la dirección no mira, ni oye, ni piensa, ni siente como todos nosotros. O le falta ver algunas partes o escuchar otra cosa o pensar y sentir otros pensamientos. Bueno, pues por eso se consulta a todos, por eso se pregunta todos, por eso se toma el acuerdo de todos. Si la mayoría dice que no, pues entonces la dirección tiene tache y tiene que buscar otra vuelta, y otra vuelta presentarse ante los pueblos a proponer y así hasta que, en colectivo, llegamos a una decisión. O sea que acá mandan los pueblos.

Ahora el colectivo que somos tomará una decisión. Se están sopesando los pros y los contras. Se están haciendo bien las cuentas, lo que se pierde y lo que se gana. Y, viendo que no es poco lo que se arriesga, se decidirá si vale la pena.

Tal vez, en la balanza de algunos, pesará mucho lo que hemos logrado. Tal vez, en la balanza de otros, pesará más la indignación y la vergüenza que provoca el ver a nuestros suelos y cielos destruidos por la estúpida avaricia del Poder. En cualquier caso, no podemos permanecer pasivos, contemplando nada más como una banda de rufianes despoja a nuestra Patria de todo lo que la hacía ser y ser a todos: la dignidad.

Bueno, ya es mucha vuelta. Nosotros le estamos escribiendo esta vez. acaso la última, para devolverle su palabra de apoyo comprometido. No es poco lo que hemos logrado en la lucha indígena, y eso ha sido, así lo hemos dicho en público y en privado, por su ayuda.

Creemos que puede enorgullecerse, sin pena alguna, de todo lo bueno que, junto a usted, hemos construido hasta ahora los zapátistas. Y sepa usted que ha sido un honor, a todas luces inmerecido, el que personas como usted hayan caminado a nuestro lado.

Ahora vamos a decidir si hacemos otra cosa y el resultado lo haremos público en su momento. Aclaramos desde ahora, para acabar con las especulaciones, que esta ’otra cosa’ no implica ninguna acción militar ofensiva por parte nuestra. No estamos, por nuestra parte, planeando ni consultando el reinicio de los combates militares ofensivos. Desde febrero-marzo de 1994, todo nuestro dispositivo militar ha sido, y es, defensivo. El gobierno debería decir si, por su parte, hay algún preparativo bélico ofensivo, sea de las fuerzas federales o de sus paramilitares. Y el PRI y el PRD deben decir si planean algún ataque en contra nuestra con los paramilitares que apadrinan en Chiapas.

Si es decisión de la mayoría zapatista, quienes nos han apoyado hasta ahora en la lucha exclusivamente indígena podrán, sin pena ni remordimiento alguno, deslindarse de esa ’otra cosa’ a la que se refirió el Comandante Tacho en la plaza de San Cristóbal de Las Casas en enero del 2003, hace dos años y medio. Es más, hay un comunicado que, de

acá allá, hace ese deslinde y que puede ser presentado en una solicitud de empleo, currículum vitae, reunión de café, sala de redacción, mesa redonda, templete, foro, escenario, solapa de libro, nota de pie de página, coloquio, precandidatura, libro de arrepentidos o columna periodística y que, además, tiene la ventaja de poder ser exhibido, como prueba de descargo, en cualquier juzgado (no se ría usted, hay un antecedente: en 1994, a unos indígenas que detuvo el mal gobierno ~y que no eran zapatistas- los liberó un juez dando validez a una carta del CCRI-CG donde se deslindaba a esas personas de lo realizado por el EZLN. O sea que, como dicen los abogados, ’hay precedente jurídico²).

Pero quienes encuentren en su corazón un eco, así sea pequeño, de nuestra nueva palabra y se sientan llamados por el camino, el paso, el ritmo, la compañía y el destino que hayamos elegido, tal vez decidan renovar su apoyo (o participar directamente)... sabiendo que será ’otra cosa’. Así. sin engaños, sin dobleces, sin hipocresías, sin mentiras.

Agradecemos a las mujeres. A todas las niñas, adolescentes, jóvenas, señoritas, señoras y ancianas (y a las que fueron cambiando de uno a otro de esos calendarios en estos 12 años) que nos apoyaron, nos acompañaron y, no pocas veces, hicieron suyos nuestros dolores y nuestros pasos. A todas esas, mexicanas y de otros países, que nos apoyaron y caminaron con nosotros. En todo lo que hicimos, ustedes fueron la inmensa mayoría. Tal vez porque compartimos con ustedes, aunque cada quien en su modo y lugar, la discriminación, el desprecio... y la muerte.

Agradecemos al movimiento indígena nacional, al que no se vendió por puestos gubernamentales, por viáticos, por lisonjas que los poderosos catalogan como ’para indígenas y animales ’. Al que escuchó nuestra palabra y nos dio la suya. Al que nos abrió el corazón, es decir, su casa. Al que resistió y resiste con dignidad, levantando bien alto el color que somos de la tierra.

Agradecemos a los jóvenes y jóvenas de México y del mundo. A quienes eran niños, niñas o adolescentes aquel 94 y, nobles, crecieron sin escatimarnos ni la vista ni el oído. A quienes llegaron a la juventud o, a pesar de las hojas arrancadas al calendario, se mantuvieron en ella tendiendo la mano de su rebeldía a la morena mano de la nuestra. A quienes optaron por venir a compartir días, semanas, meses, años, nuestra digna pobreza,
nuestra lucha, nuestra esperanza y nuestro necio empeño.

Agradecemos a los homosexuales, lesbianas, transexuales, transgenéricos y ’cada-quien- sumodo’. A quienes compartieron con nosotros su lucha por el respeto a la diferencia, sabiendo que ésta no es un defecto para ocultar. A quienes demostraron que la valentía no
tiene nada qué ver con la testosterona y que. una y otra vez, nos dieron algunas de las más hermosas lecciones de dignidad y nobleza que hemos recibido.

Agradecemos a los intelectuales, artistas y científicos, de México y el mundo, que nos apoyaron en la lucha por los indígenas. Pocos movimientos u organizaciones se pueden preciar de haber tenido el respaldo (siempre crítico, y lo agradecemos) de tanta inteligencia, ingenio y creatividad. Ustedes ya saben que siempre los escuchamos con respeto y atención, incluso cuando no compartíamos sus puntos de vista, y que algo de la luz que emanan ayudó a alumbrar nuestros oscuros caminos.
Agradecemos a l@s trabajador@s honesf@s de la prensa y a los medios de comunicación decentes que mostraron, con verdad y a todo el mundo, lo que miraban y

escuchaban, y respetaron, sin distorsionar, nuestra voz y caminar. Reciban nuestra solidaridad en estos duros momentos que atraviesa el ejercicio de su profesión, donde arriesgan su vida, son agredidos y, como nosotros, no encuentran justicia.

Y, para que no falte nadie, agradecemos en general a todit@s tod@s que, honest@s y sincer@s, nos apoyaron.

He dicho, al inicio de esta carta, que no era una despedida. Bueno, pues resulta que para algunos sí lo es. Aunque para otros será lo que es en realidad, es decir, una promesa...
Porque ya se alcanza a ver lo que falta...

Vale. Salud y, de corazón a corazón, gracias por todo.
A nombre de tod@s l@s zapatistas del EZLN.

Desgraciadamente la mayoria de naciones que conocenos ahora por no decir todas se han constuido de espaldaa a los pueblos qizás esto se vea más claramente en America però tambien en Europa, acordemonos de los balcanes), a las sociedades y a los grupos y lo que es peor a las mismas personas. Desgraciadamente para ellos ni el poder ni el dinero a podido aniquilar las ànsias de libertad y justícia social y civil. hay maneras y maneras de aniquilar, qualquiera de ellas es abominable a mi entender, el silencio y la muda aceptación de los mismo és simplemente una cómoda complicidad. Mi compromiso no és la complicidad si no mi voz y mis manos con los pueblos, con los indigenas y con las personas a quein las naciones òbvia i extermina. Un abrazo.

Si yo fuera enemigo político del subcomandante insurgente Marcos, temería más la pesadez de su prosa que el acierto de sus balas. Gatopardo, avísame cuando pongas estas campanudas soflamas o cuando escriba ese siniestro inspector de hacienda que firmó ayer el post. Siempre tengo Almax para esos casos de digestión difícil. perdona gatopardo, pero quisiera responder a perdon volteriano, loq ue hago con mi voz y mis manos. Con mi voz, explico, digo y reflexiono sobre como concibo el mundo y la (con)vivencia, con mi voz leo cuentos y denuncio aquello que creo injusto y con mis manos que nunca cogeran un arma si no es para destruirla trabajo junto aquellos que no pueden trabajar con las suyas. Victor Flyte tiene el lema: "*Puede que no esté de acuerdo con las cosas que dices, pero defenderé hasta la muerte tu derecho a decirlas.*" En consecuencia, suele explicar contundentemente lo que cree como si su interlocutor no estuviera obligado a comulgar con él, y argumenta, razona, explica... hace un continuo homenaje a la inteligencia de los lectores.
Os lo recomiendo, leed su último artículo:
"Martes, 21 de junio de 2005"
Y volved siempre que podáis a su bitácora "El diario de Victor Flyte", que tengo en mis

Amigo, muchas gracias por tu visita y por tus palabras. Conozco bien el enlace que me sugieres ;-) Tal vez sea un poco radical en estos últimos días, tal vez; pero me asusta la reacción que está teniendo lugar en contra de un derecho elemental de la persona. Hoy, el Senado rechazará el Proyecto de Ley; el día de hoy nos recordará a muchos que hay una causa justa que defender. De repente la vida tiene un sentido nuevo: defender una causa justa. Gracias, amigo.

Gracias por tu recomendación; Madre mía, menos mal que no somos pocos los que seguimos apoyando el derecho a ser como se quiera, a tener la vida que se quiera, porque con todo lo que se cuece en este post, tendríamos para alimentar unas buenas mesas redondas, cuadradas o estrelladas. Ya le contaba lo que sentí el día de la lectura del manifiesto, y no por tratarse de lo que se trataba, ni porque fuese en el sitio en donde se llevó a cabo, sino por el amplio significado, de la velocidad conque este país está cambiando. Espero que la velocidad se mantenga, sin hacer que nadie salga disparado, porque es lo malo que tiene la velocidad no controlada. no crees?

TRANSBORDO

Para Samuel, que se marchará a África la semana que viene como cooperante con una organización humanitaria, y me pidió que lo contara.

Me equivoqué. El tren a Madrid no pasaba hasta las cuatro de la madrugada. Aquel pueblo manchego a la una de la madrugada se veía desierto y el frío y la niebla deshilachaban la semipenumbra de las luces del andén. Con el dinero justo para un par de cafés y comprar el billete de tren decidí buscar algún bar en el pueblo donde refugiarme el mayor tiempo posible hasta la hora de irme.

A veces, una pálida luminosidad me indicaba adonde dirigir mis pasos, pero una y otra vez sufrí la decepción al descubrir la luz de una ventana, de un concesionario de coches, de una tienda de ropas y hasta la de un marmolista que exponía sus lápidas. Y al cabo de una hora sin cruzarme a nadie a quien preguntar, exhausta y helada, me encaminé otra vez hasta la estación de tren.

Anteriormente había visto la sala de espera cerrada, y por pura desesperación probé la resistencia del picaporte. A través de la puerta acristalada vi la silueta de alguien en el suelo, recostado en un banco en una postura extraña. Llamé con los nudillos y no se movió. Golpee con fuerza, repetidamente. Escuché un gemido pero no supe de donde provenía y los latidos de mi corazón se desbocaron. Volví a salir de la estación para buscar una cabina de teléfonos, pero la niebla me impedía ver más allá del alcance de unos metros y caminé en aquella oscuridad interrumpida por las luces lechosas de un alumbrado insuficiente, y de vez en cuando escuchaba pasos que se interrumpían o se alejaban cuando yo me detenía a escuchar.

Cuando me tropecé con el cuartel de la Guardia Civil, cerrado a cal y canto, el cansancio, el miedo y la tensión se habían multiplicado. Llamé una y otra vez, hasta que se entreabrió la puerta y acudió un guardia civil perfectamente uniformado y con cara de sueño.

Escuchó mis explicaciones entrecortadas con cara de hastío y me interrogó por las razones que me habían dejado varada allí. Me pidió el DNI, volvió a entrar en el cuartel, y me dejó esperando otra vez en la calle, rodeada de oscuridad y sonidos que crepitaban en mi cerebro.

Cuando se abrió otra vez la puerta fueron dos guardias los que se alternaron para preguntarme una y otra vez lo mismo. Irritados ante mi insistencia me acompañaron a la estación para comprobar que alguien estaba tendido en la sala de espera, quizás malherido o muerto.

Pocos metros antes coincidimos con el factor de la Estación, al que habían levantado de la cama para que acudiera.

A estas alturas yo no estaba precisamente para optar por el primer puesto en un concurso de popularidad con aquella gente.

No sé por qué, al abrir la puerta, me cedieron el paso y, al encender la luz me encontré cegada momentáneamente. Pero vi toda la sangre como un puñetazo en los ojos. Y un niño diminuto, oscuro, desnudo y ensangrentado, lanzó un vagido interminable que nos paralizó. Su madre apenas lo sujetaba ya entre sus brazos y la inconsciencia había cincelado una belleza sobrenatural en sus finos rasgos de ébano.

—*¡Llamen a un médico, se está muriendo!*— gemí.

Y de pronto desaparecieron de aquellos hombres sus rasgos irritados y dejó paso a la piedad, que guió sus gestos. El factor corrió para avisar y uno de los guardias cortó el cordón umbilical con los dientes, lo anudó, y envolvió a la criatura en su chaquetón.

—*¡Abraza bien al crío!* —me dijo. *Y lo vi acunar a aquella mujer intentando transmitirle su calor.*

Cuando llegó la ambulancia los paramédicos nos hicieron salir y se hicieron cargo.

—*La mujer está muerta, pero el niño parece que está bien, vamos a llevarlo al Hospital. Hay que llamar al juez para levantar el cadáver.*

El guardia que había cortado el cordón umbilical y había tratado de infundir calor en aquel cadáver, extendió los brazos, tomó con destreza al niño, lo abrazó tiernamente, y se encaminó a la ambulancia con él.

Sí, han pasado casi veinte años, pero no hemos dejado de escribirnos, intercambiando confidencias y fotografías, y aunque no lo había vuelto a ver ¿quién puede olvidarse del rostro de un hombre transfigurado por la piedad y arrasado de lágrimas? Nos reencontramos en la fiesta de apoyo a los derechos de los gays y lesbianas: vino a mí sonriente y casi tan joven como cuando lo conocí.

Le pregunté por aquel niño y unos segundos después, al ver a aquel hermoso masai que se acercaba, adiviné. Una mujer con una camiseta con el logo de las lesbianas lo acompañaba.

—*¡Es Samuel!* — y les explicó: *—Es la viajera que...*

Samuel, pasó sus brazos por los hombros de los dos, protector, y me dijo sonriendo:

—*¿Verdad que fue una locura que se casaran para poder adoptarme siendo gays?*— Y con una carcajada feliz añadió: *—¡Podrían haberme traumatizado!*

EL DIARIO IMPERTINENTE

A mi edad, cada vez resulta más difícil leer con un nudo en la garganta, sintiendo que cada palabra ocupa su lugar por derecho y no se puede sustituir sin echar a perder el contenido.
Llevo un tiempo admirando locamente a quien es capaz de empezar así un artículo titulado ¿Quién debe a quien? :
"*No me gustan las cifras. Las cifras no tienen nombre, no pasan hambre, no tienen frío, no tienen cara. Las cifras son redondas y casi nunca entramos en el detalle.*"
Y el resto todavía es más contundente, destila inteligencia y lucidez.

Jordi Jaumà, Consultor Social, dice en la presentación de El Diario Impertinente:
"Las noticias que no llegan a los medios. Desde este blog, te animamos a que nos envíes tus denuncias, noticias y artículos que te gustaría ver publicados y que no encuentras dónde. Este es un blog participativo por lo cual apreciamos tus comentarios y sugerencias."

Cuando yo sea sabia quiero ser como Jordi Jaumà.

Según el psicoanálisis
La paranoia en una forma de psicosis. Según J. Lacan en la psicosis por el mecanismo forclusivo (Verwerfung en alemán) se la expulsa del aparato psíquico el significante fálico (a diferencia de la neurosis donde se reprime la significación). Freud incluye en la paranoia el delirio de persecución, la erotomanía, el delirio de grandezas y el delirio celotípico.

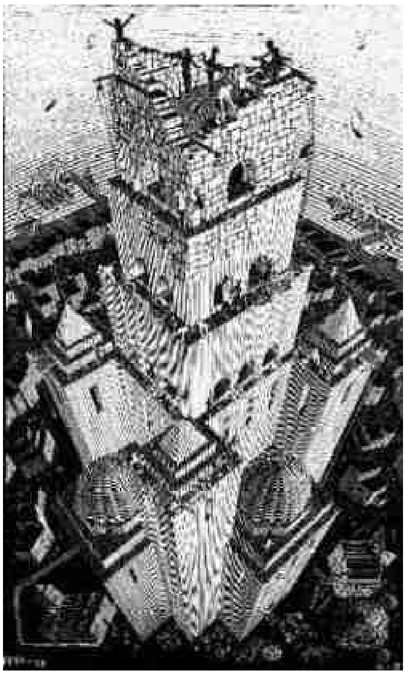
EL CASTELO SANGRIENTO



Trachedia desarrollata
en el ruinoso castelo
del barón de Chente Mata.
¡Si no é vera e veritata
que m'arranquen un capelo!
Tras morisca ventaneta,
con le semblante contenti,
a primorosa Julieta
murmura una cansoneta
que marcha en alas del vienti.
Es sua voche melodiosa
cual la campane de Huesca;
es chentile, candorosa,
e más fresca que una rosa,
¡quichás demasiado fresca!
Digo fresca, y es verdate,
perque lichera de rope
é a la fenestra asomate,
y está pelando patate
con un sable de la trope.
A bordo d'una barqueta
llega un mancebi elegante,
vestidato de etiqueta,
con gorra de sportman, guanti,
e gabani con faldeta.
Fumando brevas a pasti
fragua algún plane siniestri,
perque a la paloma casti
le hace con el ojo diestri
la seña del as de basti.
La joven enamorata
le arroja una escalinata
fabricata con cordeli,

e per ella le donceli
como un felini, esquilata.
Le patre, qu'era un Nerone,
observó l'operachone
desde un huerti exuberanti,
donde tene plantachone
de pementone picanti.
Aparte del pementone
cultivaba: le melone,
la fabi, le remolachi,
la chufi, le macarrone
e le turrón de guirlache.
Presto le gran cabalieri,
de su honore se ricorda,
e trepando per la corda,
sube a le piso primeri
llevando una estaqui gorda.
Le burlato personache
da uno grito de corache
al ver que la sua filla vile
está con furia salvache
abrazando a un zascandile.
Altamenti incomodati,
les apunta sin pietati
con una vieja escopeti,
per profanare el respeti
de un lugare tan sacrati.
Sona una detonachone,
e una descarga chertera
atraviesa le pulmone
del galán e la pendone.
¡Fue una morte de primera!
Furiosi, desesperati,
y con el juicio incompleti,
les tritura el esqueleti,
poniendo al uno en tomati
y al otro a la vinagreti.
Abre luego le balcone
y se tiri en direchone
vertical sobre un peñasqui,
quedando allí le barone
como un centolli sin casqui.
Tutos los astros del chelo
se tiñeron d'escarlata;
desde entonces, no es camelo,
non s'abrió más le castelo
del barón de Chente Mata.

Luis Fernández Valdés, "Ludi" (Tío-abuelo de Francisco Álvarez-Cascos, el que fue Ministro de Fomento, del chapapote y del desastre del AVE surcado de grietas vertiginosas a su paso por Zaragoza).

MÉXICO EN EL CORAZÓN

A lo largo y ancho de México,mientras se tortura, se viola y se asesina con la complicidad de jueces y policía; mientras la corrupción moral, política y económica se perpetúa, la avanzadilla de la burguesía culta, que sabe y puede contarlo, viviseciona y analiza con lupa su inexistente sensibilidad, glosa los vaivenes anímicos de su neurastenia, y describen ardientes emociones que jamás vivirán.
Es la gente que sufre la injusticia quien emborrona peticiones de auxilio como las de Chiapas, Atenco, Oaxaca y Juárez, mientras esperan lo peor.
Los alevines de la burguesía culta mexicana no se han ganado el derecho a vivir mientras sigan callando.

MÉXICO: COMITÉ DE SOLIDARIDAD CON DAVID MEZA ARGUETA Y NEYRA AZUCENA CERVANTES

Antecedentes:

El Comité se crea el 9 de diciembre de 2003; el objetivo central es alcanzar la Libertad de Miguel David Meza Argueta y Justicia para Neyra Azucena Cervantes. Está conformado por familiares, amigos y en general por personas que, por esta situación, dejamos la inmovilidad social para caminar por la calle de la Libertad, para unirnos a los que claman justicia.
Contamos con dos elementos fundamentales para alcanzar nuestro propósito: el Amor y la Verdad.
¿Derechos Humanos? David Meza Argueta, torturado y preso

Desde hace más de 10 años y debido a su incapacidad para resolver las desapariciones de mujeres en Chihuahua, la Procuraduría de Justicia de ese Estado fabrica culpables, amenazando, deteniendo, torturando y encarcelando a personas inocentes es decir, inventa "chivos expiatorios" para tapar su negligencia. Como es el caso que enseguida exponemos:
Neyra Azucena Cervantes desaparece el 13 de mayo de 2003 en la ciudad de Chihuahua, Chihuahua, dos días después los familiares que radican en Tuxtla Gutiérrez, Chiapas, reciben la noticia y el 17 de ese mes, David se traslada a Chihuahua a colaborar en la búsqueda de su prima, después de ser comisionado por la familia para

viajar a dicho lugar. Transcurridos casi dos meses de infructuosa búsqueda, el 14 de julio, alrededor de las 20 hrs., Jesús Argueta Vargas, Miguel David, la C. Patricia Cervantes (esposa de Jesús) y la prima de la misma, acudieron a las instalaciones del Complejo Industrial de Seguridad de Chihuahua, cumpliendo con el llamado del comandante Mayorga Solís, Jefe de la Policía Judicial y de la Lic. Rocío Sáenz, encargada de la investigación de delitos sexuales y contra la familia; este llamado se suponía serviría para corroborar la pertenencia de restos óseos recientemente encontrados cerca de la mencionada ciudad que se suponen pertenecían a Neyra; sin embargo, una vez que Jesús y David se encuentran en dichas instalaciones, son detenidos sin ninguna razón válida con el pretexto de colaborar con las autoridades, además su detención va acompañada de golpes y maltratos por parte de los elementos de la PGJE. Durante esa noche son sometidos a tortura física y psicológica, ensañándose de manera especial con David.

El 15 de julio, aproximadamente a las 16 hrs., es puesto en libertad Jesús Argueta, no así David Meza. Los elementos de la PGJE le hicieron firmar una declaración falsa; ésta fue hecha bajo presión de sentencia de muerte para él o su familia, si no se declaraba culpable del delito.

Desde entonces permanece encerrado en el Cereso de la ciudad de Chihuahua, mientras los verdaderos culpables siguen gozando de libertad.

Siguiendo la vía jurídica fueron presentadas pruebas que demuestran su inocencia

1.- Existen documentos probatorios que demuestran que David se encontraba en Tuxtla en el momento que desapareció Neyra.

2.- De acuerdo con lo sostenido por la propia familia de Neyra Azucena, David no pudo cometer el asesinato porque se encontraba en compañía de la hermana de la víctima en el momento del crimen, contradiciendo la declaración que se le obligó a firmar a David bajo tortura.

3.- En su confesión forzada se afirma que David mantuvo secuestrada a Neyra en una casa ubicada en el Cerro de las Cruces, pero los habitantes de esta casa, desde hace 10 años, aseguran no haber visto jamás a Miguel David ni a Neyra.

4.- También resulta imposible lo que se afirma en la declaración acerca del modo en que David había trasladado a su prima al Cerro Los Cuernos de la Luna, ya que éste se encuentra en una zona de adiestramiento policial, vigilado las 24 hrs. del día y monitoreada permanentemente por cámaras de video. ¿Para qué querría David llevar a este sitio de difícil acceso a su víctima si podría haber abusado de ella y matarla en la casa donde supuestamente la retenía?

5.- De acuerdo con el dictamen pericial antropológico, es imposible que el cuerpo de Neyra se hubiera descompuesto hasta quedar convertido en una osamenta totalmente limpia en 55 días, partiendo del día 21 de mayo al 14 de julio, que según la declaración forzada transcurrieron desde el momento de la desaparición de Neyra hasta la fecha en la que se dice que David la mató.

6.- De acuerdo con este mismo dictamen, el cuerpo de Neyra fue llevado a este sitio cuando se encontraba en la última etapa de descomposición, lo que contradice y desmiente la tesis contenida en la declaración bajo tortura de Miguel David, donde se afirma que fue ahí donde él la mató; este hecho resulta entonces evidentemente falso.

Por estas y otras pruebas totalmente documentadas, se demuestra que Miguel David Meza Argueta no pudo cometer el crimen del que se le acusa. Sin embargo continúa preso.

¿Por qué se violan los derechos humanos? ¿Por qué se dice que ha desaparecido la tortura en México? ¿Por qué el presidente Fox afirma en el extranjero que los crímenes de las mujeres han sido resueltos por las autoridades del Estado de Chihuahua, a pesar de que existen documentos que demuestran lo contrario y que han sido entregados al propio presidente de la República? ¿Por qué sigue encerrado Miguel David Meza Argueta? ¿Por qué el gobierno federal no se interesa por el esclarecimiento de estos crímenes contra la mujer en México? ¿Por qué, si es del dominio público, no se habla de la tragedia que se vive en Chihuahua, que ahora alcanza a Chiapas, la de los inocentes que son torturados y encarcelados permitiendo así que los verdaderos culpables sigan cometiendo más asesinatos?

Por respeto a la mujer, por la recuperación de la confianza en la justicia, por el cumplimiento de la promesa de acabar con la tortura, por la dignidad humana: Libertad para Miguel David Meza Argueta y para los inocentes encarcelados que sufren la misma tragedia.

Atentamente,

"El Amor y la Verdad vencerán a la injusticia"

comentario: Basta de tanta impunidad, basta de tanta cochinada, basta de tantos asesinatos, basta de tantos presos injustamente, torturados. libertad para David Meza Argueta, chiapaneco consecuente, congruente y un revolucionario. Justicia para Neyra Azucena Cervantes. Aplausos para el comite de solidaridad para la libertad de david y justicia para neyra. Nuestra lucha es tu lucha, el camino es largo y sinuoso. No pararemos hasta que david meza se encuentre de nuevo en tierras chiapanecas. En pos de eliminar de nuestras mentalidades y de la sociedad la misoginia y el machismo. MÉXICO: DENUNCIA DE LOS ZAPATISTAS DE CHIAPAS

Denuncia de la Junta de Buen Gobierno Corazón Céntrico de los Zapatistas Delante del Mundo, zona Altos de Chiapas.

6 de junio de 2005

A LA SOCIEDAD CIVIL NACIONAL E INTERNACIONAL
A LOS MEDIOS DE COMUNICACIÓN

Desde esta Junta de Buen Gobierno Corazón Céntrico de los Zapatistas Delante del Mundo, ubicada en la zona Altos de Chiapas, México, en conjunto con las autoridades del municipio autónomo rebelde zapatista San Pedro Polhó, queremos denunciar los siguientes hechos de injusticia:

El día 17 de abril de 2005, los compañeros bases de apoyo Librado López Hernández y Juan Pérez Gómez, los dos son choferes de transporte público, fueron contratados en la cabecera de Pantelhó por dos comandantes de policía municipal para ir en un viaje a la tijera de Chimix, ubicada a 4 kilómetros de la cabecera municipal. Junto con los comandantes iba también una muchacha de Cancuc que se bajó con ellos al llegar en la tijera de Chimix. Los comandantes y la muchacha salieron unos metros al monte, y pidieron a los choferes que esperaran un rato porque pagaron 100 pesos por viaje

redondo. Después de un rato, los comandantes y la muchacha subieron al carro y todos regresaron en la cabecera de Pantelhó. Hasta ahí parece que no hubo problema. Pero el día 18 de abril la policía municipal de Pantelhó llegó a detener al compañero Librado López Hernández que estaba trabajando con su transporte en la cabecera de ese municipio, y el día 19 de abril el otro compañero Juan Pérez Gómez también fue detenido ahí mismo en la cabecera por la policía municipal. Los dos compañeros fueron acusados de haber violado a la muchacha que fue en el viaje mencionado, y los llevaron primero en la procuraduría de San Cristóbal de las Casas y después de tres días los metieron en el Cereso número 5, donde se encuentran todavía.

Pero los compañeros detenidos no sólo están enfrentando la acusación falsa de violación, sino que además el juez municipal de Pantelhó, Pedro Cortés López, está cometiendo más injusticias en este caso. El juez municipal ni siquiera pidió declaración a los compañeros detenidos, no hizo ninguna investigación y los metió directo en la cárcel sin buscar pruebas y sin tener testigos de nada. Además, ahora este mismo juez está echando mentiras porque dice que los compañeros fueron detenidos en San Cristóbal, cuando en realidad fueron detenidos en Pantelhó.

Por estos hechos que explicamos, exigimos que se libere inmediatamente a los dos compañeros bases de apoyo zapatistas, pues ya va mes y medio que fueron injustamente presos, sin una investigación de por medio y por orden de un juez que no cumple con su trabajo ni actúa con honradez. Como autoridades autónomas zapatistas vamos a estar pendientes de que las autoridades oficiales correspondientes sí hagan su trabajo de manera honrada y liberen a estos compañeros, porque no hay razón alguna para que sigan encarcelados.

BOLPRESS, LA DIGNIDAD DEL MEJOR PERIODISMO EN BOLIVIA

La dimisión del Presidente de Bolivia, Carlos Mesa, me hizo descubrir Bolpress, una muestra del mejor periodismo en la red.

"Bolpress.com es un sitio web impulsado por periodistas bolivianos y está comprometido con la democratización de la información y la comunicación.
En un intento más por alcanzar esos objetivos, pone a disposición de sus usuarios el servicio que llamamos "periodismo ciudadano", es decir la posibilidad de que todos los usuarios de Bolpress.com puedan ser "periodistas" y, como tales, publicar sus notas en las páginas de nuestro sitio.
Para acceder a este servicio, los usuarios deben registrarse mediante el formulario de la dirección http://www.bolpress.com/reg/index2.php y esperar en su correo electrónico la contraseña de acceso."

Acostumbrada a enterarme mejor de los problemas gonádicos de los comentaristas políticos que de las noticias que me interesan, he disfrutado de un periódico donde se analiza la realidad sin centrar el protagonismo en el analista.
Os recomiendo esta joya entre otras:

La historia secreta que nunca revelará The Washington Post

Después de 32 años, finalmente se supo que Mark Felt, ex funcionario del FBI, era la Garganta Profunda que destapó el escándalo Watergate bajo la presidencia del republicano Richard Nixon. El periodista John OConnor, de la revista *Vanity Fair,* definió el caso como el más grande misterio sin resolver para el periodismo moderno, protagonizado por la persona anónima más famosa en la historia de Estados Unidos.
Los nombres de Bob Woodward y Carl Bernstein, reporteros del Washington Post que en 1972 salieron del anonimato, vuelven a ser noticia. En segundo plano, se menciona a Ben Bradlee, director del diario entre 1968 y 1991, periodo durante el cual el periódico obtuvo 18 premios Pulitzer. En un discreto tercer lugar, reaparece el nombre de Katherine Graham, su propietaria, fallecida el 17 de julio de 2001.
Sin embargo, detrás de todo este alboroto, hay otra historia oculta mucho más antigua y compleja. Se trata del vínculo de los dueños del *Washington Post* con uno de los más influyentes grupos económicos internacionales, un poder en las sombras que algunos ya definen como "gobierno global". Ante esto, el caso Watergate y Garganta Profunda constituyen una anécdota.

Los Meyer

Graham es el apellido de casada de Katherine Meyer. Era hija de Eugene Meyer, un especulador que llegó a ser líder de los banqueros demócratas bajo el gobierno de Franklin D. Roosevelt. Meyer fue agente en Estados Unidos del banco francés *Lazard Frères*, lo que le permitía estar en contacto con las altas finanzas internacionales, como la *Banca Rothschild, Kuhn-Loeb Company, Warburg Company, Lehman Brothers, Goldman Sachs, J.P. Morgan* y la familia Roosevelt.
Hoy, pocos recuerdan que Meyer fue el primer presidente del Banco Mundial en 1947.
Katherine Meyer Graham también heredó todos estos vínculos. En la década de los 60, ingresó al *Club Bilderberg*, un aparentemente inofensivo grupo que oculta a una de las

redes internacionales más herméticas de control financiero por encima de fronteras, bancos locales y gobiernos.

Misiones de "rescate"

Cuando Estados Unidos decide participar en la Primera Guerra Mundial, debe movilizar la economía nacional a su favor. El Departamento del Tesoro recomienda crear una agencia gubernamental de préstamos. En abril de 1918, nace la *Corporación de Finanzas de Guerra (CFG)*, con autoridad para prestar hasta tres mil millones de dólares mediante la emisión de bonos. Eugene Meyer es el director administrativo.
En los seis meses que opera, la CFG presta cerca de 71 millones de dólares a empresas productoras de artículos de consumo y firmas financieras que dan préstamos aprobados por el gobierno. Cuando el conflicto termina, Meyer no quiere que la corporación se disuelva. Aunque ya no existe su justificación original, decide continuar con su misión de rescate financiero "todo propósito" y propone usar a la CFG para subvencionar las exportaciones estadounidenses a Europa. En marzo de 1919 impulsa en el Congreso una ley que autoriza el gasto de mil millones con este propósito. Cuando un año después esa ley llega a su fin, renuncia a la CFG.
Meyer regresa a finales de 1920, apoyado por banqueros y empresarios preocupados por dificultades en la economía agrícola. Gestiona en el Congreso el reflotamiento de la CFG y logra que el Tesoro le suministre fondos. En tiempo de paz, la *Corporación de Finanzas de Guerra* otorga préstamos para solventar exportaciones. En esta etapa, que dura hasta enero de 1925, presta unos 300 millones de dólares a cooperativas agrícolas y bancos rurales
En octubre de 1929 estalla el *crack* de la bolsa en Wall Street, que inicia la etapa conocida como Gran Depresión. El Presidente Herbert Hoover llama a Meyer en enero de 1932 para idear un plan de rescate para los bancos. Así nace la *Comisión para la Reconstrucción Financiera (CRF).* El presidente de la junta de directores del nuevo organismo es Meyer.
El Tesoro suministra 500 millones de dólares a la comisión y el Congreso la autoriza a endeudarse por mil 500 millones. A los seis meses, esa cantidad aumenta al doble. Una década después, la RFC es *"la mayor corporación de los Estados Unidos y la organización bancaria más variada del mundo"*, según Jesse H. Jones, quien fue su presidente de 1933 a 1945. Ante las quejas de corrupción y favoritismo político, la RFC fue disuelta en 1953.

Herencia macabra

Eugene Meyer ya era millonario pero encuentra un tiempito libre para operar en favor del banco *Lazard Frères*, de París, fundado en 1876. A 129 años de su creación, esta casa tiene filiales en Londres y Nueva York. Se especializa en fusiones y adquisiciones, financiación de proyectos y privatizaciones. En los años 90, efectuó más de 200 operaciones de reestructuración de deudas de empresas, por un monto total de casi 300 mil millones de dólares.
Lazard Frères también tiene experiencia en asesorar a gobiernos deudores. En 2003 se convierte en consultora para la refinanciación de la deuda pública argentina (52 mil millones de dólares). Por la "asistencia" en la renegociación con acreedores privados, cobra 190 mil dólares mensuales.
En 1933, el magnate compra en una subasta el *Washington Post*, un modesto periódico fundado en 1877 que estaba en bancarrota a consecuencia de la Gran Depresión.
Cuando en marzo de 1946 nace el *Banco Mundial*, Meyer es nombrado presidente. Renuncia menos de seis meses después.
Ese año, el hombre de negocios coloca a su yerno Philip Graham como editor general del

Washington Post. El esposo de su hija Katherine era un encantador abogado que cuando se casó no tenía un centavo. Graham se suicida en 1963 y ella se encuentra con la mayoría absoluta del capital del diario, de la revista *Newsweek* y el 50 por ciento del *International Herald Tribune*.

De ama de casa a "dama de hierro" de la prensa

En 1997, Katherine Meyer Graham publica *Personal History*, una autobiografía de más de 600 páginas, que al año siguiente gana el Premio Pulitzer. En el libro se presenta como una ama de casa rica y sin preocupaciones, madre de cuatro hijos, que a los 46 años se ve al frente del Washington Post.
"Yo era inferior a los hombres con los que trabajaba. No tenía experiencia en negocios ni dirección y mis conocimientos sobre política, economía y otras materias con las que tenía que tratar eran escasos", escribe. *"Una mujer al frente de una compañía era algo tan singular en aquellos días que yo destacaba a la fuerza. Al menos en la mayor parte de los años 60, vivía en un mundo de hombres, que apenas hablaban con otras mujeres que no fueran sus secretarias".*
Katherine describe su evolución hasta convertirse en una especie de "dama de hierro" del periodismo estadounidense. Lo que nunca relata es cómo ingresa al poderoso *Club Bilderberg*, llamado así en recuerdo de la localidad de Holanda donde se creó en 1954.

Un selecto club internacional

La *Enciclopedia Británica* dice que las selectas reuniones anuales del grupo se efectúan en *"una atmósfera de estricto secretismo".* Los miembros replican que sólo integran *"un club privado"*, al que asisten personalidades de todos los países, líderes de la política, la economía, las finanzas y los medios de comunicación, así como algunos científicos y profesores universitarios.
"El mundo está gobernado por personajes que no pueden ni imaginar aquellos cuyos ojos no penetran entre los bastidores", escribió Benjamín Disraeli en su novela *Coningsby* (1844). La definición le viene bien al *grupo Bilderberg.* Disraeli era protegido del Barón de Rothschild, cuyo verdadero nombre era Mayer Amschel Bauer, así que sabía de qué estaba hablando. Miembro del Partido Conservador, el escritor recibió el título de Lord de Beaconfield y en 1867 llegó a ser Primer Ministro de Gran Bretaña.
Bilderberg nació por iniciativa del príncipe Bernardo de Holanda, quien quería limpiar su imagen fascista durante la Segunda Guerra Mundial. Es un grupo supranacional compuesto fundamentalmente por personalidades del mundo de los negocios, la industria y la política que inicialmente reunió a los miembros de la *Organización del Tratado del Atlántico Norte* (OTAN). A este club se adhiere por contactos confidenciales y sus miembros tienen prohibido hablar sobre los temas tratados y las decisiones que se toman.
Algunos periodistas asisten esporádicamente a las reuniones anuales pero no pueden informar nada. En 1976 el reportero Gordon Tether fue despedido del *Financial Times* cuando intentó publicar un artículo demasiado explícito sobre el grupo.

Poder privado, gobierno mundial

Un integrante del *Club Bilderberg* es el profesor Anders Aslund, ex diplomático sueco, investigador de pacifismo en la *Fundación Carnegie* de Washington y ex consejero económico de los gobiernos de Rusia y Ucrania. Aslund dice que el grupo es *"una red privada de personas influyentes de Europa Occidental y Estados Unidos. Aproximadamente 110 personas participan cada año. La idea es debatir cuestiones políticas y de alta economía".*

Según declaró Aslund algunos años atrás, algunos asistentes participan casi siempre: los máximos responsables del FMI, el Banco Mundial y la Organización Mundial del Comercio, y los directores de los Bancos Centrales de Alemania y Francia. También concurrían Vernon Jordan (Lazard Brothers), Jurgen Schrempp (Daimler-Chrysler), Paul Allaire (Xerox) y Katherine Graham, directora del Washington Post, o su hijo Donald. *Bilderberg* tiene un "brazo político": la *Comisión Trilateral.* Su fundador es David Rockefeller, dueño del Chase Manhattan Bank, quien participa de todas las reuniones del grupo desde 1954. El 1 de febrero de 1999, Rockefeller declaró a *Newsweek International: "Algo debe reemplazar a los gobiernos y el poder privado me parece la entidad adecuada para hacerlo".*
Esta es la historia que nunca "destapará" el Post."

Querida Gatopardo. Ha pasado demasiado tiempo sin cruzar una palabra contigo. Me he dado una vuelta por la página que recomiendas y como casi siempre, pones delante de mí algo que conecta conmigo a la primera.
Tengo mucha curiosidad por todas esas historias del Club Bilderberg, y me gustaría tener tiempo para profundizar en el tema. Hace poco tuve en mis manos un libro en torno a este Club. Resulta increible y la vez atrayente suponer que cierto grupo de poder, controla la situación mundial al margen de nuestros deseos. Pero estoy cada vez más convencido de que algo de esto hay.
Muchos besos.

POR QUÉ ENTRA EN LA CARCEL ÁNGEL ZAMORO, PATXI

Relato basado en cartas y testimonios escritos y narrados. Dibujo de Patxi Zamoro.

Estudié en la academia del barrio, sin llegar a terminar el Bachillerato. No fui mal estudiante, pero ansiaba ayudar económicamente a mi familia y tuve que crecer antes de tiempo. Para mí, un trabajo era sinónimo de independencia y madurez. ¡Quería ser mayor! Luego con la perspectiva del tiempo me doy cuenta de que algo me empujaba a querer hacerlo todo más deprisa, como si presintiera que me quedaba poco tiempo por delante, como si intuyera esta muerte en vida que me avecindó en la cárcel desde los dieciocho años, apenas un crío... y quizá por eso todo lo tuve que vivir tan rápida e intensamente...
A los diecisiete años me casé con Menchu contra la voluntad de mis padres.
Éramos dos niños jugando a ser mayores, encandilados con el primer amor. No sé si alguien habrá podido explicar el misterio de esa zozobra que parece licuar los huesos y atar la lengua, el vértigo de mirarse a los ojos, del roce de las manos, cuando uno quisiera morirse y que nunca termine ese instante... Y aquel miedo atroz de que no me quisiera, de perderla, de olvidarnos algún día... ¡Todo se siente tan imperiosamente a esa edad! Y me digo que quizás todos hayan vivido algo parecido, pero simplemente no lo creo. Sé que aquello fue sagrado y que jugamos limpiamente, sin condiciones, sin saber ni prever...
Y a los pocos meses de casarnos, supimos que íbamos a ser padres. ¡Fue tan hermoso! Nació mi única hija, Vanesa, y la amé profundamente desde antes de verla, cuando espiaba sus movimientos en el vientre de su madre. ¡Qué anhelo de evitarle tristezas, penurias, lágrimas y qué impotencia cuando tenía hambre, estaba mojada o le dolían los oídos...y qué nudo en la laringe si lloraba! ¡Qué vulnerable me sentía abrazado a ellas!
¡Cuánta ternura se me ha quedado estancada sin su presencia en todos estos años!
Desde que empecé a trabajar, siguiendo la tradición familiar, milité en Comisiones Obreras, y en el todavía ilegal Partido Comunista. En aquel año de 1975 soñaba con un mundo mejor para mi hija y los hijos que estaban esperándome en el porvenir y que nunca nacieron. Mis hermanos estuvieron siempre en primera fila en la lucha sindical y ellos me enseñaron a vivir con dignidad y a no mendigar lo que por derecho nos correspondía, a defender a los compañeros y a confiar en un futuro de libertad.
Ahora confieso que tuve muchas veces miedo, que me sobresaltaban los pasos tardíos en la escalera, recelando la visita de la policía, y a veces, al cruzar mi mirada con el encargado, sentía hielo en las entrañas imaginando que perdía el trabajo.
Pero sabía que los compañeros confiaban en mí y ahuyentaba los malos presagios, apretaba las mandíbulas, me daba un capón mental por mi debilidad, y seguía adelante.
Llegué a formar parte de la Delegación de mi zona y salí elegido enlace sindical en la empresa de electricidad donde trabajaba con apenas dieciocho años. Recuerdo las reuniones interminables en sacristías, casas momentáneamente abiertas a los conjurados, con el oído alerta. Y recuerdo que

caminaba en zigzag, desandando el camino, mirando a mi espalda a los transeúntes para ver si alguien apartaba la vista de pronto, si había visto a alguien un trecho mayor de lo habitual, observando, si aparentaba mirar un escaparate cuando volvía sobre mis pasos...
Y el miedo a no estar alerta y, por culpa de un descuido, ser la causa de que cayeran los compañeros, me obligaba a salir una hora antes de casa para cerciorarme de que nadie me seguía: cogía el metro en dirección contraria y de pronto, cuando estaban a punto de cerrar las puertas, saltaba al andén, y más de una vez dejé a mis seguidores aplastados contra los cristales mirándome con rabia.
Un día tuve que faltar a una reunión porque una y otra vez descubría gente sospechosa que parecía adivinar mis intenciones, y mate el tiempo en un cine a un centenar de metros de donde nos reuníamos. Llegué a la cita de seguridad, que nos dábamos un par de horas después por si algo nos impedía acudir, y no encontré a mi contacto: lo habían detenido junto a los demás. Y se disparó el miedo: había que cambiar de domicilio cuando eso ocurría, pero no tuve valor para dejar a Menchu sola con la niña para abrirle la puerta a los policías que llegarían preguntando por mí.
Mis compañeros nunca me delataron, no dieron mi nombre ni mi dirección, a pesar de que no los trataban con guante blanco. Pensar en aquello me ha caldeado el ánimo muchas veces al recordar que no siempre me equivoqué al confiar en los demás.
Y un día la pesadilla se hizo realidad y me despidieran del trabajo: me vi en la calle cuando mi hija apenas tenía un año Los continuos enfrentamientos para reivindicar unos mínimos derechos laborales y sindicales, inexistentes en España entonces, hizo que me incluyeran en las listas negras... A partir de ahí fui de un lado para otro en busca de empleo, e hice casi de todo: vendedor a domicilio, camarero, limpiador de cristales, siempre sin contrato, por poco tiempo...
El día que me despidieron de mi último empleo para los fines de semana en un Pub de Cornellá, sin duda marcó mi vida. Volvía andando para casa, de noche, pensando en cómo le diría a Menchu que de nuevo estaba en paro cuando un coche patrulla se abalanzó sobre mí. Los policías estaban muy nerviosos: me pidieron la documentación y al carecer de ella me llevaron a comisaría, Inútil fue decirles que salía de trabajar e iba a mi casa. Allí me enteré de que un comando había hecho explosionar un artefacto cerca de donde yo me encontraba.
Permanecí toda la noche y toda la mañana siguiente en un calabozo maloliente, con restos de comida, vómitos, sangre, donde nos hacinábamos doce personas. Me llamó la atención un chico de mi edad, que conocía del barrio, aunque no habíamos hablado nunca. Su larga melena enmarañada y su rostro marcado por un culatazo hicieron que me fijara en él. Le habían golpeado al detenerle, cuando intentaba hacer "el puente" a un coche. Era "el Lolo". A mí me soltaron a la mañana siguiente, pero él se quedó allí. Volví al otro día para llevarle unas revistas y algo para asearse, justo antes de que lo llevaran a la cárcel.
Siguieron días y meses en los que caminaba kilómetros con tal de no gastar en transporte, me presentaba a cualquier trabajo, por pocas horas que fueran, por poco que pagaran... Había que elegir entre comprar detergente o comprar aceite, comprar pan o arroz, pagar el recibo de la electricidad o pagar el piso, y cada día renunciábamos a algo más: vendimos todo lo que tenía algún valor y lo único que sabía es que mi hija no debía sufrir las penalidades que nosotros le ahorrábamos a duras penas, y como todo el mundo pensé:
-"¡Si no encuentro trabajo robaré, haré lo que sea…

Una tarde volvía a casa con mi hija a hombros y me encontré a "Lolo". Acababa de salir de la Modelo y me preguntó cómo me iba:
-"Mal... Las deudas se nos acumulan y no tengo fácil lo de encontrar un trabajo. Parece como si los patronos se avisaran unos a otros..."
-"Quedamos mañana... quizás tenga algo para ti" - me dijo.
Al día siguiente, por primera vez, hablé con él sobre robos y atracos. Lolo tenía armas, pero necesitaba alguien con quien llevar a cabo algunos "trabajos", porque los robos nos reportarían poco beneficio y mucho riesgo, así, que había que ir a por los grandes empresarios.
-"Ellos tienen de sobra, nosotros, ni siquiera tenemos trabajo..."
Planeamos una especie de secuestro, basándonos en las películas que habíamos visto y en la idea de que nuestro aspecto adolescente y dubitativo podría hacer creer que éramos veteranos desalmados. Nuestra falta de experiencia y nuestra ingenuidad hizo que nos reuniéramos casi exclusivamente para profetizar nuestro éxito y la solución de nuestros problemas.
-Lo primero que voy a hacer es comprar la lavadora y pagar un año adelantado de alquiler… y a mi hija unos zapatos, porque los que lleva se le han quedado pequeños y le rozan, ya no quiere andar…¡Nada, le voy a comprar dos pares!
-"Tú estás tonto! ¿No ves que con lo que crecen los críos se le van a quedar pequeños antes de que los gaste? Además, vamos a decirle al pavo que lo del rescate de ahora, vale, pero dentro de unos meses que aligere otra vez la hucha…"
-"No fastidies, eso sería una canallada, es aprovecharnos de que está en nuestras manos… Además, yo para salir del paso lo haré, pero luego voy a poner una tienda o algo para vivir…"
A pesar de haber participado en el plan y estar de acuerdo en todo, íntimamente no me sentía del todo seguro, no era miedo al fracaso, sino a que alguien saliera herido, y sobre todo, remordimientos de

conciencia, porque entre los míos lo que nos sostiene es sabernos “pobres, pero honrados”.. Pero me obligaba a sentir un irrefrenable deseo de venganza pensando en mis múltiples despidos y los abusos que sufrimos, y, sobre todo, pensaba en las penurias que estaban pasando mi hija y Menchu, y eso me hizo decidirme a empuñar un arma.
Entre estos augurios de triunfo, pensamos que necesitábamos otra persona para ir seguros, y contamos con “Sebas”, al que conocí en esos momentos.
El “objetivo” fue el Sr. Ortiz, famoso por sus pastelitos. Pensábamos ir a buscarlo y llevarlo de banco en banco, retirando un "donativo" para sus acompañantes, bajo la amenaza de un explosivo junto al corazón, que a la menor sospecha haríamos saltar. Por supuesto no teníamos explosivo alguno, pero pensábamos que era una idea genial aprovechar el miedo que había provocado el “escapulario explosivo” que mató a Bultó y a Viola.
Pero quiso el destino, nuestra mala información y la improvisación que estuviera de viaje aquel día el señor Ortiz, y nos encontramos en casa a su mujer. Actuó como una experta en crisis, entrenada por las fuerzas especiales: se mostró conciliadora, nos entretuvo con minucias, nos hizo hablar y discutir largamente, ahondó en los desacuerdos entre nosotros y alternativamente daba la razón a uno y trataba de demostrar que los otros estaban errados, fingió estar conmovida por lo que consideraba un acto debido a la desesperación, se situó como victima cooperante y nos dejó inermes psicológicamente.
Sería un eufemismo decir que no supimos reaccionar muy inteligentemente: nos comportamos como los pardillos que éramos. Después de intentar robarle el poco dinero en efectivo que tenía en casa, nos disuadió porque lo necesitaba para la compra, y nos juró que nos haría entrega de una cantidad que estipuló por encima de la que pedíamos en cuanto pudiera disponer de dinero, además convencería a su marido para que nos diera trabajo... Así fue como se nos ocurrió la brillante idea de quedar en el bar de una estación de metro, sin escapatoria posible. El día acordado era yo quien debería ir a buscarr el dinero.

En mi vida había visto tanto policía y con tanto "modelito”. Los supuestos electricistas, la chica del estanco, los camareros... todos eran policías y se abalanzaron sobre mí en cuanto puse la mano en el bolso.
Así fue como me estrené para los dieciocho años de cárcel que me esperaban.
Aún debe de estar riéndose la Sra. Ortiz. Espero que su marido le haya obsequiado por su astucia con una vida cómoda y segura.

ÁNGEL ZAMORO DURÁN, "PATXI": A AMBOS LADOS DEL MURO

Hay quien cree que para escribir hace falta imaginación. Yo creo que la empatía, la piedad, y la capacidad de ponerse en el lugar de los demás bastan para sumergirnos en otro universo, otra lógica y otra sensibilidad. A veces ocurren misteriosas conexiones como la que me ocurrió con Ángel Zamoro, "Patxi", al que sólo conocí a través de unas pocas cartas desde la cárcel, que lograron traspasar esa especie de abotargamiento con el que nos defendemos de los demás. Y supe que tendría que describir lo que había sentido allí, como preso FIES, y durante dieciocho años de condena. Escribí a Arantxa, su viuda, y le conté que estaba obsesionada con Zamoro, como si su lógica y su modo de ser se hubieran trasvasado hasta mí. No era la primera vez que me ocurría, pero fue la primera vez que lo contaba abiertamente. Yo soy muy púdica en mis relaciones personales y suelo salpicar mis confidencias con ironías distanciadoras... Y en un momento dado me dirigí a ella llamándola "Pequeña saltamontes"... como la llamaba Zamoro. Pero yo no podía saberlo y sin embargo, no fue la única coincidencia.
Lander Garro ya estaba corrigiendo y editando "A ambos lados del muro", de "Patxi" Zamoro. Y hoy he acabado de leer su libro de un tirón llena de ternura y de admiración por aquel adolescente que entró con apenas diecinueve años a la cárcel y por el hombre que salió dieciocho años después, tras cientos de palizas, torturas, celdas de castigo,

medidas de confinamiento de excepcional crueldad y con una sola obsesión: luchar para denunciar lo que era el régimen FIES, para que nadie más tuviera que sufrir esa indignidad, esa deshumanización, en las cárceles españolas.
A Zamoro le pasó factura la prisión y murió con un proceso degenerativo hepático tres años después de salir de la cárcel. Nadie sabe porqué son esas enfermedades letales de etiología desconocida, incluso en ex-presidiarios como Zamoro, que no fumaba habitualmente y no se drogó jamás, y quizás algún día se investigue y se llegue a saber.

IMPRECACIÓN

La cautela, la clandestinidad caracterial, el disimulo, estar alerta, precavida, ya forma parte de tu naturaleza, vieja zorra. Al principio te costó sudar frío y apretar los dientes, engañar a. los cazadores y los perros de presa. Ahora ya ni los perros olfatean tu pista, eres invencible porque a tu lado has visto morir a tus cachorros y aquellos zorritos juguetones, apenas destetados, adornan con su piel el cuello de tus enemigos y has permanecido impasible, sin acercarte más que para atacar, vieja zorra, ya sin gusto por la sangre, pero todavía apasionada por el riesgo.
Vieja corra, sigue alerta. No dejes que sepan que hay algo más fuerte que tu instinto de conservación, que los cazadores y los taxidermistas sigan ignorando cuál es el cebo que te hallará vulnerable, a su merced, porque tu secreto me ha permitido llegar hasta aquí

indemne, cobijada en tu flanco. Tú me has conducido entre el olor de la pólvora, burlando la mira de sus rifles, hasta este refugio, sin temor a nadie porque tú velabas por mí y yo pude degustar la imprudencia y el peligro sin consecuencias.

Cuidado, vieja zorra, guarda tu miedo, tu cautela, tu desconfianza y tu crueldad para que yo no necesite saber qué es eso. Yo sé que a tí también te gustaría remontar el curso del destino y encontrarte con tu memoria de especie y sueñas con salir a descubierto, cruzar la cerca y volver a ser aquella que jugaba con sus cachorros, triscaba hierba con el rebaño, haciéndole rabiar a las gallinas... Pero no puedes, zorra. Con tu piel harían una alfombra que aísle del frío en las mañanas de febrero. Cuídate, vieja zorra, y cuídanos.

Tu hermosísimo post me ha recordado un sueño que tuve hace unos años y que aún recuerdo por lo mucho que me impresionó.
En el sueño estaba yo durmiendo en mi cama cuando aparecieron en mi habitación un lobo y una zorra. La zorra se subió encima de mi y me tironeaba con el hocico... el lobo me miraba inmutable con sus ojos transparentes.
Recuerdo que me sentí (dentro del sueño aún) tan impresionada por esas dos presencias numinosas que sentí un sagrado estupor... pero a continuación empecé a preocuparme por como habían entrado esas dos bestezuelas en mi casa y me puse histérica intentando echarles fuera.
Cuando me desperté sentí aún la presencia de esos dos seres a mi lado y comprobé que soy capaz de ser controladora y montar un numerito histérico hasta en sueños... grande es mi poder.
Todavía recuerdo los ojos del lobo.
Besitos.

Y ahora enlazando con tu post anterior y para llevarle la contraria al Kavafis amargueta... estoy segura de que esa fué una primera visita que yo no estaba preparada aún para aceptar... pero que volverán el lobo y la zorra a mi huerto y a mi higuera... de hecho están volviendo de cuando en cuando. Me aman.

Me pregunto si es la vieja zorra la que protege o si son los otros que como parásitos se pegan a su sombra como lastres. Y si el miedo no se vuelve manía y si alguna vez se pierde el hablar bajando la voz y mirando a los lados o si es que se nos llega a colar en la sangre y transforma incluso nuestros genes.
Quisiera soñar que es posible, todo, desatar nudos visibles e invisibles y que por un instante la vieja zorra vuelva a jugar en la hierba, que vuelva justo al minuto anterior al último en que no sintió miedo.

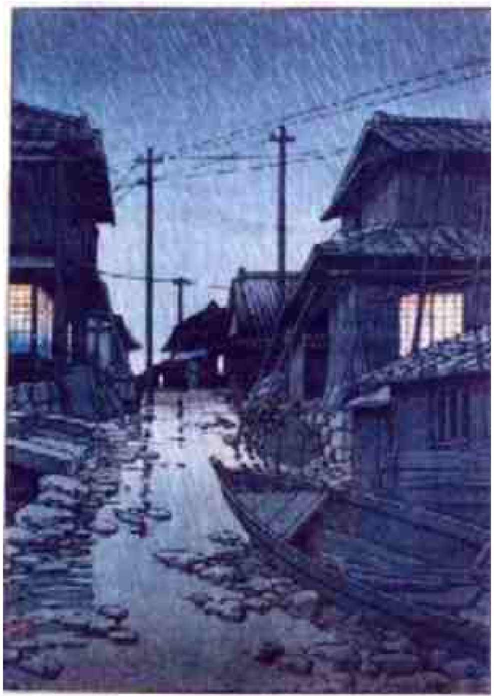
LA CIUDAD



Dices «Iré a otra tierra, hacia otro mar
y una ciudad mejor con certeza hallaré.
Pues cada esfuerzo mío está aquí condenado,
y muere mi corazón
lo mismo que mis pensamientos en esta desolada languidez.
Donde vuelvo mis ojos sólo veo
las oscuras ruinas de mi vida
y los muchos años que aquí pasé o destruí».
No hallarás otra tierra ni otra mar.
La ciudad irá en ti siempre. Volverás
a las mismas calles. Y en los mismos suburbios llegará tu vejez;
en la misma casa encanecerás.
Pues la ciudad siempre es la misma. Otra no busques

-no hay-,
ni caminos ni barco para ti.
La vida que aquí perdiste
la has destruido en toda la tierra.

Caray!... ¿este Kavafis es el mismo que escribió el viaje a Itaca?... pues vaya.
El dia que escribió este poema estaba de bajonazo total... qué pesimista... qué lapidario... qué exagerado... qué amargao y qué aguafiestas.
Habrá que hacer un sesudo estudio de su obra para analizar si padecía un trastorno bipolar como la copa de un pino. Así se explicaría que un dia te animara a emprender un viaje sin fin y sin final y otro dia te prohibiera asomar la nariz fuera del sótano de tu casa.
Yo como que me voy a quedar con lo de Itaca que me mola mucho más... besitos.

Quizás hable de esa ciudad que tenemos dentro y que llevamos a cualquier sitio; que por más afeites irá envejeciendo si no la cuidamos. Pero si de lo que habla es de la prisión externa, pues sí, menudo mal día que estaría pasando.
Prefiero leerlo como que la vida es ahora, este minuto, si lo "vives" intensamente, vivirá así por siempre; si en su lugar lo "mueres", de esa forma quedará atrapado.

Sra. Enkidu, si se toma la molestia de reflexionar un poco (lo siento, hoy estoy antipático) verá Usted que en el poema "La ciudad" mi buen amigo Kavafis de ningún modo contradice su propia tesis del viaje a Itaca, aunque una lectura superficial y distraída como la que Usted llevó a cabo (ya le dije que hoy estoy intratable, el que avisa...) así pareciera indicarlo.
De modo que vuelva a leer "La ciudad", vuelva a leer "Itaca", falte a su oficina o lugar

de trabajo (yo le extenderé un certificado en caso que le hiciera falta) y dedique dos días a reflexionar. Cuando haya obtenido una conclusión plausible la redactará en medio folio y la transcribirá aquí.

¿No basta con sentir la ciudad? ¿Hay que analizarla?
La ciudad, la vida, Malher, Venecia, el maquillaje derritiéndose por el rostro, la lluvia llorando por las paredes verdines de Venecia...
Señor Augusto R. levante el castigo a Enkidu. Ella es joven, vital, y leer de nuevo el poema solo le traera la sensación de no saber por qué se la castiga.
El poema no está destinado para ella, no aún. Es para mi, cuando abandono mi isla luminosa y entro en la decadencia de los recuerdos... Creta, Ítaca, islas...

A ver... que yo el poema lo entiendo, eh. Qué tan tonta no soy. Que comprendo lo que quiere decir pero no comparto su tesis. Una cosa es comprender intelectualmente un poema y otra cosa es empatizar con él... o que te conmueva.

A mi me parece un poema pesimista, que no cree que cambiando de lugar se pueda cambiar interiormente. Yo no comparto esta idea, creo que los lugares, la gente que te rodea, las circunstancias condicionan bastante. Tampoco creo que por cambiar de sitio ya inmediatamente vayas a cambiar, porque efectivamente puede que tus problemas los lleves contigo a donde vayas.
Y no es una visión "juvenil", creo. Los antiguos ya recomendaban un "cambio de aires" para curar ciertas dolencias, especialmente la melancolía.
Este poema de Kavafis me recuerda (en sentido contrario) una canción de Serrat que se llama "Mi pueblo blanco"...
... Si yo pudiera unirme a un vuelo de gaviotas
y remontando lomas dejar mi pueblo atrás...
Creo que las personas tenemos muchas más posibilidades de cambiar de las que nos pensamos... y un cambio de circunstancias puede ayudar mucho a un cambio interno.

Fecha: 04/06/2005 21:54.

Autor: Gatopardo

Enkidu ¿tú crees que un cambio de aires te ayudaría a sintetizar? Yo creo que no. ¿Tú crees que te haría percibir el mundo sin el tamiz del yo-me-mi-conmigo? Yo creo que no. ¿Tú crees que te haría captar lo que no es tu propia percepción de las cosas? Yo creo que no.

Siempre he dicho que el río no cambia, cambio yo. Y el tiempo, Enkidu, nos ayuda a entender luego lo que ahora no necesitamos entender. No te enfades, niña, pero la poesía es lo que es, y a cada uno le alcanza de una forma distinta. Yo no veo melancolía sino realidad de un imposible.
"Pues la ciudad es la misma"
Y la fatalidad está en huir de ella, cuando es de nodotros mismos de quien intentamos inútilmente huir...
Bueno, dejo este berenjenal en el que me estoy metiendo.

MI AMIGA GATOPARDO

Gatopardo es ese tipo de amiga que, cuando se interesa por tu salud, te pone al corriente de sus achaques desde el sarampión, antes de que contestes, y si llegas pensando en su reacción ante el regalo que le llevas, te equivocarás porque nadie puede prever que vaya a relatarte cuánto le gustaron los regalos que recibió, desde aquel sonajero que tuvo en la cuna hasta el cuadro con la orla de su graduación, y pueda olvidar indefectiblemente mencionar qué le parece el que le haces en ese momento.
Oyéndola llego a la conclusión de que sólo conozco gandules que no trabajan veinticuatro horas como ella, que ha logrado convencerme de que me está escribiendo una carta desde hace veinte años, que servirá como contestación a la que le mandé el mes pasado.
Yo creo que su percepción de la cortesía elemental no se basa en el calendario sino en su convicción de que si lo pensó es que lo hizo, como aquellos ingenuos salvajes que mataban un ciervo en sueños y se despertaban creyendo tenerlo en la despensa, listo para dejarse almorzar. Pero que yo sepa cuando descubrían que no estaba, no juraban haberlo descuartizado. Gatopardo está convencida de haber correspondido y trata de llevarte a ese punto en el que pides cita con el neurólogo para que te diagnostique el Alzheimer.
Gatopardo, como cualquiera puede maliciarse, es abogado de cualquier causa perdida de antemano, por vocación. Algunos han asegurado que tiene una secreta perversión que le hace llegar al orgasmo recitando la Jurisprudencia del Tribunal Supremo, pero siempre lo dicen los despechados, si bien es verdad que no se le conoce otros, aunque la he oído hablar apasionadamente de un tal Aranzadi, pero no me lo ha presentado.
Suele hacer incisos inextricables en los que las personas de las que habla se enredan como cerezas sin orden cronológico y algunas aparecen tras medio siglo de ausencia por la magia de su lógica.A Gatopardo no es que le falle la memoria inmediata, es que cualquier cosa que ocurra en el presente la retrotrae a tiempos pretéritos, adonde campan sus queridos difuntos.
Y no es porque no quiera a sus amigos, es que su cariño necesita de un proceso de maduración similar al del queso Rochefort, sepultado durante años en una oquedad adonde no llega la luz, hasta lograr ese punto exquisito de putrefacción que lo identifica.

Con ella siempre tengo la sensación de que cuando se deja llevar por la emotividad conmigo, es porque me imagina de cuerpo presente, y sus frases de cariño tienen el perfume sutil de inscripciones funerarias.
Gatopardo y yo somos amigos desde hace más de veinticinco años porque cuando yo me muera sé que será la única que hablará de mí a todo el mundo, venga o no venga a cuento.

PROLOGOS DE HERMIONE PARA GATOPARDO

PRÓLOGO DESAHUCIADO:
Esta no es la bitácora que haya soñado jamás nadie leer. Ni siquiera la que haya soñado nadie escribir.
Aquí no encontrará el elixir del pensamiento, ni hechizos amatorios, ni "Sonrisas y lágrimas", tan sólo curiosidades, anécdotas producto de la lúcida observación de un ingenio despierto sin tregua.
La que suscribe estas palabras, no es ninguna prescriptora, ninguna autoridad en campo alguno. Tampoco una experimentada lectora. Me leí un relato una vez y no era ninguno de éstos.
Por eso, tal vez, mi entusiasta crítica anime a los expertos a abrir estas páginas y dedicarle un tiempo a este corto capítulo de la gran futura obra de Gatopardo.

PRÓLOGO A LO BUKOWSKI:
Como bien dijo un visionario representante literario, los relatos que componen esta bitácora, son unos relatos mediocres.
Su utilidad bien podría ser la de papel auxiliar, una vez impresos, cuando se nos agota el del baño, o la de entretener con juegos de adivinanzas a los niños.
Si firmo este texto no es porque tenga deuda alguna con el escribiente, sino porque me he apostado unos whiskies con el autor, ¡peor aún, autora!
En fín, que gusten ustedes hacer lo que quieran de este cuadernillo, que yo ya la ronda me la tengo ganada.
¡A su salud!

PRÓLOGO CLÁSICO O PELOTÓN
Cuando finalice la lectura de esta colección de relatos, estoy convencida de que lo hará con una sonrisa satisfecha. Con un sentimiento de plenitud que inundará todo su ser.
Bajo un estado de ensoñación del que se verá incapaz de despertar, no deseará que nada le extraiga de él.
Se preguntará por la mano de quien haya podido dar lugar a estos elegantes textos, la

inteligencia que patrocina estas intrigantes narraciones, la sensibilidad que cuida y hiere las imperfecciones de la naturaleza humana, y deseará no ya un fugaz encuentro amoroso, sino simplemente mantener la ilusión de que su autora pudiera saber de la existencia de su necia persona.
Y yo puedo revelarles, que sólo alguien cuya misión es experimentar en la vida, con crudas exigencias para sí misma y para los demás, puede ser dueña de resultados como los de esta bitácora.
....

P.D. También puedo hacer títulos, que me gusta mucho.

DESISTO PORQUE ES MAYO

Para Augusto R, por nuestro periplo siciliano.

Desisto porque es mayo
y apenas me predisponga a amar,
vendrá el estío, lleno de sol y pesadillas,
y me quedaré con los brazos vacíos
y mi sonrisa aviesa,
recorriendo la soledad de punta a punta.
En la distancia no hubo exilio,
nadie colmó aquel viejo estante
ni sustituyó a su sombra otro perfil
que aquél que fue.
En mi código se reiteró lo tácito, el silencio,
con ese pudor inoperante
que tenemos los nómadas, las putas
y los muy sabios
para decir adiós y jamás olvidar.

EL ROMANCE DEL PRISIONERO

Recogida por Ramón Menéndez Pidal en "Flor Nueva de Romances Viejos"

Que por mayo era, por mayo,
cuando hace la calor,
cuando los trigos encañan
y están los campos en flor,
cuando canta la calandria
y responde el ruiseñor,
cuando los enamorados
van a servir al amor;
sino yo, triste, cuitado,
que vivo en esta prisión;
que ni sé cuándo es de día
ni cuándo las noches son,
sino por una avecilla
que me cantaba al albor.
Matómela un ballestero;
déle Dios mal galardón.

Estaba yo en la mi choza
pintando la mi cayada;
las cabrillas altas iban
y la luna rebajada,
vide venir siete lobos
por una oscura cañada
venían echando suertes
cuál entrará en la majada.
Le tocó a una vieja loba
patituerta, cana y parda
que tenía los colmillos
como punta de navaja.
Dio tres vueltas al redil
y no pudo sacar nada.
A la otra vuelta que dio
sacó a borrega blanca
hija de la oveja churra,
nieta de la orejisana,
la que tenían mis amos
para el domingo de pascua...

Y no me acuerdo de más. Me encantan los romances, tienen un no sé qué que no sé qué es lo que tienen...

Hola, amiga. Gracias por tu visita. Me ha gustado lo de la tarjeta de visita. Pero es que a mí me tiran los epitafios. Ten en cuenta que yo me paseaba con quince años por el cementerio y escribía poemas sentado sobre las lápidas. Hablando de poemas, este romence se lo sabe Celia de memoria y me lo ha recitado más de una vez con su voz, una de las más hermosas del universo, seguro.
Verlo aquí escrito, como me ha ocurrido en otras ocasiones, desata en mí la certeza de nuestra absoluta unidad de alma.

más o menos sigue así:

- ¡Acá mis siete cachorros,
acá perra trujillana,
acá perro el de los hierros,
a correr la loba parda!
Si me cobráis la borrega,
cenaréis leche y hogaza;
y si no me la cobráis,
cenaréis de mi cayada.

Los perros tras de la loba,
las uñas se esmigajaban;
la corrieron siete leguas
por unas tierras aradas.

Al subir un cotarrillo
la loba ya va cansada:
- Tomad perros la borrega
sana y buena como estaba.

- No queremos la borrega
de tu boca alobadada,
que queremos tu pellejo
pa' el pastor una zamarra;
el rabo para correas,
para atacarse las bragas;
de la cabeza un zurrón,
para meter las cucharas;
las tripas para vihuelas,
para que bailen las damas.

Mi padre era un maestro de un pueblo de Salamanca y el año 36 lo mataron los “nacionales”. Como no teníamos madre, mi hermana de trece años tuvo que ponerse a servir en la iglesia del cura, que era de los que nos mataron al padre. Ella me enseñó las letras que tengo. Yo era de pocos años y, para comer, fui zagal de un pastor de ovejas. A los seis años anduve muchas veces la Cañada Real, desde León a la Alcudia. Aún hoy, con 75 años, me gusta cantar con un rabel y bailaría si tuviera con quién. Labro cuernos, como aprendí con los pastores. La historia de la loba que ponéis la cantaba con el rabel y otras parecidas. Yo os digo que empezaba así:

“Las cabrillas altas iban
y la luna arrebajada,
las ovejas de un cabrón
no paran en la majada”.

A la fe, Gil Gonzapito,
por los tus pecados penas.
¡Si no haces obras buenas
no esperes ganarte el vito!

Tenías do bien pacieses
en verdura todo el año
y te metiste a hacer daño
en el haza por las mieses.

¿Por qué traes tal sobrecejo?
Andas esta madrudgada
la cabeza desgreñada.
¿No te llotras de buen rejo?

Pues perdido has el cayado,
vas zanqueando con los pies,
dando trancos al través,
tras cualquiera, desbabado.

La color tienes marrida
y no oteas si te vas
adelante o cara atrás,
como res que andas perdida.

Te moviste de ligero,
rebellado, al apriscar,
y así has venido a dar
manso, en el trasquiladero.

Cata que se rompe el cielo,
deszorrúmase la tierra;
cata que el ñublo se cierra,
rebellado. ¿No has recelo?

Si no tomas mi consejo,
Gonzapito, esta vegada,
habrás tal estorajada
que te escueza el pestorejo.

PANDÉMICA Y CELESTE

quam magnus numerus Libyssae arenae
...
aut quam sidera multa, cum tacet nox,
furtiuos hominum uident amores.
Catulo, VII

Imagínate ahora que tú y yo
muy tarde ya en la noche
hablemos hombre a hombre, finalmente.
Imagínatelo,
en una de esas noches memorables
de rara comunión, con la botella
medio vacía, los ceniceros sucios,
y después de agotado el tema de la vida.
Que te voy a enseñar un corazón,
un corazón infiel,
desnudo de cintura para abajo,
hipócrita lector -mon semblable,-mon frère!

Porque no es la impaciencia del buscador de orgasmo
quien me tira del cuerpo a otros cuerpos
a ser posiblemente jóvenes:
yo persigo también el dulce amor,
el tierno amor para dormir al lado
y que alegre mi cama al despertarse,
cercano como un pájaro.
¡Si yo no puedo desnudarme nunca,
si jamás he podido entrar en unos brazos
sin sentir -aunque sea nada más que un momento-
igual deslumbramiento que a los veinte años !

Para saber de amor, para aprenderle,
haber estado solo es necesario.
Y es necesario en cuatrocientas noches
-con cuatrocientos cuerpos diferentes-
haber hecho el amor. Que sus misterios,
como dijo el poeta, son del alma,
pero un cuerpo es el libro en que se leen.

Y por eso me alegro de haberme revolcado
sobre la arena gruesa, los dos medio vestidos,
mientras buscaba ese tendón del hombro.
Me conmueve el recuerdo de tantas ocasiones...
Aquella carretera de montaña
y los bien empleados abrazos furtivos
y el instante indefenso, de pie, tras el frenazo,
pegados a la tapia, cegados por las luces.
O aquel atardecer cerca del río
desnudos y riéndonos, de yedra coronados.
O aquel portal en Roma -en vía del Balbuino.
Y recuerdos de caras y ciudades
apenas conocidas, de cuerpos entrevistos,
de escaleras sin luz, de camarotes,
de bares, de pasajes desiertos, de prostíbulos,
y de infinitas casetas de baños,
de fosos de un castillo.
Recuerdos de vosotras, sobre todo,
oh noches en hoteles de una noche,
definitivas noches en pensiones sórdidas,
en cuartos recién fríos,
noches que devolvéis a vuestros huéspedes
un olvidado sabor a sí mismos!
La historia en cuerpo y alma, como una imagen rota,
de la langueur goûtée à ce mal d'être deux.
Sin despreciar
-alegres como fiesta entre semana-
las experiencias de promiscuidad.

Aunque sepa que nada me valdrían
trabajos de amor disperso
si no existiese el verdadero amor.
Mi amor,
íntegra imagen de mi vida,
sol de las noches mismas que le robo.

Su juventud, la mía,
-música de mi fondo-
sonríe aún en la imprecisa gracia
de cada cuerpo joven,
en cada encuentro anónimo,
iluminándolo. Dándole un alma.
Y no hay muslos hermosos
que no me hagan pensar en sus hermosos muslos

cuando nos conocimos, antes de ir a la cama.

Ni pasión de una noche de dormida
que pueda compararla
con la pasión que da el conocimiento,
los años de experiencia
de nuestro amor.
Porque en amor también
es importante el tiempo,
y dulce, de algún modo,
verificar con mano melancólica
su perceptible paso por un cuerpo
-mientras que basta un gesto familiar
en los labios,
o la ligera palpitación de un miembro,
para hacerme sentir la maravilla
de aquella gracia antigua,
fugaz como un reflejo.

Sobre su piel borrosa,
cuando pasen más años y al final estemos,
quiero aplastar los labios invocando
la imagen de su cuerpo
y de todos los cuerpos que una vez amé
aunque fuese un instante, deshechos por el tiempo.
Para pedir la fuerza de poder vivir
sin belleza, sin fuerza y sin deseo,
mientras seguimos juntos
hasta morir en paz, los dos,
como dicen que mueren los que han amado mucho.

¡Qué bello!¡Qué hermoso, carnal, material...!. Amiga, ¿se enteró alguna vez la Iglesia, nos hemos enterado todos, que cada Navidad celebramos el nacimiento del Amor hecho Carne en la Historia?.
¡Sagrada piel, sagrados huesos revestidos de músculos y nervios!¡Sagrada forma de un cuerpo acariciable, besable, comestible para un Dios!.
Un beso con todo mi afecto.

CONSIDERANDO EN FRÍO, IMPARCIALMENTE

Considerando en frío, imparcialmente,
que el hombre es triste, tose y, sin embargo,
se complace en su pecho colorado;
que lo único que hace es componerse
de días;
que es lóbrego mamífero y se peina...

Considerando
que el hombre procede suavemente del trabajo
y repercute jefe, suena subordinado;
que el diagrama del tiempo
es constante diorama en sus medallas
y, a medio abrir, sus ojos estudiaron,
desde lejanos tiempos,
su fórmula famélica de masa...

Comprendiendo sin esfuerzo

que el hombre se queda, a veces, pensando,
como queriendo llorar,
y, sujeto a tenderse como objeto,
se hace buen carpintero, suda, mata
y luego canta, almuerza, se abotona...

Considerando también
que el hombre es en verdad un animal
y, no obstante, al voltear, me da con su tristeza en la cabeza...

Examinando, en fin,
sus encontradas piezas, su retrete,
su desesperación, al terminar su día atroz, borrándolo...

Comprendiendo
que él sabe que le quiero,
que le odio con afecto y me es, en suma, indiferente...

Considerando sus documentos generales
y mirando con lentes aquel certificado
que prueba que nació muy pequeñito...

le hago una seña,
viene,
y le doy un abrazo, emocionado.
¡Qué mas da! Emocionado... Emocionado...

Me gustaría saber cuál es la razón por la que no conocía tu blog. Me encanta lo que escribes: la forma y el fondo. Y este post sobre Vallejo te lo agradezco de manera especial: es mi poeta favorito: Trilce, Poemas Humanos, España, aparta de mí este Cáliz... Ay, Georgete, París (con aguacero). Estuve sentado en su tumba en el cementerio de Montparnasse, muy cerca de la de Beckett. Te leeré.

TORTURAS BAJO CUSTODIA DEL ESTADO

El Capellán del Hospital Psiquiátrico Penitenciario de Fontcalent ha denunciado en el Juzgado las sistemáticas palizas y agresiones a internos por parte de un grupo de funcionarios, que han amenazado también al sacerdote.
Para más información: Artículo en el Diario Información Edición Digital de Alicante, 18 de mayo de 2005
Europa Press(17 de mayo 2005) La Asociación Pro-Derechos Humanos (APDH) de Córdoba denunció que los datos que ofrece el informe de 2004 sobre la tortura en el Estado español sitúa a la prisión de Córdoba como el centro penitenciario con un mayor número de muertes. Según la información facilitada de las 38 muertes que ha habido en la prisión de Córdoba desde 2001 sólo ocho fueron por muerte natural, y aseguró que los otros 30 casos responden a sobredosis, enfermos crónicos a los que no se les deja morir en sus casas y a torturas que han sido denunciadas pero que no tiene el

tratamiento judicial que otras denuncias. APDH ha solicitado que se puedan acoger al "*Habeas Corpus*", el derecho a comparecer inmediatamente ante un juez porque "*si no es así*, -dicen-, *las lesiones son imperceptibles cuando se inician los procesos judiciales*". Según el comunicado, la justicia, en los casos que hoy recordó APDH, "*ha actuado de forma deficiente porque no se ha investigado y también se han buscado pruebas de torturas denunciadas cinco meses después de que se produjeran los hechos*".
En la prisión de Albolote (Granada) hay una investigación "interna" sobre los hechos presuntamente ocurridos el pasado 23 de abril, cuando entraron dos funcionarios de prisiones en la celda donde se encontraba un interno que sufre una enfermedad mental, y tras cerrar la puerta "*le pegaron con porras en la espalda, glúteos y genitales*" oyéndose los gritos pidiendo auxilio del agredido "*en todo el módulo*", según informa el coordinador del Area de Cárceles de la Asociación Pro Derechos Humanos de Andalucía (APDH-A), Miguel Gámiz, y que ha acompañado a la madre del reo a denunciarlo ante la Justicia.
Para más información: Siglo XXI Diario Digital 17 de mayo de 2005
Deberíamos poder confiar en que las autoridades competentes logren cumplir con su cometido y protejan a quienes están bajo custodia del Estado y son maltratados por sus funcionarios.

Sabemos que no es económicamente rentable el enfermo mental, y por eso no se le ingresa en un Psiquiátrico para recibir el tratamiento que necesita hasta que no haya cometido un delito y el Juez decida recluirlo.
Y después, lo que le espera en un psiquiatrico penitenciario o en una cárcel puede ser el maltrato sistemático, silenciado o denunciado, pero ignorado por la sociedad civil que cree estar a salvo de esa enfermedad ignominiosa llamada locura.

Qué barbaridad. Una de mis utopias es precisamente la de un sistema penitenciario humano. Porque no me cabe duda de que hay individuos a los que no hay mas remedio que quitar de la circulación, pero deberían recibir un trato digno y tienen derecho a una reeducación cuando eso es posible.
Otro de mis sueños es que se considere todo delito como un trastorno... para mi hay trastornos mentales, trastornos de la afectividad, trastornos de la personalidad y trastornos morales. Creo que algunas personas que hacen mucho daño a otras tienen un grave déficit moral, pero no tengo ni idea de si algo así tiene tratamiento y cual sería.

MEMORIAS DE UN ASESINO ECONÓMICO A SUELDO

JOHN PERKINS: "Confesiones de un asesino económico a sueldo"

PERIODISTA DIGITAL
Domingo, 15 de mayo 2005

En su libro "*Confesiones de un Economic Hit Man*", John Perkins describe cómo él mismo, un profesional muy bien pagado, ayudó a EEUU a timar a países pobres alrededor del mundo en trillones de dólares prestándoles más dinero del que ellos podrían alguna vez pagar, para luego hacerse dueño de sus economías.
Hace 20 años, Perkins comenzó a escribir un libro con el efectivo título: *"Conciencia de un Economic Hit Man"*. Perkins dice:
"*El libro iba a estar dedicado a los presidentes de dos países, hombres que habían sido clientes, a quienes yo respeté y de pensamientos afines —Jaime Roldós, Presidente de Ecuador, y Omar Torrijos, Presidente de Panamá. Los dos murieron en accidentes de aviones. Sus muertes no fueron accidentales. Ellos fueron asesinados porque se opusieron a esa fraternidad de corporaciones, gobiernos y élites bancarias del imperio global.*
Nosotros, los Economic Hit Man fallamos en obtener a Roldós y a Torrijos... y otro tipo de Hit Men, los chacales castigadores de la CIA que siempre estaban detrás de nosotros, llevaron a cabo su tarea."
John Perkins sigue en su escrito:
"*Fui persuadido para detener el libro que escribía. Cuatro veces más lo retomé durante los siguientes veinte años. En cada ocasión, mi decisión para recomenzar fue influida por los eventos del mundo actual: la invasión norteamericana de Panamá en 1980, la primera Guerra del Golfo, Somalía, y el surgimiento de Osama Bin Laden. Sin embargo, las amenazas o sobornos siempre me convencieron que lo detuviera*."
Pero ahora Perkins ha publicado finalmente su historia. El libro se titula: "*Confesiones de un Economic Hit Man*" A continuación, una entrevista con el autor.

AMY GOODMAN: Explíquenos este término, el "*Economic Hit Man*", E.H.M., como usted lo llama.
JOHN PERKINS: Básicamente para lo que fuimos entrenados y para lo que era nuestro trabajo fue construir al imperio norteamericano. Para traer, para crear situaciones, en dónde tantos recursos como sea posible, fluyan a este país, a nuestras corporaciones y a nuestro gobierno y de hecho nosotros hemos tenido mucho éxito. Hemos construido el imperio más grande en la historia del mundo. Se ha llevado a cabo durante los últimos 50 años desde la Segunda Guerra Mundial, realmente con muy poco poderío militar. Sólo en casos raros como Irak dónde el ejército entra como el último recurso. Este imperio, al contrario de cualquier otro en la historia del mundo, se ha construido principalmente a través de la manipulación económica, a través de las estafas, a través del fraude, a través de seducir a los pueblos en nuestro estilo de vida, a través de los *Economic Hit Man*. Yo fui, eso es seguro, una parte de todo eso.
AMY GOODMAN: ¿Cómo llegó a serlo? ¿Para quien trabajó?
JOHN PERKINS: Inicialmente fui reclutado mientras estaba en la Escuela de Negocios a finales de los sesenta por la Agencia de Seguridad Nacional, la organización de espionaje más grande y menos comprendida de la nación; pero finalmente trabajé para las corporaciones privadas. El primer auténtico *Economic Hit Man* fue Kermit Roosevelt, nieto de Teddy, a principios de los años 50, quien derrocó al Gobierno de Irán, un gobierno democráticamente elegido, el Gobierno de Mossadegh que fue la persona del año de la revista Time; y tuvo un gran éxito en hacer esto sin gran derramamiento de sangre, aunque hubo alguna, pero fue sin intervención militar, simplemente gastó millones de dólares y reemplazó a Mossadegh con el Shah de Irán.
En ese momento, entendimos que esta idea de un *Economic Hit Man*era sumamente buena. No teníamos que preocuparnos por la amenaza de guerra con Rusia cuando lo hacíamos de esta manera. El problema con eso era que Roosevelt era un agente de la

C.I.A. Él era un empleado gubernamental. Si le hubiesen cogido, habríamos tenido muchos problemas. Habría sido muy embarazoso. Así que, en ese punto, se tomó la decisión de usar organizaciones como la C.I.A. y la Agencia de Seguridad Nacional para reclutar a los potenciales *Economic Hit Man*, como yo, luego enviarnos a trabajar para las compañías consultoras privadas, empresas de ingeniería, empresas de construcción, para que si nos descubrían, no hubiese ninguna conexión con el gobierno.
AMY GOODMAN: De acuerdo. Explíquenos sobre la compañía para la cual trabajó.
JOHN PERKINS: La compañía para la cual trabajé era una compañía llamada Chas. T. Main de Boston, Massachusetts. Éramos aproximadamente 2.000 empleados y llegué a ser el jefe economista. Terminé teniendo cincuenta personas que trabajan para mí. Pero mi trabajo real era hacer tratos. Fue dando préstamos a otros países, grandes préstamos, más grande que lo que ellos podrían rembolsar. Una de las condiciones de los préstamos —digamos de 1 billón de dólares a un país como Indonesia o Ecuador— era que este país tendría entonces que devolver el noventa por ciento de ese préstamo a una compañía o a compañías norteamericanas para construir la infraestructura —a la Compañía Halliburton o a Bechtel.
Éstos eran los grandes. Esas compañías entrarían entonces y construirían un sistema eléctrico o puertos o carreteras y éstos servirían básicamente sólo para unas pocas de las familias más adineradas en esos países. Los pobres en aquellos países serían finalmente atrapados con una asombrosa deuda que ellos posiblemente no podrían rembolsar.
Un país hoy en día como Ecuador simplemente debería destinar sobre el cincuenta por ciento de su presupuesto nacional para pagar su deuda. Y realmente no puede hacerlo. Así que, nosotros los tenemos literalmente encima de un barril. Así, cuando nosotros queremos más petróleo, vamos a Ecuador y decimos, "*Pareciera que usted no puede rembolsar sus deudas, por consiguiente entregue su bosque lluvioso Amazónico que está lleno con petróleo a nuestras compañías petroleras*". Y hoy estamos entrando y estamos destruyendo los bosques lluviosos del Amazonas, forzando a Ecuador a darnos porque ellos han acumulado toda esa deuda. Así que nosotros hacemos este gran préstamo, del que la mayoría regresa a los Estados Unidos, el país queda con la deuda más un montón en intereses, y ellos se transforman básicamente en nuestros sirvientes, en nuestros esclavos. Es un imperio. Es un imperio enorme.
AMY GOODMAN: Usted dice que debido a los sobornos y a otra razones usted no escribió antes este libro. ¿Qué quiere decir con ello? ¿Quién intentó sobornarlo, o cuales fueron los sobornos que usted aceptó?
JOHN PERKINS: Bien, acepté medio millón de dólares de soborno en los años noventa para no escribir el libro.
AMY GOODMAN: ¿De quien?
JOHN PERKINS: De una gran compañía de ingeniería de construcción.
AMY GOODMAN: ¿Cuál?
JOHN PERKINS: Hablando legalmente, no fue un soborno, fui pagado como consultor. Esto es todo muy legal. Pero esencialmente no hice nada. Estaba implícito cuando acepté este dinero como consultor para ellos que yo no tendría que hacer mucho trabajo, pero no debería escribir ningún libro sobre el asunto, por lo cual ellos eran conscientes que estaba en el proceso de escribir este libro que en ese momento yo llamé *"Conciencia de un Economic Hit Man"*.
AMY GOODMAN: Bien eso es ciertamente lo que el libro dice.
JOHN PERKINS: Sí, y lo fue, ¿sabe usted? Cuando la Agencia de Seguridad Nacional me reclutó, ellos me pusieron durante todo un día en el detector de mentiras. Averiguaron todas mis debilidades e inmediatamente me sedujeron. Usaron las drogas más fuertes en nuestra cultura, sexo, poder y dinero, para seducirme. Vengo de una vieja familia de Nueva Inglaterra, calvinista, empapada en valores morales increíblemente fuertes. Pienso que soy sobre todo una buena persona y realmente pienso que mi historia

muestra cómo este sistema y estas drogas poderosas, el sexo, el dinero y el poder, pueden seducir a las personas: porque fui seducido ciertamente. Y si no hubiese vivido esta vida como un *Economic Hit Man*, pienso que me sería difícil creer que alguien haga estas cosas. Y por eso escribí el libro, porque nuestro país realmente necesita entender, si las personas en esta nación entendieran acerca de lo que es realmente nuestra política exterior, acerca de la ayuda al exterior, cómo trabajan nuestras corporaciones, dónde va nuestro dinero de los impuestos, sé que nosotros exigiríamos cambios.
AMY GOODMAN: En su libro, usted habla sobre cómo ayudó a llevar a cabo un esquema secreto que hizo fluir billones de dólares de los petrodólares de Arabia Saudita de vuelta en la economía norteamericana y eso extensamente consolidó la íntima relación entre la Casa Saudí y las sucesivas administraciones norteamericanas. Explíquenos.
JOHN PERKINS: Sí, fue un tiempo fascinante. Recuerdo bien, usted es probablemente demasiado joven para recordar, pero yo recuerdo bien a principios de los años setenta cómo la OPEP ejerció este poder que tenía y redujo los suministros de petróleo. Nosotros teníamos los automóviles en filas en las estaciones de gasolina. El país tuvo miedo que estuviera enfrentando otro crash/depresión tipo año 1929; y esto era inaceptable. Así, ellos —el Departamento del Tesoro me contrató a mi y a unos pocos E.H.M. Fuimos a Arabia Saudita.
AMY GOODMAN: ¿Usted les llama *Economic Hit Men* —E.H.M.?
JOHN PERKINS: Sí, era un término en tono de burla, como nos llamábamos nosotros mismos. Oficialmente, yo era el economista jefe. Nos llamamos nosotros mismos E.H.M. en tono de burla. Nadie nos creería si les dijésemos esto. Y fuimos a Arabia Saudita a principios de los años setenta. Nosotros sabíamos que Arabia Saudita era la llave para deponer nuestra dependencia o controlar la situación. Y trabajamos el siguiente trato con la Casa Real Saudita, ellos estarían de acuerdo en enviar la mayoría de sus petro-dólares de regreso a los Estados Unidos e invertirlos en bonos gubernamentales norteamericanos. [*Lo que China hoy en día, gracias al multibillonario comercio de bienes fabricados en su territorio y exportados hacia Estados Unidos, está haciendo exactamente. Nota del Editor*].
El Departamento del Tesoro usaría el interés de estas bonos para contratar compañías norteamericanas que construirían las nuevas ciudades de Arabia Saudita, la nueva infraestructura —lo cual hicimos. Y la Casa Saudí estaría de acuerdo en mantener el precio del petróleo dentro de límites aceptables para nosotros, lo cual han hecho durante todos estos años y nosotros estaríamos de acuerdo en mantener la Casa Saudí en el poder mientras ellos cumplieran su parte, lo cual nosotros hemos hecho, lo cual es además una de las razones por la que fuimos a la guerra con Irak en primer lugar. Y en Irak nosotros intentamos llevar a cabo la misma política que tuvo tanto éxito en Arabia Saudita, pero Saddam Hussein no la compró. Cuando los hombres EHM fallan en este escenario, el próximo paso es lo que nosotros llamamos los chacales. Los chacales son la gente de la C.I.A. que entran e intentan fomentar un golpe o una revolución. Si eso no funciona, realizar los asesinatos o intentan llevarlos a cabo.
En el caso de Irak, ellos no pudieron acabar con Saddam Hussein. Sus guardias personales eran demasiado buenos. Él tenía dobles. No pudieron terminar con él. Así la tercera línea de defensa, si los EHT y los chacales fallan, son nuestros hombres y mujeres jóvenes [del ejército] que son enviados a morir y matar y eso es lo que obviamente hemos hecho en Irak.
AMY GOODMAN: ¿Puede explicarnos cómo murió Torrijos?
JOHN PERKINS: Omar Torrijos, el Presidente de Panamá había firmado el Tratado del Canal con Carter —y, sabe usted, pasó en nuestro Congreso por sólo un voto. Fue un asunto muy discutido. Y Torrijos entonces también siguió adelante y negoció con los japoneses para construir un canal a nivel del mar. Los japoneses quisieron financiar y construir un canal a nivel del mar en Panamá. Torrijos habló con ellos sobre la Corporación Bechtel que estaba muy disgustada, cuyo presidente era George Schultz y

Director jefe del Consejo era Casper Weinberger.
Cuando Carter fue apartado [y eso es otra interesante historia], cuando perdió las elecciónes, y entró Reagan, Schultz asumió como Ministro de Relaciones Exteriores desde Bechtel y Weinberger vino desde Bechtel para ser Ministro de Defensa, ellos estaban sumamente enfadados con Torrijos —intentaron hacerle renegociar el Tratado del Canal y que no hablara con los japoneses. Él se negó rotundamente. Él era un hombre de firmes principios, tenía sus problemas, pero era un hombre de principios. Torrijos era un hombre asombroso. Y así..., murió en una caída de avión en llamas que se conectó a una grabadora con explosivos en su interior. Yo había estado trabajando con él. Supe que nosotros los EHM habíamos fallado. Supe que los chacales estaban rodeándolo y... su avión explotó por una grabadora con una bomba en élla. No hay ninguna duda en mi mente que fue la rúbrica de la C.I.A. y la mayoría, muchos investigadores latinoamericanos, llegaron a la misma conclusión. Por supuesto, nunca oímos sobre esto en nuestro país.
AMY GOODMAN: ¿Cuán estrechamente trabajó con el Banco Mundial?
JOHN PERKINS: Mucho, muy estrechamente con el Banco Mundial. El Banco Mundial proporciona la mayoría del dinero que es usado por los EHM, el Banco Mundial y el F.M.I. Pero cuando fue el golpe de Septiembre/11, tuve un cambio en mi corazón. Supe que la historia tenía que ser contada porque lo que pasó en Septiembre/11 es un resultado directo de lo que los EHM están haciendo. Y la única manera que nos vamos a sentir seguro nuevamente en este país y que nos vamos a sentir bien con nosotros mismos será si usamos estos sistemas que hemos puesto en el lugar, para crear cambios positivos alrededor del mundo. Creo realmente que podemos hacer eso. Ayudar auténticamente a los pueblos pobres. Veinticuatro mil personas mueren cada día de hambre. Podemos cambiar eso.

La deuda externa de estos paises los está asfixiando. EE.UU. no sólo ha sabido utilizar el dinero en su beneficio, sino que ha creado todo un modo de vida (por llamarlo de alguna forma) y lo ha exportado, de momento creo yo con mucho éxito.
Lo peor de todo ello es que han conseguido convencer a casi todo el mundo que aquellos que no salen del pozo es por culpa suya (paises de vagos y ladrones). Muchos de sus gobiernos son responsables junto a EE.UU., pero la población es la que está muriendo. Y Europa tampoco está libre de ello (lease Africa).
Uf! tema complicado. ¿Conoces a Arcadi Oliveras? Es muy bueno.
Un abrazo.

Muy interesante, la verdad interesantismo, pusto que aunque la idea general de los ciudadanos de a pie viene a ser algo así, nunca puedes illegar a imaginar como està entrelaxado toda este tejido economico-politico que és el verdadero gobierno del mundo. Me deja perplejo además de con una sensacion de dejadez y desconcierto absoluto, y entonces me pregunto: hay alguna solución a esto? Como des de una sociedad civil idiotizada en los paises desarroladaos y otra sociedad civil fragmentada cuyo unico ogjetivo és sobrevivir indivdualmente junto con su familia puede forzar algún movimiento de canvio? desalodaror , solo me deja un espació desierto y desolado.

LA NATURALEZA ENTONCES Y AHORA

AUTOR: ANDRÉS CLAVERÍA

A medida que fui creciendo en estatura y edad creció mi contacto inseparable con la naturaleza. Desde mi más tierna infancia, el medio rural fue mi ambiente y por ello me siento identificado con él, y lo que para otros chicos pudo ser misterioso para mi fue simplemente una vida rutinaria.
Una pequeña aldea de campesinos, una escuela mixta, regentada por una anciana maestra, y una iglesia pequeña era todo lo destacable de aquel maravilloso lugar donde crecí a la par que una docena de chiquillos, que constituíamos una aviesa grey juvenil en aquel lugar que motiva mis recuerdos hasta la edad de once años.
En aquellos tiempos no había nido de pájaros que no supiéramos ubicar ni pájaro que resistiera nuestras artes de caza, hasta los pícaros gorriones eran presas de nuestros cepos, y así calmábamos el hambre de carne, que no abundaba en las despensas.
Sabíamos en que fechas maduraban los frutos de los muchos árboles que había en las huertas, y a su debido tiempo recibían nuestra visita, incluso los latoneros que producen unos diminutos frutos de muy escasa pulpa: seguíamos su proceso de maduración con auténtico interés, ya que al comerlos quedaba en nuestro poder un esférico hueso que, lanzados con canutos de caña transformados en cerbatanas, eran el tormento de las mozas.

En el verano, muchos días, antes de entrar en la escuela, nos resultaba fácil ponernos de acuerdo para la primera zambullida en las frías aguas de la acequia. El taparrabos era siempre el mismo, el que nos dieron al nacer: ese baño resultaba un tanto precipitado, el tiempo nos resultaba escaso, únicamente después de comer, sin observar ninguna precaución por los posibles cortes de digestión y, luego, repetíamos el baño de forma mas sosegada.
Nuestras indumentarias no diferían gran cosa del verano al invierno: la diferencia estaba en el número de prendas, pero el principal tejido era la pana, la confección de las prendas la hacia el sastre con generosa holgura y las calculaba para que nos viniera dos años grandes, dos años bien, y dos años cortas.
A mi edad en aquellos parajes todos sabíamos aparejar un mulo y montarlo con destreza, éramos tambien los encargados del cuidado del conejar, en toda las labores, incluido en el momento oportuno el juntar el macho con las hembras, y de ahí, con facilidad, deducíamos los misterios de la reproducción, incluyendo el del genero humano. De educación sexual tardé muchos años en oír hablar, hasta que al final me dijeron lo que ya sabia.
Las familias por lo general eran numerosas y las vicisitudes, por ser generales parecían normales: el autoabastecimiento era un logro que siempre se alcanzaba, ya que si se veía que el invierno pintaba mal se molía un saco más de maíz y se aumentaban las raciones de farinetas. Se criaban cerdos en la explotación familiar pero el jamón era un producto de desconocido sabor para las gentes humildes, en cambio los productos del mondongo se consumían con gran fruición.
El pan se amasaba en casa y siempre oí decir que el pan casero cundía mucho y, naturalmente, así era: al cuarto día de su elaboración llegaba a la mesa entre correoso y duro, y de ahí en adelante estaba en las más optimas condiciones para hacer sopas, que se aliñaban con ajo, ese gran condimento que los pobres consumíamos en abundancia.
A pesar de cuanto antecede, mentiría si dijera que se pasaba hambre: aún quedaban los frutos de la época, en especial las patatas, los tomates, y toda clase hortalizas y frutas diversas, que en aquella zona abundaban muchisimo
En síntesis, estos fueron los años de mi niñez, de mi adolescencia y de mi mayoría de edad. Y en ese largo caminar a través del tiempo es donde he podido percibir -o más bien constatar- el gran deterioro que ha sufrido el medio ambiente y para intentar explicarlo he echado mano de lejanos recuerdos, que podemos decir son la cara y la cruz de aquella época: la industrialización y todo aquello que llamamos progreso son los motivos que nos hacen pagar los tributos de una vida mejor o al menos más justa y más equitativa en el reparto de la riqueza.
Con excesiva frecuencia medio mundo se atribuye el papel crítico de la vida, demoliendo en su labor todo lo realizado. La otra mitad tiene otro concepto que se dice es más egoísta o conservador, porque pretende a la vez acrecentar lo que posee patrimonialmente, bien como fruto de sus esfuerzos e iniciativas o bien por haber heredado los frutos de sus antepasados.
Todo puede ser justo si se hace o se ha hecho, dentro de las reglas que se establecen al efecto, y en el caso que nos ocupa sin deteriorar el medio ambiente, de lo que tanto hacemos gala actualmente por ser patrimonio de toda la humanidad. Bien es sabido que ahora ya todos somos contaminadores en mayor o menor grado, y que nadie aceptaría rechazar lo que el progreso ha puesto a nuestro alcance, y que constituye un paraíso en nuestra sociedad de consumidores.
Seria ingenuo ignorar la gran revolución industrial habida en nuestro planeta, y tambien seria ingenuo no atribuirle gran parte de los efectos de la contaminación y deterioro del medio ambiente. Nunca fue un buen relaciones públicas una chimenea echando humo, ni una industria contaminando un río, ni tampoco una granja porcina con sus pestilentes olores, ni otras muchas actividades y jamas nos perdonará la historia por haber esquilmado los mares y los ríos, y haber acabado con muchas especies en la tierra, que

contribuían en estrecha simbiosis al mantenimiento ecológico de nuestro mundo: hay que reconocer que el genero humano es el principal depredador de este planeta, y que con gran eficacia contribuye a hacer mas incierto su propio destino.
Hoy día, con los medios mecánicos y científicos de que dispone, unas veces por obtener el máximo de rentabilidad en la actividad que ejerce y otras como deporte o esparcimiento, resulta incompatible la actividad humana con el medio ambiente y se hace sumamente difícil compaginar y armonizar los insoslayables mandatos de la naturaleza.
Ya está demostrado que si a escala internacional no se adoptan las correspondientes medidas protectoras en pocos años habrán desaparecido de nuestro planeta muchas especies, especialmente los grandes mamíferos, tanto marinos como terrestres, mientras que, por el contrario, se manifiesta nuestra incapacidad para enfrentarnos a diminutos insectos como pulgones y arácnidos y aún más difícil nos resulta enfrentarnos contra los microscópicos virus y bacterias, que ponen en jaque nuestra salud, nuestra vida y nuestra sociedad.
Como conclusión me atrevo a decir, que la ciencia ha mejorado al hombre y que el hombre, en justa correspondencia, seguirá mejorando la ciencia, y en ese reciproco desarrollo está escondido en el incierto futuro, las mayores venturas y los mas graves peligros de la humanidad.

Leido tu post, añoranzas de mi infancia me ha traído. Si bien me crié en ambiente urbano de pequeña cidad gallega, la familia de mi padre eran pastores en la Mancha, y la de mi madre encargados de una granja en un pequeño pueblo da Castilla (La Vieja de entonces, Leonada de ahora). Aprendí de mis primos joyas de sabiduría rural (o medioambiental que ahora prima). Ha sido en parte por ello por lo que ahora prefiero vivir en el campo, me desplazo al trabajo y asumo el deporte de fin de semana (empujar carrito en centro comercial), pero me encanta que por las ventanas sólo vea monte.

PERIODISTA DIGITAL O LA CABALLEROSIDAD A LA ANTIGUA USANZA

Quienes hemos seguido las peripecias de Periodista Digital y hemos sabido las amenazas y querellas de El Mundo para impedir que puedan citar sus contenidos en esta revista de prensa, en los tiempos en que David Rojo afrontaba una campaña de acoso y derribo desde todos los frentes, nos temimos lo peor cuando Pedro J Ramirez creó las condiciones idoneas para que Alfonso Rojo, que no suele caracterizarse por su docilidad, se fuera de El Mundo, el periódico donde era socio fundador, y que había ayudado a consolidar.
Alfonso Rojo se hizo cargo de la dirección de Periodista Digital como un jabato de buena estirpe, en el peor momento, cuando el equipo jurídico de El Mundo pretendía invalidar el derecho de cita, la ley y el sentido común en que se apoya Periodista Digital.
Cuando denunciaron la piscina ilegal de PJ Ramirez hubo quien vio la venganza del resentido; quienes hemos seguido su trayectoria vimos la determiación de unos investigadores que no se casan con nadie.
En estos momentos, Periodista Digital ha investigado a quienes han colocado en internet el vídeo infame que le hicieron a PJ Ramirez con Exuperancia Rapú, y ha conseguido de la empresa que lo alojaba en Argentina suspenda la emisión.
Ni se me ocurriría haber sospechado que Alfonso y David Rojo hubieran podido actuar de otra manera porque, visto lo visto, y sopesados sus antecedentes, creo que son profundamente honestos y de una caballerosidad a la antigua usanza, lo que a veces lastra su posibilidad de defenderse de canallas sin categoría con micrófonos en las tertulias.
Periodista Digital está en mis enlaces de portada desde el principio de abrir esta bitácora. Os recomiendo que leais sus contenidos. Y vale la pena leer su investigación sobre los responsables de este nuevo ataque contra PJ Ramírez, que enlazo aquí.
Para más información: David de Ugarte, en la Bitácora de las Indias (en mis enlaces de portada): ¿Qué pasó con Periodista Digital?

Y hablando de caballerosidad a la antigua usanza, pueden leer también Diario del Aire, donde Lazarillo comenta e indaga sobre la actualidad sin seguir modas ni modelos, y A sueldo de Moscú, donde el divertido y juguetón Ricardo Royo-Villanova pone a parir sin pelos en la lengua a quien manda y se deja mandar.
Si yo fuera periodista me encantaría pensar que son mis colegas.
De nada, ya sabéis que me gusta ser útil.

Habría mucho que decir de Periodista Digital, y sin lugar a dudas, entre las muchs cosas que habría que decir, ninguna sería similar a la frase que encabeza este post: llamarle caballerosidad a la antigua usanza a un mero oportunismo, realizado para que los que les están poniendo la argolla en el cuello se vean ahora indefensos ante la opinión pública que sigue este enfrentamiento, es disfrazar de Cenicienta a la madrasta mandona.

Periodista digital, abusando del derecho de cita, se está aprovechando del trabajo hecho por otros muchos periodistas. No es lo mismo que usted ponga aquí en su blog un texto íntegro publicado en El País para comentarlo con sus lectores, que un diario on line lo haga. Usted no es una empresa ni cobra por publicidad, Periodista Digital sí que lo es, y está sacando dinero a costa de terceros. No le digo cómo se le llama a eso porque creo que usted sabe perfectamente darle un nombre a tal comportami

comportamiento.

No están ayudando en nada a la propagación de la cultura, porque ahora, el derecho de cita, va a ser restringido, cuando no debería. ¿Quiénes son los responsables? Estos irresponsables, que por abusar y lucrarse de esta situación, han conseguido que los grandes medios se obsesionen con que el derecho de cita pase a ser parte de la historia.

El que El Mundo sea un periódico demagogo, torticero y fabulador, no hace menos malo a Periodista Digital. Esta historia no es una película de policias y ladrones. Todos son malos, sin excepción.

Espero que al no ser de su agrado lo que le estoy diciendo, este comentario no acabe desapareciendo, porque la última vez que participé en este blog, para decir que Borjamari se había hecho eco de su extraña forma de reclamar contra los acosadores virtuales, no duró colgado en la red ni dos horas. La verdad es mi nivel de analisis sobre temas legales y derechos de cita està por los suelos. Así pués únicamente dejaré mi opinón de ciudadano. Por lo que se refeiere a la "validez" u "oportunismo" de Periodista Digital en cuanto al derecho a las citas, sólo lo puedo entender si efectivamente no hhubiese elemento de lucro en ello. La libertad de expersión iy opinión està por encima de todo, i todo el mundo cita o copia camufladamente. No se si hasta que punto es legal o moral hacer un periodico paralelo con el meteodo copiar y pegar, yo lo podria hacer en mi blog como una muestra de notícias que me parecen interssantes y creo que no pasaria nada, porque no voy a sacar dinero del trabajo de otros. En fin como no estoy muy enterado, es la primera vez que visito las paginas gracias a tu enlace, no opinaré más al respecto.
En lo concerniente al video de PJ 8aunque no sea santo de mi devoción) creo ante todo en el derecho a la intimidad y a que no sea invadida. No obstante tambien siento que aquellos que propagan ciertos modelos sociales cómo imposición sobre los de los demás en los medios de comunicación y ellos pueden escudar su "modelo" en su intimidad quizás no tengan el derecho de tenerla. Supongo que la "moralidad" de una acción depende de tu propia consciencia, el problema radica en que tambien existe una "consciencia social". Creo que me he liado un poco :(
de todas formas intersante texto e interesantes enlaces.

Joan:
Sobre el derecho de PJ Ramírez y de cualquiera a mantener relaciones sexuales con quien consienta, a puerta cerrada, y no ser objeto de chantaje creo que estaremos de acuerdo, aun en el caso de que él hiciera feroz campaña por la abstinencia y la castidad, cosa que no es el caso. Así pues, no admito ninguna salvedad ni excusa para justificar la canallada de los que se llevaron los fondos reservados, financiaron la guerra sucia desde el Estado, y se asociaron con delincuentes para hacer un video y chantajear.
Respecto a las restricciones al derecho de cita en el periodismo no han estado legisladas hasta ahora y es curioso que ni siquiera era obligatorio citar el medio donde se había publicado y en los periódicos que ahora reclaman se solía decir "en un periódico nacional" o "de la mañana" y nadie levantó la liebre hasta que Periodista Digital se hizo incómodo, no por las citas, sino por su línea.
Soy lectora habitual de El Mundo, El País, y de Periodista Digital entre otros: y escucho Cope, SER, y Radio Nacional para contrastar noticias: no me consta que exista un sólo medio que sea independiente, poseedor de toda la verdad y objetivo. Pero en la guerra fratricida entre los grandes colosos da la casualidad de que Periodista Digital no se ha alineado con uno ni con otro, y reparte estopa por igual cuando tiene datos. Respecto a sus ganancias, no estoy segura de que fuera a bajar la cifra de lectores y anunciantes si hicieran un periódico digital sin enlaces a otros.

Recomiendo "Medios de papel: ¿Reaccionarios o tartufos?" de David de Ugarte en Bitácoras de las Indias: "El oligopolio mediático intenta denodadamente imponer, mediante restricciones legales, un modelo de prensa nacido de las limitaciones tecnológicas existentes hace dos siglos. Pero la lógica de la red es implacable y los periodistas empiezan a descubrir las bitácoras como fuentes informativas fundamentales. Incapaces de reconocerlo y citar lo que llaman "paginillas de internet", los periódicos en papel espigan plagios cada vez con más frecuencia en sus páginas. Pero hasta plagiar requiere una mínima cultura tecnológica y mientras hacen grandes aspavientos por ser enlazados, caen en ridículos espantosos, haciendo cortapega y publicando como noticia contenidos satíricos o incluyendo, como opinión firmada por otros, contenidos de ésta misma bitácora que ya habían sido leidos por decenas de miles de personas. ¿Estamos ante tartufos que persiguen la cita ajena mientras hacen sordina a los plagios propios?, o es que ¿el discurso oficial va contra el sentido de los tiempos y hace aguas inevitablemente?."

Gatopardo, no sé ni me importa si usted ha jurado dejar espacio abierto a todo el mundo en su blog. Lo único que sé es que tiene un diario personal colgado en la red, a la vista de todo el mundo, y a más a más, ofreciendo la posibilidad al resto de los internautas de comentar lo que usted escribe. Eso presupone que tiene la suficiente capacidad de autocrítica y talante como para aceptar las opiniones de otros que no opinan como usted. Resulta gracioso que hace unos cuantos posts montara la Marimorena por un supuesto acoso virtual a una amiga suya y que luego publicase una carta de la supuesta agradedida en la que a lo que más se aclamaba era a la libertad de expresión. No me dirá usted que no es una actuación incongruente, a más a más, si luego reconoce que borra los comentarios que no le gustan. No pretendo ser su enemigo, pero si por decir u opinar de manera contraria a la suya, he de serlo, usted verá. A mí, me la trae floja.

El que exista un vacío legal en el uso del derecho de cita no justifica que se abuse de él. Cualquier estudiante de periodismo se lo podrá explicar. No es necesario que recurra a uno experimentado. Eso de que hasta hace poco las fuentes ni tan siquiera se citaban, no tengo ni idea de dónde lo habrá usted sacado, pero siento decirle que está usted mal informada.

El caso de PD no tiene nada que ver, en principio, con David contra Goliat, porque David, en la historia que se cuenta en el AT era un buen chico, y en la que ahora

tenemos delante, David es todo menos un buen chico. No se trata de enlazar, sino de que copian los textos íntegros, sin haber pagado por ellos. Y esos textos tienen una autoría.

¿Cuántos periodistas tiene en plantilla PD para poder acudir a todos los frentes? ¿Se lo ha preguntado usted alguna vez? No es lo mismo citar para hacer un estudio, un ensayo, o algo similar, o que un particular, sin ánimo de lucro, emplee textos o imágenes con todos los derechos reservados, que el que lo haga una empresa que vive de un periodismo ficticio.

No confunda lo del Manifiesto por la Cultura y la campaña de desprestigio que se está haciendo contra Jorge Cortell con esto, porque existen años luz de diferencia entre una cosa y la otra.

Voy a ser concreta: las amenazas que ha recibido en su blog Tautina, incluso contra sus hijos y contra su libertad sexual, con injurias irreproducibles, están tipificadas como delito sean por teléfono, con spray, por carta o por internet, y perseguir penalmente a quien las hace para mí forma parte de la defensa de la libertad de expresión de la autora del blog, que ha tenido que dejar de escribir.
Espero que no crea que en cualquier periódico o en cualquier editorial por el hecho de tener un espacio reservado para que se expresen los lectores van a publicar todo lo que se les envíe. Pues bien, en Gatopardo tampoco. Por lo pronto, si usted desea argumentar con el rigor que le caracteriza sus ideas al respecto, puede enviarme su artículo y si tiene calidad, según mi libérrimo criterio, lo pondré en portada rebatiendo lo que yo opino, porque enriquece el contenido de este blog. Gracias por su concreción, Gatopardo. Hasta que no he leido su última aportación no tenía claro qué había ocurrido. De lo que no sé si es usted consciente es de que para dar a conocer una ip públicamente y a más a más para acusar a la persona o personas que haya detrás de esa dirección de acosadores, difamadores y demás bajezas morales, se ha de saber a ciencia cierta el alcance de la acción recriminatoria que se está ejerciendo. Y creo, señora mía, que usted no midió las consecuencias de sus actos. Arrogarse el papel de poli bueno y de juez no lleva a nada bueno. Pero usted es dueña de sus actos y creo que tiene la suficiente inteligencia como para caer en la cuenta de que lo de la presunción de inocencia no es un asunto baladí. Dejo aquí este asunto. Tan solo lo traje a colación por la incoherencia que supone aclamarse a la libertad de expresión, como orden supremo de todas las cosas, y luego censurar comentarios en su blog porque no le gusten o porque contengan faltas de ortografía.

Señora mía, haga lo que le plazca. Eso sí, si como me dice en su mail, es de las que se confiesa, sí que tendría que hacerselo saber a su confesor, porque la falta de humildad tengo entendido que es pecado para los cristianos.

Si el publicar textos en los que el autor adopta o defiende opiniones contrarias a las suyas enriquece el blog, no veo la diferencia que existe entre este cruce de mensajes y lo que usted plantea.

Entré para decir que ni David ni Alfonso Rojo son caballeros a la antigua usanza. No veo la caballerosidad por ningún sitio. Su frase "cuando el equipo jurídico de El Mundo pretendía invalidar el derecho de cita, la ley y el sentido común en que se apoya Periodista Digital." no hay por dónde cogerla. Porque el sentido común no apoya a PD. Están aprovechándose del trabajo de otros. No sólo El Mundo los denunció. El grupo Prisa también.

Cuando entró Alfonso Rojo en el diario digital, la cosa cmabió un poco para dar una imagen más seria. Pero siguen publicando artículos que sólo se pueden adquirir previo pago en los medios digitales que así trabajan, como El País.

Navegando por dicho periódico, veo que lo que abundan son enlaces (hipervínculos) a todas las versiones on-line de los periódicos. Hay sin embargo algunas reproducciones íntegras de artículos de esos mismos medios, aunque se citan las fuentes.

Me ha surgido entonces una duda consistente en saber si esa nueva legislación que se prepara puede impedir que se realicen dichos los enlaces. En ese caso, parece una dura restricción a uno de los aspectos más interesantes de la red (la difusión libre de la información) y de los blogs: el intercambio de enlaces y como se ha dicho más arriba, la construcción de una red viva donde la información importante se expande a mayor velocidad y llega a más personas.

De todos modos, no me cabe duda de que los medios informátivos tratarán efectivamente de eliminar las ventajas que antes expuse, para evitar la injerencia de este nuevo modelo de transmisión de la información. Quien tiene poder y abusa de él,

es siempre el que lucha contra toda innovación que no quede bajo su control.

Présteme usted su página, carísimo Gatopardo, que a la mía la ha nublado un extraño encantamiento. Sólo para decirle, como es obvio, que la foto de don Cándido que ilustra su portada me había parecido la de un sensu stricto talibán. ¿O no?

Agradecido, buen Gato. Le decía que hoy pensaba publicar en Diario del Aire un modesto articulillo intitulado Radio Vaticano contamina y los jesuitas piden libertad de expresión. De hecho ya está editado pero el nublado persiste, aunque algún muy avisado lector haya conseguido conexión no sé cómo. Lo dicho, ahí queda, por si el asunto le motiva. No puedo soportar que me enmudezcan y me siento muy gratificado por llenarle a usted estas líneas.

PROTECCIÓN PANDA PLATINUM INTERNET SECURITY ¿NO SERÁ UNA BROMA?

Mi consulta era porque el antivirus Panda Platinum Internet Security con Tecnología TruPrevent (9.02.00), que teóricamente sirve para tres años, estaba dando aviso de no estar protegiendo mi equipo después de la actualización recomendada.
Y el protocolo es tan sencillo como todo esto:Hay que desinstalarlo y volver a instalarlo desde su web.
Pero eso ya se ha hecho anteriormente y sigue el mismo problema.
Copio e.mail de respuesta de Panda:

Estimado Cliente:
Me pongo en contacto con Ud. con motivo de la consulta recibida.
Para desinstalar manualmente Panda Platinum Internet Security, siga los pasos que se indican a continuación:

1. Copie los ficheros UnInstLsp.zip y UnRegDll.bat en el disco duro del equipo.

2.Reinicie el equipo en Modo Seguro o Modo a Prueba de Fallos. Para ello, nada más encender el equipo, pulse la tecla F8 repetídamente para acceder al menú de arranque. En este menú, seleccione Modo Seguro o Modo a Prueba de Fallos, según el sistema operativo.

3.Descomprima el fichero UnInstLsp.zip y copie el fichero UnInstLsp.exe en el directorio de instalación del programa antivirus, por defecto, C:Archivos de ProgramaPanda SoftwarePanda Platinum Internet Security.

4.Acceda a la carpeta de instalación del programa antivirus y ejecute el fichero UnInstLsp.exe copiado anteriormente. Con esto, se desinstalará el componente LSP del programa antivirus.

5.Renombre el fichero UnRegDll.ba_ a UnRegDll.bat
Para ello, pulse con el botón derecho sobre él, seleccione la opción Cambiar nombre y escriba UnRegDll.bat
6.Ejecute el fichero UnRegDll.bat haciendo doble click sobre el, acepte los mensajes emergentes que aparezcan.
7.Posteriormente acceda al registro de Windows, para eliminar las diferentes entradas del programa antivirus. Para ello, vaya a Inicio -> Ejecutar, escriba REGEDIT y pulse Aceptar.
Nota: Para abrir estas entradas de registro, únicamente deberá pulsar en el signo + que aparece junto a cada entrada hasta acceder a la carpeta indicada. Además, puede que alguno de estos ficheros o entradas no existan ya en el equipo. Por ello, elimine sólo lo

que le indicamos a continuación, y si no existieran, siga con el punto siguiente hasta completar las instrucciones.

HKEY_LOCAL_MACHINESOFTWAREPanda Software
HKEY_LOCAL_MACHINESOFTWAREMicrosoftWindowsCurrent Version, seleccione la carpeta Run y en el panel de la derecha, elimine Apvxdwin y ScanInicio.

Si no visualiza esta carpeta, posiblemente la opción de Mostrar todos los archivos y carpetas ocultos de su Explorador no esté activada. Para poder mostrar dicha carpeta es necesario que abra el Explorador de Windows. Pulse en el menú Ver-> Opciones de carpeta-> pestaña Ver (para Win95/98/Nt) o en Herramientas-> Opciones de carpeta-> pestaña Ver (para Win ME/2000/XP), y active la opción Mostrar todos los archivos y carpetas ocultos. Pulse en Aplicar y en Aceptar para guardar los cambios y compruebe ahora que se muestra la carpeta.
10.Elimine los siguientes ficheros:

%windir%system32driversshlddrv.sys
%windir%system32driverspavproc.sys
%windir%system32driverspavdrv40.sys (En Windows NT)
%windir%system32driverspavdrv50.sys (En Windows 2000)

%windir%system32driverspcontnt.sys
%windir%system32driversNetflt.sys
%windir%system32driverscpoint.sys

%windir%system32Pavipc.dll
%windir%system32SYSTOOLS.dll
%windir%system32PavSProt.dll
%windir%system32PavSkre.dll

11.Finalmente para todos los sistemas elimine el acceso directo que aparece en la barra de herramientas poniendo el ratón sobre el icono de panda y con el botón derecho darle a eliminar. Haga lo mismo con el acceso directo que aparece en el botón de Inicio -> Programas -> Panda Platinum Internet Security con el botón derecho del ratón eliminar.

Reinicie el equipo y podrá instalar la última versión del programa sin ningún problema.

Nunca he llegado a usar el panda antivirus. Desde siempre he escuchado que ralentizaba mucho el ordenador e incluso lo pude comprobar una vez, cuando lo instalé a un amigo en los tiempos de los 486.

Yo de todos modos soy un despreocupado con esto de los virus, tengo el norton 2002, una versión que me deja funcionar durante un año. Pues bien, siempre acabo formateando cada 3-6 meses, de modo que la información del registro de windows se pierde y al reinstalarlo cuenta como si hubiera iniciado el período.

Te digo lo mismo que Antonio P, a mi Panda siempre me ha dado problemas.
El antivirus y el FireWall que uso ahora es también el Norton, se actualiza solo y cómodamente puedes renovar la licencia por internet.
No obstante es algo carillo, una opción es el Norma Antivirus PC, que es de la casa Norton es algo más asequible, en las tiendas suele costar la licencia unos 30€, funciona muy bien y no relentiza el PC; además está pensado para Pentiums más antigüillos, el Norton por el contrario en los Pentium III los fatiga demasiado cuando se tiene que actualizar; al menos la última versión.

Espero que tu nebulosa de unos y ceros se disipe, y acabes por encontrar una pronta solución.

Cuídate mucho.
Saludos a tod@s.

Dios mío, a mí me mandan un correo así y los pongo a parir. Eso no es desinstalación "manual", es desinstalación artesanal. Me parece increíble que no sean capaces de crear un ejecutable que haga todas esas tareas y verifique que se han realizado (casi cualquiera recién salido de informática podría hacerlo). En fin... Del Panda, lo que dice Antonio, mi experiencia es que deja los equipos medio muertos, pero depende mucho de las opciones de protección que se activen, pero por defecto es monstruoooooso.

En cuanto a protección antivirus, la primera y más importante es no usar Internet Explorer ni Outlook Express. Si usas XP, tener activado el firewall que trae de serie (está en Configuración -> Conexiones de red -> propiedades de la conexión -> Avanzadas -> proteger mi equipo...). Al hacerlo puede ser que no funcionen algunas osas como el envío de archivos por el messenger y cosas así, pero se podría incluso cambiar para que funcionen también esas cosas. Y de antivirus... yo uso el Norton, pero hace siglos que no me pita, lo cual quiere decir que no me atacan muchos virus. Señal de que el equipo está bien protegido con las otras medidas.

Saludinos.

Yo usé el Panda y tuve varios problemas similares. Pero sobre todo, que tanta tontería gráfica consumía muchos recursos del bicho, asín que lo cambié por McAfee. Estoy bastante contento.

Por otra parte: ¿No habrá virus en tus correos, gata?

Gata, yo tengo McAffe, también y no es muy caro y a mí me va. En el trabajo funcionamos con Panda y cada dos por tres andamos a la greña con él.
Pero lo divertido es la carta que te han mandado. ¡La leche! Si yo tueviera que hacer eso, me compraba un ordenata nuevo...
Tal vez cuelgue un cuento de Asimof en la isla, para que compruebes como se las gastan los ingenieros. ¡Recuerdamelo!

Yo soy una aPandadora de toda la vida, y es completamente cierto que ralentiza el ordenador una barbaridad, pero es el precio que pago por una protección muy buena. El Panda me ha salvado de las garras del maligno más de una vez, y no me da ninguno de los problemas que me daban Norton y McAffe, aparte que me parece mucho más seguro. Uso el Platinum 7. Todo lo cual no quita para que tenga que formatear cada seis u ocho meses, como todo hijo de vecino, pero me parece que eso es cosa de Windows (la perfección no tiene límites), no del pobre osito.

Dice mi informático que si hago lo que dice en las instrucciones lo más normal es que joda el Windows, pierda todo lo que tengo guardado y tenga que llevar el ordenador a que me lo vuelva a programar (unos 90 € la última vez que me hizo esta broma Panda) y que mejor me espere a llevarle el ordenador y vaya trabajando con este otro que me ha prestado, que tiene Norton.

Me parece que simplemente no saben utilizar el programa y que sus equipos estan infectados y que despues de instalar el antivirus de panda se los alenta ya que no solo es antibirus, si no que ontiene otras herramientas como son antispyware, anti dialers, antispam, etc. y que sobre todo las instrucciones que nos da para eliminar el antivirus manualmente no le perjudica a windows, claro si eres un enepto que no sabe utilizar una pc y mucho menos ocupar el registro de windows y eliminas otra cosa aparte de la que se menciona en las instrucciones, logicamente le das en la torre al sistema o a otro componente, pero en fin como dirian cada quien habla cono le ha ido en la feria.

Reconozco que soy fan de Panda desde hace años. Por suspuesto que tienen sus cosas -como todos- pero mi experiencia es que siempre te solucionan todo y rapido. No se si habeis probado la ultima version 2006 de Platinum, porque yo estoy encantado con ella. El consumo de recursos ha mejorado de forma impresionante, y hasta ahora no he tenido ninguna pega.

Levo muchos años en el tema de la informatica. Y si hay problemas con los antivirus es algo que siempre ha existido y existira, pero en cuanto al Panda, el problema siempre se complica. O ralentiza mucho el ordenador, o da problemas para desistalarse. Es verdad que el Norton y demás antivirus potentes consumen recursos pero lo de panda es bestial. Finalmente se resume que si no tienes un pepino de ordenador no te funcionara ningun antivirus potente bien, pero sobre todo el panda, se llevara la palma

Fecha: 28/06/2006 13:49.

Autor: Ivan

Totalmente de acuerdo con el comentario de Xabi.El panda es el antivirus más cerdo de todos los que he tenido.No hace mas que ralentizar el ordenador de una manera exagera. Una cosa es que un antivirus coma recursos (cosa normal), y otra que no deje ni uno libre. Ademas para la cantidad de recursos que requiere no rinde ni la mitad de lo que deberia, puesto que es un autentico colador que hace un pasillo expectacular a los ataques.

Fecha: 28/06/2006 16:08.

Autor: Laura

Claro que ralentiza el Panda, como todos. Pero me gustaria ver que ordenadores teneis, que juegos os habeis instalado, y todas esas porquerias en el ordenador que consumen recursos. El Panda es uno de los mejores antivirus que hay, lo unico es que son unos ladrones porque continuamente estan pidiendote la renovacion de la licencia y a la gente le sacan el dinero como quieren (al que se deja, claro). si os consume muchos recursos: Control+Alt+Supr, os vais a procesos del sistema, finalizais el proceso de panda y luego volveis a ejecutarlo. Asi no hace falta reiniciar el ordenador.
Para los que quereis eliminar Panda definitivamente: Inicio> Ejecutar> Regedit>HKey Current User>Software... y aqui os poneis a buscar la carpeta del panda. No lo hagais a no ser que esteis seguros de lo que esteis haciendo... En fin, esto de la informatica es dificil pero con el tiempo se controla, tranquilos! Saludos.
Por cierto, actualmente uso Kaspersky, no es tan bueno como Panda pero algo hace.

MEDICUS MUNDI ALBACETE EN BURKINA FASO

BLOGOMARATÓN SOLIDARIO 2005

A la primera persona que oí hablar de Burkina Faso fue a mi nieto Angel, camionero de estirpe y nula vocación de transportista. Se iba como cooperante con Medicus Mundi al antiguo Alto Volta. Cuando me lo dijo pensé que se había vuelto loco: ahora creo que es el único que tuvo la cordura de no tapiarse el horizonte.
Y a través de él conocí a mi amiga Remedios López Jiménez, una profesora de Lengua y Literatura, jubilada en la actualidad, que en 1977 viajó a África con unas amigas misioneras y, a la vuelta, algo se había roto en su interior, a pesar de que Remedios no es de las que cultivan la tristeza y la deseperanza. Con una tenacidad torturante habló con los médicos de Albacete, los mandamases, los políticos, los sindicalistas, los escritores, los cristianos, los indiferentes, y logró un grupo de gente para poner en marcha el proyecto de Medicus Mundi Albacete que recaudaría dinero, medicinas e instrumental para enviar un equipo de oftalmólogía a Burkina Faso, para operar a los burkinabes afectados por una especie de cataratas precoz, que los deja ciegos en la infancia.
La esperanza media de vida de los burkinabes es de 45 años. Sólo el 14% del suelo es cultivable, y el agua potable es una pura hipótesis allí. Su clima tropical oscila desde el calor seco del invierno al calor húmedo del verano; con una época de tres meses de lluvias torrenciales sin infraestructuras para encauzar el agua, seguida de nueve meses de sequía, en un terreno casi desertico que, sin embargo, da manganeso, piedra caliza, mármol, pequeños depósitos de oro, fosfatos, piedra pómez...
Al cabo de casi treinta años de tesón y coraje, Medicus Mundi Albacete puede presentar este balance bianual:

· Una consulta médico-quirúrgica permanente en el Hospital de Houndé, dotada de todo el material y aparatos necesarios para su correcto funcionamiento.
· Consulta a más de 13.857 pacientes.
· Realización de más de 3.000 revisiones escolares.
· 1.618 intervenciones quirúrgicas.
· Servicio permanente de óptica en el Hospital de Houndé totalmente equipado con material técnico específico, y con un taller de fabricación de gafas que se venden a bajo precio.
· Consulta médico-quirúrgica permanente en el Hospital de Orodara, dotada de todo el material y aparatos necesarios para su correcto funcionamiento.
· Servicio permanente de óptica en el Hospital de Orodara totalmente equipado con material técnico específico y con un taller de fabricación de gafas que se venden a bajo precio.
· Formación del personal local responsable para trabajar en los dos Servicios Ópticos.
· Programa específico de oftalmología para formar a los dos enfermeros-oftalmólogos especialistas de Houndé y Orodara.
· Seminarios de formación anuales sobre nociones básicas de oftalmología y óptica para los enfermeros y maestros de educación primaria de Houndé y Orodara.
En preparación:
Mejora de la cobertura terapéutica de los casos de tuberculosis y VIH/SIDA en el Distrito Sanitario de Orodara
En preparación:
Jóvenes cooperantes 2005 en dos modalidades:
· la "modalidad a", que consistirá en enviar a dos jóvenes de la región durante tres meses a trabajar con el personal expatriado de Medicus Mundi Castilla-La Mancha en proyectos en ejecución.
· la "modalidad b", consistente en enviar un grupo de jóvenes durante un mes a recibir en el terreno un curso teórico-práctico sobre cooperación para el desarrollo.
.Mejora de la capacidad y calidad de la educación secundaria en la provincia de Tuy
.Proyecto de construcción y equipamiento de aulas, de promoción de la escolarización de niñas, de sensibilización a través del teatro, que llevan a cabo los alumnos, y una campaña de prevención de sida y enfermedades de transmisión sexual dirigida a los jóvenes con sesiones informativas, posibilidad de análisis médicos gratuitos y tratamiento en el hospital público de la zona.
.Mejora de las instalaciones del Colegio de Enseñanza General de Founzan y promoción de la escolarización femenina en la provincia de Tuy
Las actividades que se incluyen son de construcción de aulas, electrificación del centro escolar, promoción de la escolarización de niñas, creación de una asociación de alumnas, sesiones de

sensibilización sobre temas sociales de interés: ablación de clítoris, matrimonios forzados, prevención de Sida y ETS

Y sé que mucha gente pensará que hay mucho que hacer en España: en Medicus Mundi pensamos que es imprescindible que nuestro planeta no siga produciendo una miseria que lleve a la desesperación y la muerte, con cientos de náufragos que se traga el oceano y otros tantos que embarrancan en las playas cada año. Porque es posible crear las condiciones para que puedan sobrevivir dignamente en su país en vez de venir a morir aquí. Esto no hay estómago ni conciencia que lo digiera por muy europeos que seamos y por muy acostumbrados que estemos a contemplar la tragedia en televisión mientras comemos.
Hace falta voluntarios, y sobre todo, hace falta no tapiar la esperanza ni el horizonte.

A mí también me llama mucho la atención ese argumento de que aquí hay muchas cosas que hacer en cuanto a solidaridad.
Pero es que, no es incompatible solidarizarse, movilizarse por los de cerca y por los de lejos a la vez (Sí, como las gafas bifocales).
Y ya si me pongo más radical, aquí, si no tienes para comer, puedes robar, en caso extremo (Existen ayudas institucionales). Hay sitios del mundo, dónde ni eso...

Tau, un abrazo :)

Conciencias que se impliquen para solucionar, y se dejen de tanto aparecer en las fotos. Esos si que es vomitivo con sus sonrisas siempre puestas. algunos tendrán que colocarse de noche una protesis para cerrarce la boca.

La solidaridad no entiende de fronteras ni mucho menos de paises. Quizas lo mas grande de todas y todos los que se entregan a causa como esta sea que hacen de su país la vida de cada ser humano. Quizas deberiamos empezar por comprender esto. Nuestro pais, nuestra casa és la misma, nuestra vida es creer en otra vida a 1m. o a 10.000 km de distancia.

DON JUAN DÁMASO, MI VIDENTE FAVORITO, DIJO QUE ESTABA PREÑADA EN MARZO

Don Juan Dámaso, mi vidente favorito, dijo que estaba preñada: llevaba razón en esto como en todo lo demás.

Vaticinio realizado el Martes 08 de marzo de 2005

"Princesa europea ya ha dejado de menstruar.
¡Lo he visto, y como soy monárquico me he meado de la emoción! Entre hoy y el jueves 10 a la medianoche, la Casa Real de un país europeo muy conocido por todos vosotros, comunicará oficialmente que su princesa por fin ha dejado de menstruar... ¡y será madre! La noticia, muchas veces rumoreada pero jamás oficial hasta entonces, se convertirá en portada de casi toda la prensa de ese país, excepto la revista Computer World. No diré el nombre de la princesa, ni el país de la enhorabuena, para generar confusión. (Sólo diré que no se trata de la noruega Mette-Marit, porque todas las rubias tristes son frígidas."

Y como hicieron trampa, mintieron por omisión, ganó la banca, y don Juan reconoció su derrota noblemente:

"Update a fecha vencida": "¡Estériles, frígidas, impotentes, maricones, misóginos y sexualmente pasivos! ¡Ésa es la triste verdad de nuestras monarquías, así nos pagan el amor que les brindamos! ¡Un manojo de impotencia y eyaculación precoz, de menopausia y besamanos! Estoy a punto de arrojar la toalla. Si la próxima predicción no se cumple, dejaré de hacer vaticinios y me dedicaré a la profesión que nunca he debido abandonar: la lectura del tarot y la cartomancia. ¡Que eso al menos deja pasta! Hala, podéis reiros de mí. Estoy casi vencido..."

¡DON JUAN, ES USTED GRANDE!

HOY ES EL CUMPLEAÑOS DE MI AMIGA ODALYS

Ya sabes, mi dulce Odalys, que soy una especie de *cantamañanas* contemplativa, incapaz del rigor necesario para examinarme para el carné de conducir, para el certificado de la Escuela Oficial de Idiomas o acabar un trabajo en el plazo establecido, porque arbitrariamente suelo decidir que lo urgente es acabar de leer una novela de PD James o de Ruth Rendell para saber quién es el asesino.

Sólo soy rigurosa, consecuente y cabezota en la amistad, y a ti te ha tocado ser esa amiga especialísima a la que bombardeo con cartas kilométricas y cuento y no acabo, porque admiro a los seres humanos capaces de realizar grandes empresas sobrehumanas; pero adoro a los que sabéis ser únicos para reir, bromear, llorar, y tomais la determinación de actuar con lealtad, rectitud y generosidad, en lo grande y en lo pequeño, llueva o truene, sea de día o de noche, vengan de frente o de costado, y aunque tiemble la tierra os mantenéis firmes como rocas en el cariño. Mi gran orgullo es saber que nunca quise a nadie que no fuera mejor que yo.

¡Con lo fácil que me resulta exponer lo que pienso, y lo mal que explico lo que siento!

Mi dulce Odalys, feliz cumpleaños, pequeñuela. Un abrazo entrañable.

Estas son las mañanitas
Que cantaba el rey David,
Y a las muchachas bonitas
Se las cantaba asi:
Despierta, mi bien despierta
Mira, que ya amanecio;
Ya los pajaritos cantan,
Ya la luna se metió

Que bonitas mañanitas,
Parece que va a llover,
Asi estaba la mañana,
Cuando te empecé a querer

Si el sereno de la esquina
Me quisiera hacer favor
De apagar su linternita
Mientras que pase mi amor

Y ahora, si, señor sereno,
Le agradezco su favor,
Y encienda su linternita,
Que ya mi amor ya pasó

El relato pormenorizado merecería un post relatando como llevamos a nuestra dulce Odalys como gheisa por arrozal de blog en blog descubriendo la clave que debía de introducir en la casilla correspondiente: nos pusimos de acuerdo a través de una lista de correo privada, con la que nos comunicábamos ideas, iniciativas, y nos tenía constantemente informados: una media de sesenta e.mail diarios...Ramón Corominas y Hermione fueron nuestros directores de escena, diseñadores del juego y del premio con poemas, dibujos, fotos, postales exclusivas, un video giga-ntesco...

En esta nueva etapa de tu vida, done los sueños se niña se haran realidad en poco tiempo. Tal vez la vida nos llevue por caminos distintos, tal vez, cada una de nosotras, cambie su manera de pensar, de comportarse de actuar, pero sabes, yo siempre recordare aquella chica, encantadora que conoci, aquella jovencita, que cuando me veia triste me abrazaba, cuando me veia contenta sonreia conmigo, aquella chica, que me regalo muchas sonrisas, que junto conmigo y todas, haciamos bromas, aquella chiquita, que me salvo que fue mi complice, mi amiga, hoy que das ese paso de convertirte de niña a mujer quiero que sepas, que siempre contaras con mi apoyo, gracias por ser mi amiga, gracias por tantas historias, tantas anecdotas que compartimos, pero sobre todo gracias por tu cariño, tu confianza, tu compañia, espero que la vida no nos separe para seguir juntas…..los sentimientos hacen que llore, que ría, que me emocione, porque

eres mi hermana vestida de amiga. Te escribo esto para explicarte con pocas palabras lo que es tener en mi vida una personita como vos.Quiero que sepas que en este dia tan especial te regalo un puñado de sueños y una estrella,la mas hermosa,para que cuando la veas te acuerdes que te doy mi tiempo,pasiencia y sobre todo mi amistad.Hoy la luna te susurrara al oido que compartira con vos la magia de este dia,ella y yo seremos testigos de esta nueva etapa que comienza para vos.Quiero que sepas que soy feliz de tenerte como amiga y espero que nunk olvides los momentos que pasamos juntas y que yo te cangeo una lagrima por una sonrisa.=).Espero que en esta nueva etapa,la luz del amor y la magia de la ilucion te cubra para que sea muuy feliz.A un lado dejaste esos juguetes que compartian esos momentos de tu niñes para crear nuevos sueños,sueños de mujer.Bueno... espero que te des cuenta lo importante que sos para mi y que para mi sos una personita muy especial. Hoy siento la necesidad de decirte que eres una de las personas que más admiro y respeto, porque no has decaído en los peores momentos, has demostrado la fuerza que llevas dentro de tí, como muchos no podrían. Te confiaría hasta mi vida, porque eres testigo de todo lo que soy, porque me has acompañado en las mayores locuras y en las mayores estupideces también, y cada momento de los que paso junto a tí me enriquece como persona y me hace ser mejor, siempre aprendo algo nuevo de tí, aunque ésa no sea siempre tú intención …Te agradezco todos los hermosos momentos que hemos compartido juntas, de lo buenos por que de ellos tengo los mas hermosos recuerdos y de los malos por que me han servido para madurar juntas y para entender muchas cosas de la vida que ahora comprendo..aii flor que decirte boluda la verdad Desde que llegaste a mi vida,la cambiaste de una forma dulce y grandiosa.
Hay veces que me pregunto ¿te abre estado siemrpe que lo necesitaste?¿te abré escuchado?¿te abre hecho feliz?
Hcerte feliz me pondria feliz ami,sos tan importante ne mi vida, que daria todo por vos,por que te uiqero de verdad,te queiro con el corazón.
Espero no haberte fallado nunca,por que nunca me lo perdonaria...Sos una amiga de oro,y si pierdo algún día tu amistad,viviria luchando por volvela a tener.
Como sabras todos nos equibocamos,pero aprendemos de los errores...
Pero hoy te pido que nunca me dejes,que siemrpe estes presente en cada momneto de mi vida..por que tu eres parte de ella ...
y eso es el significado de la amiastad de la amistad verdadera...

CHARM TONG, PREMIO REEBOK HUMAN AWARD 2005

Charm Tong, de veintitrés años, una refugiada Shan, lucha implacablemente por los derechos de los grupos étnicos de Burma, particularmente por el pueblo Shan.
Durante años, la milicia birmana ha perpetrado atrocidades contra las minorías étnicas desplazando más de 300,000 Shans y obligando a miles de personas, incluyendo niños, a realizar labores forzadas. La negativa del gobierno Tailandés de reconocer a los Shan como refugiados sólo ha aumentado su vulnerabilidad a los abusos contra los derechos humanos.
Charm Tong ha cofundado una red de supervisores de los derechos humanos en la frontera entre Tailandia y Burma, ha establecido una escuela para los jóvenes refugiados del Estado Shan de Burma, y, a pesar de la amenaza de represalias, ha ayudado a sacar a la luz pública el alto índice de asaltos sexuales que la milicia birmana perpetra contra las mujeres étnicas. "*He prometido a las mujeres que han soportado esta brutalidad que revelaré toda la verdad acerca de los horribles actos que se cometen contra ellas.*" declara Tong.

Los galardonados con el Premio Reebok Human Rights, quienes deben tener como máximo treinta años de edad, reciben una suma de 50.000$ de la *Reebok Human Rights Foundation* para ayudarles a seguir adelante con su trabajo. También obtienen la oportunidad de participar en Forefront, una organización no gubernamental independiente constituida por anteriores galardonados, para ayudarse unos a otros a responder a situaciones críticas, comunicarse con la comunidad internacional, adquirir destrezas y recursos, y compartir estrategias.

A través de estas personas has hecho un recorrido por los diferntes continentes. Son un mero ejemplo de todo lo que aún queda por hacer y de que el horror también está globalizado.
Existen muchas luchas, muchas injusticias, muchas personas implicadas que dedican su vida a la consecución de un mundo mejor.
Otro mundo es posible. Yo me resisto a pensar que sea una utopía.

El valor agregado de este tipo de eventos es hacernos conocer a estas personas, sus ideales y las luchas que emprenden por ellos y por las personas a quienes ayudan. Me alegra que continúe esta labor por las minorías étnicas, especialmente en la protección de su cultura y estilo de vida, evitando así que estas desaparezcan o se vea remplazadas por otras que perjudiquen, de cierto modo, la identidad meramente autóctona de dichas gentes. Saludos Gatopardo.

CARLOS ROJAS, PREMIO REEBOK HUMAN AWARD 2005

Galardonado con el Premio Reebok Human Award 2005:
Carlos Rojas, veintiocho años, un indígena Mixe de Oaxaca, México, graba vídeos para hacer un seguimiento y para documentar los abusos contra los derechos humanos perpetrados en las comunidades indígenas y campesinas que durante mucho tiempo han sido discriminadas, especialmente en los estados del sur de México: Guerrero, Oaxaca y Chiapas. Carlos ha producido convincentes documentales que han revelado las injusticias cometidas, han ayudado a la liberación de víctimas maltratadas, suministrado evidencia crucial contra violadores de derechos humanos y ha contribuido a lograr progresos en la lucha por los derechos de los pueblos indígenas. Su pasión por crear una nueva generación de cineastas indígenas ha ayudado a asegurar que sus voces no serán olvidadas. "*No sólo quiero denunciar los abusos*" -comenta- "*sino también entrenar a la población indígena en las técnicas de grabar videos para así proporcionarles una herramienta que les permita tener confianza en sí mismos.*"

ALOYSIUS TOE: PREMIO REEBOK HUMAN AWARD 2005

Galardonado con el Premio Reebok Human Award 2005:

Aloysius Toe, veintisiete años, uno de los principales activistas de Liberia, adopta posturas de gran valor en relación a delicados asuntos en materia de derechos humanos, aboga por los abusos contra los derechos humanos y educa a los liberianos en sus derechos, los cuales han sido brutalmente socavados desde que comenzara la primera de las dos guerras civiles en 1989.
Es en la actualidad con el ex-presidente Charles Taylor en el exilio, y el gobierno interino tratando de reconstruir una nación devastada cuando el papel de Aloysius en la defensa de los derechos humanos se ha convertido en un asunto crucial. En el presente su labor se centra en los asuntos judiciales durante el periodo de transición, para así asegurar que los derechos humanos ocupen un lugar central en el proceso de paz de la Liberia de la posguerra.
-"*Sueño con algún día poder dormir en paz en mi propio hogar, en mi propio país," declara Aloysius. "Y sueño con que algún día mi pueblo sea considerado un pueblo digno, que sea visto como un país con dirección, como un país con un espíritu nacional.*"

ZAREMA MUKUSHEVA: PREMIO REEBOK HUMAN AWARD 2005

Galardonada con el Premio Reebok Human Award 2005:

Zarema Mukusheva, de veintinueve años, una supervisora de los derechos humanos, que lucha contra los brutales abusos contra los derechos humanos que sufren los civiles en Chechenia. Desde 1994, Chechenia ha estado sumida en una lucha por lograr la independencia de Rusia, y ambas partes del conflicto han cometido atroces violaciones contra los civiles. Zarema informa y denuncia los abusos, entrevista a las víctimas y sus familiares, a través de grabaciones plasma en imágenes la violencia y sus secuelas, y se reúne con las autoridades locales para denunciar los ataques.
Su labor ha logrado que la comunidad internacional preste atención a los homicidios, fosas comunes, desapariciones y secuestros. "*Las estadísticas no reflejan las vidas humanas, y es sólo cuando describimos estas vidas e informamos sobre sus muertes cuando el mundo exterior es capaz de entender el horrendo precio que el pueblo chechenio está obligado a pagar cada día*" declara.

DISCURSO PARA LA LIBERTAD

Dice el Artículo 19 de la Declaración Universal de Derechos Humanos:
"Todo individuo tiene derecho a la libertad de opinión y de expresión; este derecho incluye el de no ser molestado a causa de sus opiniones, el de investigar y recibir informaciones y opiniones, y el de difundirlas, sin limitación de fronteras, por cualquier medio de expresión".

Sin embargo, la red de redes ha resultado ser mala conductora para la libertad de expresión, pues aquí las libertades desembocan a menudo en la lubricidad, el liberticidio o el divertimento malsano. Como reza la canción, sangro, lucho, pervivo, para la libertad y, con esto, podríamos quitar la razón al sabio que afirmó: *"tal es la naturaleza del hombre, que si pones ante él un mundo sin normas, sin leyes y sin castigo, lo destrozará para luego destrozarse a sí mismo".*

Durante el tiempo que paseé por aquí, mis oídos se extenuaron de tanto escuchar a aquellos que, por juventud y buen vivir, nunca conocieron la censura y, sin embargo, acusaron de censores a quienes limpiaron su casa de palabras insultantes y mezquinas. A estos jóvenes, que entienden que escribir consiste en que la eme con la a es "ma" y para los que la "h" es esa gran desconocida, quiero decirles: No olvidéis que nuestra libertad acaba donde empieza la de los demás, y que no tolerar comentarios denigrantes referidos a uno mismo no es censura, sino defensa del honor propio.

Mis ojos se cansaron, en este tiempo, de ver erigirse en jueces y críticos liberticidas a seres ínfimos, carentes del juicio suficiente y del autocontrol, básicos en cualquier otro ser humano cuerdo para encauzar su propia vida. A estos críticos de oropel, que se orgasman de placer ante un poder majestuoso, otorgado por la inmunidad que nos da a todos la expresión sin leyes, quiero decirles: Opinar no es utilizar como arma arrojadiza ese bien preciado que es la libertad, ni evaluar consiste en masacrar sistemáticamente cualquier atisbo de genialidad que encuentren.

También mi cabeza esta agotada ya de negar a aquellos que ante el mal ajeno esgrimen triunfales su propio mal. Esos que si escuchan que alguien fue acosado, ellos lo fueron dos veces, y si alguien sufrió escarnio, ellos lo padecieron más. Son estos grandes sufridores que sustituyen las soluciones por el espíritu de sacrificio y osan decirle a la humillada que es cobarde y débil porque no resistió. A esos les digo: Quien os habla es mujer, violada, maltratada y castigada, parida por tres veces y en consecuencia madre sacrificada, trabajadora de sol a sol y de luna a luna, autodidacta y esforzada, pobre pero honrada, y con más años y huevos que vosotros y que todos esos valientes que no se quejan porque no tienen de qué. Cuidaos de juzgar a quien no conocéis y de presumir de una fuerza que está por probar. Y os digo más, no aguanto "ni esto" porque no me da la gana, ni me sale ya sabéis de donde, que para sufrir por gusto ya veo que estáis vosotros.

Y acabo ya mi retahíla, porque se cansa mi corazón con los reproches de quienes

bien me quisieron. Ellos se sienten insultados, y con razón, porque tiene más valor la palabra ofensiva que el cariño y puede más el que golpea que el que acaricia. Tantos hombres y mujeres buenos, que tímidamente descubren cada día un poco de sí mismos a quien quiera saber de ellos. A esos que siembran margaritas en los cañones de los fusiles y creen que puede haber un mundo mejor si nos lo proponemos, no les puedo ni quiero reconvenir en nada. Porque estos sí que tienen razón. Al otro lado de la pantalla existen personas tan reales como nosotros, con sentimientos mucho más nobles de lo que algunos quieren hacernos creer.

A ellos, por luchar cada día por lo que opinan, por existir y ser tantos, por tenerse unos a otros, por cuidar de sus amigos, por denunciar la injusticia, por soñar y por creer en los demás, a ellos, y que me escuche el mundo… yo les admiro y les aplaudo.

Hace un par de meses, le comentaba a Gato, me sucedió lo mismo, además de en mi blog recibí varios correos-e sumamente insultantes, en uno alguien me decía: "Estúpida, eres un animal porque eres cerrada al no admitir mis palabras en tus comentarios. Tengo la libertad de decir lo que me plazca". Yo no le contesté nada, obviamente, solamente borraba los comentarios y ya. Pero sí que se siente feo, una no está acostumbrada a que sin un por qué llegue alguien y te insulte. Te sugiero no te vayas, no les des gusto, no vale la pena. Solamente borra estos mensajes y no les hagas el menor caso. Ojalá lo hicieras, tu blog es muy interesante, eso es lo único que debe de ser para ti prioridad.

Muchos besitos.

Cerrando tu blog estás dando la razón a la barbarie. Es ese silecio viscoso de los bondadosos que es siempre mucho más perverso que cualquier hachazo.

Otro mundo es posible, pero con tu silencio, con tu silencio voluntario y autoimpuesto, sólo demuestras que no, que cualquiera armado con un insulto gratuito en un teclado puede acabar contigo, que ningún cambio es posible. Ja!

No se trata de un acto de valentía ni de cobardía, es sólo coherencia. Si crees que un insulto es suficiente para callar tu voz, si crees que sólo porque unos farsantes anónimos te escriban estupideces que puedes perfectamente obviar entonces todo lo que has escrito antes es falso. No es más que una máscara, muy emocionante, pero una máscara.

Está bien. Es tu decisión y de nadie más. Pero con silencio no se vence nunca a la barbarie. De alguna forma, te hace cómplice.

Pues para ser esto un silencio viscoso se está haciendo mucho ruido.
Yo creo que todo el mundo habla demasiado Cecilia B., incluso Tautina hace discursos sobre el tema, ¿quien dices que está en silencio? ¿quién lleva máscara? ¿a quién estás juzgando "Cecilia la sufrida"?

¿sufrida? ¡no me hagas reir!

Tautina saca la Declaración Universal de blablabla, uno de esos documentos que se escribieron por personas que hicieron exactamente lo contrario, no callar ante la barbarie de los otros. El silencio es sólo el de Tautina. Y la persecución al "malhechor", también, aunque no sólo de Tautina.

De sufrir con esta cosas, más bien poco o nada. Más bien mucho de sarcasmo cruel.

Yo como desconocedor del blog referido, os cuento:
No sé por qué Tautina hace una "Carta abierta" en este blog a sus ex-atacantes. Si cierras el blog por su causa lo lógico es dar el tema por zanjado (de hecho no puedes zanjar más le tema que habiendo cerrado tu blog a raíz de elloi!)
Por lo tanto esas explicaciones a tus atacantes una vez cerrado tu blog y hechas en otro blog no me cuadran en ningún caso, pues son una continuación de "tú" tema (pues yo, como otros lectores, no he conocido tu blog ni he sido expectador del difunto tema del que hablas), a no ser que sea -digamos- un epílogo dedicado a la lectura de tus ex-lectores transladados a este Gatopardo amigo.

"LA VENTANA DE TAU" HA DESAPARECIDO

Desde que abrí Gatopardo ha estado en mis enlaces de portada "La ventana de Tau".
Sin que sea muy ortodoxo, porque no conozco a la autora, escribí el 31 de marzo de 2005:
Si quieren saber lo que sienten los buscadores de oro cuando encuentran una mina, después de cerner toneladas de tierra y estar a punto de perecer de hastío, lean a Tautina, en su bitácora "La ventana de Tau". Día a día ha creado un universo propio donde explora y sorprende a quienes amamos la obra bien hecha, sin trampa ni cartón.
Después de soportar el acoso constante de un psicópata que le dejaba comentarios injuriosos en su bitácora, Tautina ha dado de baja su página.
Quien la acosó, injurió e insultó,tiene la IP: 62.174.64.110.
Blogia.com tiene los originales donde quedó reflejada la IP remitente.
Espero que miréis en el correo de vuestros blogs, y si identificáis esa IP sabed que es la de alguien tan despreciable que es capaz de acosar, amenazar e insultar amparándose en la impunidad y el anonimato que creía tener.
Aunque el acosador tire a la basura el ordenador, está registrado. Y se trata de un delito grave, que tiene pena de cárcel e indemnización a la víctima.
¡Ojalá le dé un dolor que cuanto más corra más le duela y cuando pare, reviente! Y que sepa que en los próximos siete años va a tener tan mala suerte que va a desear no haber nacido.
Espero vuestras iniciativas,ideas e informaciones.
¡Pásalo!

Con todos mis respetos, si alguno de vosotros sabe cómo funcionan estas cosas de las IP's, no estaría escribiendo mensajes de este tipo.

Un poquito de serenidad no viene nunca mal. En todo caso ¿la afectada se ha puesto en contacto con el administrador de blogia.com, Roberto Abinzada, para ver si es posible banear esa IP en esa bitácora en concreto? Si tan grave ha sido el asunto, que la interesada lo denuncie o que se ponga en contacto con la Asociación de Internautas, para que la orienten. Pero desde luego, y sin negar la buena intención del gesto, creo que está no es la forma correcta de hacer las cosas.

No es la primera vez que alguien es objeto de acoso en su blog, y la única solución que suelen aconsejar es cerrarlo, abrir otro en secreto, con otro nombre y pedirle a los amigos que no lo enlacen para que no vuelvan a encontrarlo. Eso significa perder todos los lectores y quedar flotando en una especie de nada. Existe una legislación que se aplica si alguien acosa, insulta, amenaza y existe la Brigada de Investigación Tecnológica http://www.mir.es/policia/bit/index.htm Si pinchais en "Actuaciones" (a la izquierda) veréis que se ocupan de esto. Lo malo es que quien es acosado y amenazado en su blog desarrolla el mísmo síndrome de indefensión que ha dejado a muchas mujeres maltratadas durante años en silencio, avergonzadas, en manos de sus enemigos.
La IP venía en los comentarios que el servidor os remitía por correo, y desde hace un tiempo se han eliminado y sustituido por la IP del servidor donde nos alojamos. Sólo un fallo de blogia ha permitido identificar al acosador. Que los comentaristas que insultan en un blog puedan hacerlo desde el anonimato y la impunidad es posible si el servidor que nos aloja no pone en manos de la policía los mensajes amenazantes e injuriosos. Y si, argentinita, me puse en contacto con Roberto Abizanda, y Tautina también.

Normalmente la gente que insulta termina aburriéndose. No es tan importante. No pasa realmente nada tan serio como para eliminar una bitácora sólo por que alguien te insulte. A mí no han dejado de insultarme ni un día, pero poco a poco, todo volvía a su cauce. Lo normal. El aburrimiento provoca monstruos.

Lo de la IP es un absurdo. Cualquiera puede cambiar de IP cuando desee, incluso ocultarla o adoptar cualquier otra.

Respecto a eso de las "actuaciones policiales" creo que sería bueno recordar que no hay ninguna bitácora que sea "propiedad" de nadie. Y que si alguien quiere clonar, copiar, multiplicar o dividir, podrá hacerlo tantas veces como desee. ¿Importa eso?

Antes de abandonar blogia por ese sórdido asunto de la publicidad (que en aboluto comparto), todos los días algún imbécil trataba de obtener la contraseña de mi blog, todos los días recibía notificaciones de Solicitud de Contraseña. ¿y? Por si las moscas la

cambiaba y asunto resuelto.

Borrar los comentarios de los que insultan sólo les hacen creer que tienen razón, que efectivamente es mejor abandonar. Yo no estoy de acuerdo con esa actitud derrotista. Supone admitir que la barbarie triunfa siempre, algo que en sí mismo es absolutamente ofensivo.

Algún enfermo incluso comentaba con los nicks habituales de otros lectores.

Desgraciadamente, borrar la bitácora es darle la razón a los energúmenos.

Ohhh es de Barcelona. Entonces será facilísimo encontrarle porque como es una ciudad pequeña...

Insultar en un blog no es ningún delito. Ni siquiera es una falta. Las "autoridades competentes" no pueden hacer abolutamente nada porque te insulten porque no existen tales "autoridades competentes". Llamar acoso a un comentario anónimo en un blog es perverso, banaliza lo que es el acoso verdadero y no esto que, al fin y a la postre, no es más que pura virtualidad fatua. Desde cualquier punto de vista me parece absolutamente exagerado hacer un "llamamiento" para que estas cosas no se produzcan. Exagerado e infantil. Casi ridículo. Falta que llaméis al administrador y le escribáis "papi, papi, mira lo que me están diciendo". Si no quieres comentarios fuera de tono, los borras. Si lo lo borras, los soportas. Si no los soportas, eliminas la posibilidad de dejar comentarios. No se puede pretender que otro (el administrador de blogia) administre vuestro blog, que os de la "seguridad" de que nadie os va a insultar. ¿Y por qué no? hay un montón de memos que se esconden detrás de una IP (qué más dará eso) o de un nombre que no significa nada y que se diierten insultando. hay otros que se dedican a piratear software o a hackear sistemas informáticos (eso sí son delitos o faltas, nunca se sabe)

¿habéis revisado alguna vez en cuántas bitácoras han escrito comentarios en vuestro "nombre" (usando vuestro nick y vuestra dirección de blog)? ¿que vais a hacer, llamar a la policía o directamente al Ministerio del Interior por apropiación de un nombre que no es vuestro nombre?

Que gatopardo (que por supuesto no es su nombre o sí, pero ¿qué importa eso?) haya dejado de escribir obedece a una razón que nada tiene que ver con los insultos o con la presunta psicopatía de un presunto lector. Si la razón última es esa, entonces le está dando larazón a los que le insultaban. Si no lo es, perfecto, pero que no se escude en algo tan peregrino y banal como "me insultan en mi blog".

Obviamente, Gatopardo jamás ha sufrido acoso físico ni psicológico de una persona real con cara, nombre y rotro conocido. Todo esto le parecería una fruslería.

Fecha: 04/05/2005 12:38.

Autor: Gatopardo

Mi admirada Cecilia: no se trata de demostrar lo chulos y lo valientes que somos los que asumimos el riesgo. ¿Tu argumentación sería la misma en el caso de que ese acoso fuera por teléfono? Llamar un día tras otro a alguien puta, bazofia, y amenazar es un delito, no es "interpretable" como "bobada". Y existe una figura en el código Penal que lo tipifica. No he llegado a comprender si afirmas que no he sufrido acosos y que me parecería una fruslería porque no me has leído bien o no me he explicado.
Yo he borrado de mi blog comentarios que eran insultantes, injuriosos, malsonantes y mal redactados aunque no fueran dirigidos contra mí. Eso significa que me parece muy grave ese tipo de cosas. Y como ya he dicho anteriormente el original de los comentarios está en poder del webmaster de blogia.com y es él quien ha de facilitarlos a la Brigada de Investigación Tecnológica para que actúen.
Sobre si Gatopardo es mi nombre o no, ha de bastarte con saber que es mi seudónimo, precisamente para evitar que los psicópatas decidan actuar contra mí personalmente. No soy la primera escritora que recurre a un seudónimo ni seré la última.

Yo siento mucho lo de la Blog de Tautiana. Era un placer leerla. He pasado a mis enlaces la nota que me mandaste, Gato.Lo peor de esto además d eperder esta forma de sentirnos bien que es editar y comentar las Blog, es l aperdida d eintimidad. A veces han insertado algún comentario malsonante en la mia y me he apresurado a borrarlo, no sin dejar para el autor unas pullitas afiladas. Claro que entiendo que si Tatiana a cerrado ha debido de ser por algo más grave que una memez de vez en cuando. Espero que se de con el culpable; pero, no creo que sea nadie de los que nos comentan habitualmente. Muchas blog las encuentras por azar entras una vez solamente, si este tipejo entró un día y algo no le gustó a sus cortas entendederas se ha quedado a fastidiar porque hay gente que sólo se divierte "jodiendo" a los demás(perdona la expresión) pero es que cuando me indigno me brota la mala leche.

por supuesto que no! quizá no escribo con la precisión necesaria.

Hay sistemas de blogs que permiten que el usuario controle el acceso al mismo. Del mismo modo existen sistemas de comentarios que también, pero ni una cosa ni otra están disponibles en Blogia.

Injuriar a un nombre falso no es nada, ni es delito ni es falta. Tampoco se trata de demostrar valentía ni nada de nada, no en este espacio sin espacio.

Desde luego para mí los insultos que recibo a diario en mi diario ni siquiera los tomo en consideración. Tampoco creo que sea acoso, como mucho es sólo una anécdota.

Durante cierto tiempo, un grupo de lectores enloquecidos decidió buscarme. Visitaron mi hotel, enviaron correos a amigos míos, preguntaban en tiendas si yo había pasado por

allí o no. Cosas así. No fue muy agradable pero eso no me impidió seguir escribiendo mi diario. Del mismo modo, una especie de "periodista" ha decidido revelar (no sé si sigue por aquí o ya se ha ido) aspectos íntimos que sólo a mí me interesan.

Que uno o varios dementes decidan insultar o calumniar a personas que se ocultan detrás de un nick carece por completo de importancia. Y, bajo ninguna circunstancia, son delito ni constituyen delito. Para eso deberías tener registrado el nick en algún sitio público de tal forma que nadie, en ninguna otra parte, pudiera utilizarlo, lo que en sí mismo es imposible. Insisto en lo de las direcciones IP: enmascararlas es extremadamente sencillo, aunque por lo que estoy leyendo, el/los memos no se han tomado demasiadas molestias.

En cualquier caso comparar el acoso a través de anónimos en un blog con el acoso físico de un energúmeno me parece que es trivializar el "acoso" como tal, convertirlo en una especie de rutina en el que hasta nuestra "vida" en Internet, aún cuando se parapeta tras un alias, está sujeta al acoso o la presión. Y eso no es cierto ni en mucho ni en poco. Es una premisa falsa. Tu entidad virtual no es tu entidad física. Es sólo un reflejo de una personalidad que sólo se puede expresar con palabras y que adopta otro nombre, otra identidad.

Aquí dentro, nadie tiene capacidad para violarme o para espiarme mientras me ducho. Nadie puede matarme ni golpearme. Sólo pueden escribirme. Y las palabras dichas por algunas personas carecen para mí por completo de importancia.

Espero que la dirección IP no se corresponda con la de un proxy. Espero que esa dirección de Internet no sea la de un cibercafé y acosen a quien no tiene nada que ver, aunque nadie va a hacer nada. Ni el administrador de blogia ni la Unidad de Delitos Informáticos de la Guardia Civil. Porque nadie ha cometido ningún delito informático. Y si lo hubiera (que no lo hay), jamás podría probarse (aún cuando te hubiera enviado cientos de correos electrónicos con amenazas, insultos e injurias).

Gracias, Cecilia, reo que la primera vez ya quedó claro, la segunda lo has dejado más claro, y la tercera igual de claro. No te parece grave. Estás en tu derecho. Pero exactamente he pedido: "Espero vuestras iniciativas,ideas e informaciones." sobre las medidas a tomar en este caso concreto, no hemos abierto un forum sobre el acoso en general ni sobre los avatares que nos han acontecido a lo largo de la vida. Gracias por tu participación y por tu opinión.

Internet es un hormiguero de enfermos mentales... Menos mal que también hay gente muy maja y compensa ... Yo llevo 5 años y medio con página y ahora también con blog y la verdad es que también me he encontrado con más de una sorpresa desagradable. Es una pena que por un "zumbao" un webmaster que no hace ningún mal a nadie tenga

que acabar por cerrar un blog o un sito lleno de sueños e ilusión... Un abrazo y gracias por la info... Si localizo el IP os lo haré saber :)

yo no conocí el blog de tautina, y no conozco nada de leyes o recursos informáticos.
pero leyendo a cecilia, a quien tampoco conozco, se me ocurre una cosa:
¿porqué cuesta tanto ponerse en el lugar del otro?
lo que para una persona puede ser acoso, para otra no... pero eso no le quita legitimidad a quien sí se sintió acosada (no hace falta que te propongan sexo en la oficina para hablar de acoso).
el acoso es una cuesión de poder... de pretender victimizar a alguien.
hay ´personas que pueden resistir y otras que no, y no porque les guste convertirse en víctimas.
simplemente no pueden.
marcar parámetros sobre qué es una cosa y qué no, es como un intento de borrar las diferencias que existen, por suerte, entre los seres humanos... es como si el mundo tuviera que comprenderse únicamente a través de cómo lo veo yo.

y no creo que el asunto sea para trivializar... nunca se sabe hasta donde puede llegar alguien escudado en el anonimato.

Es lamentable que hayan personas que no tengan nada mejor que hacer. No conozco el blog de Tautina, una pena, porque ahora ha despertado mi curiosidad debido a las buenas críticas que estoy leyendo sobre él.
No te desanimes, ese tipo de personas, que les da por acosar, insultar, etc. es gente deleznable, gentuza con una vida vacía, amargados. El peor de los castigos para ellos es tener que soportarse a sí mismos. Si algo puede hacerse para evitar este tipo de cosas, contáis con todo mi apoyo.

Hola Gato pardo...

Yo era una visitante asidua de Tautina, me encantaba su página :)

¿Sabes? Hace varios meses alguien me acosaba e insultaba te mentiría si te dijese que no me importaba Me dolía y mucho, pero sabes que hacia yo? simplemente los borraba y no le daba oportunidad de seguir adelante.
Tú sabes que el silencio e ignorar a los agresores les duele más eso que les prestes atención... "NO VALEN LA PENA" borrar sus comentarios las veces que sean necesario.

Venga amigo no ensucies tu alma deseando algo malo para él, suficiente debe ser ya para él tener una mente y corazón tan pobre como el que posee, esas personas son dignas de lástima no pueden inspirar otro sentimiento...

por favor no enfermen su alma de cáncer. No demos oportunidad de que logren su objetivo. "NO A LOS INSULTOS" borremos las veces que sean necesarias y no tendrán cavidad en nuestro sitio :)

Tautina, si me miras vuelve y demuestra que sus palabras y acciones no pueden contra tu corazón y sentimientos que son más grandes que una mente enferma.

Saludos!

Entiendo perfectamente la situación de Tautina y que su malestar ante la falta de respeto continuada de un tarado la haya llevado a tomar la decisión de cerrar su blog. Se decantó por una de las opciones posibles que seguramente ha sido la más drástica y la más lamentada por sus lectores. Pero el razonamiento de Cecilia B. es certero y realista. Si alguien decide montar un bar, una tienda de ropa o una panadería, se encontrará más tarde o más temprano con la visita de algún lunático, o un dipsómano o simplemente un imbécil, esto para no enumerar otras posibilidades dentro de los realmente inquietantes gremios de ladrones, violadores o asesinos.
Entonces ante una de esas previsibles interferencias una de las alternativas será el cierre del tenderete.
Pues bien, cuando alguien decide abrir un blog no debería olvidar que lo está haciendo ni más ni menos que en internet, "la red de redes", es decir que por su escaparate podrían pasar miles de millones de individuos de todo el mundo. Casi nada. Solo resta calcular el porcentaje de cretinos que estadísticamente se cuentan en un grupo de diez personas y traspolar esa cifra de forma proporcional a los miles de millones que potencialmente podrían leer y escribir en su blog.
Ante la falta de respeto del cretino se reaccionará según la sensiblidad personal de cada cual: bien con la indiferencia de Cecilia B., bien con la drástica opción de Tautina.
Intento no banalizar, pero tampoco dramatizar. Desafortunadamente cretinos se encuentran en todas partes y hay que combatirlos y defenderse de ellos, afortunadamente internet es un espacio virtual.

Ruego que tengáis en cuenta que no es un foro sobre el sentimiento de acoso ni lo que cada uno entiende: he dado desde el principio el enlace a la página de la Brigada de Delitos Tecnológicos, a la izquierda veréis que existe una unidad que se ocupa de esto.
Y me está recordando terriblemente cuando hace unos años se le aconsejaba a los trabajadores y a las mujeres que sufrían acoso psicológico e insultos que no hicieran caso, que a palabras necias oidos sordos, que o que querían los acosadores era que respondiera... ¡Calcado lo que estáis diciendo sobre como afrontar insultos y amenazas en Internet! Debe de ser que soy muy vieja y tengo demasiada buena memoria.
Y sí, el odio es necesario y es sano, y la agresividad también: yo no soy partidaria del amor universal ni del pacifismo a ultranza, ni los predico ni los practico.
JURIDICAMENTE EXISTE UN DELITO TIPIFICADO EN EL CÓDIGO PENAL; NO ES UNA EXQUISITA INTERPRETACIÓN SUBJETIVA.
Los que sean más chulos que nadie y les dé igual, muchísimo gusto que me da, y han quedado como héroes contandolo. Vale.

Sólo te puedo decir que es una IP de retevisión, así que seguramente el "acosador" sea abonado de esta compañía.

Llego a tu blog vía del de Bikerin. Allá he dejado una buena parrafada. Sólo diré que no todas las personas somos iguales y tenemos la misma capacidad de aguante y de respuesta ante situaciones como ésta. El "Pásalo" de tu comentario lo voy a tomar como una invitación a colgar tu comentario en mi blog. A Tau ya le dije en nuestra despedida todo lo que podía decirle. No quiero que más personas sean atacadas, perseguidas, insultadas, acosadas por nadie. Ni que nadie se sienta en el derecho de hacerlo, ni con potestad de criticar sin pedírselo, sin alzarse con el privilegio de ser juez en misión casi salvífica, y encima no permitir que se le conteste en su propio medio. Personalmente estoy en esto porque disfruto, imagino que vosotr@s también. Si en la calle trabajamos por evitar injusticias, hagánoslo también. Demasiado tiempo impasibles, es hora de actuar. Venga y esta es mi propuesta. Es cierto lo que dice Cecilia B. no es acoso físico, creo que no; pero es acoso psicoemocional, cosa que ella no entenderá, por supuesto porque ... vale; ese es su problema o no

Pero mi propuesta es que los que quieran unirse para apoyar a un compañero que esté sufriendo este tipo de mensajes, nos avise y nosotros que no estamos bajo ninguna presión emocional, la tomamos con el individuo en cuestión en el mismo plan; a ver cómo le sienta que le busquen a él las cosquillas continuamente.

Ya, es cansado y a lo mejor no queréis mover realmente el culo por nadie ni mojaros, bueno pues no pasa nada pero tampoco os solidaricéis de mentirijillas, coño que quejarse es muy fácil. Y estaría de puta madre que el que estuviera sufriendo este tipo de 'Acoso Virtual' tuviera eso, un grupo de apoyo o algo así, porque es jodido estar abriendo tu mundo interior y exponiéndote a la crítica para que simplemente venga el payaso de turno, que no expone nada, a tocarte los ovarios o los cojones, en su defecto.

Yo de chivatazos y todo eso, paso pero para esto, que sepáis, que Tautina y cualquiera podéis contar conmigo.

Lo que no es bueno es comportarse como una víctima porque los verdugos eso es precisamente lo que buscan. No colaboréis con los tipos así.

Y aclarar que Tautina no era virtual, era real y ese fue realmente el problema :'(

Justamente, Imagínate, eso hacíamos en mi barrio y siempre me funcionó: "si te metes con mi colega te estás metiendo con todos los colegas y te la cargas con todo el equipo"
No es lo que aconsejan los místicos de lo políticamente correcto; pero es eficaz: por lo pronto al acosador le estamos quitando esa impunidad del anonimato que necesitaba para hacer daño impunemente.
Las repeticiones en los mensajes se debe a un error de Blogia.com que está en obras y no a mala intención de Augusto R.
Así es que, por favor, llevénseme bien que paso mucha envidia si hay follón y no participo en la bronca.

Señores, siento echar abajo los animos, pero les recuerdo que el sistema de direccionamiento de retevision es dinamico, por l oque la IP que se tiene hoy, no es la misma que la que se tendra mañana ...

La unica forma de denunciar, es mediante una denuncia judicial, ya que retevision tiene obligacion de guardar en un registro sus ip's ... pero tampoco serviria de nada, ya que se identificaria a la maquina, pero no al usuario de esta (en terminos juridicos)

lo siento

Un saludo

Ger: "El artículo 212 del Código Penal establece la responsabilidad solidaria del propietario del medio informativo a través del que se haya propagado la calumnia o injuria. En el caso de Internet, la responsabilidad civil solidaria alcanzaría al propietario del servidos en el que se publicó la información constitutiva de delito, aunque debería tenerse en cuenta, en este caso, si existió la posibilidad de conocer dicha situación, ya que el volumen de información contenida en un servidor no es comparable con cualquier otro medio de información, como puede ser una revista, una radio, un programa de televisión o un periódico."
Hace unos años si alguien recibía amenazas o injurias por teléfono sólo podía interponer una denuncia, conseguir que un juez decretara la escucha 24 horas, y solicitar la baja en la guía de teléfonos. Se articularon los medios para que se consiguiera idetificar a cualquier comunicante y hoy hay miles de casos de gente condenada por utilizar el teléfono para amenazar o insultar. Es necesario que los servicios jurídicos de los servidores de blogs estudien proteger a sus usuarios.
Respecto a retevisión está mal informado: no todas son IP dinámicas.

Llege a esta pagina justamente por buscar "acoso virtual" aunke para algunos paresca "exagerado" es una realidad cada vez + peligrosa, cualkier persona aunk paresca normal puede tener una patologia sicopata, y si alguien no a sufrido el hostigamiento de alguien, no deberia juzgar, en mi caso lamentablemente e sufrido esto , tanto en vida "real" como ahora... "virtual" , soy estudiante de Derecho y por eso me intereso prufundizar en este tema, si le damos el peso adecuado y serio al acoso virtual, puede ser un antecedente necesario para que la legislacion se pronuncie... bueno, grax por el espacio y perdon por llegar sin invitacion.

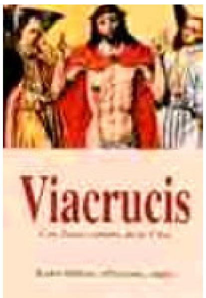
1 DE MAYO de 2005



Mis amigos curas y los católicos de base que lucharon codo con codo con los militantes de izquierda contra la dictadura, dándonos ejemplo de coraje y testimonio vivo de sus creencias, cuando la Jerarquía empezó a frenar y sepultar aquel impulso que los hermanaba a los desheredados, y al lloverles las brutales represalias, quedaron en el mismo estado de estupefacción que los comunistas asturianos cuando vieron llegar al puerto un barco soviético cargado de carbón para romper aquella desesperada huelga de 1956, como quedaron cuando recibieron la orden de no ayudar a los resistentes que no habían querido ni podido salir de España... Cuando desde el Comité Central del Partido se denunciaron los crímenes de Stalin, los comunistas lloraron como criaturas al ver en qué se había utilizado su hermosa ingenuidad, y lo peor, me contaba mi amigo Pedro, fue digerir que si no hubiera sido por la defensa a ultranza contra los que consideraban “calumnias de los enemigos”, hubieran podido desenmascara la tiranía estalinista, que asesinó a millones de comunistas bajo la acusación de “traición”.
-“Con nuestra falta de lucidez y con nuestro silencio se cavó la tumba de millones –decía mi amigo- y ahora no me siento legitimado para defender nada."
Pero no sólo traicionaron a los cristianos posconciliares los jerarcas de su iglesia: el pueblo, su aliado, creyó que se las arreglaría sin ellos. Y sin ellos se agarraron a mejoras transitorias que no supieron afianzar, y hoy los sindicatos son la correa de transmisión de las decisiones del Gobierno de turno.
En marzo de 1983, en un programa de televisión sobre "los nuevos curas", José María de Llanos fue el único que afrontó con honestidad su papel, y me impresionó que desde biografías tan diferentes que podríamos ser adversarios, hubiéramos llegado a vivencias tan similares. "Yo soy un burgués y sigo siendo un burgués. Y me duele no ser como

ellos, los obreros".
Seguramente vivimos como el cinco por ciento de los obreros no cualificados y nuestra capacidad adquisitiva era equiparable al uno por ciento de los más depauperados, pero dio igual, "no somos del pueblo", que decía José María de Llanos, aunque sean "los nuestros", aunque tengamos diez generaciones de proletarios en el ADN, para ellos éramos unos privilegiados: podíamos ser utilizados, y eso debía bastarnos; otro cantar es como utilizamos a "los nuestros" sintiéndonos útiles.
Y el quid es tan sencillo como diabólico: la pátina de los años de soledad, la resistencia psíquica adquirida, nuestra biografía y nuestra peripecia nos habían dado "voz" propia e individualizada. Y hablamos desde el pueblo, con el pueblo, a su favor, o por él, pero el pueblo no tenía voz: voceaba. Y quizás no sea ésa su servidumbre, sino la nuestra, la mía y la de ese cura que quiso ser uno más y al final se descubrió y se confesó "otro", "extraño al pueblo".
Optamos por permanecer con los despojados, despojándonos, pero los nuestros no optaron por estar donde estaban y cuando se les dio la oportunidad de escoger, no permanecieron fieles a sus orígenes.. Desde su miseria, la nuestra les pareció un capricho sospechoso; porque nosotros tenemos esa extraña convicción que nos hace aguantar sin rompernos, por muchas calamidades que vivamos. Quizás porque en el fondo sabemos que podemos, con mayor o menor esfuerzo, abandonar el club de los desheredados. Ellos no, y eso para los que no queremos los privilegios que se basan en la miseria de la mayoría, significa ser privilegiados: ese es nuestro drama, aunque no dramaticemos.
Y por eso mismo no podremos reposar beatíficamente en una relación igualitaria, sintiéndonos aceptados por los destinatarios de nuestros desvelos y tendremos que ser negados por los burgueses, a quienes negamos, y sólo tolerados, cuando somos utilizables, por nuestros aliados de corazón.
Quizás sea ése el reverso de los privilegios: la soledad, y hay una profunda justicia en que así sea, porque no es la suerte que nos merecemos, pero si es la que se nos asemeja.
Es dura la vivencia de la alteridad, pero ¿acaso podríamos encontrarnos en una relación, que ignore la diferencia?
Hoy, 1 de mayo de 2005 pienso cuánto hemos perdido sin aquellos aliados de energía sobrehumana, capaces de las mayores heroicidades con una sonrisa, tan condenadamente cálidos y humanos, a los que sustentaba una fe en Cristo que siempre me emocionó.
Los echo de menos.

PD. *En la imagen, portada de un libro de José María de Llanos, que leí dos docenas de veces y perdí en un tren hace dos años. Ofrezco recompensa a quien me lo devuelva... aunque no sea el mismo ejemplar.*
José María de Llanos decía hablando del Opus Dei, y de la jerarquía de la Iglesia, cómplices de los tiranos: "*Que Dios les perdone. Lo difícil es comprenderles*"."

El pasar de los años, los desengaños, las traiciones, el cansancio propio y ajeno, el abrir los ojos a muchas cosas, el cerrarlos a más, la comodidad,el desanimo, la cultura de lo fácil y tantos dolpes más nos hacen perder nuestras convicciones, claudicar en nuestras luchas, difuminar la pasión que un día pusimos en todo lo que hacíamos, en todo en lo que creíamos.. Es triste, tremendamente triste, pero real, como la vida misma. A veces

mirar atrás duele tanto que las defensas de nuestro cuerpo se niegan a volver la cara.

Dicen que la tiranía de Stalin fue peor que la perpetrada por lo nazis. Por aquella época en mi país también se libraban luchas contra las dictaduras, contra la falta de libertades individuales. A pesar de ello, no se logro en su totalidad superar estos vicios de poder, dejando un legado de rebelión contra las triquiñuelas de derecha e izquierda que hoy, 1 de mayo, serán recordadas en los distintos puntos de mi tierra.

Tendrían una infinita fe en Cristo, pero estoy convencida de que lo que sustenta la fuerza sobrehumana, es el amor por las personas.

Me apena esa idea de que uno se debe a su clase social. ¿Por qué nos sentimos insultados y repudiamos a quien abandonó nuestra comodidad, y por qué, también, sospechamos y despreciamos a quien se adentra en nuestra misma vida dificultosa? ¡Qué triste esa cultura del "si no te aprovechas, eres tonto o algo te traes entre manos"!

¡Qué nostálgicos nos ponemos! Hechamos de menos los curas peleones cuando la Iglesia ataca con cristianizarnos de nuevo. Añoramos los problemas sociales cuando la sociedad vive en el limbo del bienestar y lo que funciona es el "salvese cada uno como pueda!
¡Qué lejos los días añorados de lucha! (que yo no he sido núnca peleona, pero veía desfilar ante mi ignorancia de niña bien educada, a los sindicalístas)
Ahora veo a un señor acusar al gobierno de que haya atascos. ¡Qué tiempos, Señor...!
Ahora veo peleas de patio, agarradas de verduleras (con todos mis resperos a las verduleras de mi mercado) por estupideces sin nombre. Y de lo importante nada.
Pan y circo, una vez más. Disimula, que estos ni se enteran... Mangonea, que para cuando salga ya estamos en Cancun... Y así todo.

THE OBSERVER: EL PAPA OBSTRUYÓ LAS INVESTIGACIONES SOBRE ABUSOS SEXUALES

Una carta confidencial revela que Ratzinger ordenó a los obispos que mantuvieran en secreto las alegaciones.

Jamie Doward, corresponsal para asuntos religiosos. Domingo, 24 de abril, 2005. The Observer

“Desde anoche el Papa Benedicto XVI se enfrenta a una demanda por obstrucción a la justicia, después de que se descubriera que había enviado una orden, según la cual las investigaciones y pesquisas que realizara la Iglesia sobre abusos sexuales cometidos contra menores fueran llevadas a cabo en secreto.

La orden fue dada en una carta de carácter confidencial (a la que ha tenido acceso The Observer), que fue enviada a todos los obispos católicos en Mayo de 2001
En ésta, se defiende el derecho de la Iglesia a mantener en secreto y a retener la evidencia durante un período de diez años, después de que las víctimas hayan alcanzado la mayoría de edad. La carta iba firmada por el Cardenal Joseph Ratzinger, que fue elegido sucesor de Juan Pablo II la semana pasada.
Los abogados de las víctimas afirman que la carta tenía como fin impedir que las denuncias de las víctimas salieran a la luz pública o fueran investigadas por la policía. Estos mismos abogados acusan a Ratzinger de "*evidente obstrucción a la justicia.*"
La carta que "atañe a muy graves pecados" fue enviada desde la "Congregación para la Doctrina de la Fe",institución vaticana que sustituyo a la de la Inquisición, y a cargo de la cual estaba Ratzinger.
En ella se explica a los obispos la posición de la Iglesia católica ante una serie de temas que va desde la celebración de la eucaristía con un no-católico hasta el abuso sexual de un clérigo "*a un menor de 18 años*". La carta de Ratzinger afirma que la Iglesia Católica puede reclamar la jurisdicción en aquellos casos en los que el abuso a un menor lo haya cometido un clérigo o sacerdote.
Asimismo se sostiene que la jurisdicción de la Iglesia dura hasta los dieciocho años del menor y otros diez más.
En la carta se ordena, además, que las investigaciones preliminares de cualquier denuncia de abusos sexuales sean enviadas al departamento de Ratzinger, el cual tendrá la facultad de entregarlas o no a un tribunal privado en el que "*las funciones de juez, procurador, notario o representantes legales son desempeñadas únicamente por sacerdotes*."
"*Este tipo de casos esta sometido a secreto pontifical*" concluye la carta de Ratzinger. Romper el secreto pontifical mientras esté vigente la jurisdicción de los diez años acarrea penas que incluyen la excomunión.
La carta se hallaba formando parte de la documentación referente a una demanda presentada a principios de este año contra la Iglesia Católica de Texas y contra Ratzinger por dos presuntas víctimas de abusos sexuales.
Según los abogados de las víctimas, el Cardenal Ratzinger, al enviar esta carta, conspiró para obstruir la acción de la justicia.
El abogado de las dos presuntas víctimas, Daniel Shea, que fue quien descubrió la carta, dijo: "*La carta habla por sí misma. Uno tiene que preguntarse inevitablemente:¿por qué no empieza a funcionar el reloj hasta que el niño cumple los 18 años? Esto se llama obstrucción a la justicia.*"
El padre John Beal, catedrático de Derecho Canónico de la Catholic University of America, en declaración oral jurada, el ocho de abril del pasado año, reconoció ente Daniel Shea que la carta ampliaba la jurisdicción y el control de la Iglesia católica sobre delitos de abusos sexuales.
La carta de Ratzinger estaba co-firmada por el Arzobispo Tarcisio Bertone, quien, en una entrevista de hace dos años, ya aludió a la oposición de la Iglesia católica a permitir que organismos ajenos a ella pudieran investigar las denuncias de abusos sexuales.
"*En mi opinión, no tiene fundamento la exigencia de que un obispo esté obligado a contactar con la policía para denunciar a un sacerdote que ha admitido ser culpable de pedofilia*" dijo Bertone
Daniel Shea criticó la orden de que las denuncias sobre abusos sexuales sólo pudieran ser investigadas en tribunales secretos: "*Están imponiendo la doctrina y el secreto sobre estos casos. Si la justicia o los organismos legales descubren estos casos, pues entonces los afrontan. Pero no se puede investigar un caso si no se descubre. Y si logras mantenerlo secreto hasta que la víctima cumple 18 años y después otros 10 más, pues el sacerdote logra irse de rositas.*"
Una portavoz de la oficina de prensa del Vaticano declinó comentar el contenido de la

carta de Ratzinger: *"No es un documento de carácter público, así que no vamos a hablar de él."* dijo."

Podemos hablar, más bien investigar, sobre la media y desviación típica de pederastas en las insitituciones públicas y privadas de España y, si se deja, de EEUU. También podríamos investigar sobre las diferencias entre pederastas de toqueteo y de si tienen por objeto niños que cobran o no, si son niños o niñas, si los padres conocían el tema, etc. Es un buen estudio. Sería interesante saber cuántos jueces, maestros y políticos hay que sean pederastas. También si son homosexuales, lesbianas, bestialistas o no y si realizan esas actividades después de consumir alcohol, drogas o si son abstemios. Creo que, dado que estos elementos son clave en nuestras sociedades deberíamos estudiarlos a fondo.

Me cuesta trabajo creer que, al menos, jueces y políticos carezcan de instrumentos de evitación de investigaciones públicas al respecto.

Pero no, vamos a hablar de sólo de la Iglesia Católica. De esa forma desviamos la atención sobre un cabeza de turco que pague por los pecados de todo el pueblo. Lo mismo que con Jesús.

Además. Les retiramos a todos el derecho a no autoinculparse y a buscar cualquier medio de autodefensa que le libre del juicio y, de paso, hacemos la ley retroactiva. Así cojeríamos al ladrón de Felipe Gonzalez

Saludos.

Esto es como hacían los antiguos hebreos en la biblia... para rasgarse las vestiduras. Pero creo que hay en el mundo mucho sucediendo bajo la superficie aparentemente tranquila y apacible. Por eso defendí cuando muchos atacaron la última pelicula de Almodovar, porque enseña sin necesidad de juzgar (ni adular a nadie tampoco), las cosas que suceden a chavales jóvenes y niños; crímenes que cambian la vida de la gente y que a mi ver, seguirán siendo crímenes ocultos... hasta que llegue un CSI, que esté por encima de la ONU, del Vaticano, y de cuanta orden nos encontremos. hay que admitirlo, aún tienen mucho poder... aunque ya se ha visto que incluso los más enormes imperios se han venido al suelo. Tal vez ya no estemos aqui para ver ese desmoronamiento, pero de que lo habrá... lo habrá.

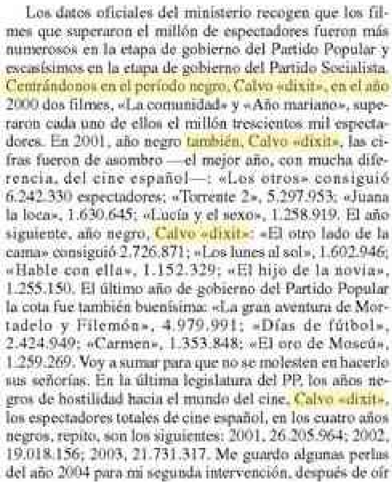
EL SENADOR VAN HALEN FALTA EL RESPETO A LA MINISTRA DE CULTURA AL DECIR "DIXIT" ...



Los datos oficiales del ministerio recogen que los filmes que superaron el millón de espectadores fueron más numerosos en la etapa de gobierno del Partido Popular y escasísimos en la etapa de gobierno del Partido Socialista. Centrándonos en el período negro, Calvo «dixit», en el año 2000 dos filmes, «La comunidad» y «Año mariano», superaron cada uno de ellos el millón trescientos mil espectadores. En 2001, año negro también, Calvo «dixit», las cifras fueron de asombro —el mejor año, con mucha diferencia, del cine español—: «Los otros» consiguió 6.242.330 espectadores; «Torrente 2», 5.297.953; «Juana la loca», 1.630.645; «Lucía y el sexo», 1.258.919. El año siguiente, año negro, Calvo «dixit»: «El otro lado de la cama» consiguió 2.726.871; «Los lunes al sol», 1.602.946; «Hable con ella», 1.152.329; «El hijo de la novia», 1.255.150. El último año de gobierno del Partido Popular la cota fue también buenísima: «La gran aventura de Mortadelo y Filemón», 4.979.991; «Días de fútbol», 2.424.949; «Carmen», 1.353.848; «El oro de Moscú», 1.259.269. Voy a sumar para que no se molesten en hacerlo sus señorías. En la última legislatura del PP, los años negros de hostilidad hacia el mundo del cine, Calvo «dixit», los espectadores totales de cine español, en los cuatro años negros, repito, son los siguientes: 2001, 26.205.964; 2002, 19.018.156; 2003, 21.731.317. Me guardo algunas perlas del año 2004 para mi segunda intervención, después de oír

Creo que su señoría, el senador Van Halen, se ha pasado cuarenta pueblos al decir "dixit" a la señora Ministra de Cultura del Gobierno de España.

BALTASAR DE ALCÁZAR (SIGLO XVI)

**Una cena**

En Jaén, donde resido,
vive don Lope de Sosa
y diréte, Inés, la cosa
más brava de él que has oído.

Tenía este caballero
un criado portugués...
Pero cenemos, Inés
si te parece primero.

La mesa tenemos puesta,
lo que se ha de cenar junto,
las tazas del vino a punto:
falta comenzar la fiesta.

Comience el vinillo nuevo

y échole la bendición;
yo tengo por devoción
de santiguar lo que bebo.

Franco, fue, Inés, este toque,
pero arrójame la bota;
vale un florín cada gota
de aqueste vinillo aloque.

¿De qué taberna se traxo?
Mas ya..., de la del Castillo
diez y seis vale el cuartillo,
no tiene vino más baxo.

Por nuestro Señor, que es mina
la taberna de Alcocer;
grande consuelo es tener
la taberna por vecina.

Si es o no invención moderna,
vive Dios que no lo sé,
pero delicada fue
la invención de la taberna.

Porque allí llego sediento,
pido vino de lo nuevo,
mídenlo, dánmelo, bebo,
págolo y voyme contento.

Esto, Inés, ello se alaba,
no es menester alaballo;
sólo una falta le hallo
que con la priesa se acaba.

La ensalada y salpicón
hizo fin: ¿qué viene ahora?
La morcilla, ¡oh gran señora,
digna de veneración!

¡Qué oronda viene y qué bella!
¡Qué través y enjundia tiene!
Paréceme, Inés, que viene
para que demos en ella.

Pues, sus, encójase y entre
que es algo estrecho el camino.
No eches agua, Inés, al vino,
no se escandalice el vientre.

Echa de lo tras añejo,
porque con más gusto comas,
Dios te guarde, que así tomas,
como sabia mi consejo.

Mas di, ¿no adoras y aprecias
la morcilla ilustre y rica?
¡Cómo la traidora pica;
tal debe tener de especias!

¡Qué llena está de piñones!
Morcilla de cortesanos,
y asada por esas manos
hechas a cebar lechones.

El corazón me revienta
de placer; no sé de ti.
¿Cómo te va? Yo, por mí,
sospecho que estás contenta.

Alegre estoy, vive Dios:
mas oye un punto sutil:
¿no pusiste allí un candil?
¿Cómo me parecen dos?

Pero son preguntas viles;
ya sé lo que puede ser:
con este negro beber
se acrecientan los candiles.

Probemos lo del pichel,
alto licor celestial;
no es el aloquillo tal,
no tiene que ver con el.

¡Qué suavidad! ¡Qué clareza!
¡Qué rancio gusto y olor!
¡Qué paladar! ¡Qué color!
¡Todo con tanta fineza!

Mas el queso sale a plaza
la moradilla va entrando,
y ambos vienen preguntando
por el pichel y la taza.

Prueba el queso, que es extremo,
el de Pinto no le iguala;
pues la aceituna no es mala
bien puedes bogar su remo.

Haz, pues, Inés, lo que sueles,
daca de la bota llena
seis tragos; hecha es la cena,
levántese los manteles.

Ya que, Inés, hemos cenado
tan bien y con tanto gusto,

parece que será justo
volver al cuento pasado.

Pues sabrás, Inés hermana,
que el portugués cayó enfermo...
Las once dan, yo me duermo;
quédese para mañana.

Baltasar de Alcázar (1530-1606)

Baltasar de Alcázar, fue descendiente de judíos conversos. Su vena jocosa, satírica y llena de malicia, le ha quitado el lugar destacado que merece entre los escritores del siglo XVI, porque no hay nada como la falta de seriedad asnal para convencer a un crítico literario de que ha de escatimar el elogio.

Otro poema de Baltasar de Alcázar que me gusta:
Job
A Job el diablo tentó
con tanta solicitud,
que los bienes, la salud
y los hijos le quitó.
Más no pudiendo vencer
su virtud, por inquietarle,
trató de desesperarle
y le dejó... la mujer.

[!publi_entrearticulos]

PORQUE LA VIDA ES MÁS IRREMEDIABLE QUE LA MUERTE...

Para Manuel, que me preguntaba sobre la naturaleza evanescente del perfume...

La vida real es una amalgama de contradicciones y, entre lo blanco y lo negro, hay infinitas gamas de gris, y todos los colores del arco iris existen para recordarnos que "*la vida es más irremediable que la muerte*."
En la Europa de Carlos V, Felipe II y su trastornado hijo Carlos, de la Inquisición y de las guerras interminables, las crueldades, la miseria, a la sombra de la Edad Media, alumbraba el Renacimiento como un amanecer de la ciencia y del desarrollo en todos los campos. La industria del perfume pudo aprovechar los nuevos conocimientos de una disciplina donde convivían la química y la alquimia, y resurgió.
Con el descubrimiento de América, el comercio ultramarino de especias se enriqueció con nuevos aromas, como la vainilla, el clavo, la nuez moscada: en los salones renacentistas se colocan naranjas cortadas donde se pinchaban clavos de olor, que daban un perfume próximo al clavel y servía para ahuyentar los insectos; ponen en las chimeneas, cerca de las brasas, pucheros con agua y canela...
Es en el *Cinquecento* cuando se comienza a usar la palabra perfume, en lugar de

bálsamo, que se fabricaba con materias primas traídas de Oriente, persistentes, fuertes y muy caras.
Hombres y mujeres de toda Europa perfuman su cuerpo, sus abanicos, sus guantes y sus vestiduras. Los italianos del siglo XVI tenían entre sus aromas favoritos el Chipre entre más de trescientos aromas. La fuente de todos estos datos es un importante escrito de 1555, titulado "*Los secretos notabilísimos del arte de los perfumes*", escrito por Rossetti, tratado de perfumería que contenía detallada información sobre el arte del perfume en Italia, cuya capital aromática fue la ciudad de Florencia.
Los perfumistas italianos eran reclamados en toda Europa, como había sucedido en épocas anteriores con los árabes. La reina Catalina de Medicis, noble florentina, esposa de Enrique II, rey de Francia, se trasladó a París para vivir con su marido con todo su séquito de perfumistas. Pronto se convirtieron en los creadores de los perfumes de la élite francesa, popularizando los aromas intensos y persistentes, tan de moda en Italia. Y fueron ellos los que descubrieron que en la ciudad de Grasse existía todo lo necesario para crear allí el paraíso del perfume.
Sin embargo, está en la naturaleza de los aromas su volatilidad, su fugacidad, su evanescencia. Y está en la naturaleza del ser humano buscar la eternidad, la permanencia, e investigaron hasta encontrar las sustancias de origen animal que aportaran una nota de sensualidad suplementaria y actuase como "*fijador*" del perfume.
Hoy en día estos componentes se sustituyen con productos de síntesis, reacciones químicas elaboradas sin vínculo alguno con las sustancias animales originarias. Cuatro de ellas ocupan un sitio relevante: el almizcle, la algalia, el castóreo y el ámbar gris.
El almizcle es una secreción de las glándulas del ciervo almizclero, un cérvido de Asia central, y con el tiempo se ha utilizado también la secreción glandular del buey almizclero, la rata almizclera y el caimán de Florida, que secretan esta misma sustancia. Hoy en día es un producto de síntesis, que interviene como "*fijador*" del perfume y da una tonalidad suave y penetrante.
La algalia o civeta, en cambio, guarda su aroma fuerte y natural en perfumería. Originariamente, se extraía de una glándula del animal de mismo nombre, que pertenece a la familia de los felinos. Hoy en día se produce químicamente. El profesor Ruzicka, premio Nóbel de Química, logró su síntesis en el 1928, poco después de descubrir nuevos almizcles sintéticos más baratos.
El castóreo, tiene su origen en el castor canadiense, precisamente en sus glándulas perineales. Existe una composición sintética de este producto, que no disminuye sus méritos como fijador del perfume con olor fuerte y amargo.
El ámbar gris, denominado durante mucho tiempo "*el oro negro del mar*", es una sustancia pegajosa parecida a la cera que se encuentra flotando sobre el agua en mares tropicales; se compone de los elementos no digeridos por el estómago de los cachalotes. Su síntesis química es uno de los mejores fijadores de fragancia que se usan.
Más allá de las sustancias vegetales y animales, desde hace más de un siglo se ha desarrollado los productos de síntesis, gracias a las investigaciones en Química orgánica. Ofrecen una amplia gama de aromas encontrados en la naturaleza y enriquecen el órgano de esencias del perfumista.
Un viaje a Grasse, el tradicional centro del perfume del sureste de Francia, y la visita al Museo de la perfumería, a los laboratorios, a sus inmensas plantaciones de aromáticas, es una peregrinación y una experiencia que recomendaría como un viaje iniciático. Sí, justamente, es allí donde Patrick Süskind situaba la acción de su novela *"El Perfume",* publicada en el 1986, que empecé varias veces y jamás pude leer más allá de la página veinte, aunque me la hayan recomendado mucho.

"*¿Quién es ésta que sube del desierto como columnas de humo de oloroso perfume de mirra e incienso, y de todos los polvos olorosos del maestro de los olores?*" (El Cantar de los cantares)

Todos olemos bien o mal, lo importante es… trascender: De esos pocos lo logran, para bien o para mal.

No te preocupes, no te has perdido nada de nada sin leer el perfume de Suskind. De hecho, más allá de la página 20, para ser más exactos: allá por el último tercio del libro, el bueno de Patricio decide que es muy bueno y profundo escribiendo y nos recrea con un capítulo de aislamiento en el que opina sobre lo humano y divino. Un horror, vamos, y de una mediocridad que espanata. Casi tanto como cuando escribe Alimaña, para que te hagas una idea.

De los olores y la trascendencia, asociación que preocupa al Sr. Manuel: Está científica y teológicamente demostrado que el pedo (ventosidad que se expele del vientre por el ano, según el diccionario de la RAE, citado en atención a a la siempre puntillosa Gatopardo) es el alma de un alimento muerto por efecto masticatorio y en trance de elevación hacia su destino celeste.
De modo que de una sola tacada (o masticada) queda probada la existencia y trascendencia del alma (ya que si la tiene una pitagórica alubia por qué diantres no la voy a tener yo ?) más allá de la muerte del cuerpo físico que la alojaba y su ineludible

sociedad con el olor o perfume.
De nada, Sr. Manuel, igual que a la dueña de esta casa a mí tambien me gusta ayudar.
(Y ya que estamos, Don Cyránobix, no me niegue que le acabo de dar una ayudita en cuanto a abrir los ojos a todos esos que no creen el más allá)

POBRE MÉXICO, TAN CERCA DE LOS LEGIONARIOS DE CRISTO Y...

No querría pensar que existe una implacable lógica que impide al gobierno Fox y a la clase política mejicana salir de esa mugre moral en la que crecen todas las injusticias y todas las corrupciones, pero...

"El gobierno de Vicente Fox quiere proponer nuevos compromisos con la sociedad. Uno de los más importantes es el que tiene que ver justamente con el desarrollo humano en su entorno de trabajo; el fin último de todo gobierno es que la ciudadanía tenga una mejor calidad de vida y encuentre oportunidades. Carlos Abascal ha sido invitado a formar parte del Gabinete por su congruencia y compromiso con estos objetivos."

El secretario de trabajo de México, Carlos Abascal, no es partidario de que las mujeres trabajen fuera de la casa, porque se "*masculinizan*", según el ideario de los *Legionarios de Cristo* que impera entre la clase dirigente. En abril del año pasado protagonizó un escándalo al criticar públicamente que a su hija le hubiera recomendado su profesora la lectura de "*Auras*" de Carlos Fuentes y "*Doce Cuentos Peregrinos*" del

premio Nobel Gabriel García Márquez. La profesora que recomendó las lecturas fue despedida.

Marcial Maciel, fundador de "*La legión de Cristo*", acusado de pederastia y defendido a ultranza por el ultraderechista Francisco González Garza, líder de "*A favor de lo mejor*", organización afín a Maciel, que también cuenta con Lorenzo Servitje Sendra (miembro del Consejo de Autorregulación en Radio y Televisión, y presidente honorario del *Grupo Industrial Bimbo*), lograron que la mayor parte de los patrocinadores de *Canal 40* clausuraran sus contratos a raíz de un reportaje de su emisión *Realidades*, que denunciaba las andanzas del religioso Marcial Maciel, acusado de abusar sexualmente de varios de sus miembros y de su gusto por los novicios aún no consagrados, que le masturbaban "*para ayudarle a aliviar intensos dolores*", derivados de lo que él denominaba una enfermedad. La explicación de sus defensores es que era para extraer muestras de su semen para análisis clínicos. Los testimonios que recogía el programa *Realidades*, eran de hombres mayores, profesionales prestigiosos en la actualidad, que habían decidido denunciar y hacer públicos los abusos sexuales que sufrieron.

"*Él puso mi mano en su pene. Y yo no sabía nada acerca de la masturbación*", Juan Vaca, quien fue sometido abusos por primera vez cuando tenía 11 años, le dijo a ABCnews: "*Y él dijo:tú no sabes cómo hacerlo. Déjame mostrarte. Y él cogió mi pene y comenzó a mansturbarme. Yo estaba en un shock*".

Juan Vaca ahora tiene 65 años de edad, es profesor de Psicología en el *Mercy College* en Dobbs Ferry (New York) y fue el anterior superior de la *Legión de Cristo* y es uno de los ocho antiguos estudiantes, ahora sexagenarios, que han firmado afidávits juramentados presentados al Vaticano, declarando que Maciel abusó sexualmente de ellos.

En los últimos años, han estado intentando obtener que el Vaticano los escuche o tenga conocimiento de sus detalladas acusaciones de abuso sexual en manos del padre Maciel. No los han escuchado.

Juan Vaca también le dijo a ABCNEWS que él fue instruído para llevar a otros niños desde sus cuartos al cuarto de Maciel. Vaca dijo que Maciel tuvo diferentes chicos que visitaban su cuarto en diferentes noches. "*En algunas instancias, dos fuimos juntos con él; yo mismo y otro*".

Vaca dijo que Maciel les recompensó con privilegios especiales, tales como encuentros privados con el Papa Pío XII, quien fue papa de 1939 a 1958. Maciel siempre aseguró a Vaca que él no estaba haciendo nada malo. Cuando Vaca admitió que le preocupaba que estuviera cometiendo un pecado, Maciel lo absolvió de su propio pecado "*en el nombre del Padre, del Hijo y del Espíritu Santo*" y le dijo que no se preocupara y lo olvidara. Pero Vaca dice que nunca lo pudo olvidar.

El Vaticano investigó a Maciel por los cargos en malversación de fondos, abuso de sustancias y tráfico de drogas. El Vaticano declaró a Maciel innocente de estos cargos y lo reinstaló como superior general de la Legión.

El Vaticano tenía conocimiento de estos hechos desde finales de los años cincuenta, e incluso en febrero de 1956 ordenó la suspensión de funciones de Marcial Maciel durante dos años para luego, no sólo exonerarlo sino también reconocer su sublime labor: En noviembre de 1994 el P. Maciel celebró sus bodas sacerdotales, cincuenta años al servicio de la Iglesia y de la Legión. El culmen de este año de celebración fue la ordenación de 57 sacerdotes Legionarios en la víspera del aniversario. Con motivo de este aniversario, el Santo Padre le envió al P. Maciel una carta de felicitación que se leyó durante la acción de gracias de la Celebración Eucarística.

Actualmente, el P. Maciel es el Gran Canciller del Ateneo Pontificio Regina Apostolorum de Roma. Y en el último capítulo general celebrado en Roma, en enero de 2005, renunció a la reelección de los padres capitulares dejando la dirección general de la Legión y del Movimiento Regnum Christi a su sucesor, para poder así acompañarlo en sus primeros pasos.

Pues bien, Martha Sahagún, la segunda esposísima de Fox, fue tesorera de los

Legionarios de Cristo en el estado de Guanajuato y, profesora en escuelas de esta poderosa organización eclesiástica.

Sobre la preocupación que demuestra el gobierno de Fox por los derechos humanos...Un informe anual del Centro de Derechos Humanos Miguel Agustín Pro Juárez da cuenta de al menos 52 mujeres indígenas violadas por militares durante las razzias contra la insurgencia en los estados de Guerrero y Veracruz.

Ningún caso se ha resuelto. Todos siguen bajo el fuero de la justicia militar.

En los primeros días de enero de 2003, la Comisión Nacional de Derechos Humanos hizo una recomendación al secretario de Salud, Julio Frenk, para acabar con las esterilizaciones forzadas de mujeres indígenas de Oaxaca, Guerrero y Veracruz. Las esterilizaciones continúan..

Dice la página web de la asociación "Nuestras hijas de regreso a casa"

"*Hoy es 26 de abril de 2005: Los asesinatos de mujeres en Ciudad Juárez, Chihuahua, continúan. Son ya más de 400 mujeres las que han sido asesinadas y más de 600 las desaparecidas desde 1993, según los datos reportados. El clima de violencia e impunidad sigue creciendo sin que hasta el momento se hayan tomado acciones concretas para terminar con esta situación.*"

"*Cada semana en Ciudad Juárez desaparece mínimo una mujer y no se vuelve a saber más de ella, a menos que sus raptores decidan hacer aparecer su cuerpo sin vida y con evidencias claras de haber sido brutalmente torturada y asesinada, violada de manera tumultuaria y arrancadas partes de su cuerpo o quemadas.*"

Todas son mujeres obreras jóvenes, que corrían el riesgo de "*masculinizarse*" trabajando fuera de casa.

En diciembre del 2000, en su segundo día como presidente, Vicente Fox firmó el acuerdo de cooperación técnica con la ONU sobre derechos humanos, siguiendo las tacticas del PRI: de cara al exterior, México es el país de la libertad y de los derechos humanos, pero el gobierno desde hace décadas siguen ignorando los derechos humanos para los ciudadanos de su país.

joéeee... es cierto que dan ganas de vomitar de todo lo que sucede, pues esto creo que sólamente es la parte más ligera de una cantidad de acontecimientos que han afectado a mucha gente que por defecto, tiene que aguantarse a los poderosos. No sé si habéis leido algo sobre la época de la conquista. No sólo en México sino en muchos otros paises de sur y centro America. En esas épocas sin ONUS ni derechos humanos , ni nada medio parecido no había quien defendiera derechos humanos de todas clases. Aunque esto se queda en un decir, porque las cosas que han salido publicadas en la revista de EP del domingo sobre los infiernos que han encendido los fantásticos cascos azúles en países africanos, aprovechándose también de su situación de "liberadores" para llegar a chicas jóvenes que por la situación de sus países han accedido a tener sexo a cambio de comida y unos cuantos dolares... Por eso creo que tanto mal se ha heredado, y siempre por el exceso de poder... los unos por exceso, y los otros por defecto. A ver en cual sitio estamos nosotros????

Si, pero hoy, nosotros podemos hacer algo para que estas atrocidades cesen.
Los criminales necesitan nuestro miedo, nuestro silencio para asegurarse su impunidad.
El pasado no lo puedo cambiar erix70: sólo puedo conocerlo. Por favor, firmad en la página de las mujeres de Juárez, haced que se sepa a través del mundo los crímenes rituales con los que se sella la permanencia en un grupo de hombres poderosos, mediante la complicidad en crímenes atroces que impidan que haya vuelta atrás en la lealtad al "grupo".

En el breve período que Ulises Ruiz lleva en el gobierno del estado, el deterioro de la situación social y política se ha recrudecido. Hemos tenido noticias de crímenes políticos, enfrentamientos comunitarios, decenas de detenciones injustas y criminalización de la lucha social hacia todos los sectores que no apoyan al gobierno.
DESDE LA TOMA DE POSESION DEL GOBIERNO PRIISTA DE ULISES RUIZ ORTIZ EN EL ESTADO DE OAXACA (del primero de diciembre del 2004 hasta el día de 4 de febrero del 2005) se han ejecutado numerosas órdenes de detención y asesinatos en el estado de Oaxaca.
Por enumerar algunos de los casos citamos los de:

14 integrantes del CONSEJO INDIGENA POPULAR DE OAXACA RICARDO FLORES MAGON, CIPO-RFM, detenidos el 14 de septiembre y el 2 de febrero.
11 integrantes de SAN JUAN LALANA CHOAPAM detenidos el 3 de febrero.
6 integrantes de la COORDINADORA OAXAQUEÑA MAGONISTA POPULAR ANTIIMPERIALISTA, COMPA, detenidos el 3 de febrero.
6 MUERTOS POR GRUPOS PARAMILITARES.

Nadie dice que sea una coincidencia con la denucia por "obstrucción a la Justicia" que les cae de EEUU: esta semana ha llegado desde el Vaticano, Charles J. Scicluna, para interrogar a más de treinta personas que acusan a Maciel de abusos sexuales, reabriendo así "formalmente" el expediente cerrado en falso anteriormente.
Ofrecer impunidad si no cuesta nada es una cosa; otra muy distinta cuando pesa una acusación por encubrimiento y obstrucción a la Justicia en EEUU, desde donde se puede propagar al resto de los países donde hay asuntos pendientes y "clausurados" por la Iglesia sin atender a los Tribunales.

Me parece increíble por decir lo menos todas las cosas que se dicen para hacer ver que los Legionarios son malos, para empezar va en contra de toda lógica pensar que algo que está fundado para seguir el ejemplo de Jesús sea malo, da lo mismo de la religión que seas, estás en toda tu libertad de creer o no en la Iglesia, pero lo que no se debe y no se puede poner en duda es que Jesús, lo mires sólo como un profeta o como el hijo de Dios haya venido a hacer el mal o haya dejado un mal ejemplo.
Los Legionarios transmiten la Palabra de Dios y sor fervientes veneradores y adoradores de Jesús, ¿es esto malo? o criticable? NO, lo que les molesta a todos los que hacen mención negativa de La Legión es lo rápido que ha crecido la congregación y el movimiento laico Regnum Christi, les molesta que sus seguidores sean personas inteligentes y con poder y sepan exactamente a donde llegar y a dónde influir para lograr hacer el bien, si quizás esto no tuviera aires religiosos y fueran personas X las que hicieran lo mismo que Los Legionarios nadie lo criticaría, pero les molesta tremendamente que todo esté amparado por la Iglesia y que mejor que acusar a alguien con una rica vida espiritual y profesar la palabra de Dios que es pedófilo o drogadicto.
En vez de criticar podrían hacer una cuarta parte de lo que hizo el Padre Maciel y sus seguidores a ver si podrían solos, es mejor ponerse en acción que criticar tanto, hagan algo, muévanse de donde están y hablen menos, esa sería la única forma en que estarían en derecho de calumniar a alguien, son unos vegetales espirituales e inanimados sus palabras tarde o temprano se las llevará el viento y lo que quedará será toda la obra que han hecho LOS LEGIONARIOS y el MOVIMIENTO RC, movimiento, palabra clave, esto indica acción, no sólo contemplación.
Claudia de CHILE y reciente incorporada al MOVIMIENTO REGNUM CRHISTI.

Maravillosa Claudia, del movimiento Regnum Christie: si cualquiera hubiéramos hecho la cuarta parte que Maciel, nos habríamos tirado veinte años en la carcel.
Y de la ejemplaridad de la conducta cristiana de los Legionarios de Cristo y de Regnum Christie no hay constancia; sólo de su espíritu de secta, sus tácticas destructivas de la personalidad, su ambición social y económica, que les hace aupar y amparar a narcos y desaprensivos negociantes; y que yo sepa, Cristo no tiene nada que ver con ustedes ni con la Iglesia de la Cienciología ni otras sectas destructivas, en los que el abuso sexual contra los niños a su cargo quedan impunes durante sesenta años.
Ya sé que su palabra clave es acción, y la mía también, y no estoy de acuerdo con que Maciel y los demás pederastas que amapara el Vaticano reciban el consejo de no dejarse ver demasiado cuando ya no pueden hacer vida social.

No he leido nada de esta página. La he encontrado de rebote al oir en la TV lo del padre MM. Y escribo sin pensar. Tan solo os digo que hace 30 años o más en Ontaneda, Santander, el rector era el Padre Morelos. Que pregunten/investiguen que pasó allí. Yo tenía tan solo 10 años… La gran mayoría nunca terminó el curso… los abusos eran reales, psicológicos y físicos… los "padres" eran unos enfermos. No me ha sorprendido escuchar la noticia hoy en TVE. Los niños iban al dormitorio del padre Morelos despues del "toque de silencio"… Todo era sucio. Yo era muy joven para entenderlo entonces. Me faltaban referencias. Pensé que éso es lo que hacían los adultos.

Allí aprendí lo que era una "corrida", el padre Morelos me lo describió en su despacho. Yo tenía 10 años. No sabía que de los penes salía leche. El me lo explicó detalladamente. Lujuriosamente.

Que no os engañen. Habrá seminaristas que no tienen ni idea de lo que pasa y están ahí por la fe… Pero hace 30 años en Ontaneda yo perdí mi inocencia para siempre… No les guardo rencor, tan solo espero que no suceda lo mismo a ningún niño más. Es triste que estos hombres se hagan sacerdotes para impunemente satisfacer sus deseos pedófilos. Al menos la iglesia se ha hecho eco de los datos que le llegaron.

Voz del pasado: el texto completo de la Iglesia habla de acusaciones sin especificar cuales, y dicen que no lo juzgarán debido a su edad y salud; le recomiendan orar y hacer penitencia, y no hay ni una palabra hacia las víctimas; y Marcial Maciel ha declarado que tiene la conciencia tranquila y esto es otra cruz que Dios quiere que sufra. Ni una palabra de arrepentimiento.
La Iglesia ha zanjado en falso para no tener que responder ante las víctimas.

y que me dices de todas las escuelas y fundaciones que ayuda esta legion...
creo que para ti es mas facil ver las cosas negativas simplemente porque son "mas interesantes". y perdonamee una cosa son las personas que trabajan para algo y otras son lo que en verdad es ese algo, y si por algo fueran ciertas las acusaciones de Maciel,el es una persona no toda la legion que no ha hecho nada de daño, alrevez.

yo no defiendo al padre Maciel porque ni vivi con el ni lo conosco pero yo soy parte de esta legion y mucho de lo que soy ahora es porque la educacion que tuve en sus colegios que me hicieron tener valores que me diferecian de otras mujeres, y creelo o no estos valores se necesitan mucho en esta sociedad hedonista y consumista, creo que no esta bien que generalizen lo que pudo o no haber echo un hombre con lo que es esta legiòn.

Sé que usted forma parte de la Legión de Cristo por las faltas de ortografía y sintácticas que suelen tener los miembros de esta secta.
En cualquier escuela primaria, a los once años, un niño que no esté tarado sería capaz de redactar mejor que ustedes.
Y ahora, le recomiendo que no crea todo lo que dijo el cardenal Norberto Rivera Carrera sobre los testigos a sueldo que se han retractado, porque también dijo lo mismo en defensa de su protegido Nicolás Aguilar Rivera, sacerdote pederasta al que ha ocultado y amparado, sustrayéndolo a la acción de la justicia.
Los testigos que yo conozco y que mantienen las acusaciones contra Marcial Maciel, como morfinómano y pederasta, que abusó de ellos, tienen nombre y apellidos, y credibilidad.
Respecto a su especial educación e idiosincrasia que le hace diferenciarse de las otras mujeres, lleva usted razón: las mujeres que no hemos sido taradas por la Legión de Cristo ni otras sectas somos humanas, y ustedes son lastimosas caricaturas.

Hay mucha gente buena y bien intencionada en la legión de Cristo, no tienen la culpa de lo que haya hecho el fundador, y es obvio que van a batallar para aceptar lo malo de él. Una cosa es el Reignum Christi y otra es la Iglesia. La congregación de los legionarios de Cristo puede desintegrarse, y los buenos miembros de ella integrarse a otras áreas de la Iglesia. Conozco varias personas consagradas en esta congregación y son buenas personas en general. Sí creo que se debe seguir investigando y que las autoridades competentes den un veredicto y de ahí se tomen las siguientes decisiones. Pero hay que tener cuidado de no canalizar todo el odio que hay en nosotros contra ellos ni contra la Iglesia. Hay que tener Amor y comprensión, y gratitud por las cosas buenas que hace la Iglesia y el Reignum Christi y no solo tratar de destruir. En fin es solo una humilde opinión.

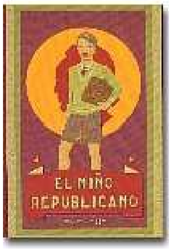
MANUAL DE "EL NIÑO REPUBLICANO"



(O cómo convertir a un ser ya de por sí repugnante en un pelmazo perfectamente insoportable)
El Manual anima al niño a dar la paliza a todo desgraciado que le pille cerca:
-"*Explica a tus amigos la biografía de Estanislao Figueras, primer presidente de la República*" (p.41)
-"*Lee con detenimiento la Constitución y coméntala con tus amigos y familiares*"(p.104)
-"*Explica a tus amigos las biografías de estos dos bravos capitanes (Galán y García Hernández) que murieron defendiendo la libertad*" (p.82)
El padre manda al maldito niño a hacer puñetas, pero nuestro joven héroe no se desanima y amplía su campo de apostolado a los organismos públicos. Los funcionarios declaran la huelga como señal de protesta:
"*Visita, cuando sea expuesto, el Censo electoral. Pregunta y entérate de la importancia que reviste la confección y revisión del Censo*" (p.94)
Una vez en casa, el pequeño inspector de Hacienda es encerrado en su cuarto. Pero, siguiendo los consejos del manual, no cede en su propósito:
"*Hojea tan pronto puedas nuestra Constitución y, por las noches, coméntala con tus padres*"(p.23)
"*Procura leer la gran Tabla de los Derechos del Hombre y procuran que te los expliquen con claridad*"(p.141)
"*Probablemente conocerás, niño, la música de La Marsellesa; sin embargo, procura oírla muchas veces y notarás cómo pronto el resonar de sus notas llega a lo más hondo de tu ser…*" (p.14)
Ya han protestado los vecinos; los padres unánimemente han decidido regalar el engendro al Defensor del Niño. El pequeño mártir marcha a seguir su destino y sus buenas obras:
"*Lee alguna de las obras publicadas por la insigne gallega Concepción Arenal (…) De todas sus obras lee cuando menos "El visitador del pobre" y "La instrucción del pueblo"*" (p.176)
"*No desperdicies nunca sellos usados. Recógelos con cuidado y principia una colección (…) Los que te sobren, consérvalos, puesto que serán útiles para tus amigos. Además, puedes ofrecerlos a algunas Instituciones benéficas, que te los agradecerán*"(p.73)
"*Haz que tu alma sienta aquel amor patrio que daba vida al inmortal Simón Bolívar*" (p.195)
Visto todo lo cual, este Comité declara al Niño enemigo público número uno, dado que el autor del Manual se halla fallecido. Se ordena la busca y captura del delincuente, así como la inclusión del supra citado manual en el *Índice de Libros Peligrosos para la Seguridad Pública*.

ARRIBADA

¿Quién habla de una fácil travesía?
Las noches se poblaban de sirenas,
de cuartos donde ardía la revuelta,
de exilios que a tu cuerpo devastaron.
Mi amor fuerte, mi amor loco y profético
con vestidos que el puro azar cosía
y que eran desflecados por la bruma
entre las carcajadas reprimidas
de una Europa siniestra y satisfecha.
Son muchos los agravios, risueña. Pero algo
desatado y veloz, a mí te trajo a flote,
indemne, victoriosa, con el floral tesoro
de tu ternura oceánica, de tus ojos de miel.
Y en la tranquila tarde de este día de mayo
cruzas serenamente por tu sueño y yo velo,
mientras pasan los lentos veleros de la música,
tu tos de fumadora y tu jersey grandón.

Lo de recrearse en lo escatológico es, para no salirnos de la adjetivación benévola, "garbancero" (¿de dónde es usted?). Por lo que leo del diálogo entre Gatopardo y usted, el sr. Martínez Sarrión es más peligroso de lo que yo presentía (uno tiene un natural ingenuo incorregible), toda vez que ha ampliado el territorio de sus desmanes a las memorias. Por cierto lo de mezclar expresiones como "deletéreas agudezas" con "mover el vientre" supongo que es rasgo de escuela estilística del pedestre vate, un homenaje suyo ¿no?. No quise yo mediar en esta postrer polémica que traía con el malgenioso Pendón Volteriano, porque lo veía yo muy sobrao con la muleta. No tuve tiempo de decirle lo mucho que yo admiro a un poeta como Antonio Martínez Sarrión ("Antoñico" para los que le queremos). Es una vergüenza que una gloria cimera de nuestra poesía sea arrastrada por el fango de la crítica. Y no quiero dejar de recordar aquellas magistrales traducciones del maestro: Los Cantos de Maldoror y la poesía de Genet. Nada de traducciones rastreras y literales. Eran Sarrión mismo. Siempre se lo digo yo a mi alimañeja: léete el "in memoriam" a la muerte de Juan Benet que escribió Sarrión y fíjate en el detalle de las galletas. Y (III) LA LOCURA DE DON CARLOS, HIJO DE FELIPE II

Capítulos anteriores:

*** (I) LA LOCURA DE DON CARLOS, HIJO DE FELIPE II**

*** (II) LA LOCURA DE DON CARLOS, HIJO DE FELIPE II**

Hubo en realidad, un desacuerdo absoluto y constante entre el padre y el hijo. Lejos de intentar corregir el mal natural de don Carlos, no sólo no hizo nada Felipe II por mejorarlo, sino que contribuyó a su desarrollo. Vemos despuntar la verdad en el siguiente párrafo debido a un embajador (1): " *Hay muchas personas* –dice hablando de don Carlos- *que no se asustan de los defectos que se le atribuyen, pues ven en ellos las consecuencias del trato que se le da, sin contar con que siempre ha estado enfermizo y delicado.*" Las locuras del príncipe de España son, pues, si bien se miran "*tanto producto de su temperamento mórbido como del instinto tiránico de su padre.*"(2)

Parece, sin embargo, que dio éste pruebas patentes de gran paciencia. Durante mucho tiempo toleró las algaradas de su hijo, contentándose con deplorarlas; durante mucho tiempo mantuvo en suspenso su resolución de reducirlo a la impotencia de hacer daño. Se dio cuenta de que el príncipe, según los términos del enviado de Francia en Madrid, "*tenía más descompuesto el cerebro que el cuerpo, y de que jamás sentaría el seso, cuando sus actos se lo hicieran experimentar.*" (3). Se ha dicho que pretendió Felipe atraérselo por la dulzura, que esperaba mejorar sus sentimientos por métodos de suavidad, pero que el príncipe hizo fracasar sus esfuerzos. Cuando asistía al Consejo "*embrollaba todos los asuntos e impedía toda deliberación*" (4). Sus prodigalidades fueron siempre insensatas.

Los actos de violencia de don Carlos eran continuos: después de amenazar con un puñal al duque de Alba, se precipitó contra don Juan, espada en mano; estos hechos señalaron que ya era tiempo de poner fin a un estado de cosas que no podía prolongarse sin graves inconvenientes. Felipe II juzgó llegada la hora de encerrar al demente, que se había hecho peligroso.
Sin consignar un relato que está profusamente reproducido, indicaremos sin embargo sus puntos principales.

Exactamente entre once y doce de la noche del 18 al 19 de enero de 1568, salió, sin guardia, el rey de su gabinete, vestido con su traje ordinario; iba precedido de un hombre portador de una antorcha y seguido de otros cuatro, provistos de clavos y martillos. Con este aparato penetraron aquellos personajes en la habitación de don Carlos, cuya puerta estaba entreabierta. Antes de ser visto por su hijo, que estaba vuelto de espaldas, Felipe II se apoderó de la espada y del puñal, suspendidos a la cabecera de la cama en que el infante estaba echado. Dio orden el rey a continuación de que fueran retirados todos los objetos de hierro y acero que hubiese en la pieza, incluso los morillos de la chimenea; mientras dos de sus hombres clavaban la ventana: el heredero de la monarquía española quedaba desde aquel momento constituido en prisionero de Estado.

La impresión general que produjo aquel acontecimiento se encuentra resumida en el siguiente documento diplomático: "*Su majestad busca remedio desde hace dos años a esta situación; pero a pesar de sus esfuerzos, las cosas han ido empeorando. Nunca se pudo afirmar ni reglar este cerebro, habiéndose impuesto la necesidad de llegar a los extremos...*" ¿Podía el rey ni debía, si llegaba a morir, dice en otro lugar, dejar el gobierno a un príncipe tan débil de razón? Quien mejor nos descubre el móvil que lo inspiró es el mismo Felipe II, en una carta que escribe al duque de Alba.

"*Duque y primo mío* –escribía el rey-: *Vos sabéis muy bien cuál es el natural del príncipe, mi hijo, y cuáles sus acciones, para que tenga que detenerme en justificar la medida que acabo de adoptar y explicaros los motivos de mi suprema resolución. Después de vuestra partida han tomado tal carácter las cosas, han sobrevenido tantos acontecimientos particulares y de importancia, a tal extremo ha llegado el príncipe en desmerecimiento, que al fin me he decidido a asegurarme de él, encerrándolo en sus habitaciones con guardia especial. El escándalo ha sido grande, la medida que he tenido que adoptar es severa; pero de lo poco que habéis visto y de lo mucho que sabéis podréis deducir si mi resolución es prudente y bien fundada. En lo que se refiere a mí solo, con sus desobediencias y faltas de respeto de todas clases, habría tenido paciencia, o, al menos, habría empleado otros procedimientos; pero teniendo en cuenta mis deberes para con Dios, para con el bien público de la cristiandad y de mis Estados, he visto en toda su evidencia los inconvenientes, los peligros que podían seguirse en el porvenir, lo mismo que los que ya nos amenazan.*"

Se ve claramente en este documento que el padre cede ante el rey; si bien el padre había podido manifestar una longanimidad prolongada, el rey no tenía derecho a sacrificar los intereses del Estado a sus sentimientos paternales. Felipe II decía al rey de Portugal en una carta: "*He preferido el bien de mis pueblos a las demás consideraciones humanas.*" No fue, pues, un castigo lo que quiso infligir Felipe II a don Carlos; fue un encierro definitivo para evitar los inconvenientes que podían resultar de extravío mental de su hijo.

Una vez preso el infante y reducido a la impotencia para perjudicar al Estado y a sí mismo ¿qué interés podía tener un padre en precipitarle la muerte? Pues de dar crédito

a ciertos historiadores, aquella muerte fue la obra de un crimen y no debida a una causa natural; para unos, se le administró el veneno mezclado con el caldo; otros dicen que se recurrió a un tóxico lento, mezclándoselo durante cuatro meses a su alimentación; no insistimos, por nuestra parte, sobre la inverosimilitud de esta hipótesis.

(...) Todo esto son leyendas, de las que, al menos, ha quedado que, si no se suprimió al demente por cualquier medio violento, se le dejó entregado a sí mismo; no se hizo nada para impedir que se arrastrase desnudo, en plena fiebre, por su habitación, convertida antes en un mar, ni para evitar que bebiese agua helada en dosis excesivas, lo mismo de día que durante la noche y en ayunas. A pesar de la frialdad de las noches, se despojaba de sus vestidos y permanecía varias horas con la ventana abierta. Tenía constantemente en la cama un calentador lleno de nieve. Rehusó durante varios días todos los alimentos, y después de largo ayuno, sin transición, devoró en una comida un pastel de cuatro perdices. ¿Cómo no se ejercía más vigilancia sobre el detenido? ¿Por qué no se le impidió dar rienda suelta a su voracidad, reglamentándole el número de platos que habían de servírsele? Los panegiristas de Felipe II invocan, como excusa del rey, que éste no quiso, oponiéndose a los caprichos de su hijo, provocarlo a una funesta resolución. ¡Miserable pretexto! Los informes cotidianos de los carceleros tenían al rey al corriente de los menores despropósitos del príncipe, siendo la verdad que el monarca nunca intervino para evitar el lento suicidio de su hijo.

Si no acogió con alegría la noticia del desenlace, disimuló, al menos, toda emoción. Sin embargo, su alma debió ser presa de remordimiento si pensó un solo instante que no podía hacer responsable a su hijo de una fatalidad morbosa que hirió primero a Juana de Castilla, su abuela, que había pesado a continuación sobre el gran emperador de ella nacido (Carlos V), y sobre el mismo Felipe II, cuyo carácter taciturno y temperamento lipemaniaco no podían dejar de influir en su descendencia.

El resto del legado en que cupo a dos Carlos la mayor parte lo encontraremos en Felipe III y Felipe IV. Carlos II (el hechizado) vendrá después a sumarse a esta dinastía de degenerados.

1.- El rey iba acompañado del duque de Feria, el príncipe de Éboli, don Luis Quijada (ayo de don Juan de Austria), don Pedro Manuel, don Diego de Acuña y el prior don Diego.
2.- El rey llevaba una coraza bajo las ropas, casco y la espada desnuda debajo del brazo.
3.- La puerta estaba cerrada, confiando don Carlos en que funcionase el mecanismo que había hecho instalar al ingeniero francés Luis de Foix; mecanismo que el rey había hecho desconectar el día antes, con el mayor de los secretos, al mismo ingeniero.
4.- Don Carlos dormía profundamente. Ruy Gómez, príncipe de Éboli, y el duque de Feria se hicieron con el arcabuz cargado que el príncipe tenía junto a la cama y con la espada; el puñal no lo encontraron en un principio al estar debajo de la almohada. Otra de las armas requisadas fue un falso libro, construido también por de Foix, formado con tablas de mármol azul y revestidas, como si fuese la encuadernación, de dos láminas de acero embutidas de oro. El príncipe tenía este libro para su "defensa personal".

Buenas a tod@s:
Muy interesante el artículo, sí señor...
Sólo una objeción, y es que este don Carlos ha resultado y resulta un personaje tan controvertido que muchos de sus actos han sido a veces exagerados por sus contemporáneos e historiadores (quién sabe, a lo mejor incluso alguno fue inventado). A esto además se le añade el que pueda haber algún tipo de manipulación en lo que rodea a este sujeto dependiendo de si eres defensor o detractor de Felipe II (yo personalmente prefiero quedarme a medias...). Así, no he leído nada a favor de don Carlos en este interesante artículo, a pesar de que tenía sus (quizás escasas) virtudes: se criaron a niños abandonados a sus expensas y se hizo cargo de las deudas de un preso para que éste pudiera salir de prisión (esto está recogido en el Archivo General de Simancas); era además en cierto modo piadoso, enamorado de la verdad y la justicia (según informa el varón Dietrichstein) y generoso en gran medida, sobre todo con aquellos que él consideraba que le servían bien. También fue un buen amigo de la reina Isabel de Valois y de su tío don Juan de Austria.
Nada más que añadir, creo que ya está todo. Muchas gracias por este artículo y a tí si has sido capaz de leer hasta aquí ^^.

* **(I) LA LOCURA DE DON CARLOS, HIJO DE FELIPE II**

El embajador Soranzo nos pinta a don Carlos, a la edad de diecinueve años entonces, "*de una naturaleza tan colérica que se hace difícil gobernarlo. No escucha a nadie ni tiene en cuenta nada... Estima muy poco al rey, quien disimula y finge no enterarse de sus acciones. Sin embargo alguna vez manifiesta su resentimiento, y en el acto, su alteza se precipita en la cama, presa de ardiente fiebre, que es consecuencia inmediata de la cólera a que está sujeto*". Agrega el narrador que "*es cruel, tiene particular odio a los que le sirven y, si no fuese por miedo al rey, cambiaría continuamente de servidores. Muy pocos han sabido comprenderlo y conquistar su gracia." Se nos ha mostrado aún el joven príncipe como "encaprichado de cosas singulares, tales como mandarse hacer infinitos vestidos, comprar joyas sin querer que sean tasadas, hacer grabar su retrato en rubíes y diamantes; además cuando ha llevado una sortija ocho días, ya no se cuida ni de verla... Afecta desdén por todo lo que gusta al rey... Este lo ha hecho entrar en el Consejo de Estado, lo ha acompañado en persona, hasta hacerlo sentar; pero apenas sentado, el príncipe ha salido repentinamente."* Cuando se negaban los ministros a ejecutar sus genialidades, los colmaba de ultrajes.

No lo presenta bajo mejor aspecto el enviado de Francia. Se había hablado de casar a don Carlos con la hija de Maximiliano de Austria, y a propósito del proyecto escribe el citado diplomático: "*Será muy triste que la señora princesa de Bohemia se case con un príncipe tan mal dotado de persona y de costumbres como éste...*"(1)

El representante del emperador de Austria en Madrid, encargado de informar a su señor sobre su futuro yerno, traza un retrato de don Carlos que no tiene nada de adulador: "*No es un príncipe ancho de hombros, teniendo uno más alto que otro, ni de gran talla. Tiene el pecho hundido. A la altura del estómago presenta una pequeña giba. Su pierna izquierda es bastante más larga que la derecha, sirviéndose con menos facilidad de este lado que del izquierdo. Tiene los muslos fuertes, pero mal proporcionados, y es débil de piernas. Su voz es chillona, aguda, y al comenzar a hablar sufre viendo que las palabras salen con dificultad de su boca...*" (2)

Este contrahecho, canijo, de salud débil, que con tanto trabajo se expresaba, ¿nos ofrece un tipo de la degeneración? ; este retoño de epilépticos, de lipemaníacos, de vesánicos, por decirlo claramente, ¿podía dejar de ser un degenerado?

Uno de los críticos que ha estudiado el caso con más sagacidad, Raymond Clauzel, hace notar que fue concebido en madurez incompleta de sus padres, que fue imperfecta su evolución puberal, y para quien conoce las alteraciones causadas por la pubertad, la observación es de importancia.

Se ha hecho observar que, como sucede frecuentemente a ciertos anormales, sus operaciones mentales sufrían repentinas detenciones. "*En ciertos momentos, su elocución difícil correspondía a una especie de incoherencia de espíritu. Sus concepciones pasaban a ser fácilmente excesivas y exaltadas*."

En materia religiosa, la exaltación confinaba con la angustia, con el delirio del escrúpulo. No había nada que no imaginase para ahogar las inquietudes de su conciencia. Viendo aproximarse la época del jubileo, creía dar un mal ejemplo al pueblo absteniéndose de comulgar. En vez de tomar una determinación sencilla, de acuerdo con sus sentimientos religiosos, juzgó necesario convocar a un gran número de hermanos en el monasterio de San Jerónimo, y preguntarles "*si teniendo en el alma un*

gran odio, justificado, naturalmente, se podía comulgar. Le contestaron que no, y entonces preguntó de nuevo para saber si, al menos, podría hacerlo con una hostia sin consagrar, con lo que el pueblo creería que comulgaba. Como los religiosos respondieron aún que no, que sería cometer un gran sacrilegio, el príncipe no se presentó a la comunión."

Existe una carta de don Carlos al embajador de Felipe II en Roma, en la que le mandaba hacer lo necesario para obtener del Papa un fragmento de la inscripción de la Cruz, autorización para mandar decir misa a cualquier hora y... ¡una reliquia procedente de la circuncisión de Nuestro Señor! Esta última ocurrencia, aunque se defienda lo contrario, se aleja de lo normal. Esto ya no es pietismo exaltado, es la frontera de la aberración mental. Pero aún tenemos, para apoyar el diagnostico, hechos más característicos de verdadera demencia.

Un correo del emperador se atrevió a decir, al dejar Madrid, "*que no eran muy edificantes las continencias que había visto tener en la mesa y fuera de ella, al príncipe de España.*" Sus excesos en la mesa son conocidos. Algunos días llegó a comerse dieciséis libras de fruta, sin incluir cuatro de uvas, en una sola sesión. Ordinariamente no comía más que un plato, que consistía, muy a menudo, en un capón, cocido y cortado en pequeños trozos, habiéndose sobre él vertido el jugo de una pierna de cordero. Por la mañana comía muy poco, resarciéndose en la comida del mediodía. Esta glotonería, señalada por varios contemporáneos, era un legado de su abuelo, recuerda el pantagruélico apetito de Carlos V.

No fue el único vicio de don Carlos la glotonería. (...) Ferreras y Cabrera, citan sus paseos nocturnos y señalan su poca decencia. En una de esas excursiones recibió el príncipe un jarro de agua en la cabeza, proyectado desde una ventana, y en vez de reconocer benévolamente que se había expuesto él al accidente, ¿qué hizo nuestro desequilibrado? Atacado repentinamente de una especie de furor convulsivo, volvió a palacio y mandó a sus guardias quemar la casa de donde había partido la irrespetuosa ducha, recomendándoles que matasen antes a sus habitantes. El oficial que recibió el encargo, con mejor sentido, afortunadamente, que el maniático impulsivo, después de fingir que iba a ejecutar las órdenes de su joven señor, volvió diciendo que había visto a un sacerdote llevar el Santo Sacramento para un moribundo de la casa en la que debía penetrar, y había juzgado prudente aplazar la ejecución del mandato recibido. Don Carlos, más calmado, tuvo a bien contentarse con las explicaciones que le daban, y no insistió.

En la corte se conocía aquel desorden del espíritu y se tenían serias inquietudes sobre el porvenir de la corona. El nuncio escribía, a propósito de don Carlos, a un cardenal amigo suyo: "*No está sano su cerebro, está perturbada su razón.*" El embajador de Francia se asombraba, en la misma época, de "*aquellas locuras desbordadas*", empleando sus mismos términos.

Con pruebas irrecusables en la mayor parte, se le imputan a don Carlos lo menos seis tentativas de muerte. Se han citado de este príncipe rasgos de brutalidad verdaderamente extravagantes: muchachas golpeadas por orden suya, con subsiguiente obligación de indemnizar a sus padres; bárbaros tratos infligidos a los caballos.

Cuando estaba descontento de uno de sus servidores lo molía a palos o lo amenazaba con echarle por una ventana; llego a darle un puñetazo a un gentilhombre que lo censuró el escuchar detrás de las puertas. Cierto día le trajeron unas botas que le resultaban estrechas; estaba su mayordomo, que las había encargado, al alcance de su

mano, lo abofeteó y llamó después al gentilhombre de servicio. Como éste tardara en llegar, se arrojó el infante contra él al presentarse, y quiso precipitarlo a los fosos del castillo; acudieron a los gritos los sirvientes; el príncipe les ordenó entonces cortar en trocitos las botas y cocerlas (4). “*Las hizo dividir en pequeñas piezas y guisar como si fuesen tripas de vaca, y así arregladas tuvo que comerlas, en su presencia, en su propia cámara.*”

(I) LA LOCURA DE DON CARLOS, HIJO DE FELIPE II

"*El príncipe don Carlos* –dice Paolo Tiépolo- *causó al nacer, el 9 de julio de 1545, la muerte de su madre (María de Portugal).*" La reina María no murió hasta cuatro días después del parto; se dice que una imprudencia tuvo su parte de culpa; pero no están bien determinadas las causas de su muerte.

Desde el principio revela el infante instintos singulares. No sólo mordía, sino que según el texto español (1), se comía el pecho de sus nodrizas; tres de ellas fueron víctimas de la bulimia del pequeño ogro.

Hasta la edad de tres años no se le oyó pronunciar una sola sílaba, al extremo de llegar a creerlo mudo; la primera palabra que salió de su boca fue *¡no!*

Lo comunicaron inmediatamente a su abuelo y éste lo celebró mucho. Tenía don Carlos veintiún años cuando le cortaron el frenillo de la lengua, habiéndose encontrado nota de la suma pagada al operador.

Su régimen de vida a los doce años, que conocemos, estaba perfectamente reglamentado. Se dedicaba a los deportes en uso entonces: jugaba a los trucos, al tejo, hacía algo de esgrima; algunas veces montaba a caballo; pero como "*era demasiado aturdido para hacerlo sin peligro*" (2), raramente se le permitía hacer este ejercicio.

A pesar del régimen, su estado era poco satisfactorio. Hay quien, aún pitándolo "*de*

visu", hace resaltar su color pálido, que atribuye a exceso de bilis, del que los médicos, dice, no se preocupan bastante.

El verano de 1557 fue extremadamente caluroso en Castilla, y hubo muchas fiebres; don Carlos también las tuvo. Los facultativos opinaron, sin embargo, que no tenía necesidad de cambiar su residencia el príncipe, puesto que no reinaba en la ciudad ninguna enfermedad contagiosa ni había amenaza de peste.

Un informe hecho al Senado de Venecia hacia la misma época contiene detalles circunstanciados sobre el real infante, tanto desde el punto de vista del temperamento como de sus inclinaciones naturales. "*Tiene la cabeza desproporcionada respecto al resto del cuerpo* – relata el embajador Badoaro- *Débil de complexión, anuncia, sin embargo, un carácter cruel. Se cuenta de él que cuando le traen liebres u otros animales siente especial placer en verlos asar vivos. Le habían regalado una culebra de gran tamaño; un día le mordió en un dedo este animal; inmediatamente le arrancó la cabeza a dentelladas (...) Es tan colérico y obstinado en sus opiniones como puede serlo un joven... su preceptor se dedica únicamente a explicarle los "Oficios" de Ciceron, a fin de moderar la impetuosidad de su carácter.*(3)

A los quince años padecía fiebres casi constantes, hasta el extremo de no poder asistir a la ceremonia de matrimonio de su padre con Isabel de Valois.

En el acto de prestar juramento resalta su tinte pálido y su actitud desgarbada, al lado de la elegante apostura y buen parecer del hijo natural de Carlos V, don Juan de Austria.

Después permaneció don Carlos alejado de todas las fiestas que se dieron en la corte aquel año. Hubo, el dos de abril, un juego de cañas, en el que tomaron parte cien caballeros, divididos en cinco compañías; la primera era mandada por el rey; el príncipe heredero debía mandar la segunda, pero tuvo que sustituirlo don Juan.

La ciencia tuvo que confesarse impotente. Saltaba a la vista que el joven príncipe se iba muriendo, sin que los remedios prescritos consiguieran el menor alivio a su estado.

La opinión común de los médicos era que se iba de "*hétiquez*", no encontrando qué aconsejar más que el cambio de aires. Opinaban que una ciudad del litoral mediterráneo le sentaría bien, por lo que era necesario enviarlo inmediatamente. Felipe II se decidió por Alcalá de Henares, que le había sido recomendada y tenía la ventaja de estar próxima a Madrid. El enfermo mejoró al principio, engordó y estuvo más alegre. A veces tenía bromas de dudoso gusto: una de sus distracciones favoritas consistía en jugar con un joven elefante que le había mandado el rey de Portugal, al que dejaba llegar hasta su habitación. Un día tuvo una extraña ocurrencia: un comerciante indio le mostró una perla, cuyo valor pasaba de tres mil escudos; la tomó en sus manos, poco a poco fue desprendiéndola con los dientes del oro donde estaba montada y se la tragó, ante la desesperación del indio, que no pudo recobrarla hasta algunos días después.

Parecía curado de sus accesos febriles cuando una imprudencia vino a reavivarlos. Por una carta del obispo de Limoges, embajador de Francia en Madrid, dirigida a Catalina de Medicis, sabemos "*que aliviado de las cuartanas, el príncipe se gobernó tan mal*", que le volvieron, habiendo experimentado al menos seis o siete ataques, más fuertes que los precedentes. Pero durante una tregua pudo asistir a la fiesta que su padre daba en el palacio del Pardo, en honor de la reina.

Un accidente que puso en peligro los días del prícipe causó nuevas inquietudes a su alrededor.

Don Carlos había tomado gran afecto a una de las hijas del conserje del palacio; descendía al jardín para verla, por una escalera muy empinada y oscura. Franqueaba los últimos peldaños con tal precipitación, que le faltó tierra y cayó de cabeza. La violencia del golpe hizo que perdiera el conocimiento; levantado del suelo y conducido a su habitación, se le apreció una herida de una pulgada y contusión del pericráneo.

Nos basta consignar que estuvo enfermo cerca de tres meses: ochenta y tres días menos tres horas exáctamente. Hubo por lo menos cincuenta consultas, catorce de ellas en presencia del rey.

Toda España se asoció al dolor de su soberano. Las iglesias se llenaban de gente que iba a implorar, con fervor, de la misericordia divina el restablecimiento de la salud del príncipe. En Madrid hubo procesiones, de día y de noche, en que una multitud de personas se disciplinaban. En Toledo llegaron a contarse tres mil quinientos flagelantes. Era la costumbre de aquel tiempo.

Cuando peor estaba hizo don Carlos voto de ofrecer, en caso de curación, a varias casas religiosas, cuatro veces su pesos en oro y siete en plata. Había prometido igualmente solicitar la canonización de un monje, fray Diego, muerto un centenar de años antes, cuyo cadáver se sacó del feretro en que yacía, para ponerlo en contacto con el enfermo. (...) Habiéndose manifestado a continuación una mejoría en el estado del príncipe, se atribuyó al bienaventurado Diego, a quien don Carlos tenía desde mucho tiempo antes especial devoción. Don Carlos, que sabía cumplir una deuda de gratitud, pidió al papa la canonización de Diego.

Don Carlos fue un caso clarísimo de degeneración genética por consanguinidad y locura hereditaria. Su padre, Felipe II, y su madre, María Manuela de Portugal, eran primos hermanos en doble grado, por vía materna y paterna. La bisabuela de don Carlos fue Juana la Loca que (diga lo que diga la leyenda romántica o la ficción pseudohistórica actual) estaba, como díria mi nieto, como las maracas de Machín. Juana la Loca es, a su vez nieta de la conocida en la historia como "la loca de Arévalo", Isabel de Portugal, que tuvo que ser recluida gran parte de su vida en aquella ciudad. Y no sigo, para no marear. Saludos a todos

¿QUÉ FUE DE LOS ILUSTRADOS?

¿Qué fue de los ilustrados
maestros republicanos
con sus propósitos vanos
de hacer un pueblo letrado?

Fallaron en sus esfuerzos
aquellos sabios maestros
y hoy sólo veo cabestros
gobernados por mastuerzos.

Ahora el pueblo es soberano
y sólo se escucha al cura;
¡Ha llegado la Cultura!:
¡Tenemos el Gran Hermano!

Con la tele y una pizza,
con el móvil a la oreja,
la gente, que es muy pendeja,
lo pasa mejor que en Niza.

Ya somos capitalistas,
horteras y democráticos
y todos somos socráticos
teniendo un bar a la vista.

Aunque negro como un nubio,
y obedeciendo a algún Fritz,
cualquiera es aquí feliz,

pues va teñido de rubio.

El nene juega a interné
y, aunque no sabe escribir,
ni sumar ni discurrir,
tiene el mundo bajo el pie.

Nunca le dan un sopapo
y, aunque es algo debilucho,
su mamá le quiere mucho
y el se siente chico guapo.

Ya va para los "cuarentas"
y está en casa de su padre,
pero no hay quien a él le ladre
ni quien le presente cuentas

La madre que fue muy progre
y hacía el sesenta y nueve
hoy por nada ya se mueve
de que provecho no logre.

A Manuela: Cuando el estado o usted decida aplicar la pena de muerte, es mejor que lo hagan con juicio previo. Así nos evitamos hipocresías. Los asesinos y maltratadores de mujeres no suelen morir en la cárcel, porque siempre hay una madre que los cuida, una hija que los visita o una mujer enamorada que intenta redimirlos. Y a mí me parece que toda la indignación moral que se pueda sentir contra un asesino no justifica que se le torture. Yo no pregunto el delito que han cometido, porque para eso están los Tribunales y las Leyes.
Y os comunico que primero golpean, torturan y luego, preguntan.
Y mucha gente que ha enloquecido de odio es el resultado de esa forma de actuar de quienes deberían actuar según el Derecho y la Legalidad.
Mirad el informe de Amnistía Internacional, y éste que confirma punto por punto los datos.
Nadie, nunca, bajo ninguna circunstancia puede justificar la tortura ni el asesinato ni la impunidad de los torturadores si no está dispuesto a mancharse las manos de sangre, por lo menos, y llamarse a sí mismo criminal.

El problema empieza antes, cuando una sociedad no asume la cárcel como su fracaso más flagrante. Una obviedad, de acuerdo, pero el fracaso también se constituye en la necesidad de tener que volver una y otra vez sobre lo obvio para recordarlo, para evitar que naufrague en la anestesia universal resumida en la tremenda frase "es lo que hay"...como si todo no pudiera y debiera ser de otra manera.
Que la policía en España golpea impunemente como forma casi rutinaria de los procesos de detención también es una obviedad.
Y la indignidad llega a su escalón más siniestro en la tortura pero también pasa por otros peldaños como los negociados montados en torno a los suministros de las prisiones, el tráfico de drogas o la vejación sistemática a los familiares cualquier día de visita.
Todas obviedades que ocurren en la acera de sombra.
Es lo que hay...

Yo no estoy hablando de la emotividad ni de los sentimientos subjetivos, que desgraciadamente son gratis y muy poco elaborados: por eso, las leyes no castigan de acuerdo con el resentimiento de la víctima sino de acuerdo con un baremo objetivo con el Código Penal como referencia.
Si no te gusta, tendrás que tratar de cambiarlo en el Parlamento, donde se dictan las Leyes.
Y en este país, el informe de Amnistía Internacional habla de violaciones de mujeres sin papeles por funcionarios de Policía; habla de razzias para buscar a "un culpable" donde torturan a diez "inocentes"; habla de palizas a los extranjeros "pobres" mientras este

país es el paraíso de los grandes narcotraficantes de la antigua URSS, de Latinoamérica, de los países árabes, y cuando cae una red mafiosa siempre salen funcionarios del Estado pringados.

Tautina: en mi mundo la gente que nos queremos discutimos cuando no estamos de acuerdo, y cuando estamos de acuerdo, también. Y cuando yo era joven e impulsiva he llegado a pegarme con mis mejores amigos por cosas que ni me acuerdo, y a continuación, hemos seguido siendo más amigos que gorrinos. Y las cicatrices de nuestras agarradas las miramos con cariño y con orgullo.
Eso es lo que yo considero ser verdaderamente amigos. Lo contrario me parece enfermizo e infantil, indigno de una barriobajera como yo.

El terrorismo de Estado es el peor de los terrorismos, y la tortura infligida por los "guardianes de la Ley" es la peor de las torturas. Ellos (los guardianes de la Ley y de nuestra integridad y derechos)tienen que estar sometidos al Derecho y a la Ley y por ende "no deben" ("poder" ya se ha visto que pueden) conculcar los derechos humanos.- La peor de las muertes es la ejecutada por un Estado, con la frialdad de la ejecución y del verdugo, su instrumento.- "El Verdugo" de Berlanga es uno de los mejores alegatos contra la pena de muerte... El verdugo es un ser corriente... ¡y eso da escalofríos!

Los vuelos de la muerte, cima de la perversión perpretada por oficiales de la Armada Argentina, produjeron a modo de "daños colaterales" problemas de remordimientos en algunos de los verdugos encargados de arrojar prisioneros vivos al mar. Estos desajustes de conciencia eran atendidos solícitamente por sacerdotes castrenses que recordaban al confundido asesino que la desagradable misión que se le había asignado tenía un fin trascendente: defender los valores occidentales y cristianos. Se trataba pues de una cruzada contra el ateísmo marxista.
Los lanzados al mar eran designados "terroristas" o "elementos subversivos" por la jerga de la dictadura militar, la prensa y buena parte de la sociedad, de dónde es posible deducir que según el razonamiento de la Sra. Manuela se tenían ganado a pulso su sórdido destino.

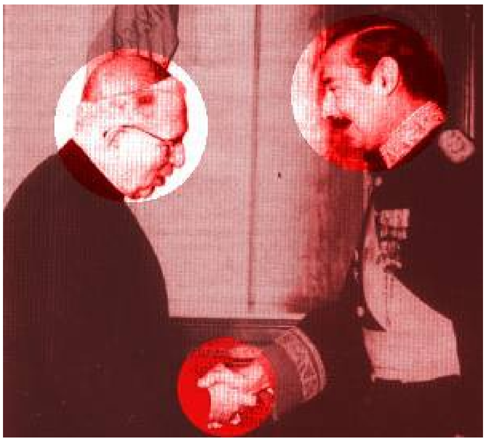
¿QUÉ DECÍA LA IGLESIA CATÓLICA ARGENTINA DE LOS CRÍMENES CONTRA LA HUMANIDAD?



Agencias. 19.04.2005.

"La Audiencia Nacional ha condenado al ex militar argentino Adolfo Francisco Scilingo a 640 años de prisión por un delito de lesa humanidad con "causación de 30 muertes con alevosía, detención ilegal y torturas" cometidas durante la dictadura argentina."

A finales del 1976 la Iglesia podía estar segura de que los represores ganarían, es por esto que dieron su abierto apoyo al Gobierno.

En mayo de 1977 Monseñor Ildefonso Sanserra de San Juan por iniciativa del presidente Videla, la Conferencia Episcopal Argentina recibió a los generales Viola, jefe de Estado Mayor del Ejército, Jáuregui y Martínez (responsables de los servicios de inteligencia). Al finalizar la reunión Monseñor informó a la prensa:

"... *los señores militares nos informaron con amplitud sobre la situación actual del país en el marco de la actividad defensiva y ofensiva contra la guerrilla subversiva que se nos ha impuesto desde adentro y afuera de nuestro territorio... al término de la exposición de los generales hubo un intercambio de ideas en un clima verdaderamente cristiano y patriótico*..."

Como demuestra la cita anterior todo era considerado en un clima cristiano y patriótico. Existía una verdadera alianza y hasta se podría decir que los genocidas eran defensores de la fe de igual modo que eran defensores de la patria. En diciembre del 77 Monseñor Bonamin en una conferencia en la Universidad Nacional del Litoral dice: "*es una lucha por la República Argentina, por su integridad, pero también por sus altares... esta lucha es una lucha en defensa de la moral, de la dignidad del hombre, es una lucha en defensa de Dios... por ello pido la protección divina en esta guerra sucia en que estamos empeñados*..."

¿Podría tomarse la declaración anterior como una prueba que fue una Guerra Santa?

Durante el próximo año se sentirían tan triunfantes que hasta el Monseñor Sansierra se daba el lujo de bromear. El 31 de enero del 78 dijo:

"... *yo voy a la cárcel y me dejan salir siempre. Nunca me quedo adentro*..."

Las Investigaciones

Durante el año 77 se sintieron fuertes y triunfantes y la Iglesia tenia razón de gozo...

El 20 de Noviembre de 1977, Monseñor Bonamin Declaraba como partidario del gobierno de esta forma:

"... *si pudiera hablar con el gobierno le diría que debemos permanecer firmes en las posiciones que estamos tomando: hay que desestimar las denuncias extranjeras sobre desapariciones*..."

El 26 de mayo de 1978 Monseñor Romulo Garcia de Mar del Plata defendía a la represión de una manera cristiana:

"... *las denuncias sobre violaciones a los derechos humanos son campañas improvisadas y organizadas por quienes niegan la libertad*..."

En el año 1979 comenzada a sentirse la presión extranjera debido a las violaciones de los derechos humanos. Investigaciones internacionales estaban descubriendo el reino del terror.

El 11 de septiembre de 1979, el Monseñor Octavio N. Densi, Obispo auxiliar La Plata y Rector Universidad Católica Argentina, se siente personalmente afectado por las actividades de las investigaciones internacionales y dice:

"... *la CIDH no debería haber venido, el gobierno con gran generosidad la ha aceptado... una comisión extranjera no debería venir a tomarnos examen*...”

"... *la Argentina es uno de los países donde hay más tranquilidad y donde los derechos humanos están más respetados. No veo que en este momento en la Argentina se encarcele, se mate, se atropellen los derechos humanos*... "

Monseñor Guillermo Bolaffl de Rosario es más agresivo el día 13 de septiembre de 1979 al decir:

"... *cada país debe regular los derechos humanos, no deben ser los extranjeros (la CIDH) los que nos vengan a indicar lo que tenemos que hacer*..."

Para mostrar el apoyo del Vaticano a los impostores en el gobierno Monseñor Parodio destinado en el Vaticano en su visita a Mar del Plata declara:

"... *ahora se comprende mejor a la Argentina... en Europa hay quienes siempre buscan lo negativo... aquí el rostro de la Argentina se ve más positivamente*..."

Ya para diciembre de 1979 los crimines eran muy grandes para ocultar y empezaban a reconocerlos y justificarlos. Monseñor Antonio Quarradno de Avellaneda, futuro presidente CEA y cardenal de Buenos Aires dice:

"... *en una situación de guerra, los argumentos y los límites éticos entran en un cono de sombra y oscuridad*..."

En marzo de 1981 Monseñor Bonamin en la Casa Rosada y junto a Videla dice:

"... *los miembros de la Junta Militar serán glorificados por las generaciones futuras*..."

En abril de 1982 Monseñor Miguel Medina, vicario General de las Fuerzas Armadas declara:

"... *Algunas veces la represión física es necesaria, es obligatoria y como tal, lícita*..."

El 11 de agosto de 1982 después de haber sufrido las humillantes y justas derrotas en el Atlántico Sur, Monseñor Medina declara:

"... *es un honor para la Argentina tener la calidad de estas Fuerzas Armadas*..."

Llamada a la Impunidad

El 19 de noviembre de 1982 Monseñor Juan Carlos Aramburu, Arzobispo de Buenos Aires cardenal declara al "Il Messagero" de Roma.

"... *en Argentina no hay fosas comunes y a cada cadáver le corresponde un ataúd.*

Todo se registró regularmente en los correspondientes libros..."

Ya para abril del 83, con el país en crisis y con la justicia a la vista Monseñor Quarradno declara.

"... *es necesaria una ley que yo llamo de olvido, porque si no, no le veo solución. Si no es así, se envenenará más la sociedad Argentina*..."

EL 15 de abril podemos ver una especie de revisionismo cuando Monseñor Quarradno declara:

"... *no hay que dejarse engañar, hay supuestos desaparecidos que están fuera del país.... hay gente que no figura en las listas, que están en otros lugares de América Latina indocumentados y pasan para mucha gente como si fueran desaparecidos... si son indocumentados y están fuera del país, por algo será, pero me consta que los hay*.."

El 2 de mayo, Monseñor Quarradno declara ante la ley autoamnistia:

"... *es valiente y está bien hecha... las protestas individuales de algunos obispos argentinos sobre el contenido del documento son individuales y en consecuencia no pueden ser tomadas en cuenta como la opinión de la CEA*..."

Al asumir como presidente constitucional el Doctor Raúl Alfonsin, el Documento de la C. E. A. "Democracia, responsabilidad y esperanza" dice:

"... *el episcopado argentino pudo no acertar todo lo que dijo e hizo. Los obispos somos hombres limitados; pero podemos afirmar que siempre procuramos obrar y hablar de acuerdo a los dictados de nuestra conciencia de pastores*..."

Muchos sacerdotes se quedaron con sed de sangre y guerra. Se sentían frustrados al no haber podido aniquilar a todos sus opositores como en las inquisiciones y genocidios de antaño.

El 23 de enero de 1984 el Monseñor Carlos Mariano Pérez de Salta dijo:

"... *hay que erradicar a las Madres de Plaza de Mayo y a los organismos de derechos humanos que pertenecen a una organización internacional, lo mismo hay que terminar con la exhumación de cadáveres NN que es una infamia para la sociedad*..."

El 30 de julio de 1984 el represente de Cristo Padre Christian Von Wernich, capellán de la Policía de Buenos Aires y actual párroco en Bragado declara a la revista "Siete Días":

"... *que me digan que Camps torturó a un negrito que nadie conoce, vaya y pase, pero cómo iba a torturar a Jacobo Timerman, un periodista sobre el cual hubo una constante y decisiva presión mundial... que si no fuera por eso!*..."

Monseñor Plaza fue siempre fiel a sus principios. El 21 de mayo de 1985, declara sobre el juicio a los excomandantes asi:

"... *es una revancha de la subversión y una porquería. Se trata de un Nuremberg al revés, en el cual los criminales están juzgando a los que vencieron al terrorismo*..."

Este carácter murió en 1989.

El 23 de Octubre de 1991 "La Nación" informa:

"*Todos se sintieron llamados por el Papa. Festejo en la Nunciatura*."

"*El presidente Menem y el nuncio apostólico Ubaldo Calabresi brindaron con champaña por los trece años del papado de Karol Wojtyla. A cincuenta metros del sillón Luis XV en el que hablaban los dos, los ex presidentes Videla y Viola mantenían un diálogo junto a los ventanales de la Nunciatura. En el mismo salón conversaban*

Leopoldo Galtieri, Basilio Lami Dozo y Emilio Massera. La senadora Saadi conversaba con el obispo Jorge Casaretto y después con Gerardo Sofovich..."

El Papa apoyó todas las actitudes criminales de todos los Obispos, Monseñores y otros curas varios en la Argentina. Cuando un grupo de familiares viajo al Vaticano pidiendo ayuda para encontrar a sus seres queridos el Papa no los atendió.

El 2 de mayo de 1995 Monseñor Edgardo Storni de Santa Fe declara:
"... *La Iglesia no necesita hacer ningún examen de conciencia y mucho menos pedir perdón a la sociedad Argentina*..."

Dos acotaciones sin demasiada importancia:
1- Acerca de la declaraciones efectuadas en noviembre de 1977 por Monseñor Victorio Bonamín, obispo castrense ("... si pudiera hablar con el gobierno le diría que debemos permanecer firmes en las posiciones que estamos tomando: hay que desestimar las denuncias extranjeras sobre desapariciones...")acotar que su propio sobrino fue desaparecido. Monseñor Bonamín, a pesar de su enorme influencia en la cúpula del gobierno militar argentino, no movió un dedo por cambiar la suerte del muchacho.

2- Con respecto a Monseñor Edgardo Storni, obispo de Santa Fé, actualmente está separado del cargo aunque sobradamente protegido por la curia argentina ante las gravísimas acusaciones de pederastia que pesan en su contra.

No deben olvidar, damas y caballeros, que la iglesia de la que hablamos siempre ha estado codo con codo con el poder desde la época en que ella misma dejo de ser el Poder en todo el mundo mundial. Y cuando les ha fallado han intentado recular y donde dije Diego digo digo... Lo de las cruzadas medievales lo añoran más que la llegada del reino de los cielos. Llegado ese momento de justicia suprema, más de uno y más de dos, entre los que espero encontrarme, Dios mediante), serán los que rían los últimos. Eso si Dios se porta como debe. La Iglesia argentina estuvo dividida ideológicamente en dos fracciones. Una se proclamó defensora de la lucha armada emprendida por la guerrilla marxista. Ningun obispo ni sacerdote ni seminarista enrrolado en ese sector emitió algún "comunicado" condenando la violencia emprendida por ellos. La otra parte, felizmente la gran mayoría, no apoyó la lucha guerrillera, primero porque era de ideología marxista y segundo porque condenaba los métodos violentos y crueles por ellos ejecutados. La guerrilla marxista procuraba aniquilar al ejército nacional. Es obvio entonces que la parte mayoritaria de la Iglesia Católica no los aplauda y se coloque a la par de las FF. AA que lucharon para que ellos no triunfen, cosa que hubiera sido muy penoso para nosotros en el caso de el "neocomunismo" nos llegara a gobernar. -Antonio Nour

En las dècadas del 60 y 70 en todos los paìses de Amèrica Latina surgieron guerras de guerrillas con el fin de "aniquilar" a las Fuerzas Armadas Nacionales e instalar en la Casa de Gobierno de cada país un "dictador" castrista, comunista, similar a lo que fué el Dr. Dorticós en Cuba.De tener éxito estas pretensiones hubiera sido una verdadera desgracia. La cantidad de muertos en la Argentina habría sido de varios centenares de muertos pues la inmensa mayoría del pueblo argentino era antimarxista. GATOPARDO CONDENADA

El Comité Revolucionario por la Salud y las Buenas Costumbres de la República Ilustrada constituido por: el ciudadano redactor-jefe Alimaña (garduña), el ciudadano por-decir-algo Crasticeddru (sin cédula de identificación, ya que la *Academie des Sciences* sólo ha reconocido como subespecie a los sicilianos), el ciudadano Pendón-Volteriano (gato), el ciudadano Saint Just (zorro) y el ciudadano ujier (que es un impresentable) han decidido lo siguiente:
1º. El Comité ordena al ciudadano ujier que saque a palos de la sala a la chusma que ha venido a animar, apoyar y jalear a este Comité. El Comité Revolucionario considera que toda porción de masa vociferante, en general, (y ésta en particular) suele oler mal. Se ordena asimismo al ciudadano ujier que abra las ventanas después del desalojo.
2º Este Comité considera que la ciudadana Gatopardo, maestre de la logia del mismo nombre, ha venido incurriendo en los últimos tiempos en un delito de leso buen gusto haciendo acopio y alarde de habilidades poéticas y sentimentales. El ciudadano Pendón Volteriano quiere puntualizar, pero este Comité le ordena callar inmediatamente.
3º El Comité Revolucionario juzga como atentatorias contra la moral del Estado los coqueteos y juegos de palabras que la acusada viene manteniendo en la sección "*comentarios*" con un tal Manuel I.., conocido también como "*Manolo el del Vespino*". Se ordena la confiscación de susodicha moto, así como que se le retire al individuo el carnet de "*turyocios*" que tiene a su nombre. El ciudadano Saint Just pretende decir algo, pero se le amenaza en la debida forma y acata.
4º El Comité evalúa como gravísimo delito ecológico el que la ciudadana Gatopardo haya exaltado a un individuo tan poco ejemplar para la patria como un poeta, que no contento con el desafuero de serlo, se suicida con una bosa de plástico no reciclable y además se espera hasta casi cumplir los cincuenta años. Con ello la ciudadana

Gatopardo intenta minar los esfuerzos del Comité de Salud Pública que viene dando a las mujeres gestantes (junto con la canastilla y los dodotis) un paquete de bolsas ahoganenes , así como el libro de instrucciones escrito en castellano, catalán, euskera, gallego y bable. El ciudadano Alimaña protesta, pero este Comité le lanza la jarra del agua y se calla.
5º Este Comité condena a la ciudadana Gatopardo a limpiar las secreciones enzimáticas de las glándulas salivales (o de cualquier otra glándula) que su actividad poética o sentimental origine, originare o haya originado. Y a pagar las costas de mocho y fregona que requiriere para ello. El ciudadano por-decir-algo Crasticeddru pregunta, pero este Comité le tira varios zapatos a la cabeza y logra que permanezca en el mutismo del que no debía de haber salido.

6º El Comité ordena la ejecución de esta sentencia inapelable, que firma de forma unánime en la villa de Tócameroque, a 18 de Germinal.

PS *Dado que existe un conflicto de jurisdicción internacional y la condena también a fecta a don Manuel I. y su moto, sugiérese revisar las alegaciones que desde México se hacen en http://www.20six.co.uk/iguiniz y tomar cumplida cuenta de ellas.*

La sentencia es injusta y la autoridad no es competente ya que el redactor-jefe alimaña ha realizado igual número de atentados de carácter salival contra la Salud y las Buenas Costumbres en la República, yo soy testigo de ello.

Este juicio es el principio de una confabulación, una traición, un claro intento de desprestigiar a la autoridad para que el propio acusador (redactor jefe Alimaña) pueda usurpar el codiciado derecho de admisión que la dama Gatopardo ostenta. Una vez conseguido, no quedaría en este espacio persona que no amara los episodios sentimentales de la alta nobleza.

Ciudadanos del mundo
Este individuo se acoge a la extraterritoriedad de su bitácora y no se deja juzgar por tribunales “republicanos” que me recuerdan a la santa inquisición y solicita un juicio justo en territorio neutral (dado que el ejercito mexicano esta ocupado en otras cosas… ¿¿¿¿????)
Y tomando en cuenta que mi moto no es una vespa (italiana) sino una Harley (GRINGA), me planteo la posibilidad de solicitar una invasión punitiva por dichos individuos que viven y predan arriba de mi país, invocando los tratados que castigan el racismo (de motos, que no de individuos) a dicha comarca, y si ustedes no tienen un Pancho Villa… Preocúpense.
Con respecto a su relación con el susodicho y antes no nombrado Gatopardo, declaro mi libre albedrío para llevar a dar la vuelta -a quien se deje- en la multicitada moto que nunca a tenido una infracción ni de transito, ni en el tribunal de menores, ni… siquiera por falta de luces, por lo que se declara competente para salir con quien se deje. (En Mexico, SI hay cohecho), ya que niega conocer personalmente a la susodicha, su trato ha sido un devaneo sutil, de alguien que tira las redes a ver que pesca (hasta la fecha puros resfriados)
Con respecto a las acusaciones de poeta suicidado las acepta y le honran ya que la mayoría de lo que trata de escribir es fantasía, y por ser ingeniero no da para más con la pluma.
Y ya que el sitio del tal y ante citado gatopardo no se deja acceder, heme aquí defendiéndome del desafuero que se me trata de imponer.

IN MEMORIAM

Mi amor fue un gato de tejado,
errático, sensual, insomne y descreído,
pero amé París
y cuando tuve frío
amé también los cuerpos tibios.
Aún recuerdo sus huecos en mi cama,
su inefable impudicia,
la euforia de los atardeceres, víspera de fiesta,
mas confundo sus rostros y su historia
como en un palimpsesto enmohecido.
Ahora, el Sena es un grabado antiguo,
en Göteborg, mediando el mes de junio,
con alguien que me habló en su idioma
del sol de medianoche.
Al cabo de los años Les Marais es un barrio,
una extraña novela, Québec, y un canadiense rubio,
solemne y desairado,
que me enseñó a llorar en la ensalada.
En los Campos Elíseos rememoro a Swann,
de paseo con Odette y una sombrilla malva,
con los pies doloridos y la risa mojada,
porque mi amor ideó aquella noche
no sé qué muy bucólico
y perdimos el metro...
La única pasión eterna es el olvido,
por fortuna,
teniendo en cuenta el desgaste emocional,
la edad y las arterias.

Hermoso poema que observa desde la lejanía serena los amores fugaces idos, con

aceptación, con delicada nostalgia que se redime en la auto ironía del cierre que nos devuelve todo el poema de golpe y lo ilumina.
Pero también señalaría un par de cosas que considero debilidades:
1. todo el poema está escrito con un lenguaje sencillo y referido a elementos tangibles, eso lo hace cercano y emocionante. En este sentido, creo que las expresiones "inefable impudicia", pero sobre todo "palimpsesto enmohecido" rompen esa línea por aludir a abstracciones y no aportan nada, más bien despistan del paseo visual, real, por el que nos lleva el poema.
2. Casi todo el poema está medido abundando los versos de 7,9,11 y mayores impares. La ruptura de "pero amé París"(6)y "por fortuna"(4)rompen en alguna medida el ritmo.A pesar de que el verso de 4 está comunmente admitido, debe estar justificado en aras de la expresividad, pués no siendo así es un recurso fácil que rompe y no añade.
Un abrazo.

FRAGMENTO DEL INFORME ANUAL DE AMNISTÍA INTERNACIONAL SOBRE TORTURAS EN ESPAÑA

Fragmento del informe anual de Amnistía internacional: *"Acabar con la doble injusticia"* de diciembre de 2004 sobre la tortura en España:

El Relator Especial sobre la Tortura de Naciones Unidas comparte esta preocupación afirmando en su informe de febrero de 2004, tras una visita a España en octubre de 2003, que en el país no existe legislación concreta que garantice una indemnización justa y adecuada a las víctimas de tortura tal y como establece el derecho internacional, incluida la concesión de los medios para una rehabilitación lo más completa posible, como dispone el artículo 14 de la Convención contra la Tortura.
En este nuevo informe Amnistía Internacional expone motivos de preocupación concretos que se derivan de la injusticia a la que se enfrentan las víctimas de tortura y malos tratos en España, y formula serios cuestionamientos sobre el compromiso del Estado con la protección del derecho de las víctimas a una reparación íntegra y apropiada que incluya medidas de rehabilitación, indemnización, restitución y satisfacción, así como garantías de que el delito no se repetirá.
Las conclusiones de este informe se basan en la información obtenida con el estudio de más de 450 sentencias dictadas entre los años 1980 y 2004 relativas a procesos relacionados con tortura y malos tratos perpetrados por miembros de las fuerzas de seguridad, y a los que en la mayor parte de los casos dichas sentencias ponen fin. De ellas, Amnistía Internacional ha examinado en profundidad 95 en las que se ha probado la comisión de tortura o malos tratos. La mayoría de ellas son firmes y condenatorias, aunque en algunos casos los responsables finalmente son absueltos por prescripción, por no haber sido identificados los culpables directos o por haberse absuelto a los responsables indirectos por distintos motivos.
Estas sentencias permiten examinar en detalle las indemnizaciones a las víctimas u otros elementos que inciden en el derecho a reparación por los daños sufridos.
Es importante insistir en que aquí no se detallan hechos que hayan sido puestos en conocimiento de Amnistía Internacional por distintas fuentes, ni se trata tampoco de información obtenida a través de denuncias, como es el caso de otros documentos de la organización. Amnistía Internacional no ha entrevistado para este informe a víctimas ni a sus abogados ni a otras organizaciones sociales. Los casos que se describen y las preocupaciones que aquí se exponen provienen de la información obtenida de sentencias judiciales en las que las denuncias de las víctimas de tortura y malos tratos han sido respaldadas por los tribunales.
Un denominador común de las sentencias analizadas es el extenso lapso de tiempo transcurrido entre la fecha de los presuntos actos de tortura o malos tratos y la obtención de sentencia firme. El presente informe describe varios procesos en los que víctimas de tortura han tenido que esperar entre 15 y 20 años para obtener una sentencia firme que determine una indemnización.
Podría llamar la atención que este documento cubra un periodo tan largo, en el que se han producido muchos cambios políticos y legislativos, pero Amnistía Internacional se ve en la obligación de destacar, precisamente, que la duración de los procesos por tortura es excesiva, y que las consecuencias de tan inexplicables retrasos se traducen en una reparación insatisfactoria para las víctimas. El informe examina por ejemplo algunos procesos cuyos hechos se produjeron a lo largo de los años 80 o principios de los años 90, pero para los que, lamentablemente, hasta una o dos décadas después no se ha obtenido la sentencia firme.

En numerosos casos, a pesar de que las torturas o malos tratos han resultado probados, las víctimas no obtienen indemnización alguna a causa de la prescripción del delito, motivada por las dilaciones del proceso, así como por la imposibilidad de identificar a los autores materiales de los hechos por la falta de colaboración de los agentes con las investigaciones.
(...)Por otra parte, es preciso mencionar que en muchos de los procesos examinados en este informe, los condenados por delitos de tortura y malos tratos se han beneficiado de indultos y muchos agentes condenados, o con procesos pendientes, han continuado ejerciendo en puestos que exigían protección de los derechos humanos o incluso han sido premiados. Este tipo de medidas tampoco favorecen una reparación adecuada para la víctima, puesto que no ofrecen garantías de no repetición del delito.
A Amnistía Internacional también le preocupa que en España no se hayan hecho esfuerzos por conceder algún tipo de reconocimiento público a las víctimas de tortura y malos tratos. Si bien la organización no cree que la tortura sea sistemática en el país, sí se reciben denuncias frecuentes y creíbles, en particular de detenidos en régimen de incomunicación.
(...)Sin embargo, es necesario señalar que los propios tribunales españoles han establecido como hecho probado la tortura en varios de estos casos en el pasado, como ponen de manifiesto las 95 sentencias analizadas en este informe. Amnistía Internacional ha expresado en reiteradas ocasiones su preocupación por el insuficiente debate y la falta de cumplimiento por parte de las autoridades españolas de las recomendaciones concretas de muchas instancias internacionales para, por ejemplo, acabar con la detención en régimen de incomunicación por ser una medida que propicia la tortura y los malos tratos. Para erradicar la tortura en España, la organización considera
indispensable que exista voluntad política para prevenir que se cometa el delito, para encausar a los responsables y para garantizar a las víctimas la reparación más completa posible."

En memoria de Ángel Zamoro Durán y Xosé Tarrío que lucharon hasta la muerte por la dignidad humana.

En España, 14 de abril de 2005, aniversario de la Proclamación de la II República Española."

Primo Levi decía que cada vez que subía a un autobús o a un vagón de metro miraba las caras de esas gentes normales a su alrededor sabiendo que cualquiera de ellos podría ser un torturador. Porque sus torturadores no habían sido hombres manifiestamente sádicos de mirada pérfida, descomunales mentones, piel agujereada por la viruela y orejas puntiagudas sino hombres comunes, honestos padres de familia, que cumplían con su trabajo en la mesa de torturas con el mismo empeño o indiferencia con que haría sus tareas cualquier oficinista o funcionario público. Esta certeza recurrente lo desesperaba.

En la actitud de las personas la hipocresía suele ser la norma y no la excepción. Es terríblemente sencillo llegar al propio convencimiento de que las barbaridades que se cometen han sido en realidad, forzadas por las circunstancias. Es curioso que una simple circunstancia puede ser más fuerte que todo el aprendizaje moral de una persona.

Yo creo que el informe apunta en la dirección correcta: hay que impedir las situaciones que pueden propiciar el abuso de autoridad, permitirlas y después pedir que no ocurran es un absurdo.

Sra. Gatopardo, cuando se pone Usted el uniforme de policía despierta mis ansias semidormidas de lanzar un perfecto cross de derecha a un mentón situado veinte centímetros por debajo de la visera del vigilante, en este caso su mentón gatuno.
Sus pretensiones eugenésicas se emparentan con los anhelos del Dr. Menguele.
Inquietante...

LIBRETO ZARZUELA DEL PATRIMONIO DE CASPE

Con motivo de la destrucción del Yacimiento Arqueológico de Palermo en Caspe por Brutencio, y defender su actuación Oz, El Pendón Volteriano, fotografiado arriba, ofreció a los lectores de Gatopardo el acto I de su zarzuela "El Patrimonio de Caspe", en la sección "comentarios de los lectores". Hemos querido darle el espacio que merece y solicitar a don José María Cano la partitura apropiada.

Acto Primero (Brutencio, Oz y El Coro de Patrimonio)

Brutencio:

Me acosan, me insultan,
me llaman bruto animal,
Y de pelas yo ando mal
Yo me mato si me multan.

Oz:

¡Qué injusticia, qué locura!
¡Acusar a tal portento!
¡Un mocetón tan atento,

que tal dicha me procura!

Brutencio:

Donde antes había era,
yo he hecho un camino.
Dimelo, yo te conmino:
¿No es hazaña cimera?

Oz

Si yo fuera Carmen Calvo,
El Prado te dejaría;
en decir "Ave María"
lo dejabas de arte salvo.

Brutencio:

¡Qué gran centro comercial,
y qué bares, qué de cines,
un sex shop pa que alucines,
festival de arte marcial...

Oz:

No prosigas ese sueño,
que me entra la tristura,
cuando veo la cultura
y de un arma no soy dueño.

Brutencio:

Pues mi fiel y amante Oz,
yo te dejo mi tractor
pa que seas mi factor
y arrases hasta Vinaroz.

El Coro de Patrimonio:

¡Qué movida, qué tormento,
qué follón más indignante,
qué pesadez tan tronante!
¡Por un simple yacimiento!

¡Qué cansado es trabajar!
Siéntate, ponte derecho...
Un café entre pecho y pecho...
Ni te puedes relajar.

Total por cuatro pedruscos,
se ponen éstos tan bruscos.
¡Vaya infernal castigo
no poder tocarse el higo!

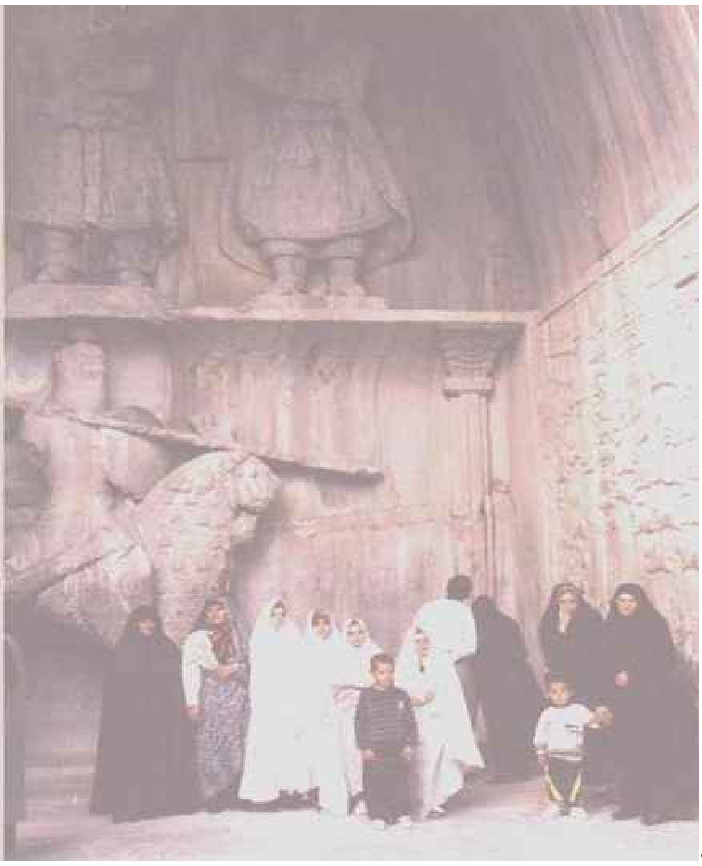
MI ADMIRADA ANA BRIONGOS



¿Qué aporta leer más o menos, ver más o menos museos? –me preguntan a veces- y he de responder que leer y ver cuadros es como todo lo demás,apenas aporta nada si no se desencadena una transformación interior.
Había visto, como todo el mundo, reproducciones de cuadros de Van Gogh y era uno de mis pintores predilectos, así es que viviendo en París decidí de la noche a la mañana que iría a Amsterdam, y vería el Museo Van Gogh. Iba a llenarme los ojos de colores brillantes de la mano de mi gran amor del momento, que ya ni recuerdo quién era.
No estaba previsto que tuviera una especie de éxtasis místico ante sus cuadros que me obligó a quedarme hora tras hora, día tras día, durante una semana, en la que viví para ver por primera vez lo que había mirado miles de veces sin verlo. Nunca más ha vuelto a ser lo mismo una silla, un ramo de girasoles ni los tejados de las azoteas de París que veía desde mi mansarda.
Leer "Invierno en Kandahar" de Ana Briongos significó una experiencia similar, afiló una percepción que tenía embotada por los prejuicios, las ideas hechas a la medida de mi ignorancia, y me hizo percibir una realidad múltiple y misteriosa, que nada tiene que ver con los exotismos de un agente de viajes.
Ana Briongos ha vivido en Afganistán, Irán, la India... Es de la raza de viajeras y escritoras que entroncan con las grandes viajeras y exploradoras del siglo XIX, todo lo contrario de las escritoras que apenas son capaces de explorar un palmo más allá de sus narices,consagradas y mimadas por las editoriales y los lectores, encantados de leer sin tener que salir de la modorra.
Tengo un enlace permanente a la página web de Ana Briongos en Gatopardo, y a continuación podréis leer un fragmento de este libro inolvidable. Pero os ruego que leáis sus libros, porque es preciso sumergirse en la magia del papel impreso para disfrutarlos, y para que Ana Briongos pueda seguir escribiendo.
Yo no la conozco personalmente, pero me han asegurado que sus conferencias son una pura delicia, vivaz y ocurrente, cálida y capaz de fascinar al auditorio menos dispuesto a escuchar.
De nada, ya sabéis que me gusta ser útil.

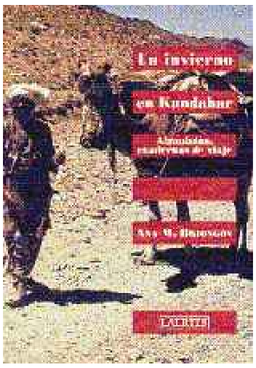
UN INVIERNO EN KANDAHAR



El día que Shirin me propuso salir estaba la suegra presente y según se desarrolló la conversación entendí que ellas ya lo habían hablado y decidido. Salir conmigo tal cual traería problemas largos de enumerar y para mí difíciles de entender, decían, por lo que me proponían que me encasquetara el chadrí de la abuela, con lo cual nadie sabría quiénes éramos y cualquier inconveniente quedaría automáticamente resuelto. Así de sencillo. La aventura me atraía y admití la jugada sin discusión. El único inconveniente llegó cuando apareció el embozo e intenté probármelo. El olor a sudor era penetrante y el borde del casquete, que se adapta a la cabeza y aprieta la frente, estaba

húmedo y pegajoso. Pensé con asco en las babas de la abuela pero decidí seguir adelante con la experiencia. Por suerte llevaba atado al cuello un pañuelo limpio que anudé en mi cabeza al estilo pirata, con la excusa de que me molestaban las costuras, de forma que el casquete reposaba sobre él. La risa fue general cuando me vieron con la indumentaria, pero había otro inconveniente: mis pantalones vaqueros y mi calzado me delataban, de modo que me dejaron unas calzas blancas con puntillas en el tobillo, unos faldones y unos zapatos de plástico. Una vez me los hube puesto, los aspavientos de aprobación fueron generales: las mujeres reían y los niños aplaudían y la cocina era una fiesta.

Fue una complicación salir de la casa y bajar las escaleras. No veía nada y tuve que recogerme el chadrí para no tropezar con él. En la calle, la abrumadora luz del sol entraba por la rejilla del chadrí, y necesité un tiempo para situarme y orientarme. Shirin y yo parecíamos dos fantasmas que caminan, ella de color de ala de mosca, yo de color de rueda de carro. Metida dentro de aquella campana mi campo de visión se reducía al frente y debía girar la cabeza si quería ver a los lados. Al poco rato me encontré siguiendo a Shirin, unos pasos detrás de ella. Di unos saltitos para situarme a su lado pero cuando quise darme cuenta ya volvía a estar detrás de ella siguiéndola como una sombra. Era evidente que me resultaba más fácil seguir a un bulto y que prefería que Shirin se adelantase a mí, y entonces comprendí por qué en Afganistán las mujeres van siempre unos pasos por detrás de sus hombres. No era simplemente una cuestión antigua de protocolo familiar que otorgaba el primer puesto de la marcha a los que ostentaban el poder dentro de la familia sino que a las mujeres de las ciudades, además, les habían impuesto una indumentaria que no les permitía otra posibilidad que seguir al hombre, o de lo contrario se perderían o se darían encontronazos contra cualquier obstáculo de los muchos que hay por las calles polvorientas de las urbes afganas: cabras, carros, hombres acuclillados en mitad de la calle solos o formando corro, jaulas con perdices, cacharros amontonados, camellos, acequias, sacos, burros, camas, cestos, un barbero con la navaja en ristre afeitando la cabeza de un cliente barbudo, mujeres agachadas esperando turno para no se sabe qué, melones desparramados y un largo etcétera. Para una mujer embozada en ese atuendo, la idea de igualar su paso al de su hombre sería totalmente descabellada.

De vez en cuando Shirin se detenía y me miraba.

-Good?

-Good.

Oí como se reía. Estaba contenta con nuestro juego a pesar de que nuestra incomunicación era casi absoluta: yo todavía no había aprendido ni una palabra de darí[1] y con aquel embozo el lenguaje gestual resultaba imposible.

Mi visión del entorno estaba enmarcada en un pequeño hexágono y tenía cuadraditos de color de rueda de carro. Me pareció que era mejor ver el mundo con cuadraditos del color de la calle que verlo multidividido en negro o en un color intenso; quizá por eso los chadrís acostumbran a tener colores suaves, ocres, grises azulados, malvas. Cuando movía la cabeza el movimiento que el cuadriculado producía en las imágenes que veía me mareaba, y llegué a la conclusión de que era mejor seguir adelante con la cabeza al frente y moviéndola lo menos posible. Las imágenes fijas eran mucho más soportables que las móviles, por lo cual pude descansar cuando Shirin decidió pararse frente a una tienducha de telas del bazar.

La tienda era un cubo sin puerta y de algo más de dos metros de lado. Como todas las que, una al lado de la otra, se abrían a aquella calle, estaba elevada a casi un metro del polvo. El comerciante se sentaba sobre el suelo de madera con las piernas cruzadas. Quedaba a una altura cómoda para hablar con él sin necesidad de agacharse. Su mercancía, piezas de telas superpuestas de todos los colores, estaba ordenadamente dispuesta en la parte trasera del cubículo. Yo conocía al vendedor de verlo todos los días cuando me dirigía por la mañana a la tienda de yogur que estaba un par de travesías

más abajo. Era un hombre amable, que siempre me saludaba. Esta vez me resultaba extraño verlo de incógnito desde detrás de una reja.

Pasaron a nuestro lado los suecos que compartían habitación conmigo en el hotel. Pude observarlos con toda desfachatez cuando se pararon en la tienda contigua, desde bien cerca, y ni siquiera se dieron cuenta de que alguien les estaba observando. Podía oír lo que decían y me divertía. Ni por un momento se me ocurrió hacer un gesto que me delatara. Pensaba mantener aquella situación en secreto. Nadie sabría qué hacía yo por las tardes cuando desaparecía del hotel.
Acababa de descubrir que en Afganistán las mujeres embozadas no existen, ni para los del país ni para los que vienen de fuera. El chadrí es como un filtro mágico que propicia la desaparición. Nadie está interesado en saber quién será aquélla que pasa por delante: no hay curiosidad ni morbo, simplemente no hay nada. El mundo sigue su curso, los hombres negocian, discuten, compran y venden, el arcaico engranaje de la vida afgana mueve sus ruedas sin parar. Los artesanos industriosos trabajan en sus cubículos: uno arregla teteras de loza con grapas metálicas, otro amolda a golpes de martillo recipientes de cobre, otro confecciona calzones con su rudimentaria maquina de coser. Si llega un cliente, el artesano manda a por té y ambos charlan acuclillados con la taza humeante entre las manos. Pero las mujeres que compran en el bazar no toman té: aun en el caso de que existieran, ¿cómo lo tomarían si no tienen boca?

OFENSAS REALES

En la imagen, el momento en el que el príncipe Carlos reprocha a la reina la ofensa que tiene al borde de un ataque de ira a Camilla, mientras la reina muestra una satisfacción rayana en el regocijo.

Como anunció *Alimaña News*, nadie de la casa real española fue a la boda de Camilla y Carlos, dando como excusa que irían a la ceremonia de nombramiento como *doctor honoris causa* en la Universidad de Salamanca del presidente de Chile, Ricardo Lagos, en la primera fecha señalada para la boda.

Pero el día 3 de abril el Presidente Lagos canceló el viaje por enfermedad de su madre, sin embargo no hubo cambio de planes, ni siquiera cuando se pospuso en enlace para el sábado.

Las palabras ofensivas del príncipe Carlos contra el redactor-jefe de Alimaña News no nos extrañaría que fueran el motivo de esta ausencia. (véase artículo anterior)

El redactor-jefe de Alimaña News, fiel a su misión como informador, captó el momento en el que la novia, enfurecida, descubre que la reina ha ido a la ceremonia eclesiástica vestida de blanco impoluto, mientras que ella ha debido vestirse de gris acero y con un tocado de espigas, según el rígido protocolo para las divorciadas montaraces.

Autor: Berenice a punto de perder su reputación

Y a mí, estimado Redactor jefe, que esta boda me parece la culminación de un cuento de amor de los que ya no quedan... Me explico: No es que yo admire a la monarquía de la pérfida Albión, muy al contrario, desde lo de Enrique el mujeriego las cosas no han mejorado. Pero un amor que trapasa la edad (la novia no es un pimpollo y el novio parece un capullo más que un capullito...) una pasión que supera a una Di, tan hermosa ella, tan triste ella, y sobre todo, un amor con la Madre Isabel detrás, que quereís que os diga. Me parece que tiene algo. Constancia, paciencia y mucho recochineo para el resto del personal.
Dicho esto, comentar que me parece una estupidez esa manía que tiene la gente feliz por casarse al cabo de los años. Estoy segura que sus problemas acaban de empezar,

por capullos ambos. Ahora es cuando su amor va a pasar la peor de las pruebas. Le ruego al Redactor jefe que nos mantenga informados puntualmente de los futuros desencuentros de la pareja.

Ahora están comentando que Camila con el Carlos tuvieron un hijo que podrá ser heredero, lo cual me parece una cochinada digna de investigación por tus sagaces reporteros.
Y lo único que en serio me parece respirable de esta historia es que a pesar de su feo, es la primera vez que le veo una cara felíz al príncipe. EL PRESUNTO AUTOR DE LA DESTRUCCIÓN DEL YACIMIENTO DE PALERMO EN CASPE

El presunto autor de la destrucción del yacimiento de Palermo en Caspe (Zaragoza), presuntamente trabaja como Policía Local del Ayuntamiento de Caspe, y es el presunto propietario de unas colmenas que decidió instalar en terrenos que no eran de su propiedad.
Para facilitar el acceso creyó conveniente abrir un camino de cinco metro de anchura hasta la cima arrasando el yacimiento de Palermo.
(Presuntamente lo mío es meterme en camisa de once varas, y lo que necesito es un novio).

ALIMAÑA NEWS: SE TEME POR LA VIDA DE CAMILLA

En la imagen, la Reina Isabel II observa cariñosamente a su futura nuera.

Sepultada por el alud de hojarasca de la noticia rosa se está desarrollando una conspiración palaciega contra Camilla Parker-Bowles.
Hay agentes de Scotland Yard, del CID y del MI6 que están intentando boicotear estos planes de asesinato filtrando a la prensa, no sólo la falta escandalosa de medidas de seguridad que habrá en la boda, sino además una sucesión inexplicable de negligencias que están ocurriendo. "*Con Diana ocurrió lo que ocurrió. Su Majestad la Reina debe entender que una cosa es tomar medidas drásticas puntuales y otra muy distinta coger la costumbre de invocar a San Accidente como patrón contra las nueras". "Además* -ha añadido este superintendente (que prefiere omitir su identidad por miedo a posibles represalias- *ésta es una mula. Y una mula vieja y resabiada. Se las sabe todas, oiga. Cuente usted lo de los alfileres. No hay quien la engañe."*.
Efectivamente, cuando Camilla fue a hacerse la primera prueba de su vestido a la casa de Robinson Valentine, lo primero que preguntó fue:
-*"¿Quién ha enviado los alfileres?"*
-*"Su majestad, señora. Son de alpaca dorada"*
A continuación Camilla sacó su propia caja de alfileres y señaló el lugar donde la Reina Isabel podia clavarse los que graciosamente había enviado.
También tendrán noticia los lectores de *Gatopardo* del escándalo que ha ocurrido en el Reino Unido al saberse que dos reporteros de The Sun, pudieron entrar en el castillo de Windsor con una furgoneta que, en su interior, portaba una caja con la palabra "*bomba*". Con ello los periodistas, más que señalar la voluntaria falta de medidas de seguridad, que es la política adoptada por la soberana inglesa, han querido apuntar otra duda más aterradora: *Quién ha entrado YA en Windsor, en Clarence House o en las residencias del Príncipe de Gales*
Alimaña News ha sabido que el servicio está nerviosísimo porque se han encontrado varias serpientes (en concreto una *agkistrodon contrortrix*, una *laticauda colubrina* y siete *boigas dendrophilas*) en Clarence House cuya presencia nadie sabe explicar.
Camilla ha adquirido últimamente la "*democrática*" costumbre de invitar a comer a sus estancias privadas a doncellas y camareras. Los más ingenuos dicen que la futura Duquesa de Cornualles se siente sola. Lo cierto es que ya han ocurrido cuatro hospitalizaciones entre estas trabajadoras en estado muy grave "*por ingestión de alimentos en mal estado*".
Alimaña News advierte: El peligro está en las caballerizas. Camilla puede sufrir una caída de mortales consecuencias ejercitando su deporte favorito.

Se me olvidaba: Camilla pinchó con un alfiler real a un guardaespaldas. El oficial se dice que acaba de morir por septicemia.

POEMAS HUMANOS DE CÉSAR VALLEJO

Un hombre pasa con un pan al hombro
¿Voy a escribir, después, sobre mi doble?

Otro se sienta, ráscase, extrae un piojo de la axila, mátalo
¿Con qué valor hablar del psicoanálisis?

Otro ha entrado a mi pecho con un palo en la mano
¿Hablar luego de Sócrates al médico?

Un cojo pasa dando el brazo a un niño
¿Voy, después, a leer a André Bretón?

Otro tiembla de frío, tose, escupe sangre
¿Cabrá aludir jamás al Yo profundo?

Otro busca en el fango huesos, cáscaras
¿Cómo escribir, después, del infinito?

Un albañil cae de un techo, muere y ya no almuerza
¿Innovar, luego, el tropo, la metáfora?

Un comerciante roba un gramo en el peso a un cliente
¿Hablar, después, de cuarta dimensión?

Un banquero falsea su balance
¿Con qué cara llorar en el teatro?

Un paria duerme con el pie a la espalda
¿Hablar, después, a nadie de Picasso?

Alguien va en un entierro sollozando
¿Cómo luego ingresar a la Academia?

Alguien limpia un fusil en su cocina
¿Con qué valor hablar del más allá?

Alguien pasa contando con sus dedos
¿Cómo hablar del no-yó sin dar un grito?

Se descubren restos de la Edad de Bronce en San Floriano, Italia: Arqueologos italianos aseguran que es un descubrimiento revolucionario

La ciudad que hospedó a Federico II y Pergolessi, se sabe que es más temprana de lo que se pensaba, debido a que recientemente, se encontraron restos que datan del 1800 a. C. en las galerías del Complejo San Floriano-Ceniza que corresponden al asentamiento de "Jessi".
Marco Cercaci, asesor de Cultura y presidente del Archeoclub, argumenta: "Las excavaciones han dado grandes resultados, gracias a la colaboración entre la Superintendencia y el Ayuntamiento hemos logrado descubrir los orígenes más antiguos de la ciudad".
El estudio de los estratos revelados es decisivo, pues se llegó a una profundidad de entre cuatro y seis metros más que el nivel de la estratificación ya existente. Así, los trabajos de excavación han ido avanzando progresivamente: desde las evidencias de ocupación del s. XVII, luego la época romana, hasta las del 1800 a.C. como testimonio de la existencia del asentamiento "Jessi" durante la Edad del Bronce.
El hallazgo consiste en fragmentos cerámicos, pilares y huellas de postes. De gran relevancia, fue el descubrimiento de cerémica de importación griega (datada alrededor del 1400 a.C.), que se daban en tributo a la civilización micénica, parte de su importancia radica en que es un testimonio de un desarrollo comercial presente ya en dicho asentamiento temprano.
Sin embargo, estas excavaciones no están exentas de los problemas que ocurren durante las excavaciones pues, "El terreno de las galerías de San Floriano -explica Maurizio Landolfi de la Superintendencia- está muy alterado debido a las numerosas intervenciones desordenadas efectuadas en el pasado. Gracias a un personal sumamente competente ha sido posible definir sobre base científica la nueva morfología de la antigua ciudad.
Cercaci asegura que, a pesar de los inconvenientes, se tratará de transformar el museo, ahí ubicado, incluyendo con estos excepcionales descubrimientos: "para devolverles una historia más completa a la comunidad" dijo.
Las excavaciones seguirán adelante, gracias a los resultados obtenidos y al financiamiento por parte de la comunidad, que de esta forma apoya las investigaciones.

"HE ARRASADO EL YACIMIENTO DE PALERMO EN CASPE, ¿QUÉ PASA? ¿NO TIENES OTRA COSA DE LA QUE OCUPARTE?"

Un héroe anónimo, que por humildad no quiere identificarse, me ha contestado con ese tono viril, escueto y bronco, que caracteriza a los valientes:
-"*He arrasado el yacimiento de Palermo en Caspe, ¿qué pasa? ¿no tienes otra cosa de la que ocuparte?*- y ha mirado con sorna mis canas, el serrín que mancha mi mono de trabajo, y ha posado su mirada largamente en mis tetas, para desviarla a continuación mientras sonrie con una mueca burlona.
Pero no quiero, no puedo abreviar el encuentro con un especimen tan admirable de nuestro pueblo:
-Era un yacimiento datado en la Edad de Bronce, fue declarado Monumento Nacional en 1931, y estaba prácticamente por excavar, pendiente de unos presupuestos desde entonces... Has jodido los vestigios de miles de años para hacer un camino sin pedir permiso a nadie...
-¡No me jodas! ¿Y eso a quién le va a resolver la vida? ¡A cuatro gilipollas con pincelitos para apartar la tierra!¡Anda que no hace falta ser imbécil para estudiar Arqueología!
-¡*La policía está buscando al culpable*!
-No creo que estén buscándome mucho, porque yo no me he escondido y todo el mundo sabe que fui yo... Nadie va a decir nada...
-Pues menos mal que no se te ocurrió escribir un poema satírico al concejal de Turismo, porque tuve al policía judicial investigado todo el verano, y tuve que ir al Juzgado a depositar mis ripios poéticos, para que, ya que me iban a procesar, que lo hicieran por todos juntos.
-Vaya tontería eso de la poesía...
-¿Por favor, me firmas un autógrafo? Es que seguramente serás un descendiente directo de aquellos del yacimiento...
-No, pero te pago el café la próxima vez que te vea vestida de mujer...
Y sale del bar mientras las miradas admirativas se clavan en él...
-¡Qué tío, los tiene bien puestos! -dice uno de los parroquianos.
Y se oye un murmullo de aprobación general.
Me imagino que la noticia habrá salido en la página web oficial de Caspe, pero quizás ni siquiera estaría señalado ese tesoro arqueológico...

Anda que no se de éstas yo. Águilas, el pueblecico costero de mis padres, está construido sobre una urbe romana y cada vez que una constructora excava cimientos para un nuevo edificio le aparecen restos arqueológicos. Normalmente la constructora disimula y hace por taparlo rápidamente, pero como ya se sabe lo que hay, a poco que se descuide la pillan y la obligan a parar las obras.
Por suerte (para el constructor y el contratista, claro) al segundo día de parón, en plena noche y con encubrimiento y alevosía, suelen entrar una pandilla de vándalos que derraman el hormigón y se lían a destruir piedra a pico limpio. Y una vez hecho el destrozo, con todo el dolor de su corazón, la constructora continúa su edificación, sin atinar a entender como supieron los vándalos manejar la hormigonera, ni que motivos los llevaron a tal destrozo.
Y es que estas cosas, en los pueblos pequeños, son secretos a gritos...

Ahora va cuando me tiran piedras. Abomino de los pedruscos históricos, me caen gordos, nunca he entendido por qué hay que guardar todo lo viejo por el solo hecho de ser viejo. Algunas obras importantes se han visto impedidas porque había que preservar unas cloacas ¡! romanas, como pasó en la zaragozana plaza de la Seo. Sí, unas alcantarillas de adobes que son una risa costaron mil millones de pesetas de aquellas a los maños. ¡Es la leche! Vale que haya que conservar piedros bellos y elegantes, vale. ¿Pero cualquier cagarruta? ¡Por dios! Los municipios se gastan dinerales en preservar un

abadía, un convento, de cuando iban en cota de malla, y que no tiene ningún mérito artístico. Y los méritos históricos normalmente son los que pueda tener un lugar donde se oprimía al aldeano y se difundía el error y se defendían derechos feudales que hoy nos horrorizarían. Yo propugno el uso del buldocer para alisar todos los monumentos históricos emergentes y convertirlos en parques con arbolitos y columpios. ¡A la mierda con la historia de una puta vez, coño! Si la historia no es más que el cuento de cuánto le han dado por saco al personal los que mandaban, a qué ese interés en admirar lo histórico. Que se gasten esos dineros en lo de los drogatas, en asilos para viejos, en cosas que realmente sirvan al ciudadano.

Yo lo que sé es que Egipto, que era el país más pobre del mundo mundial, gracias a sus piedras tienen ingresos por el turismo de calidad que les ha permitido tener unas universidades de primera línea y ha subido la renta per capita de toda la población. Desde que pusieron en marcha un plan global para preservar y mostrar sus piedras viejas.
Respecto a Zaragoza, pues compara lo que Italia o Uncastillo obtiene con una Ley del Patrimonio que impide remodelar una casa antigua encementando toda fachada donde haya piedra de sillería con Caspe, por ejemplo, que dejan fastidiar la judería y las casas de más de 400 años y cada vez es más horroroso su aspecto. Si vamos a valorar el beneficio económico te comunico que el turismo y la reivindicación de lo antiguo ha sacado a los pueblos de Castilla-La Mancha y ha multiplicado por diez la renta per capita de los habitantes de sus pueblos, que ya no tienen que emigrar.

Los yacimientos son lugares temibles donde los hombres de siglos pasados guardaron sus armas de destrucción masiva. Es lógico que un bruto haga de vez en cuando un favor a la humanidad echando tierra o bombas encima. Se pueden encontrar esos artilugios hasta en los lugares más insospechados.

Algún día alguien excavará y encontrará el disco de almacenamiento donde se guardan todas estas conversaciones, seremos patrimonio de la humanidad.

Hace algunas semanas visité el castillo de Yeste (Sierra del Segura -Albacete-)acompañado por un familiar yanqui (y por tanto no demasiado culto). La guía era una chica joven del pueblo contratada por el ayuntamiento. Era simpática y habladora y estaba bastante bien informada. De modo que nos explicó con bastante detalle la historia del castillo, el uso de sus dependencias, dejando muy claro lo que estaba restaurado y lo que no, así como la época de construcción de cada una de sus partes. Desde aquella altura también nos dibujó el pueblo antiguo y su extensión en cada una de las épocas de ampliación de la fortaleza.

Fuimos describiendo las ropas y uniformes de las gentes que pasaron buena parte de sus vidas allí y acabamos jugando a que se producía una batalla y dónde deberíamos colocarnos cada uno en función de su cargo y condición y qué debíamos hacer...

Y para que una chica espabilada, tras unos someros estudios de turismo e historia local pueda vivir en su pueblo con los suyos escapando al destino que sin duda le aguardaba de peón en la conserva en Murcia o en la cerámica en Castellón, igual que casi todos sus familiares en décadas pasadas.

Volví en 1997 y fue impresionante el cambio hasta en el físico de la gente: la juventud no tenía que emigrar, había iniciativas privadas sin tener que estar bajo el yugo de los caciques, y todo empezó por el turismo rural y la recuperación de lo antiguo, con el cuidado y la restauración con los elementos tradicionales... ¡Lo que hay que leer...! Espero que Oz se retracte de tan atroz comentario. Pensaba esta mañana comenzar un texto sobre la influencia del mundo clásico, griego sobre todo, en nuestra vida actual. Pensaba reflexionar sobre la palabra que da orígen a la estatua del discóbolo o a las cariatides..., sobre Homero y la cosmología que nos ha dado nombres, mitos y vida para estar otra vida descubiéndola. Pero visto lo visto, ¿para qué? Si por Oz fuera, supongo que las creaciones artísticas actuales deberían ser destruidas antes de la muerte del autor. Total, en dos o tres años se van a convertir en parque temáticos... Por cierto, Oz, que los parques de hoy en día se pavimetnan con gres y pizarra, las farolas son de metal y los árboles no se pueden plantar por que a los seis o site años las raices pueden levantar el pavimento. Y quedan tan bonitos los viejos sentados en sus bancos de diseño...
Si algo tiene de bueno la propuesta de olvidarnos de la Historia y del Arte, es que Gato y yo ya no tendremos que sufrír más por la destrucion del Buda por los talibanes, por los yacimientos arrasados y por los libros y los cuadros quemados... La cultura turística cambiará radicalmente. (Sigue)

En los planos turísticos veremos señalizados los parques públiocs, los centros comerciales (creo que van a abrir uno en Cendillejos de la Cuesta)y los parques temáticos (el último sobre los orcos ya se está diseñando)
La ventaja de que nos olvidemos de la Histria y el Arte es que el Gato y yo no dendrémos que sufrir ya por ver como los bárbaros vuelan una estúpida piedra de 4.000 años, que representaba una filosofía oriental ya desfasada o un cazurro de boina y tractor John Deer arrasa yacimientos que vaya ud. a saber para qué sirven.
Señor, Oz, espero, con todos mis repetos que reflexiones seriamente sobre la importancia de llamarse Oz (supongo que el camino amarillo no le es ajeno) y mantener la compostura ante una crítica sin acritud. Me gustaría que el señor Pendón Volteriano afilase su pluma y le dedicase algún ditirambo adecuado a la situación, dado que a mí las musas solo me hablan de amor, perdón y deseos de recuoeración.
Y a Garopardo, mis más sentidas condolencias por el atentado histórico y a gorrazos con ese animal de bellotas, que debía necestiar el camino para subir a ciscarse en sus muertos, ¿no? Un beso para ti y un saludo (en el fondo le entiendo, pero muy en el fondooooo) a Oz.

Nada, nada, ¡el buldocer! Reconozcamos de una vez que la influencia de la historia no es tanta, y que nos influye más un chino de hoy, que está a la vuelta de la esquina, que uno de nuestros abuelos. Esto antes no pasaba y la historia tenía su cachito de importancia. Son tiempos nuevos, miremos hacia adelante. ¿Qué se puede aprender de la historia, si es una sucesión de guerras, opresiones y espantos? ¿Se aprende gramática de un libro lleno de faltas? Si decimos que obtenemos una enseñanza de la observación de la historia es porque obtenemos una enseñanza de cualquier cosa que observemos, no porque la historia sea especialmente edificante.
Lo histórico cuesta más de lo que vale. Si hemos de ser civilizados, sentémonos, pensemos, hablemos y miremos al futuro, eso sería más constructivo que leer los torcidos, sesgados y parciales libros de historia.

REIVINDICACIÓN DE LA ZARZUELA

Soy salvaguardia de la sociedad,
soy policia de seguridad,
un polizonte con este poder
y por aquí ya lo ve usted.
Con esta mano sostengo el bastón,
con ésta el sable que no es de latón
y si me encuentro cualquier criminal,
yo nunca sé qué mano echar.
Todo se halla en paz en la población
y si alguien se queja no tiene razón,
porque debe haber gran tranquilidad,
con la policia de seguridad.
Si hoy se me escapa un pillastre ladrón
o si no doy con un tocho gandul
es porque no tengo a mano un cañón
como el que tuvo el señor Barba Azul.
Mas si algún día lo llego a tener
y es un proyecto del cual voy en pos
en cuanto yo empiece a cañonazos,
Apaga y vámonos.

"Vals de la Seguridad" de "La Gran Vía", de Federico Chueca y Joaquín Valverde.
Este Vals, junto con "El Pasodoble de los Sargentos" se añadió a la partitura a partir de las representaciónes de 1887. Se les omitió en las representaciones posteriores a la guerra civil, y no se recuperan hasta 1996.El Vals era considerado irreverente con la autoridad y el pasodoble estuvo prohibido porque reflejaba el malestar del ejército ante su posible reconversión en funcionarios civiles.Amén.

TANGO DE LA MENEGILDA Y DE DOÑA VIRTUDES

¡Pobre chica, la que tiene que servir!
Más valiera que se llegase a morir;
porque si es que no sabe por las mañanas brujulear,
aunque mil años viva,
su paradero es el hospital.
Cuando yo vine aquí
lo primero que al pelo aprendí,
fue a fregar, a barrer,

a guisar, a planchar y a coser;
pero viendo que estas cosas
no me hacían prosperar,
consulté con mi conciencia
y al punto me dijo "Aprende a sisar."
"Aprende a sisar, aprende a sisar."
Salí tan mañosa, que al cabo de un año
tenía seis traies de seda y satén.
A nada que ustedes discurran un poco,
ya saben o al menos,
ya se han figurao
de dónde saldría
para ello el parné.
Yo iba sola por la mañana a comprar
y me daban seis duros para pagar:
y de sesenta reales gastaba treinta,
o un poco más,
y lo que me sobraba me lo guardaba un melitar.
Yo no sé como fue
que un domingo después de comer.
Yo no sé que pasó,
que mi ama a la calle me echó;
pero al darme el señorito
la cartilla y el parné
me decía por lo bajo:
"Te espero en Eslava tomando café."
"Tomando café, tomando café."
Después de este lance serví a un boticario,
serví a una señora que estaba muy mal;
me vine a esa casa y aquí estoy al pelo,
pues sirvo a un abuelo
que el pobre está lelo
y yo soy el ama,
y punto final.

Tango de doña Virtudes

Pobres amas

las que tiene que sufrir
a esas truchas
de criadas de servir;
porque si una no tiene
por las mañanas mucho de acá,
crea usted, caballero,
que la dividen por la mitad.
El domingo pasao
a un pendón que es de al lao de Bilbao,
el permiso la di
para ir al teatro Madrid;
y le dije en la escalera
cuando ya se iba a marchar:
-"Cuidadito que te vengas
así que se acabe,
por si hay que fregar".
Usted se figura que vino a las ocho,
que vino a las nueve, que vino a las diez,
pues vino a las doce con un artillero
y dijo el grosero
con tono altanero:
"Señora Virtudes ...
dispénsela ustez".
Tuve otra
que era de Valladolí,
y tenía unos bigotes así.
Y mi señor marido,
que es peluquero ... por afición,
me dijo: "A ésta la pago
con la navaja y con el jabón".
Pues, al mes no cabal
me faltó un cucharón de metal
y una falda de tul
que hallé registrando un baúl.
Me faltaron dos pendientes de azabache superior,
y, por fín de tantas faltas,
faltóme mi esposo, que fue lo peor.
Después tuve una que a poco me pega;
después tuve otra que sí me pegó,
y, en fín, tuve una tan buena persona,
que friega, que barre,
que lava, que cose,
que plancha, que guisa,
porque esa soy yo.

El anterior me ha gustado mucho. Y este me resulta entrañable. Siento apelar a mi infancia, pero mi padre (un ser especial) me llevaba a ver zarzuelas, por las cuales yo quedaba fascinado para siempre. Guardo imágenes incorruptas en la memoria de muchas de aquellas representaciones. No sé si es exactamente la zarzuela lo que te interesa, pero acabo de llegar de otro "mundo" y es lo primero que me ha salido.

UN PUÑADO DE LINCES SOLITARIOS

Hace unos días la prensa informaba de un descubrimiento esperanzador y hermoso en el campo de la zoología de la península. Existen colonias vivas de lince ibérico en los Montes de Toledo, en la región limítrofe de las provincias de Ciudad Real y Jaén, cuya extinción había sido corroborada por los estudiosos hace años. En un minucioso estudio de campo se ha recogido heces de los amimales y, a través de estudios de ADN, se ha comprobado que pertenecen a individuos distintos, lo que garantiza que, aunque pequeña, existe una colonia de estos animales. El estudio, según se informaba, se encuentra ahora en la fase nada fácil de fotografiarlos e identificarlos para elaborar un plan de acción que favorezca su supervivencia.
Que exista un puñado de linces en un territorio donde los creíamos extinguidos, puede que no sea asunto trascedente. Pero yo los he visto durante todos estos años caminando entre las breñas envueltos en un halo de silencio, mirando y viendo hasta

más allá del horizonte para medir el espacio de sus soledades, los he visto con sus picudas orejas peinando el viento para entregar a los conejos con la muerte la épica de la que carecen. Los he visto adustos y mimosos cuidando a sus cachorros, siempre los últimos cachorrros de la especie. Y los he visto dejando, acaso descuidadamente, sus heces para que otros compongan el rompecabezas.
Que yo haya soñado todo eso no es desde luego en modo alguno asunto trascendente. Pero la noticia y el sueño me han mostrado que existen personas que como los linces sobreviven en el olvido, que viven en el eco de su desaparición. Personas que viven solitarias en las anchuras de nuestro tiempo, que viven entre los otros sin que nadie los vea. Personas que aman el saber callado, que afilan como los linces sus uñas en los troncos del pensamiento, que critican su mundo por el instinto de un amor feroz a sus semejantes. Hablo de filosófos, poetas y otros resistentes. Son personas que se esconden del disparo narcótico del despilfarro, del tiro de la idiotez común. Piensan. Son libres. Casi no existen. Son supervivientes en un mundo que los desplaza roturando los bosques frondosos de las ideas, envenenando la cultura de que se alimentan, atravesando sus veredas solitarias con las autopistas de una información enorme y vacía. Con sus heces, dejadas acaso descuidadamente, otros compondrán nuestro enorme rompecabezas.

Es un texto que va más allá del comentario de actualidad para hacer una parábola de los "outsider", como depositarios de la superviencia de lo genuinamente literario, filosófico, científico.
Creo que en todas las épocas sólo se ha vitoreado y aplaudido a los cantantes, a los toreros y a los actores; y la diferencia es que ahora se pretende una popularidad que ponga al escritor, al científico, al filósofo en pie de igualdad con Alejandro Sanz o Penélope Cruz. Y lo consustancial en el estudioso y en el creador es la soledad.

No puedo expresar lo que he sentido al leer este articulo de León. Si hablamos del lince(animal) y, es cierto lo de su vuelta al ecosistema, me parece una noticia esperanzadora y magnifica. Pero no, eso no es lo que me ha emocionado de el post, sino la mención a gente que como el lince no desaparece, pero pocos ven, gente que permanece callada, sobreviviendo ante los demás en silencio pero viva interiormente para si misma.
No sé explicar bien mis sentimientos pero si sirve de pista he sentido por dentro una emoción comparable quizá a la que, como veo en televisión está sintiendo mucha gente por la muerte de Juan PabloII, y que yo he sido incapaz de sentir. Porque pocas cosas ya me emocionan.
Gracias León por emocionarme.

Avicena o Ibn-Sina, Abu-'Ali Al-Husayn Ibn-Sina (980+1037), el genial autodidacta, filósofo, médico, gran visir de Hamacan y autor del "*Canon de Medicina*", que fue durante cuatro siglos el principal texto de medicina en Europa, escribió también una enciclopedia de las ciencias, y más de cien obras de diversas materias. Fue necesario su genio para inventar la destilación de plantas aromáticas, e hizo falta siglos para que se dominase los mecanismos que permiten fabricar perfumes.

El perfume era importante para los árabes: el aljez para construir mezquitas se mezclaba con almizcle para que, al calentarse al sol, expandiera su aroma, e introdujeron en España el jazmín y el alambique, que permitió el desarrollo de la perfumería, su comercio y transporte.

Hasta comienzos del siglo XIX, el perfume se utilizaba para vencer el hedor y la pestilencia reinantes. Los nobles demostraban su delicadeza poniéndose un pañuelo perfumado bajo la nariz, comprando guantes curtidos en Grasse, perfumados según receta autóctona.

En la corte de Versalles, las damas de alta alcurnia llevaban cosidas al bajo de sus vestidos pedazos de carne cruda para que las pulgas, las chinches y los piojos acudieran allí en busca de sangre.

Debajo de la peluca empolvada los aristócratas tenían el cráneo afeitado como medida de higiene contra los parásitos, y unas varillas de materiales preciosos, preferentemente marfil, servían para rascarse elegantemente la cabeza sin tener que quitarse la peluca en público.

La idea de bañarse fue una aportación de los pueblos primitivos y paganos y fue acogida con suspicacia por los pueblos civilizados.

Los cartujos de la ciudad alemana de Colonia regalaron en 1792, al hijo de su regidor, como obsequio de boda, su famosa "*aqua mirabilis*", que usaban como ungüento medicinal para librarse de enfermedades como la sarna. Se puso de moda y

algunos snobs, pisaverdes, dandys, cursis, subversivos y extremistas, se frotaban enteramente con ella y salían rebozados en un aspecto limpio e higiénico, cosa que debía de indignar a los bienpensantes (no es de extrañar que enseguida viniera la Revolución Francesa), y los cartujos tuvieron que aumentar la producción del "*Agua de Colonia*", que se fabricaba en el número 4711 de la calle y pasó a llamarse así.

Entre las glorias y grandezas del imperio británico, la Reina Victoria de Inglaterra perdió a su marido arrebatado por las tifoideas, como millones de europeos, porque el sistema de canalizaciones y letrinas era un foco infeccioso permanente, y las normas de higiene corporal más elementales se ignoraban.

Marcial, contemporáneo de Nerón, también desconfiaba de los preceptos higiénicos de los jóvenes romanos:

" Pensando en tu novia, Andrés,
te depilas pecho, axilas,
pubis, minga, piernas, pies…
¿En quién piensas tú, Andrés,
cuando el culo te depilas?

Un perfume es una joya evanescente. La ciencia para recrear artificialmente lo que existe no puede sustituir para un amante del perfume la fragancia de una rosa, el límpido frescor del espliego… Los "*nez*" que intentan encontrar la armoniosa yuxtaposición, no pueden explicar el misterio del olfato y del perfume.

Es relativamente fácil calcular a qué distancia de años luz se encuentra una galaxia, cuantos siglos hace que desapareció en un agujero negro la estrella que vemos brillar en la noche, se puede medir los decibelios de una nana susurrada amorosamente y el fragor de una batalla: pero no hay unidad de medida para el perfume; no hay sensor electrónico que cuente las notas aromáticas, el arpegio de una fragancia, sólo la nariz.

Se puede hablar de un olor "*tipo jazmín*", "*tipo musgo*", "*tipo almizcle*", pero la genialidad del perfumista estriba en percibir un olor y ser capaz de crear la fórmula con sus proporciones infinitesimales de esencias, donde entran cientos de materias primas, para reproducir exactamente ese perfume.

Aimé Guerlain, el creador de Jicky, fue el primero que estableció un perfume con diferentes "capas" o notas de duración:

La primera, nota *de tête* o nota alta, con efluvios más volátiles, de cítricos, bergamota, lavanda, enebro, etc. dan la primera impresión, es la nota predominante, y dura aproximadamente una hora hasta que empieza a desvanecerse. La nota media, nota *de coeur*, surge cuando empieza a desaparecer la nota *de tête*, y es la que le da carácter, requiere fragancias menos volátiles, menos ligeras, compuestas normalmente de aromas florales y madera, que vayan emanando sin desvirtuar la personalidad general del perfume, para desaparecer paulatinamente al cabo de dos o tres horas. La nota baja o nota *de fond*, está compuesta por fragancias aún menos volátiles; son la base que fija el perfume y le da cohesión, compuesta de maderas, Chypre, fougères, ámbar, etcetera, y puede permanecer más de veinticuatro horas.

Una gota, tan sólo una gota en el fondo de un frasco y me vuelve mi infancia, las tardes eternas del verano, el patio encalado y preñado de flores, la rama rezumante de la sabina con su lágrima ámbar que me hizo llorar, porque era un perfume cargado de dicha, de alegría, como un privilegio que jamás merecí.

Il est de forts parfums pour qui toute matière
Est poreuse. On dirait qu'ils pénètrent le verre,
En ouvrant un coffret venu de l'Orient
Dont la serrure grince et rechigne en criant.

¿Y qué opinión te merece eso de la aromaterapia? ¿Crees que puede haber buenos olores que curen, y malos olores que enfermen, insalubres, como un río apestoso, un vertedero, un órgano en descomposición, una ventosidad...? 0:)

Respecto a la aromaterapia, si que creo, ¿cómo no? El olor rancio de sudor y de orines que acompaña a algunos viejos es disuasorio para que sintamos afecto por ellos y seamos capaces de ofrecerles nuestra amistad. A pesar de nuestras convicciones a favor de los pobres viejecitos. Hasta ese punto afecta a nuestros sentimientos un aroma... Tengo estudios clínicos hechos en consultas de dentistas con el ambientador, y os lo contaré un día de estos.

Yahvé pidió a Moisés la confección de un perfume de su agrado: -"Toma para ti los perfumes más selectos de mirra en gotas cuajadas, quinientas unidades, y de cinamomo, la mitad de esa cantidad, doscientas cincuenta unidades, y de cálamo aromático doscientas cincuenta unidades, y de casia quinientas unidades, según el siclo del lugar santo, y de aceite de oliva un hin aromático, entonces tienes que hacer de ellos un santo óleo de unción."
Así habló Yahvé.
A las mujeres de la antigua Grecia que elaboraban los perfumes, se les consideraba intermediarias con el poder divino… Los romanos invocaban a sus dioses "per fumum", quemando materias olorosas; honraron a sus dioses y a sus héroes ungiéndolos con aceites perfumados de sándalo, enebro, canela... Los héroes nórdicos adoraban la naturaleza, el bosque era sagrado y creían que el perfume que exhala iba directamente al Walhala, el paraíso que los acogería.
¿No es esto sabiduría?
La evaporación de los aromas ha sido una característica inevitable hasta que se descubrieron los fijadores del perfume, que es una parte interesantísima de la perfumería, que os contaré.

Conocía una parte de lo que has contado desde que leí "El perfume" de Patrick Süskind, ese libro me hizo plantearme las consecuencias del mal que afectaba a su protagonista, la carencia de olor.
Realmente si no olemos a alguien podemos tropezar con el? Lo miramos como a un ser extraño, carente de cierta áurea humana? Consulté con mi hermana (que nació con el sentido del olfato atrofiado) estas carencias y mis dudas, y descubrí entonces la importancia de ese sentido que menospreciamos y olvidamos. Sería largísimo referir todo lo que ambas comprendimos acerca del olor en esas charlas que mantuvimos sobre el libro, quizá en otra ocasión…

Bueno aqui he estado y he leido tu estupendo post sobre perfumes. Me encantan los perfumes , casi todos, algunos son intolerables, desde luego, durante muchos años el único que usé fue colonia para bebés, pues el presupuesto no me daba para más, ya con la edad es lo que pido que me regalen.

Te he enviado un e-mail en respuesta al tuyo, queria que lo supieras aqui, a veces se pierden.

En el fondo este texto es un alegato contra la ducha. Obviamente apoyaría esa tesis. Medio frasco de perfume bien distribuído (una colonia cualquiera, comprada en el Sepu o en el Día) y no hay ninguna necesidad de andarse duchando, que por otra parte daña tanto la piel.
En las últimas líneas del prolijo texto me ha sorprendido gratamente comprobar que la Sra. Gatopardo alguna vez fue felíz. Enhorabuena.

CARLOS DE INGLATERRA HA DICHO MIRANDO A ALIMAÑA (REDACTOR-JEFE): "¡BLOODY PEOPLE!"

«Maldita gente, no puedo soportarlo...»

El príncipe Carlos de Inglaterra, con el labio inferior torcido y en voz baja, dijo mirando a nuestro corresponsal,y redactor-jefe de Alimaña News: *"¡Bloody people!"* -mal traducido en la prensa española como *"maldita gente"*. Todo sucedió este jueves en la estación suiza de Kloster donde se encuentra de vacaciones con sus hijos Guillermo y Harry.
El hecho fue difundido por los principales medios internacionales cuando falta poco más de una semana para que se case con Camila Parker Bowles.
El redactor-jefe de Alimaña News no pudo romperle los morros porque estaba rodeado de escoltas, y dijo: "*Arrieros somos*...", que ha sido mal traducido por la prensa inglesa como "Estamos retrasados".

GATOPARDO HA PEDIDO A LA CASA REAL ESPAÑOLA QUE SE SOLIDARICE CON NUESTRO CORRESPONSAL.

En respuesta, el próximo sábado 8 de abril, los miembros de la Casa Real Española que estén

de servicio han optado por acudir a una investidura *honoris causa* a Salamanca, y no asistirán a la boda de Carlos y Camila.
¡Así, con un par!¡Gibraltar español!

Alimaña News seguirá informando a nuestros lectores.

Que alegría volver a verle por aquí señor Alimaña, ¿la señora bien?
Veo que continúa en su egocéntrica tónica de “el mundo gira en torno a mi ombligo” y se atribuye usted el total direccionamiento hacia su persona de las palabras del príncipe Carlos. Bien, puedo creer e incluso compartir que tan variopinto personaje dijera tal insulto referido a usted, pero no conseguirá hacerme creer que la prensa inglesa recogió ninguna de las memorables frases que usted dijera en respuesta.
Señora Gatopardo, yo dudo mucho que haya boda a la que asistir si el metepatas principesco continúa así, e intuyo que en breve tendrá usted que prescindir de los valiosos servicios de su monotemático redactor jefe si éste se empeña en hablar de un evento tan próximo a la extinción.

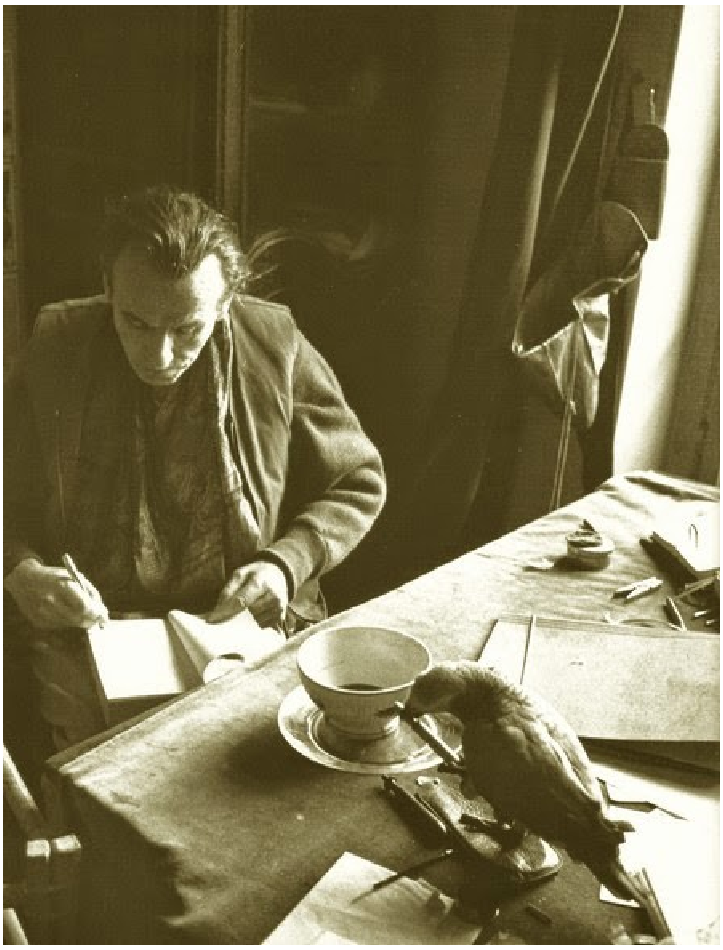
HOTEL CELINE



HOTEL CÉLINE, es un artículo de Guillermo Piro, que me habría gustado haber escrito yo.

El enlace permanente a la bitácora WIMBLEDON de Guillermo Piro estará en portada, y os prometo que vale la pena leerlo.

Yo leí con veintidos años a Céline para odiarlo y negarle el derecho a permanecer en las Bibliotecas, porque era un escritor antisemita. Y fue deslumbrante, arrasador, y lo más hermoso que jamás hubiera leído: daba igual qué pensara y qué dijera, porque su forma de narrar y mirar me hizo considerar que la plenitud de su obra era más importante que mis sentimientos de venganza, que confrontados con sus textos me parecieron mezquinos.

En las imágenes, Céline, Bébert, su gato, y Lucette, su mujer.

HOTEL CÉLINE

Tal como se habla de "amor loco", de los libros de Céline podríamos decir que se trata de "literatura loca". Son libros sobre locos, escritos por un loco, y son, entonces, libros de una belleza loca.

Como los pulpos o las estrellas de mar, estos libros logran mostrar y esconder al mismo tiempo el secreto del cual son a la vez únicos depositarios y fascinantes reflejos. La verdad es su verdad. Y la búsqueda de la verdad es una actividad sumamente incómoda, ya se sabe; incluso podríamos decir patológica. Estos libros llevan en si mismos la gran dialéctica moral, y la condición de esa dialéctica

es ésta: es mejor morir que durar. La función curiosa e inquietante del arte consiste en seguir recordándonos eso, y decirnos que, al fin y al cabo, la verdad es más importante que la justicia y la libertad, e, incluso, que nuestras esperanzas. Los libros de Céline no existen para confortarnos ni para darnos una "postura equilibrada". Todo lo contrario: se bucea en ellos ya sin aire, como si se estuviera trepando una montaña embarrada. Y sin embargo, o precisamente por eso, las hojas que leemos se desgarran para desgarrarnos. Su propósito es amenazar nuestro equilibrio. Esa es la única función del arte. Y los que traicionan esa función, aún en nombre de un credo humanitario, traicionan el arte. El arte traicionado enseguida se venga, y lo que pronto resulta es un arte tan muerto como la carne fría. El hombre que odiaba a su especie terminó donde debía, admirado, copiado, clásico entre los clásicos, a la derecha de Casanova y a la izquierda de Cervantes. Hasta Rabi, para denigrarlo, escribe como él.

Decir de él "es el mejor novelista del mundo" es decirlo todo. Para ponderar sus méritos debería bastar con eso. En efecto ¿para qué hablar más ampliamente del Viaje, de Muerte a crédito, de Guignol's Band, de la Trilogía alemana? De estos libros decimos "son los mejores libros", y es decirlo todo. ¿Por qué? Porque es así, y solo en la literatura está permitido utilizar un razonamiento tan infantil. ¿Por qué? Porque es literatura, y la literatura se basta a sí misma.

Hay un muro que la literatura erige entre el lector y la vida que con Céline se derrumba bruscamente. Con él uno no se siente como si estuviera lidiando con un "autor", un escritor munido como todos de una aureola de filigrana, que goza del privilegio de la expresión y sabe "espolvorear el orégano en la pizza", sino con un hombre que no sabe expresarse mejor que cualquiera de nosotros y que se ve obligado a empuñar la pluma para decir lo que tiene en el corazón.

Hay escritores que tienen un estilo, y otros que lo buscan. Existe un estilo Rimbaud, no hay un estilo Mallarmé. Casi siempre la crítica ha confundido la creación de un estilo con la fabricación de un lenguaje. No existe un estilo Céline, existe una lengua celiniana.

Se podría discutir eternamente este problema porque es un problema de nuestro tiempo, el problema del "estilo hablado". La novela francesa de este siglo se orientó visiblemente hacia la búsqueda de un estilo hablado en escritores como Giono, Aragón y Céline. El mismo movimiento se dió en Estados Unidos, donde escritores como Faulkner y Wolfe libraron una tentativa paralela, aunque en Faulkner se trate más de un estilo pensado que hablado. Céline busca lo insólito, a toda costa, porque lo insólito es una convención y, tras esa convención, hay que regresar, también a toda costa, a una verdad. Y si a veces se pierde buscando la locura detrás del realismo lo hace porque para él la única manera de redescubrir el verdadero rostro del realismo es encontrándolo detrás de la locura. Es por eso que nos parece que las palabras de Céline "lavan" los rostros, así como el lienzo de Santa Verónica lavó el Divino Rostro. Y es que Céline no sabe "redactar", no consigue "relatar" una idea, no sabe "vestir" una idea con palabras. Las palabras son como los gritos, se escapan. Las palabras son actos, confesiones de debilidad. La palabra es la venganza de los débiles.

Cuando el mundo fue creado, fue necesario crear un hombre especialmente para ese mundo, adaptado a su rigor. Todos estamos deformados por la adaptación a la libertad de Dios. No sabemos como seríamos si hubiéramos sido creados en primer lugar y después el mundo adaptado a nuestras necesidades. Céline fue creado antes que la literatura. Por eso sus libros están deformados, adaptados a su libertad. Céline escribe como quien pinta. Todos los escritores "dramatizan" los hechos. Céline "desdramatiza", esto es, lo importante no es "contar una historia" sino elaborar un universo vivo, un mundo en torno y "con" determinados personajes. Eso se ve claramente en la Trilogía alemana.

Céline no logra "contenerse", la estructura no puede visualizarse, entenderse. Lo que sale a la superficie ya viene con o a través de las palabras o no existe. Y en este punto descubrimos en qué consiste la astucia, el verdadero arte de Céline: parece natural... con naturalidad. Cambia el lenguaje escrito no por un lenguaje hablado, sino por un lenguaje hablado escrito.

En la primera página de *Muerte a crédito* Céline dice: *"Contaré cierto tipo de historias para que ellos vuelvan, expresamente, a matarme; volverán desde los cuatro rincones del mundo. Entonces todo habrá terminado y estaré contento."* Céline se vanagloria. Solo se desea matar a los hombres que dicen la verdad. Si eso es cierto, entonces él solo simula decirla. Céline miente: la gente compró sus libros y nadie lo mató. La izquierda de la década del '30 había creído ver en Céline a un nuevo Zola. Céline declaró un día, hablando del autor de *Germinal*: *"Sabemos hoy que la víctima pide siempre más y más martirio."* Quizás en el mundo tal cual es, en este mundo que solo puede destruirse a sí mismo, el deseo sólo puede ser masoquista. Eso explicaría muchas cosas. Es una pasión masoquista la que sostiene a Céline sesenta y siete años. Céline poseía en grado supremo el arte de ponerse del lado equivocado. Excitaba el destino que sabía iba a terminar por hacerlo sufrir. Se podría recopilar una gruesa antología de sus errores y torpezas.

Pero en cambio no hay una sola página suya que pueda "entrar" en una antología. Es un talento del que carecen, en general, los novelistas, buenos administradores de sus dones. La narración celiniana es un todo cuyos elementos no se pueden disociar. Es un hecho que el lector impaciente que emprende la lectura de la Trilogía alemana debe esperar veinte, cincuenta o cien páginas hasta el momento en que "empieza" el relato. Y más adelante encuentra la continuación de ese relato interrumpida y retomada constantemente. Y las digresiones no hacen mas que aumentar la impaciencia: Céline habla de su destino personal, no hay casi más que quejas y recriminaciones. Pero el lector no puede parar: pide más y más martirio. Si existe una, ni en *De un castillo a otro*, ni en *Norte*, ni en *Rigodón* está la puerta de entrada a Céline. Llegan a ellas lo que han sido previamente inoculados con el veneno y tratan de encontrar su procedencia. Son novelas para adictos.

La puerta está en el *Viaje* o en *Muerte a crédito*. Quizá esté en *Semmelweis*, la tesis, la excepcional biografía del médico húngaro descubridor de la fiebre puerperal, con la que Céline obtuvo su doctorado en medicina. Sus fobias ya están allí. Quizá sea la "entrada de servicio" por la cual podría accederse a ver con más claridad. Pero el que lee el *Viaje* queda indefectiblemente estupefacto, como presenciando una erupción, de esas cuyo aliento, nos cuenta la historia, da siete vueltas y media a la Tierra. No se lo lee impunemente, nada se vive impunemente, nada se contempla sin peligro de muerte. Céline es el héroe negativo de El talón de hierro de cuya mano somos conducidos a visitar el infierno. No se puede seguir contemplando el discurrir del día después de leer *Muerte a crédito*, como si nada hubiera ocurrido: debemos empezar de nuevo. Ya no se verá con los mismos ojos. El comercio con Céline nos comprometió. El fin de la noche siempre estará por llegar.

George Steiner declaró haber notado que una adhesión metódica, persistente, a la vida de la palabra impresa frena la inmediatez, el lado conflictivo de las circunstancias reales. Respondo con más entusiasmo a la tristeza literaria de Bardamu que al infortunio del vecino. Bardamu es más mi hermano que mi hermano. Lloro con Bebert, recito de memoria la despedida en la estación de trenes de Ferdinand y Molly, la prostituta de Detroit, y me muevo en un infierno material.

Steiner tiene razón. El logro de Céline acaba siendo siniestro.

Aquellos para los que las mañanas son mañanas no encontrarán en Céline más que logorrea. Céline necesita de aquellos a los que la luz más atenuada hace daño; necesita de aquellos para

quienes todo lo que entra en la mente es brutal después que algo verdaderamente brutal entró en ella una primera vez.

Nigel Dennis, hace poco, citó una frase genial. Reflexiones sobre ella. Por lo demás, la frase no es de Céline, sino del mismo Steiner: *"Como vivimos en un mundo diseñado en gran parte por Kafka, incluso puedo concebir que a veces la verdad salga de bocas inhumanas y bestiales; la verdad es tan compleja que se aloja en algunos hoteles terribles."* Yo agrego otra frase de Steiner: *"Quizá estemos locos también, porque somos los que tenemos el valor de confesar que los libros son más importantes que los seres humanos."*

Céline es a la literatura lo que los anticuerpos a la medicina. Si sigue siendo literatura lo es, ante todo, porque es antiliteratura. Si los caminos del arte son imprevisibles es porque los de Louis-Ferdinand Céline lo son.

En pocas palabras, entre los distintos privilegios de que goza la literatura está el hacer de su estética su ética. Aún aquellos que "teman" a Céline perderán ese temor cuando vean que sus propósitos nunca acaban con todo. La literatura también hace lo que está a su alcance para destruirse a sí misma. Es Céline el que va corriendo en su socorro.

Ay madre que ha puesto usted el nivel de calidad tan alto en su botón "*enviar*

comentario" que no me pasa por alto el comentario que yo quería mandar para el artículo "*enseñanzas que nos vienen del pasado y se quedan a tomar café sin traer pastitas*" sobre la red echelon y otras vísceras, y como soy una enchufada de mierda se lo mando por aquí por email para que haga lo que le parezca más conveniente con él, que yo ya después de tres intentos me doy por vencida tristemente. besos por qué no.
Sí, sí, lo de la red Echelón es absolutamente cierto, a mí ya me han pasado algunas cosas que me hacen sospechar que estoy siendo vigilada. Lo digo porque el otro día me acerqué a la plaza a por fruta, al puesto de Pedro **(1)**, que es mi frutero de toda la vida, y le digo los tomates a cuánto y me dice a tanto están y le digo coño Pedro esto es terrorismo de estado, y en eso que vemos un flash fotográfico muy grande que se disparaba desde el cielo sobre los tomates, digo yo que de un satélite espía que inmortalizaba el momento a su manera, y así se lo dije a Pedro, pero Pedro me dijo que lo mismo era dios que nos había parpadeado, pero es que Pedro es de los que los domingos por la mañana se levantan temprano, sea para votar o para ir a misa, según toque. Y yo le digo qué va, dios no creo que sea, se notaría otra cosa más apocalíptica o no sé yo, estos van a ser los de la red Echelón sin ningún género de duda.
Y me vuelvo a casa sin tomates pero con la mosca detrás de la oreja, y llamo a mi amiga Izaskun para contarle la movida de los tomates y el flash que parecía dios, y me dice que ella hace tiempo que lo notó, y como estudia para modelo le ha puesto a su gato Bin Laden, que antes se llamaba Mus pero ahora le ha puesto Bin Laden y así cuando lo llama por el pasillo de su casa para avisarle de las bolitas esas de pescado que se le dan a los gatos, va saltando el flash por todas partes y la Izaskun aprovecha para practicar la cosa del modelaje. Y le digo que es una lista de la vida y me dice que sí y que ella siempre a la última.
Y lo del flash casi es lo de menos, lo peor es lo del espía que se nos entró en la casa hará dos meses por un descuido, que lo pensábamos una visita pero cuando sacó el colchón de espuma y lo tiró en el salón ya estaba claro, y por aquí está siempre y cada vez que me conecto a internet se trae una silla y se sienta a mi lado a ver qué hago, que ya cualquiera se piratea nada con un señor así pegado al hombro, y ha ido cogiendo confianza y me da consejos de redacción y gramática para mis emailes y cuando chateo me dice quién se hace pasar por lo que no es, supongo que de puro profesional. Y se llama Harry y también se bebe el vino y no hay quien le arrebate el mando de la tele. Y mi amiga Izaskun dice que tiene dos, uno por ser de Bilbao y otro por lo del gato, y que está pensando comprarse un periquito y ponerle Ántrax para hacerse con otro espía, y así ser cuatro para cuando toca parchís que es lo suyo, pero a mí me parece que lo hace por presumir y más pensando en la cama que en el parchís, y su madre venga a decirle que a ver si elige de una vez y se casa, y que ya está bien.

ASWAD

(1)¿Habla usted de Perico, que tiene las mejores patatas de El Salobral y del que se dice: "*Frutas Perico, endulzan su pico*"? ¿Tiene el puesto de Frutas en la Plaza de las Carretas, verdad?. Por favor, déles recuerdos de parte de la abuela, a Julia, su mujer, y a él, y que ellos repartan mis saludos al resto de la familia.
Pero si no es él, no le diga nada a su frutero.

Vaya, ahora entiendo que esta mañana, en el mercado, los melones de año se girasen a mi paso sospechosamente, y me pareció advertir entre los tomates una lente de teleobjetivo, aunque me cuidé de comentarle nada al Antoñico el de la fruta, no me fuera a tomar por loca, que en mi pueblo los puestos del mercao no son daos a semejantes tecnologías….
Y sabe usted si eso de los espías se lo mandan a todo el mundo? Yo es que mi perro se llama Pancho, pero gustosa le cambiaría el nombre por Osama si supiera de fijo que me mandan uno de esos señores, más que nada porque le mire el inglés a mi pequeño que lo lleva un poco retrasao. Y para enseñárselo a las vecinas también, que tener un espía en casa da mucho postín…

Tautina, ojo al dato, que a mí me han adjudicado uno que tontea y me tiene de los nervios: no sabe español pero eso no quiere decir que sepa inglés, y en vez de intervenirme el teléfono, me lo conecta a una freidora; en vez de controlar mi ordenador, ya vé, querida amiga, me ha conectado un post con el Palmar de Troya, y me frien con e.mail de pésame por la merte del Papa Clemente.
Tenga cuidado que si sigue así, le pueden dar un traslado y adjudicárselo a usted. En ese caso, le aconsejo que se lo eche a sus hijos para que jueguen con él hasta que lo rompan.

Estamos buenos con los espias. Hace unos minutos andaba yo limpiando el trozo de jardín delante de mi casa. Pensaba que era un pecado hacer eso tal día como hoy, en el

que me he saltado el ayuno y, probablemente, me salte la abstinencia. No debería hacerlo, pensaba, hoy no se trabaja... Y en esas andaba cuando oigo caer por las escaleras de acceso a mi casa algo que cae rodando. Dado el silencio que me rodeaba me acerco al murete y observo, toda ojos y oídos, que una botella de cocacola vacía estaba en el último escalón. Y entro disparada a casa. El buen dios me ha recordado que hoy es un día de fiesta, en el que me debo al consuminsmo más feroz. Debo consumir más agua coloreada mirando la tele en vez de deslomarme sobre las malvas locas y las ortigas. Debo descansar. Ël me ha mandado ese mensaje, seguro. Lo digo por que subí las escaleras y no había nadie. Ni siquiera una brizna de viento que hubiese arrastrado por la cuesta, donde ayer unos mamelucos celebraron su botellón, la botella. Así que si vosotros teneís un espía en casa, yo no duermo pensando en que el mismisimo manda más controla mis pasos en cuanto salgo de casa. ¿Qué me aconsejaís...? Le dejo entrar dentor o no salgo yo a la calle y muero dulcemente cuando se me acaben las provisiones?
Por cierto, Gatopardo, eres genial. Gracias por hacerme sonreir en un día ocmo hoy...

SONETO ANÓNIMO

Amigos, ¡enlutaos! Que la campana
Pregone por París mis desazones:
Y tú, prensa europea, dí a las naciones,
Cuán cruda es para mí la suerte insana.

¿Por qué no se llevó a mi esposa ufana?
¿Para no angustiarme habría razones?
Mas no, tras de maduras reflexiones,
vino a dar con mi flaco, la inhumana.

Hirió la prenda amada, el dulce anhelo,
Que vívida miré y hoy miro inerte,
Mi sólo bien, mi único consuelo.

No hay suerte más amarga que mi suerte;
No hay duelo más profundo que mi duelo:
¡Rota mi pipa está!...¡Venga la muerte!

Fumar es un placer, genial, sensual…
Fumando espero a la que tanto quiero
tras los cristales de alegres ventanales
y mientras fumo mi vida no consumo,
porque flotando el humo me suelo adormecer.

Tendido en el sofa, soñar y amar
verán mi amada feliz y enamorada
sentir sus labios besar con besos sabios
y el devaneo sentir con más deseos
cuando sus ojos veo sedientos de pasión.

Por eso estando mi bien
es mi fumar un eden,
dame el humo de tu boca
dame que en mí, pasión provoca,
corre que quiero enloquecer de placer,
sintiendo ese calor del humo embraigador

que acaba por prender
la llama ardiente del amor.

Compréndolo, porque pasome algo similar:

Y yo que la quería y mancillela.
Yo, que por ella di cuanto tenía,
que cálida a mi cuello se prendía,
obviando su pureza atropellela.
-
Estaba ajena a todo y yo ¡olvidela!
¡Ella que fue la envidia en quien veía
que por su belleza mi faz se sonreía
hasta el atroz momento en que... ¡manchela!
-
Y aunque sólo le introduje la puntita
¡voto al cielo que estoy arrepentido
de ese lapsus brutal que ahora me irrita!

Pues me senté a comer, y en un descuido
se me pringó mi hermosa corbatita
su punta en aquel plato de cocido.

Aun restallan en mi mente,
fugaces,mas,intensos,
el fragor de tantas batallas,
sin ruido,sin polvora,ni heridos
solo yo,yo y mi tormento,
capeando en la noche
indecibles aguaceros,
husmeando con desesperanza,

abierta la herida,
maltrecha mi carne
por el sutil acero de tu verbo
Cuantas veces,al pie de la esquina,he cruzado mi mirada
con la de ese perro macilento
de amarillento y humano mirar,
el tambien,en su morir lento,
espera,hora tras hora,
la aparicion que daba sentido
al palpable sufrimiento.
Noches de torvas lunas,
de maldiciones,
turbia la mirada,
repleta de emociones.
A veces,alguien asestaba
al pobre perro un pescozon,
p daba un chusco de pan,
o una patada,
que todo es de la misma vena,
odio,conmiseracion y pena,
como en el amor,
en donde todo se cruza,
y se parece y luego se desvanece.
Que marchitas nuestras vidas!
y que gélidas nuestras manos
cuando acertaban a encontrarse
avidas del olor de nuestra carne,
el entrechocar de nuestros dientes,
impacientes,en aquella oscuridad,trémulos,
con el deseo a flor de piel,
el perfume de tus labios,
y el regusto a noche y miel.
Te acuerdas de aquellas batallas,
en donde no cabia el olor a polvora,ni ruido,ni heridos?
tan solo yo,aqui,arrugado,
escondiendo mi sombra,
viejo et inutil,
haciendo cosas sin sentido,
como ese jefe Cherokee
exhibiendose en una caseta de feria.
Dime,amor.......
donde te ha aparcado la vida?

ENSEÑANZAS QUE VIENEN DEL PASADO Y SON PARA EL FUTURO

No dejes huellas de tus pasos. Si alguien que compartió contigo el pan, la sal y la amistad te reconoce en el gentío, niégalo, dile que miente. No te identifiques, porque mañana puede ser el testigo y la prueba que te condene.

Si encuentras una fotografía donde tu rostro aparece entre otras gentes, que pueden ser convocadas para afirmar que un día coincidieron contigo, rómpela y mejor aún, no te dejes fotografiar. Niega siempre, pero niega después de haber destruido las pruebas que te acusan de existir allí, entonces, sea donde sea.

Niégalo todo.

Cambia tu nombre cada vez, oculta tu rostro del tiempo y nunca guardes ropas ni objetos que puedas llegar a amar, porque te pueden reconocer por ellos. Olvida, has de ser la negación de la memoria compartida.

Si muere alguno de los tuyos y estás cerca, no acudas; puedes encontrarte con un vociferante elenco de habitantes del pasado, señalándote, acusándote de ser tú, el hijo, el amigo, el hermano del cadáver que yace, y tus lagrimas confirmarlo. Aprende a no llorar por si la casualidad te juega una mala pasada y a tu lado, en la ciudad hostil, cae muerto alguien que amas.

Ignora que fuiste parido, acunado y amado; deja que los sentimientos y los afectos caduquen diariamente. No tienes pasado y el futuro seguramente no existe para tí, la única realidad que te pertenece es tu presente.

No hables de tí y si hablas, que el otro no pueda reconstruir tu itinerario con verosimilitud; que los retazos de tu vida no dejen tu trayectoria al descubierto, porque puedes acabar de la forma más necia.

No lo olvides nunca: un secreto entre dos no es un secreto. Lo que ocurrió en invierno en Roma, sitúalo en Berlín, en primavera; si quien te acompañó era joven y ocurrente, habla de un viejo misántropo y arisco.

Pero sobre todo, no olvides que cada día es posiblemente el último: el mañana no

existe más que para los que tienen la misión de impedirte que sigas siendo un apatrida, un prófugo, un proscrito.

¿Quién te ha dicho que sólo encierran a los culpables? ¿Lo era Ana Franck? ¿Primo Levi? ¿Lo serían esos niños judíos a los que les esperaba la cámara de gas?

Están ahí... escuchad: no digáis, como aquellos, que no supisteis lo que ocurría en los campos de detención y exterminio.

- ¿No se lo creen?
- Yo tampoco lo hubiera creído hace un tiempo...
- Pero tomémos precauciones como si estuviéramos vigilados...
- Pongámonos en lo peor
- como cuando hacíamos exámen de conciencia ,
- no sabíamos qué pecado habíamos cometido...
- y terminábamos acusando a nuestros hermanos
- Pensemos de qué acusarlos,
- si vienen en la noche a buscarnos
- y acabamos descalzos y encapuchados,
- lejos de la humanidad y de los nuestros
- Porque antes ya había pasado
- Y ha vuelto a ocurrir hoy...

ummmmmm ....

"En la ciudad de las Lilas el conserje del tiempo nunca alcanza a poner los soles en hora. Los laberintos no tienen entrada y se acomodan en orden direccional para que las tortugas hagan equilibrio estelar, allí al mundo le falta una mitad. En la ciudad de las Lilas todo está sin terminar. El horizonte es vertical y divide el naciente de la nada. Los hombres tienen un solo ojo y sólo se puede ver de a dos. Las mujeres sueñan a medias si duermen solas y los romances no llegan al desengaño, ni al encono. Desde siempre, aunque la muerte alcance a cualquiera en la mitad de algo, todos quedan moribundos. Quienes intentan abandonar la ciudad de las Lilas quedan a medio camino. Y los que queremos contar su historia la dejamos inconclusa."

Pues va a ser que estamos en hora ...

"El tiempo se mide en granos de café, en jugadas de ajedréz, en bocanadas de humo o en vuelos de papel. Tic, tac, tic, tac hace una mirada y en un abrir y cerrar se descompensa el aire. El tiempo se mide en granos de arena, en saltos de rana, en esquinas de ayer o en cubitos de hielo. El tiempo se mide de todas maneras, entre su silencio y el mio."

MEMORIA

Lo miraba a punto de llorar.

— No quiero comer más…
—Quieres curarte, ¿verdad? Si no te pones buena tendré que jugar solo y me aburro. ¿Sabes que ha tenido tres perritos Luna?

Empezó a masticar sin darse cuenta de que había abierto la boca. Él continuó:

—Luna te buscó para enseñarte sus cachorros, pero no puede venir a tu habitación y se quedó refunfuñando en el patio.
— ¿Qué decía?
— Decía que a ver si comes, te pones fuerte y nos vamos a pasear al río, para enseñarle a nadar a sus cachorros.
— No quiero más, de verdad, Pepe, no quiero más…
— Aún no sé qué nombre ponerles ¿se te ocurre alguno?
— No sé… ¿cómo son?

Otra vez empezó a masticar.

— Hay un perrito que tiene la misma pinta que Luna, pero con dos manchas negras en los ojos, como si llevara antifaz…
— ¡El Coyote, a ese le llamaremos Coyote!…

Al mismo tiempo, otra cucharada, y le limpió la barbilla cuidadosamente:

— Y hay otro que muerde una zapatilla tuya vieja y duerme con la cabeza dentro y el culo fuera, porque es grande...
— ¿Cómo de grande?
— Otro bocado… Es…como la cesta de las pinzas de grande…
— ¿Ha venido ya el papá?
— Aún no…
— Cuando venga dile que pase a darme un beso…
— Si no terminas de tragar eso que tienes en la boca no sé si se lo diré…
— Bueno, ya, pero no me des más.
— ¿Y si es una perra cómo la vas a llamar Coyote?
— ¿A quién?
— Al cachorro de Luna que tiene unas manchas…
— Ah, claro… ¿pero no has dicho que son tres perritos?

Otro bocado siguió su camino…

— Son aún pequeños y no sé si serán machos todos, quizás haya alguna…
— Pepe, ¿a ti te hubiera gustado que yo no fuera una chica?
— Marieta, qué cosas se te ocurren…
— Quiero decir si hubieras preferido tener un hermano para ir al colegio contigo…
— Yo tengo amigos del colegio… Por ejemplo, Agustín…
— Agustín me cae mal, es malo…

Otra cucharada

— Pues él te quiere mucho…
— No, Agustín me dijo para hacerme rabiar que tú estabas muerto…
— Seguro que me vio dormido y se creyó que estaba muerto.
— Me hizo rabiar y me asustó…

Le limpió la boca que rezumaba trocitos sin masticar.

— Tú mastica bien y, mientras, te cuento cómo llegó un día mamá y me preguntó qué quería para mi cumpleaños…
— Si, eso, cuéntame cuando nací yo…
— Bueno, yo iba a cumplir siete años y siempre estaba triste, triste, yo solo…
— Y mamá te preguntó...
— Mastica con la boca cerrada y te lo cuento.

Obediente, Marieta esperó el relato.

— Y me dijo "¿Qué quieres que te regale para tu cumpleaños?" Y yo le contesté: Me gustaría tener una hermana, que se llame Marieta, que sea muy pequeña, muy juguetona, que coma mucho —Marieta empezó a masticar otro bocado sonriendo— *y cuando la peines no le harás daño, no le desenredarás su pelo, rizado, rizado…*

— No me hace daño cuando me peina, es verdad…

El plato estaba vacío y Marieta se recostó en la almohada. Él la besó en la frente, le acarició su cráneo rapado, y la arropó

— Ahora a dormir la siesta…
— No te vayas a jugar con Agustín que es malo…
— Pero te quiere mucho…
— Me dijo que estabas muerto para hacerme rabiar…

Al sacar la bandeja cedió el paso a Nuria, que había estado dándole la comida a la viejecita de la otra cama.

En el Control la nueva auxiliar, le comentó a la enfermera:

— ¡Qué paciencia tiene el hermano de la siete! Y tan cariñoso…
— No es su hermano, es su marido…
— No, no, me refiero a un señor bajito, como de setenta años, se llama Pepe…
— Si, ya lo sé, viene a darle la comida y la cena todos los días. Marieta cree que es su hermano, que murió cuando ella tenía ocho años… Es Agustín, su marido, pero ella… ¡Es misterioso esto del Alzheimer!...

Por lo que este relato lo escribo con una sintaxis muy elemental, con frases simples, casi infantiles es para describir el mundo mental del Alzheimer,(y el de mucha gente que se lo cultiva). Si hubiera descrito a los personajes y el entorno, con su edad y sus características desde el principio hubiera sido previsible, que es lo peor que se le puede achacar a un relato.
Facilitar al lector que pueda leer de corrido no es tarea de un escritor que se respete,

como tampoco sería tarea de un cocinero que su comida se pueda engullir deprisa.

Si me permites un comentario sobre éste, te diré que me parece emotivo y bien llevado en su desarollo, pero puede que mejorase si el alzheimer no se expresase explícitamente, sino que encontraras el modo de sugerirlo claramente, pero sin mencionarlo. Creo que el lector, al descubrirlo, se implicaría más y haría más suyo el texto y, en definitiva, se emocionaría más.

¡MARCHANDO UNA DE OPINIONES IMPOPULARES!

GENTE QUE VIVE EN UNA CASA BAJO LA AUTORIDAD DEL SEÑOR DE ELLA :Definición en el Diccionario de la RAE. de D. Julio

Casares de "*Familia*")

La familia tradicional, que definía don Julio Casares en el Diccionario, no tiene las características árabes que se le han atribuido teniendo en cuenta nuestro arquetípico machismo y la sumisión de la mujer a la autoridad del varón, sino que coincide con la familia semita en la estructuración del poder y su perpetuación a través de los roles del hombre y la mujer: el hombre "*representa*" la autoridad formal y la mujer transmite la ideología dominante.
Este tipo de matrimonio se basa en la compulsiva necesidad de fornicar con un máximo de garantías de llegar a arrepentirse, propia de los judeo-cristianos, y la fidelidad, como condición sine qua non, sólo es contumacia sexual.
El varón sabe, desde que usa orejas, que de él se deriva todo el mal que pueda recibir una mujer, empezando porque hizo añicos a su madre en el parto, siguiendo por el sufrimiento moral inenarrable que le produjo con sus enfermedades infantiles, y terminando con sus veleidades caracteriales, sus amistades y sus horarios, fuente inagotable de disgustos para sus sucesivas santas.
La imagen de sí mismo, se adereza con la aversión expresa o tácita que toda mujer decente demuestra hacia el sexo, con veladas o clarísimas alusiones a ese Getsemaní qué imponen los hombres, y habremos de reconocer que sería raro que nuestros varones no se sintieran culpables, abrumados y privilegiados a partes iguales cuando una mujer afirma amarlos.
Es curioso, no obstante, observar que a menor presión culpabilizadora de una mujer se da mayor suspicacia en el hombre. Quizás porque necesita una cierta carga autopunitiva en sus devaneos sexuales y no puede dar su pláceme a quien no se la proporcione.
Como padre es el depositario de la autoridad formal, tanto más férrea cuanto menor sea su función ejecutiva en el hogar y menos abunde en sus prerrogativas, porque entonces será, todo lo más, un tirano de tres al cuarto con una plebe a punto de sublevarse en cualquier momento.
Dice Colin Wilson que "el hombre es literalmente un dios, un dios aquejado de pereza, amnesia y pesadillas", y habría que añadir a estos males la eyaculación, que suele coincidir con un estado de amencia transitoria, y la testosterona, que es inhibitoria del raciocinio.
La mujer es juzgada desde niña por su carácter y no por su actuación. Si es dulce, obediente y sumisa tiene muchas más posibilidades de ser amada, aun siendo tonta y poco mañosa, que siendo rebelde y poco ternurista, aunque decidida y habilidosa. Se le valora por *cómo* es y sobre todo, por lo que *no hace*.
Al hombre-como-Dios-manda (eminentemente latino) lo que más le sulfura en este mundo es una sabihonda, y por lo tanto no se casa nunca con una lumbrera, sino con una mujer-como-Dios-manda, espécimen que solicita y espera que resuelvan por ella con la misma naturalidad que respira.
Como madre, nuestra heroína transmitirá la ideología dominante por pasiva y por activa, y a cambio se beneficia de su imagen de excepción,filón inagotable de complejos edipicos patológicos en nuestros conciudadanos.
No es por timidez por lo que la mujer silencia sus preferencias sexuales o finge orgasmos, sino por oportunismo , ya que la sexualidad del hombre es un terreno donde se cotiza al alza y es una inversora astuta, que nada pierde puesto que en nada se implica, siempre y cuando tenga buen cuidado de crear expectativas y fallar su resolución, con lo que crea una demanda siempre superior a la posibilidad de satisfacerla. En el terreno íntimo no le importa fingir orgasmos y convencer al hombre de su infalible habilidad, porque en su fuero interno la mujer necesita sentirse sabedora de un secreto que no comparte con él para despreciarlo por su ceguera.
Las mujeres convencionales, que fijan su mirada glauca en el hombre de la casa y jamás le harían frente, ni le comunicarán claramente su desacuerdo en ningún asunto,

cuando hablan entre mujeres, son capaces de detallar con una mueca sardónica las atrocidades que opinan sobre sus prepotentes maridos. Eso no quiere decir que en una confrontación dialéctica vayan a admitir ni un sólo argumento liberador o clarificador que pretenda plantearles otro modo de actuación y llegado el caso, opondrán una escandalizada protesta contra el feminismo, trasunto de una realidad que les subleva y les desagrada profundamente, porque lucha por la "igualdad" y les parece desventajosa.
Toda mujer que se pretenda feminista en activo, pasa la mayor parte de su tiempo curando las abolladuras que reciben las tontas, taradas, sumisas y anodinas congéneres, quizás como derivativo de aquella vocación de misioneras con los negros, que resumió en la niñez, como ninguna otra, la épica reservada al género femenino y, sin embargo, la solidaridad con la rebeldía y con las capacidad y potencialidades de las mujeres que se afirman, la profundizacion y discusión de las tácticas y objetivos para desarrollarse, quedan relegadas a un segundo término.
Se comprende el impacto que sobre cualquier sensibilidad no abotargada, tiene el espectáculo de las mujeres humilladas, golpeadas, victimas de su debilidad caracterial, de su incapacidad para mantener una opinión, embarazadas sin desearlo, aterrorizadas. Pero en algún momento tendremos que decidir si debemos seguir encubriendo esa patología social con nuestra filantropía. Porque lo más probable y lo más lógico es que el matrimonio monogámico y coercitivo produzca inmensas magulladuras morales, cuando no físicas, y no parece que venga al caso dedicarnos a la asistencia de quien sufre las consecuencias: no parecería lógico que un grupo pacifista testimoniase su oposición a la guerra cuidando amorosamente a los heridos en combate y adoctrinándolos sobre defensa personal y métodos de combate cuerpo a cuerpo para que sigan guerreando.
Mujeres que no chantajean con su fertilidad, dedican la mayor parte de su ocio a tareas informativas de planificación familiar para una recua que actúa según un sistema de compensaciones donde quedarse embarazadas es una manera de conseguir status en la familia o simplemente por no haber llevado la contraria a su marido en el descanso de la pildora.
Una feminista, por muy poca perspicacia que tenga, recurre a los anticonceptivos o a la sexualidad polimorfa-perversa, porque la penetración no es una condición sine qua non, y no obstante, batalla por la legalización de todos los supuestos del aborto que seguramente no necesitará nunca, se arriesga a practicarlo e ir a la cárcel por una ingente masa amorfa de mujeres que jamás la aceptaría en su círculo de relaciones, que condenan en su fuero interno todo intento de emancipación y nunca se encontrarán en la misma barricada.
¿Esto es feminismo o beneficencia?

ALIMAÑA DICE ADIÓS

Gatopardo: Me despido. Desde que te escribió mi patrón, la situación ha empeorado. El Gato, hijo de mala madre, le dio mi dirección a la familia de Don Augusto. Ayer, cuando llegué de Soria, me encontré a esa banda de tías bigotudas riñendo con mi mujer en el portal. Y la vieja es la peor. Al principio se calla, como si fuera prudente, pero, en cuanto se saca de la faltriquera la dentadura y se la encaja, empieza a soltar palabrotas, que me ponen rojo a mí.
Hay otra de perilla, que también es de cuidado. Yo les he dado la dirección de tu blogia y que sea lo que Dios quiera.
Mi señora Alimañesa está que muerde. La culpa la tuvieron esas hembras desvergonzadas amigas tuyas que me hicieron proposiciones. Unas cosas que no se le hacen a un padre de familia casado. Cuando lo de las patas de la Thryss, ya me dijo con voz helada: "*Cuando vayas a Mercadona, compra un cuaderno, que voy a empezar un diario*". El otro día descubrió a la Tautina y sus vicios. Y fue el acabóse. Se plantó delante de mí, abanicándose, y me espetó:
- "*Voy a tener mi propia blogia. Y ya tengo el título. Se va llamar "Sumida en la soledad". ¿Lo has oído, inútil?*"
Si lo hace, me tengo que ir de este país. Tú no sabes lo que es verla con el morro fruncido y los ojos estrábicos acumulando defectos míos en el jodido diario. Lo último que leí es que, si parece que no tengo barriga, es porque me desbordan las riñoneras de grasa.
El Gato me ha dado una semana para desalojar el invernadero. Vamos a ver dónde meto yo a Wenceslao y a María de las Mercedes. Lo suyo es que Luis Muiño, que estuvo en Kosovo con Wenceslao y lo trata en su consulta encontrara una solución.Yo creí que lo que transportaba eran sementales porcinos, pero María de las Mercedes está erre que erre en que la llame así... Y encima se llevan a matar. Wenceslao le dice gorda. Y ella le dice asesino mercenario. Wenceslao está griposo. Pero no hay forma de que se abotone la camisa ni de que cierre las ventanas. Le llevé unos pantalones polar a María de las Mercedes, pero me los ha devuelto: "*No me caben. Con la comida basura estoy engordando*". Como, según nos dijo, fue "Miss Condado de Treviño", está obsesionada con lo del peso. Y no quiero ni pensar cuándo le tenga que hablar al patrón de las orquídeas que se ha tapinado Wenceslao.
En fin Gatopardo, que me voy con mal sabor de boca. Yo cumplí mi pacto y te envié crónicas sociales amables y distinguidas y tú me has obligado a ejercer reportaje de investigación, que sabes que, aunque lo hago bien , no es lo mío. Me quedan 43 letras del camión que pagar. "Gala" y "Diva" me han hecho ofertas. Pero necesito un tiempo para que mi estilo vuelva a ser chispeante, simpático y chic, como siempre ha sido. Quiero cubrir convenientemente la boda del príncipe Carlos y Camila y el nacimiento del vástago de los Prícipes de Asturias, que ahora no me acuerdo como se llaman, pero la fecha si la sé porque he consultado a Don Juan Vidente desde tus enlaces de portada.
Y no me hables más en la vida de la familia de don Augusto. NO ME GUSTAN LAS MUJERES CON BIGOTE"

¿Sería usted tan amable, antes de marcharse, de proporcionarme la dirección o correo electrónico de su señora esposa?
No imagina la emoción que a supuesto para mi saber de la existencia de una señora Alimaña con la que poder compartir los enfrentados sentimientos que me produce usted y sus palabras, y que sin lugar a dudas, ella comprenderá mejor que nadie. Por favor, por favor, se lo ruego, póngame en contacto con su señora. Estoy segura de que hallaré en ella la amiga del alma que nunca tuve, unidas ambas por la causa común de haberlo aguantado a usted.
En fin, jamás lo reconocería públicamente y lo negaré si me lo recuerda alguna vez, pero aqui entre nosotros, le echaré de menos.
Adios con el corazón, que con el alma no puedo.

SYLLABUS PARA EL OBISPO.

Señor vicario de Cristo:
no se pase de moderno,
que lo veo en el infierno
por hacerse usted el listo.
Aquí, desde Torquemada,
unos arriman la tea,
otros hacen de tostada.
Se lo recuerda una atea.

No me cambie los papeles:
Yo me ocupo de mi tropa,
a la Iglesia doy estopa,
¡ocúpese de sus fieles!
Desde el Concilio segundo
están tan empalagosos
con este pecador mundo
que ya es amor alevoso.
No se quite la sotana,
que el pastor marca su oveja
y la conoce la vieja
aunque le esquilen la lana.
Y no olvide las novenas,
las beatas, los altares,
que son estos los pilares
de la piadosa verbena.
Sea cura trabucaire
y con fervor mesetario
cárguese al adversario
que la santa fe desaire.
No se quede con la gana
que luego no se me queje.
No deje vivo un hereje,
santidad ultramontana.

Y qué más quisiera usted

siempre cara la pared.
Qué más le haría feliz,
que convertirme en cabestro
de mil mansos padrenuestros,
doña atea institutriz.
Deje de darme consejos
que ni quiero ni he pedido.
Torquemada está muy lejos:
ocúpese de sus viejos
excombatientes caidos

en mil combates gloriosos
bajo el pendón volteriano;
que los ateos forzosos
nos caen hoy a trasmano
y no hay nada más antiguo
que el airon republicano.

El ser un pastor de Cristo
Pese a ocasionar mil penas
también tiene cosas buenas...
¿y el glamour con que me visto?
Dónde se ha visto más charme,

No, yo no puedo quejarme.
Qué figura tan devota,
yo acabaré en camarlengo

El hecho de ser curita
no entraña beligerancia
con finura y elegancia
al revés, la facilita.
Siempre fui el niño bonito

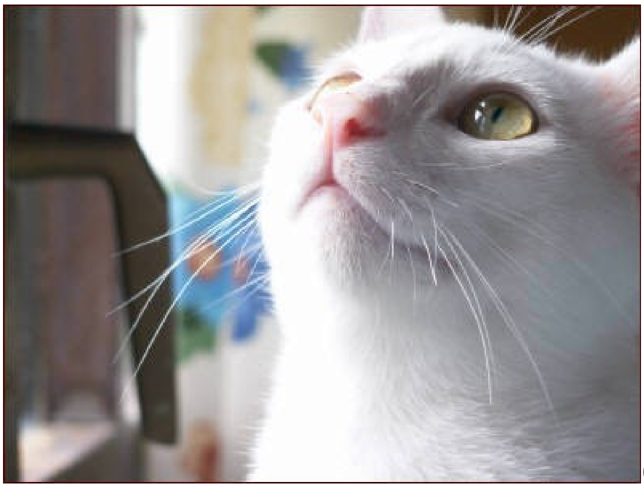
EL GATO A GATOPARDO



Querida mía, son razones de fuerza mayor las que me obligan a descender al *pied à terre* de los problemas cotidianos. Pero estoy en una situación improrrogable e insostenible.
¿Podrías encomendar a Alimaña una cobertura informativa lo más alejada posible del *Mezzogiorno*? Es más, tal y como están las cosas no me parecería incorrecta una corresponsalía en Irak
Anoche, pasadas las dos de la mañana, mientras descansaba yo de un día

especialmente agotador, cayó sobre mi jardín una turbamulta canallesca profiriendo gritos y alaridos y reclamando la presencia in situ de mi "*mayordomo*" que, a la sazón, se hallaba transportando material porcino (afortunadamente en forma de paquetes de salchichas) por las llanuras sorianas. Yo no hablé con ellos, claro, pero lo que atisbé desde la ventana de mi *boudoir* me dejó profundamente transtornado. En un primer momento pensé que era algun grupo de los ultrasur disfrazados de damas del Santo Cristo de Medinaceli. Pero, cuando la doncella y la cocinera, encendieron la luz del porche para hablar con ellos, vi que era una tribu compuesta por seis ejemplares, cuatro de los cuales al menos eran hembras. Todos talla XL y gesticulantes. La que parecía dirigir la banda suplicaba (eso decía ella, yo diría que bramaba) le dijese el ausente Alimaña el paradero del macho de la tribu que, al parecer, se encuentra bajo orden de busca y captura familiar.
Apareció la policía, aparecieron vecinos y criados de vecinos. Los perros de las fincas anejas enloquecieron. Los lamentos de la brava mujer (siciliana, para más señas), animada por el público que había conseguido congregar, alcanzaron tal fuerza que, con ellos, salió su prótesis dental. En mi jardín. Me han pateado todos los parterres de crocus, jacintos y fucsias buscando la malhadada dentadura.
Otrosi. Cuando el Orfidal empezaba a obrar su efecto, un objeto arrastrante empezó a trepar por la puerta principal y a golpear ésta rítmicamente. Después inicio la retirada recitando algún aria de ópera italiana desconocida por mí. Está mañana la doncella ha descubierto un puñal clavado en la puerta con una nota bastante imaginativa sobre las formas de guisar los intestinos del Alimaña.
A las siete de la madrugada , el carrillón del timbre. El personal de servicio se ha negado a abrir la puerta. Así es que he salido yo. Y he tenido que afrontar a una contumaz vendedora de biblias, que se presentaba como psicóloga y pariente de un tal señor Jung. La oferta que, según esta dama desequilibrada, tenía yo que aceptar era que, por cada dos ejemplares del Antiguo Testamento, me regalaba un Arquetipo (sea esto lo que sea).
Otrosi. Tengo dos huéspedes en mi invernadero. Una cabra que responde al nombre de Wenceslao y un cerdo sin documentación conocida. Según me explicó Alimaña ambos en tratamiento psiquiátrico, ambos víctimas del celo reproductor del esposo de la bruja con dientes movedizos. La vendedora de Biblias dice que está dispuesta a someterlos a tratamiento psico-onírico-no sé qué. Yo estoy al borde del colapso.
Te lo ruego, querida. Ya sabes de las nefastas causas que me llevaron a admitir al patán del Alimaña a mi servicio. Vacía mi casa de gentuza. No te lo creerás, pero, aun siendo un gato blanco, he encanecido en las últimas veinticuatro horas.

ALIMAÑA NEWS: ULTIMATUM A DON AUGUSTO

Don Augusto, no siga por ese camino. Usted va a volver con su familia. A las buenas o a las bravas. Y si son muchos hijos, habérselo pensado antes. Con lo que soy yo, mi alimañica me despelleja vivo, si le gasto yo la pifia que usted le ha jugado a la señora Leonarda. Y yo, que soy una alimaña macho y español, de las patas al hocico, mantengo, señor mío, once crías (tres alimañejas en la última camada). O sea que, como padre y marido, me sobra autoridad moral para recriminarle. Y como redactor-jefe le digo:
-¿Quiere usted que le dé su dirección a Lucio Vitalone y a los primos Nino y Salvo? Su dirección real, no la que le cacareó a Gatopardo. Ayer , cuando usted fue a recoger el paquete que yo le envié a la pensión de la calle Tabernillas, fue seguido por una falsa "*demimondaine*" (acuérdese que huyó usted de sus proposiciones como alma que lleva el diablo). Pues esa dama es mi mejor detective. Se llama Estrella y tiene un master en criminología con Cobo del Rosal. Le siguió a su casa, al banco, al urólogo, a la farmacia, al bar, etc. Informe de cuarenta folios fotos incluidas.
-¿Quiere que envíe a Gatopardo el dossier que INTERPOL tiene sobre usted como conocido estafador de viudas y damas solas? ¿Le recuerdo el "*Affaire de Mme .Bárion*"?
- ¿Le interesa realmente que envíe el estado de sus cuentas bancarias a "*Habilitación de Clases Pasivas*"? ¿Le dicen algo los números 0128-0001-63…? Si no, digámelo y pongo en esta blogia la serie entera. Para refrescarle la memoria.
- ¿Usted cree que a los nietos de Liggio les gustaría saber de la sociedad que mantiene con su hermano llamada "*Ocurrencias Javier*"? Acuérdese que la pobre familia perdió el dinero que le había confiado al honorable abogado en un desgraciado incendio del bufete (Castellmammare, julio de 1984)
- La otra sociedad "*Piscifactoría Javier*", con sede en Fuenlabrada, ¿entra en el régimen de gananciales con doña Leonarda? Le traigo a la memoria que aún está casado.
- Usted no es pobre. De hecho, "es un poble más falso que los chinos de Baloja". Que le gusta la cochambre, eso sí. Que pregunten en "La Denigrancia". Ahí sí que le conocen. Y saben todos que tiene usted gusto en ser tacaño. Por eso picó usted y salió como el hombre bala detrás del chorizo García-Recio.
- En una cosa sí ha dicho la verdad: usa dodotis geriátricos (tengo ante mi vista fotocopia de la receta de la Seguridad Social que entregó usted ayer en la Farmacia "La P…") No invente excusas absurdas. Si ya se lo dije yo en su momento: "*Don Augusto, no se haga ilusiones, que le flaquea el general de la hueste generativa*". Usted contestó con un delirio etílico irreproducible.
- En fin, vuelva con Doña Leonarda. Ella es lo bastante generosa como para perdonar eso y lo anterior. Y sus hijos son unos chavalines muy majos. Dese cuenta que la familia de su santa mujer tiene mal genio y la signora es la única abogada defensora que le va a quedar el día que descubran que usted no está muerto.
- Última cosa: No vuelva a insultar a su santa llamándola petarda. Mido de ancho lo mismo que de alto. Y lo clavo a usted como una chincheta en el suelo de un capón en la calva.

- Moraleja: La alimaña nos ha salido escusaña.

Mon cherie Gatopardó:
vale, yo le contaría cosas de Sicilia, cosas que transitarían por la ternura de la zia Giussepina, o por la temporada que pasé a mis doce años en la hermosa y triste Caltaniseta. Y el beso prohibido a María, la pastora, entre la hierba verde de Segesta con el templo griego a nuestras espaldas. O mi primera comunión en Palermo...Y más cosas podría referirle de la querida isla, y todas de manera lírica, delicada y poética como quiere Usted. Y todas demostrarían que el felón de Crasticeddru miente.
Pero...por qué habría yo de hacerlo si Usted guarda tras siete velos de silencio el relato que nos debe del episodio que ocasionó el temprano encanecimiento de su cabellera.

Usa usted frescamente la palabra "anonadada" pero seguramente desconoce que "anonadado" es un sinónimo de "bidet".
Supongo que no se enfadará por el inciso filológico que como una puñalada en las costillas hundo entre las blanduras viscerales de su blog.
Otra cosa: sus aprensiones al tinte desaparecerían ante el encandilamiento que sin duda alguna le producirían las iridiscencias azulinas del tinte negro azabache de mis bigotes de malevo.
En mis tiempos dorados, cuando cumplía asistencia perfecta al teatro La Latina a paladear la dramaturgia de la sin par Lina Morgan, las féminas de la segunda y tercera hileras de plateas aflojaban orines ante los reflejos de mis bigotes. Y todo gracias al tinte...

Madame Gato Par d'Eau:
Escribo atemorizado ante la posibilidad de que mis palabras sean censuradas nuevamente. Por eso será mejor que me dé prisa.
Digo: ¿ y si en lugar de que yo le cuente cosas tendientes a desautorizar al felón de Crasticeddru, ganamos tiempo y remitimos al lector interesado directamente a las páginas de "Conversazione in Sicilia" de Elio Vittorini?...al menos al censor le será más difícil aplicar los filos de su tijera en un libro ajeno a la "blogosfera" (parola di merda)
En Vittorini encontrarán la Sicilia profunda contada de manera lírica, delicada y poética, como Ud. demandaba, y en Vittorini sabrán, por fin, que Crasticeddru miente.

ALIMAÑA NEWS : PARÉNESIS A DON AUGUSTO

Don Augusto, antes que periodista uno es un ser humano. Como tal le hablo. ¡Vuelva con su familia! Hoy he ido a verlos a La Ventilla. Es una pena. La

señora Leonarda tiene las rodillas destrozadas de rezar por usted. “*En Trapani fuimos una familia feliz. Pero ese desalmado de hermano nos arruinó. Y ni siquiera puedo explicar la causa a los bambinos*.”
Don Augusto, que son cinco hijos. Vuelva. El pequeñín, Tomassino, está hecho un *picciotto*. Le ha salido ya bozo. Mañana cumple 35 años. Felicítelo al menos. Raquelina también tiene un bozo muy gracioso. Le envía su cariño. El mes pasado cumplió 50: “*En Trapani, mama hacía pasta con le sarde y cannoli y papa subía de la bodega un Regaleali para celebrarlo*”
Yo he callado, claro está, su domicilio actual así como esas insinuaciones procaces a Gatopardo. ¡Usted que ha tenido despacho en la calle Jorge Juan!
Me voy a dormir oyendo aún a sus nenes: ¡*Papa, vuelve*!

Por lo que he creído entender, Gatopardo, estás haciendo planes para ligarte a don Augusto y eso me parece una cochinada, porque tiene una mujer que es una santa. COMUNICADO:
Bajo la apariencia de un falso acercamiento empático hacia mi persona, el Sr. Alimaña insisite y persiste en su maquiavélica estrategia de acoso y derribo. Se trata de un linchamiento civil.
Los libelos que se están publicando con alarmante regularidad durante las última jornadas son la munición amoral con la que se intenta destruir a un hombre. Un hombre cuyo único pecado ha sido su gallarda condición de "self made man", "winner", "outsider" y "freelance", ofensas éstas que, lógicamente, el "establishment" no le puede tolerar.
La plumilla roma del Sr. Alimaña es solamente el cochambroso estilete visible que maneja un brazo poderoso desde las sombras. ¿ Jesús de Polanco, Pedro jota Ramírez, El Gran Wyoming, Bigote Arrocet ?...podría tratarse de una fabulosa alianza mediática de todos estos sostenida por algunos otros de aquellos que los "massmedia" definen como "poderes fácticos". Ni yo ni mis colaboradores descartamos ninguna posibilidad.

COMUNICACIÓN INTERCEPTADA EN SESIÓN ESPIRITISTA DE MARCEL PROUST CON SU TRADUCTORA, CONSUELO BERGES, INTERESADA AL PARECER EN LA CONFUSIÓN CREADA CON UN HETERÓNIMO ATRIBUIDO A ANTONIO GALA.

Como cuando la demora de Albertine me llenaba de sospechas y resolvía romper con ella para cortar un sufrimiento que su actitud bondadosa no evitaría, justamente porque, al carecer del egoísmo que inspira la verdadera pasión, hiciera todo por agradarme, y al ser yo objeto de su delicada atención, me hiciese esto comprender cuán lejos se hallaba de amarme de verdad. A su llegada, alborozada y un poco pálida -porque siempre que prolongaba sus paseos le huía la sangre del rostro y acaso aquello indicara hasta qué punto su corazón era frágil y al no ver entonces la fatalidad que le amenazaba, sino el reflejo de su secreta culpa, creía adivinar la doblez y el disimulo en su sonrisa exhausta y en sus ojos brillantes, y al verme a mí disgustado y taciturno, permanecía ella callada y triste, temiendo que me hubiera fatigado innecesariamente para esperarla despierto, y reforzaba con su actitud mis dudas en aquella época en la que aún me era fiel, y hacía más firme mi deseo de romper, de la misma manera, Gabriel, con la seguridad de ser excusado por una falta que no creyó cometer, se hizo merecedor del encono de José Manuel, que sin embargo habría interrumpido con un gesto amistoso cualquier amago de disculpa -como yo hubiera llenado de besos a Albertine si hubiese implorado mi perdón, ofreciéndole para enjugar sus lágrimas aquel peinador de Fortuny que tanto envidió a la duquesa de Guermantes- y dejó que se agriase su rencor al presuponer una recalcitrante alevosía donde sólo hubo cabal inocencia, pues al parodiar hasta el límite de lo inverosímil, no ya a Antonio Gala, sino a sus peores imitadores, estuvo en su intención provocar la sonrisa y no el equívoco, fiado del buen criterio literario de quienes tenían el magisterio y la autoridad de la crítica, y así creyó Gabriel que sabrían recelar que en aquellos folios se escondía, púdico, el deseo de mostrarse amable, a través del trabajo que se tomó por provocar la sonrisa por el camino de un implícito homenaje a sus inteligencias.

Pero Gabriel -como Bergotte- quizás por su propia ingenuidad o por sobrevalorar de forma pueril la inteligencia ajena, no tuvo en cuenta hasta qué punto sería inevitable la confusión, no ya por la pericia de su imitación, sino por la necesidad que el grupo de "*Barcarola*" tenía de verse, al fin, recompensado por Antonio Gala; quien recibió su admiración incondicional y consideró todo homenaje a su persona como si estuviera justificado por sus propias prendas personales, y obvió la generosa magnanimidad de sus fieles con una majestuosa indiferencia, con lo que sembró soterradas expectativas de una posterior gratificación, ya que el admirador no sólo extrae un gozo de su sometimiento al ser que admira, sino también del convencimiento de que participa de la

grandeza del objeto de su adoración por haberlo escogido tan alto, y se siente superior al resto por ello, por lo que el deseo de ser recompensado por su exquisita pleitesía es para él tan legítimo como el tributo que rinde -tanto más cuanto que su devoción por el autor de éxito emana del centro mismo de una ingenua y conmovedora creencia que hizo magnificar más y mejor a quien menos hubieron leído. Y lejos de aumentar su frustración por la falta de señales de deferencia de Antonio Gala, colmaron sus secretas esperanzas con el envío de Gabriel, rápidamente atribuido al esquivo, para así adornarlo con otra prenda suplementaria a su talento, que sería la gratitud, y cegados por la certidumbre de merecerla, no supieron ver que el heterónimo quedaba suficientemente firmado.

De este modo, nada de lo que alegara Gabriel sería interpretado sino como una nueva prueba de malevolencia, y así el grupo de "*Barcarola*" creyó adivinar mil estocadas por la espalda, mientras Gabriel detectó otras tantas falsedades al hacerlo responsable de una misteriosa llamada al director, que éste atribuyó en su momento a uno de los secretarios de Antonio Gala, en la que supuestamente se habría reafirmado la autoría y de otras llamadas, con amenazas y presiones diversas que, sospechosamente, coincidieron una y otra vez con el máximo responsable de la revista y tuvieron el efecto contrario al buscado, que era convencer de su rigor intelectual -ya que la reiteración de motivos suele corresponderse con una arbitrariedad o falacia de fondo, y porque la verdad también se inventa, muchas veces para resultar verosímiles, no tuvo Gabriel ocasión de soslayar ni perdonar el móvil de esta ficción en la que se percibía tanto la búsqueda de una justificación a la falta de rigor literario como el deseo de encontrar un culpable contra el que atizar el encono de las instituciones públicas, que subvencionan la ineptitud de estos muchachos -que, por otra parte, son absolutamente encantadores y estoy seguro de que a usted, Doña Consuelo, le agradaría el fervor por Stendhal de alguno de ellos, capaz de describir la prosa de quien aprendió a escribir leyendo el Código Civil como "pura ambrosía", dando en su exaltación un calificativo a Beyle que más pareciera digno de don Pedro Corominas.

Por estas y otras cosas no pudo Gabriel sentir ese remordimiento que hubiera aplacado a sus detractores, y creció en él la irritación contra quienes reclamaban el dudoso privilegio de ser víctimas de una conspiración, de la que únicamente el más interesado en hacerlo creer podría testimoniar por estar solo cada vez que recibiera las misteriosas llamadas telefónicas que lo indujeran a publicar el heterónimo atribuyéndoselo a Gala. Y el resto del grupo directivo de "*Barcarola*", muy reticente hacia él, pero solidario en su descrédito, fingió creerlo, y precisamente porque dudaba de su veracidad tuvieron que cerrar filas en su rencor contra Gabriel, por su torpeza al presuponerles un entendimiento del que carecían, con lo que, insensiblemente, el perjudicado, al que se le había arrebatado el nombre de autor para adjudicárselo a quien no lo hubiera sido, se convirtió en el culpable de una conjura , que todos sabían inventada, pues nadie hubiera podido imaginar semejante equívoco antes de que se produjera, y mucho menos Gabriel, que considera los menesteres literarios como pasatiempos pueriles e intrascendentes.

Quise saber sobre la posible participación de Madame Verdurin en este molesto asunto, pero al indagar acerca de ello, Monsieur Verdurin alzó los brazos y me prohibió terminantemente que hablara del caso a su mujer: -"*Lo que a buen seguro le costaría una enfermedad si lo supiera, y de hecho, una indiscreta alusión de Bergotte ha afectado su sistema nervioso más allá de lo imaginable, porque siente un verdadero afecto por ambas partes en litigio, y lo último que soportaría es un alejamiento de sus fieles y dejar menguado el cogollito. Y además luego soy yo quien ha de soportar sus jaquecas. Ni se le ocurra mencionarlo*."

Madame Verdurin ya se acercaba a nosotros entretanto, con un gracioso tocado de armiño y plumas de marabú, seguida de Monsieur de Charlus y casi sin saludarme, me preguntó crispada por la impaciencia si había visto a los directivos de "*Barcarola*" y a

Antonio Gala en el trenecito, y como yo lo negase, nos abandonó al punto, cuando escuchó la bocina de un automóvil en el jardín. Al despedirme, hablé un momento con Monsieur de Charlus, que me pidió transmitiera a Morel una carta, y no pude sacar de él nada más pues estaba hosco y distraído.

A usted, Mademoiselle Berges, le deseo tanto bien como benevolencia muestra hacia nuestro común amigo Gabriel. Su intercesión acerca de Monsieur Gala no puede por menos que obligarle a perdonar la osadía de Gabriel, y a buen seguro no le hará nuestro agraviado autor reproche alguno mediando usted, pero, precisamente por eso mismo, por la seguridad que tenemos de que su magnanimidad ha de manifestarse y sabiendo que no será por merecimientos de Gabriel, sino por su delicada generosidad al solicitar el perdón, creo que no debería abusar de la benevolencia de Antonio Gala, que ha visto su nombre encabezando un escrito del que ninguna persona sensata se responsabilizaría, y mucho menos nuestro querido Gabriel, que jamás se hubiera atrevido a darlo a la luz pública a no ser bajo un pseudónimo. Así, pues, sería obligar al admirado autor, al que no he tenido la oportunidad de leer, a una bondad que no buscó ni obtuvo Gabriel, ya que, en su ánimo, si bien no estuvo perjudicar a Antonio Gala, tampoco estuvo el de reclamar otra cosa que no fuera indulgencia para sus veleidades de autor, y jamás soñó que quien él consideró muy lejos de su atención, se la prestara.

El asma no me permite coger la pluma, por lo que privado de recado de escribir, transmito a usted mis impresiones a través de Francisca, que conoce por medio de su sobrina Celeste a Manuela, que dice pertenecer a su servicio doméstico, y le hará llegar mi mensaje y el conmovedor intento literario de nuestro amigo, atrevimiento e incorrección para con usted, que tan buena ha sido con mi prosa, que no me perdonaría nunca a mí mismo si no fuera porque creo que se ha mostrado interesada en mi opinión, y conociendo mis momentos de fatiga, sabrá disculpar mi modo de obrar. Si tuviera necesidad de alguna otra precisión, Francisca le dará cumplida cuenta de mis impresiones, siempre y cuando no mezcle la animadversión que siente hacia Gabriel y la que es su criada no modifique mi mensaje hasta hacerlo irreconocible, como ocurrió con pasajes enteros de mis libros por cuenta de los impresores de Monsieur Gallimard.

Jamás me minusvalore, amigo Puagh:en la sesión espiritista se descartaron varios espíritus burlones que decían ser Proust, y que demostraban su falacia al hablar de madalenas. Antes de morir, Marcel Proust recibió al confesor que le enviaba madame de Saint-Loup, y desde la salita se oyó el grito agónico y desgarrador del que acababa de recibir el Viático, cuando el excelente jesuita pidió a Celeste, la sobrina de Francisca, un poco de leche y madalenas para el señor:
-¡Maldita sea, no mencione en esta casa las magdalenas!¡Por su culpa todos pueden fingir que me han leído!
Y como quiera que le reconvino su ira y le recordó la presencia del Señor al que acababa de recibir,y lo exhortó a arrepentirse, antes de expirar Marcel Proust dijo, condenándose para la eternidad: -"De lo único que me arrepiento en esta vida es de no haber puesto las malditas magdalenas en el último capítulo!"

Para que veas que me esfuerzo gata, me he leído el titulo entero, y casi he conseguido descifrarlo completamente. A continuación te detallo las notas que he podido sacar para esclarecer su significado: "Comunicación interceptada(captada, interferida) en sesión espiritista de Marcel Proust (hasta aquí vamos bien, aunque lo de la sesión espiritista desconcierta un poco) con su traductora, consuelo Berges (esta es la amante ¿no?) interesada al parecer (al parecer dice ¡que huevos!) en la confusión creada con un heterónimo (¿y que es un heterónimo? pues una especie de seudónimo con personalidad propia, un otro yo del autor, en algunos casos con su propia biografía y personalidad, un recurso que a nuestra amiga gatopardo le fascina utilizar) atribuido (por fin se acaba la frase) a Antonio Gala (Poeta español nacido en Córdoba en 1936 que ha cultivado todos los géneros literarios, incluidos el periodismo, el relato, el ensayo y el guión televisivo. Y que
ha obtenido numerosos premios, bla, bla, bla.)"
Ains lo que me he cansao…jeje. A sus pies gatalinda.

Maravillosa Tautina: Cuando varias personas convocan el espíritu de un autor y este, mediante un medium no contesta, sino que se le pilla estando en amena conversación con su traductora, contándole chismes literarios que pusieron de los nervios a don Antonio Gala y a los directivos de la revista Barcarola, es que se ha interceptado (como cuando se estira la oreja a ver qué dicen); no hay motivos para creer que haya habido fornicio ni bajas pasiones entre Proust y doña Consuelo Berges ni en el otro mundo ni en

este: ¿de dónde has sacado lo de que eran amantes?
Tú pillas un escrito tuyo y haces una explicación previa diciendo que te lo has encontrado imitando, por ejemplo, el estilo de Antonio Gala y eso es un heterónimo: ¿ves lo que te pierdes por no leer el "anónimo florentino",que en la presentación tiene una imitación del empalagoso Don Antonio Gala?
Don Antonio Gala nació en Brazatortas (Ciudad Real) y allí hay una placa con la clásica retranca manchega que dice: "AQUÍ NACIÓ EL INSIGNE POETA CORDOBÉS ANTONIO GALA" y lo de que nació en 1936 también es una licencia poética, porque en ese año Gala ya padreaba.
Es decir: leer es tan dificil como escribir; pero leer bien es mucho más difícil que escribir bien. ¡Quedo rendida a tus pies!

Sra. Gatopardo: admiro profundamente a Marcel Proust porque se pasó la mayor parte de su vida en la cama, mismamente como un servidor. En cuanto a las madalenas o magdalenas...mire, a mí me chifla el cruasán, principalmente el que me sirven en "La Mallorquina" de la puerta del sol. Y me gusta especialmente el cruasán (no pretenderá que lo escriba en riguroso francés) de ese estabecimiento por dos motivos: su excelente factura y la relativa facilidad de consumirlo y de no pagarlo. Sí, en planta baja se junta mogollón de gente y un servidor suele desayunar como un pashá a las doce del mediodía pirandose después a la manera sueca, dejando que de la cuenta se haga cargo el dios todopoderoso de los cielos y la tierra que, es de suponer, tiene pasta por un tubo.
Conpréndame, estoy atravesando dificultades financieras.
No le diré nada más acerca de Proust porque yo siempre fuí de la peña de Flaubert.

ALIMAÑA NEWS: EPÍSTOLA MORAL A JAVIER , VIOLADOR DE WENCESLAO.

*Foto de archivo: Javier con Perote envainándose una reprimenda.*

Javier, cara y alma de comadreja, da la cara como el hombre que nunca fuiste. ¿Hasta cuándo vamos a tolerar que tu vesania sexual se abata sobre el prístino honor de los defensores de la Patria? ¿Durante cuánto tiempo va a poder soportar ese santo hermano tuyo, Don Augusto, el llevar sobre sus anchos hombros el peso de tu culpa, el fardo de tu infamia? ¿Acaso no te conmueve verle sumido en la sima de esa alcoholatura metílica, delirando, profiriendo obscenidades para hacernos creer a todos que él es el criminal? ¿No altera la ciénaga de tu alma facinerosa la imagen de ese santo varón rodeado por sus hijos, a los que otrora colmara de cuidados y amor, y, ahora, por mor de no arrastrarles al oprobio de un apellido estigmatizado, da puntapiés acá y acullá? ¿No te parece que apuró la hez de la penitencia, cuando, ya mancebo, tuvo que frecuentar los lupanares de la Justicia para sacarte a ti de los atolladeros que señoreaba tu lujuria? ¿No pestañean tus ojos libidinosos al contemplar a ese fraternal Cirineo arrastrando la cruz con semblante héctico, de foro en foro, de juzgado en juzgado, clamando generosamente: "*Yo me tiré a Wenceslao*".
Has llegado a engañar a Gatopardo, a don Luis Muiño, que tan desinteresadamente ha atendido en su consulta a Wenceslao. Pero a mí no. Y desde la atalaya de mi voluntad justiciera , yo te emplazo. Confiesa

Estimado señor Alimaña redactorloquesea:
Acabo de pasar unas cuantas horas poniéndome al día de la polémica suscitada a raíz del caso Wenceslao y los comentarios que ha generado durante mi por otro lado corta ausencia (que hay que ver lo que hablan ustedes). Y he llegado a una serie de conclusiones que le enumeraré a continuación:
1ro- Cada vez que usted habla sube el pan, que no sé si va a ser algo innato en su persona o producto de su idiosincrasia, pero parece tener cierto talento para provocar iras, fobias y furias desatadas.
2do- A medida que los despropósitos de los comentarios a sus artículos aumenta, disminuye en progresión geométrica la calidad y el buen gusto de éstos, ya sea por su parte o por la de sus contertulios (de los que excluiré a la señora barra ita Gatopardo y al Gato que le tiene a usted a su servicio, ambos personajes de exquisitos gusto y formas).
3ro- Si alguna vez me sentí impresionada por usted, esta sensación murió a raíz de su desagradable comentario referido a mis relaciones zoofílicas y mi preñez, por lo que puedo pedirle abiertamente que omita en el futuro hacer ninguna referencia a mi persona mientras no reciba una extensa disculpa acorde a la magnitud de la ofensa.
Y 4to y último- confieso entristecida que no necesita usted expresarse en francés o cualquier otra lengua, pues ni en el castellano más castizo consigo comprenderle, entenderle, abarcarle…resolverle al fin.
Es por todo esto que le conmino, en nombre de la caridad, a que deje descansar mis agotados parpados y evite deleitarnos con su presencia durante una temporada.
Atentamente de cualquiera menos suya.

[EXCLUSIVA: ALIMAÑA NEWS ENTREVISTA A WENCESLAO, EL MACHO CABRÍO DE LA LEGIÓN]

EXCLUSIVA: “Fui asaltado por ese energúmeno durante el desfile del Día de las Fuerzas Armadas”

Nuestros lectores recordaran que, en su día, se habló de que, durante el último desfile de las Fuerzas Armadas, la erróneamente llamada “*cabra*” de la Legión rompió durante unos momentos el paso de la tropa, lo que provocó gran hilaridad entre el público.
Alimaña News ha conseguido que Wenceslao, que así se llama el macho cabrío, rompa el silencio sacrificado que le impone la disciplina militar para iluminar aquellos sucesos.
Nos recibe a la puerta del Cuartel de Melilla, durante el breve descanso del medio día.
Fuma un cigarrillo Habanos y, entre calada y calada, ramonea un seto de aligustre.
“*Como me pille mi teniente me cae un puro de no te menees*”
“*Lo primero, pon ahí que no soy cabra. Macho cabrío. Comprobación visual. Intento táctil y te doy una hostia que te arranco la cabeza. Y al grano, que no es temprano. Íbamos mis compañeros y yo desfilando. “Soy el novio de la muerte” . Ya te lo sabes. Y noto como si me hubiera caído una bombona de gas a la altura de...*(aquí Wenceslao se turba) “*mon derrière” . (Sí, pase ocho años en la Legión Francesa). “Los etarras” le digo al cabo. Y me vuelvo y me veo un bandarra enganchao como un sapo partero. Me dio la vomitona. Y no pasa ni un segundo y veo a mi coronel arreándole un puntapié al tío. Pero en lugar de mandarlo a hacer leches se le engancho a la bota. Se la puso echa un asco.*
Le enseño la foto de Augusto. *“El mismo. La jeta no se me va de la cabeza”*
(Wenceslao aún está sometido a tratamiento psicológico. De aquella experiencia traumática le ha quedado un tic receloso de mirar constantemente hacia atrás)
“*Se lo llevaron mis compañeros detenido. A rastras. Iba cantando a voces: “me toca a mí hoy emprender la retirada/ debo alejarme de mi buena muchachada…” Cada vez que oigo un tango, desde entonces, me pongo enfermo*.
Y el honrado Wenceslao se despide de este redactor jefe con una palmada y corre a paso marcial hacia las obligaciones que la Patria impone.
Cuando leí cómo se mancillaba gratuitamente el honor de los militares -y especialmente el de los coroneles-este redactor jefe se propuso indagar en la causa. Ahí la tienen.

La Legión... ah, la Legión... aún recuerdo yo cuando iba con los miles gloriosus dándole con el pillum a los púnicos en la cresta. Qué tiempos aquellos, y cuántos años tengo ya, por Júpiter tunante, que decía Publio Cornelio. He de aclarar que la mitad de la tropa era mercenaria, oh, sorpresa, sí, sí, tan bajo llegó a caer la legión "romana". Pero esto vino muy bien, porque como eran negratas le dieron mucho ritmo a la cosa de descabellar al prójimo. De hecho, los soldados etíopes son los que sacaron el himno del legionario, que perdura en los actuales tercios hispanos. Haced memoria y veréis.

Oh...qué resaca, mon dieu (a ver si arreglo el desaguisado colando frasecitas en francés...)

Sra. Gatopardo: Le ruego tenga a bien disculpar mis exabruptos (o boutades) del día de ayer. Sucedió que sentí tal vergüenza ajena por el tono cuartelero que le estaba dando a la cosa el Sr. Alimaña Plumilla que intenté desesperadamente rebajar el contraste de su cochambrez implementando el procedimiento de la armonía. Pensé que matizando el contraste aminoraría de algún modo la catastrofe que se cernía sobre la irrefutable calidad de su blog.
Por las cartas y los llamados telefónicos recibidos en mi despacho esta mañana deduzco que no alcancé mi propósito. Lástima.
El resto lo hizo Don Simón. Y no crea que mi paladar no sabe apreciar la caricia de un Vega Sicilia, no, no es eso. Ocurre que ciertas dificultades err.... de tipo financieras me abocan circunstancialmente al tinto Don Simón. Eso sí: siempre en tetrabrick, que es la cumbre de la gama alta de la firma Don Simón. Pruébelo, hágame caso, con un cacho de chorizo cantimpalo está de muerrrrteee!!!
Con mi admiración de siempre:

Estoy dispuesto a testificar en favor de Wenceslao...
En tiempos de la guerra de Kósovo, coincidé en bastantes ocasiones con el encausado Augusto R. Y pude observar que su actitud hacia Wenceslao era harto sospechosa. Se hacía acompañar por él a todas las partes (en los dos sentidos de la palabra). Incluso,

en un café, pude observar como le miraba con unos ojos que solo podría calificar de libidinosos y lúbricos. Ya sabía yo que esto iba a pasar, porque como psicólogo he observado que etc, etc, etc...

Don Augusto: que me pida disculpas cuando ha sido usted zaherido y vilipendiado por uno de mis colaboradores me hace sentir hasta qué punto es usted un caballero a la antigua usanza, y soy yo quien se postra para pedirle perdón por el ambiente cuartelero de este blog, aunque según mi difunto Brigada en los cuarteles aprendió él todo lo necesario para sentirse orgulloso de ser español y tenía a gala no citar más extranjeros que los de la selección española.
Wencslao está en el calabozo por haber referido aquel sórdido asunto con Javier, un empleadillo del servicio de inteligencia y contraespionaje del Ministerio de Defensa, que trastornado por tener que leer tantos blogs literarios de contenido sexual explícito y redundante acabó por aborrecer a las mujeres y sintió un súbito impulso irreprimible por Wenceslao.
No sabe hasta qué punto lamento que su insigne persona se haya visto salpicada por este suceso, al que usted seguramente es ajeno.

Tautina, ahora comprenderás que no siempre el autor encuentra un público que lo entienda. De todas formas no sé porqué siempre me tengo que arrepentir de ser demócrata con los colaboradores y no por ser una quemasangres con mi patrón...
¡Cómo es posible que te me subas a la chepa de esta manera, Alimaña, por el mero hecho de tener un TIR y coger cultureta por las gasolineras de toda Europa, y además, tengo mosqueada a la casa Real Inglesa y al amigo de Bush por tu culpa. ¿Y quién me dice a mí que es verdad todo lo que te cuentan tus correspnsales?¡Ni siquiera me has dicho de dónde los sacas!

MEMORIAS APÓCRIFAS DE SICILIA.LA GRATITUD.

En Sicilia no existe tradición de hijos ilustres honrados por sus paisanos, y cuando no hay más remedio que reconocer a un benefactor, se le hace un homenaje y un ultraje, mediante el olvido de las formas de cortesía más elementales.

Si es un homenaje convocado por el Consistorio local, no es raro que acudan los ediles que han de entregar la placa con retraso y con prisas, mientras el agraciado espera sin más público que los allegados que él convocó personalmente, con la sospecha de que se ha equivocado de fecha. Sin disculparse por el cuarto de hora largo de espera, le sueltan unas frases masculladas sin ilación, de puro trámite. Pudiera ser que no se haya anunciado debidamente el acto; pero lo normal es que sus paisanos se sientan agraviados por el honor que recibe y no quieran apurar el cáliz hasta las heces, asistiendo.

Los sicilianos no saben dar las gracias y para corresponder a un favor utilizan fórmulas de rústica chufla:

-*Le ha invitado Zutano* –dice el camarero.

-¡*Que sea muchas veces*!-contesta el convidado o brinda en voz alta "*¡Por el tonto que paga!*".

Una familia que pasaba por un momento de crisis dejó a deber en la tienda los artículos de primera necesidad durante tres semanas. Una forastera ingenua , que se creía amiga, pagó su deuda y le hizo prometer al tendero que no les diría quien había sido. Al cabo de los meses la invitaron a tomar café en su casa. Allí le enseñaron las mantelerías bordadas del ajuar familiar, las joyas, los cuadros, la televisión ultraplana de 26 pulgadas, el DVD último modelo, y con el café pusieron una vajilla de ensueño y los dulces más caros... Y la anfitriona, disimulando a duras penas su ira, le espetó:

-*Para que sepas que nosotros somos unos hambrientos: en mi casa hay de todo lo mejor. Y tú sabrás por qué has pagado nuestra deuda en la tienda; pero te has equivocado de medio a medio*...

-*No quise ofenderos, me enteré que estabais sin trabajo... pero si queréis pagármelo*....

-*Hombre, claro, como que yo sé cuánto pagaste tú y cuánto me vas a querer cobrar... ¡Tú serás tonta; pero yo no!*

Al caer la noche, con sigilo, devolvieron los electrodomésticos, la vajilla, las joyas y los objetos que les habían prestado, y la familia se preparó para pasar unos días comiendo y cenando la repostería que sobró. Pero no faltó quien informara a la forastera para burlarse de los aires que se había dado aquella pobre gente y poder rematar con una de esas frases de sabiduría compendiada a lo largo de varias generaciones:

-*¡Tú eres tonta! ¿Te creías que te lo iban a agradecer?*

Esta gente aguanta y transige con todos los abusos; pero jamás perdona a quien les hace un favor. Efectivamente, es más piadoso y más justo tratarles a patadas.

En Sicilia existe la convicción de que ser pobre es una indignidad y una bajeza, y todos compiten para exhibir sus excesos: no hay reunión donde no se cuenten sus proezas gastronómicas. Si alguien se comió treinta y nueve huevos duros con pan, di que habrá quien se comió un cabrito asado con patatas o tres litros de chocolate espeso con cuatro docenas de magdalenas. Durante muchos años la mayor causa de mortandad era por desnutrición e indigestión simultáneas.

Quizás el carácter bilioso, bronco e ingrato, que les caracteriza, venga de ahí.

Claro, y los catalanes son amarretes, y los andaluces mentirosos, los argentinos fanfarrones y los gabachos...los gabachos son gabachos.
No amigo, los sicilianos son mucho más que eso que Ud. describe y simplifica y al simplificar deforma. Los sicilianos son un pueblo complejo, profundo y sofisticado si consigue conocerlos y penetrar más allá de su hermetismo y de los tópicos. De acuerdo, su orgullo es monolítico y difícil de entender pero eso se remedia conociendo su historia.

Augusto R. El título de esta serie es "memorias apócrifas de Sicilia" y U Crasticeddru puso como condición ineludible que no se quitara lo de "apócrifas" so pena de encontrarme con una "corbata siciliana", que si usted ha vivido allí tantos años como yo sabrá que no sienta bien con ningún traje.

Contestando a Augusto R.:Caballero, confunde usted la Historia con un atestado de la Guardia Civil. Y respecto a la profundidad y complejidad de algunos pueblos, le diré que hay fosas sépticas de gran capacidad y que, una vez llenas, presentan un complejísimo habitat bacteriano. Y Gatopardo no simplifica, porque es mujer y aún no me he

encontrado a una que no le dé por enredar. O sea, que cierre usted el pico, lunfardo.

Llego hasta aquí a salto de mata y... bueno, me quedo impresionado. Magnífico.

Me gustaría hacer una (posiblemente poco acertada) aportación al debate. Ese orgullo que usted está describiendo no creo que sea privativo de los sicilianos, sino que puede ser la mejor característica del espíritu meditarráneo.
Como andaluz que soy he conocido mucha gente así y escenas similares a la que usted describe. Sin embargo dos factores están haciendo desaparecer estas desagradables costumbres: una la prosperidad económica (factor importantísimo para aparentar lo que no se es) y dos ese cajón de sastre que es la globalización, en este caso cultural, que nos pierde y nos enseña muchas casos de la India y Singapur, pero que hace que nos olvidemos de nuestras costumbres más cercanas.

Yo me opongo a todo lo que se dice en ese artículo. Pero ¿será porque no me gusta o será por chinchar al autor? Eso, evidentemente, depende de mi lugar de nacimiento, si yo fuera siciliano quedaría claro que me gusta, pero no lo diré en la vida. Y ahora que releo... observo que esa actitud es común a mucha gente que conozco (y más entre los plumíferos) así que debe haber mucho siciliano por ahí repartido. En mi pueblo, siempre se ha dicho que una putada puede perdonarse, pero un favor no; o que a veces hablan bien de uno... y es pura calumnia. Yo mismo suelo decir un refrán que me encanta: Al maestro... ¡puñalada!

Sr. Redactor Jefe: No me pida Ud. imposibles. Estoy naturalmente incapacitado para cerrar el pico a pesar de la roja y espesa sangre siciliana que corre por mis venas.
La metáfora de las fosas sépticas sirve tanto para los sicilianos, como para los pobladores de Reus o los vecinos de Lepe. De modo que no vale la pena reducir las complejas floras bacterianas a tópicos útiles solamente para los chistes de Gila, que por cierto era mi amigo.
Por último decirle que de mi asiduo trato con redactores jefe de aquí, de allá y de acullá, puedo asegurarle que Ud. encaja a la perfección en el tópico que los define como alimañas carroñeras.

Para Susy: No es comprensible tu amenaza.¿No has leído de Pasifé con el toro, de Minerva con el can? ¿Y por qué vas a privar a los animales criados entre humanos, que tan generosamente nos quieren, del placer de probar otras experiencias? La cabrita que filmó Buñuel con el pastor enano... ¿acaso no gozaba con el bueno del pastor? Las gallinas de Padre Padrone...!Bien que cacareaban! Me consta, por boca de los que lo vivieron, que un ilustre hacendado manchego (de Lillo), que llegó a ser diputado, tras iniciarse con las aves de corral de sus dominios, se aficionó a su borrica, y que ésta, cada vez que le veía entrar en la cuadra, rebuznaba y se removía gozosa... ¡Oh, amor, amor!¡Enemigo de toda razón!¿Quién te dio tanto poder?¿Por qué te riges sin orden ni concierto? Todas las deudas del mundo reciben compensación en diverso género.El amor no admite sino sólo amor por paga.

Con un resto de pudor
Que no alcanza a su prosa
Don Augusto Relamido
Ha acortado su apellido
Para evitar el rubor
De su identidad rijosa

Siciliano o argentino
No tiene usted solución:
Es un puro desatino
Que nos provoca irrisión

Por la proa es pomposo,
De retórica porteña
Y más pesado que un tango
Por la popa es dudoso
Y a la cabra lugareña
Pretende tocarle el mango

A su argentina ralea
Señor mío, yo le emplazo
Que cese la verborrea
De este lunfardo peñazo

Aunque tenga mucha gana
Que no cate tanto ovejo

de hacer rimar sus aullidos
Yo lo escucho conmovido,
con ausencia de deleite
porque sé que pierde aceite
y eso lo tiene afligido.
Entre puya y resoplido
quiere ofrendarme el trasero
sin saber que este aparcero
nunca contó entre sus mañas
hincar culos de alimañas.
Escuche bien, jefecillo,

ALIMAÑA NEWS SIGUE INVESTIGANDO EL CASO DEL "MISTERIOSO NIÑO DE CLARENCE HOUSE"

LA IDENTIDAD DEL NIÑO MORDIDO POR CAMILLA HA LLEVADO AL ENFRENTAMIENTO DE LAS DOS POLICíAS MÁS PODEROSAS DEL MUNDO.
(De nuestro corresponsal en Londres)

Los medios de comunicación hemos sido convocados hoy a las seis de la mañana en la sala de prensa que **New Scotland Yard** tiene habilitada en su sede, al sur de St. James's Park para recabar "*el estado de la cuestión*" en que se halla la investigación sobre el "*misterioso niño de Clarence House*". La sala es un espacio frío, gris y funcional. Hemos soportado pacientemente un exhaustivo chequeo personal y de nuestros móviles, grabadoras y ordenadores. Este corresponsal ha levantado las alarmas al detectar el oficial de seguridad un pequeño bulto en el calcetín del pie derecho originado por un parche anticallos...
A las seis y veinte han hecho su aparición, en medio de un impresionante silencio, la doctora **Kay Scarpetta**, Forense Jefe del Instituto de Medicina Legal de Richmond

(Virginia), el Superintendente del CID , **Adam Dalgliesh** y la sargento **Barbara Havers**, asignada por la Sección Especial (Special Branch) a este caso. La doctora Scarpetta es rubia, de mediana estatura y musculosa, viste un planchado Armani color azul navy, una blusa blanca, y ha pinchado de su solapa izquierda una banderita americana en esmalte. El traje del superintendente es algo oscuro de lana que ha conocido mejores tiempos.
Ya al entrar por la puerta ha habido unos instantes de tensión cuando Dalgliesh ha cedido el paso a la forense americana, que ha rehusado secamente la cortesía, tras unos segundos de estupor, segundos que ha aprovechado la oronda sargento inglesa para colarse entre los dos y sentarse en la que, a todas luces, parecía la silla reservada al de mayor rango (el superintendente inglés, en sentido estricto o , por deferencia hacia el visitante, la doctora Scarpetta). La sargento Havers ha exhalado el humo de un último cigarrillo que ha debido de fumarse, contraviniendo todas las normas, y mientras los superiores tomaban asiento, ha procedido a sacudirse con energía las migas de algo pegajoso que se habían adherido pertinazmente a la sudadera color verde loro.
Adam Dalgliesh ha comenzado las presentaciones, pero si iba a añadir algo, nos hemos quedado sin oírlo porque la doctora Scarpetta, con un enérgico pliegue de brazo, y la mano izquierda extendida le ha cortado:
- *Cinco minutos* (señala su reloj con el pulgar). *Disparen.*
Mis colegas, más acostumbrados a los medios y modos americanos, ni han parpadeado. Yo he estado a punto de meterme debajo de la silla. Dalgliesh está escurrido a lo largo de su asiento y ha optado por reposar sus preocupaciones sobre una lánguida mano. Mira a una pata de la silla y recita con triste voz de barítono:
"*Devouring Time, blunt thou the lion's paws*
And make the earth devour her own sweet brood"
(*Tiempo devorador, embota las garras del león/ y haz que la tierra devore a su querido retoño*)
-*¿Eso lo pongo según lo oigo o me lo dicta usted al salir?* -pregunta la sargento Havers que toma notas de la reunión.
- *Siga lo que su libre albedrío le dicte, sargento*.
- *Sally Palgrave, del Evening Standard,* (se identifica) : *¿Doctora Scarpetta, a qué ha venido a Londres? ¿Es de tanta gravedad este caso como para haberse desplazado desde Virginia usted y su equipo a echar una mano a Scotland Yard?*
-*He venido a comprobar in situ si las coincidencias que presentaba la descripción policial del sujeto detenido con las concordancias entre la base HOLMES y la base CAIN sobre ciertos psicópatas y terroristas buscados por Estados Unidos y , supongo,* (aquí lanza una mirada despectiva a Dalgliesh) *también por el Reino Unido. Y sí a su segunda pregunta*.
-*Keith Williams del Norfolk Observer. -¿Qué pasos ha seguido para llevar a cabo estas comprobaciones?*
- *He seguido el protocolo habitual en estos casos: medición antropométrica, peso, búsqueda de señales relevantes, toma de moldes de dentadura (por ejemplo, en este caso la protuberancia de los incisivos superiores es muy característica); hemos observado al individuo a la luz del Luma-Lite para detectar huellas digitales (estaba bastante manoseado, por cierto), fibras textiles, semen, narcóticos, explosivos…lo normal. Desgraciadamente, tengo que declarar que mis investigaciones se han visto indignantemente constreñidas por las restricciones impuestas por las leyes de este país* (otra mirada de ira en dirección a Dalgliesh que musita:
Foul words and frowns must not repel a lover;
What though the rose have prickless, yet 'tis pluck'd
(*Agrias palabras y fruncimientos de ceño no deben repeler a un amante,/ porque, aunque la rosa tiene espinas, igual se la coge*).Todos sabemos de las aficiones poéticas del policía, al que, por otra parte nadie hace caso.

- *¿A qué restricciones se refiere?* -pregunto.
- *A la que me impide , por ejemplo, practicar la incisión en Y en el sujeto para el análisis de sus órganos internos, así como la posterior toma de muestras para enviarlas a nuestro laboratorio de patología forense* (murmullos)
- *Cecil Sewell de la North London Gazette: -¿Se da cuenta, doctora, que está hablando de un individuo vivo que, probablemente, es un niño?*
- *Yo trabajo con datos y hechos no con hipótesis o palabras . Durante los diez primeros minutos de examen, el individuo, por ponerle un ejemplo, presentaba una lividez y un enclavijamiento de mandíbulas que era un rigor mortis de manual de primero de medicina.*
Respecto a lo de ser niño, es algo que tendremos que decidir a la luz de los resultados. Las radiografías y las pruebas de densiometría, así como ciertas mediciones morfológicas, así lo apuntan. En cambio otros indicios apuntan en dirección contraria.
-*¿El bigote? ¿No le parece extraño ese bigote en un niño?* Inquiere el mismo reportero
- *En absoluto. En ciertos criminales con perfil psicopático (y en ciertas razas) es frecuente el hipergonadismo con desarrollo temprano de rasgos definidores sexuales. También puede deberse a una neoplasia en la pituitaria. Aunque esto es más frecuente en equinos de edad avanzada.*
-***Tom Meyer de Alimaña News**: **Doctora, hay serios indicios de que la persona detenida fuera el expresidente del gobierno español, José María Aznar ¿qué nos puede decir?***
- *Digo dos cosas: primero, que no entro en cuestiones políticas; segundo, el individuo que yo analicé presenta todos los rasgos psicológicos de un criminal en serie; la suplantación de personalidad entra en el perfil arquetípico. El psicópata tiene un concepto de si mismo ególatra y desmesurado. Halla placer en engañar a los otros y con ello confirma ante su degenerado ego que los demás son estúpidos. Por otra parte, en la historia de la criminología, el asesino psicópata es, por excelencia, el hombre de las mil caras. Se disfraza, adopta pseudónimos, tiene versatilidad caligráfica. Recuerden los pseudónimos y los tipos de letra bajo los que se escondía Jack el Destripador. Es más creo que este individuo intentó engañarnos cuando emitía su supuesto nombre. Los espectrogramas de fonética acústica de las grabaciones indican que no dijo "Aznar" sino "Ahnar". Es decir que reveló involuntariamente que su lengua nativa era el árabe. Estos asesinos son taimados, pero no infalibles.*
-*¿Cree usted que actuaba solo?*
-*El psicópata es un lobo solitario, pero ya he dicho que le gusta liderar y seducir. Ha contado con la complicidad voluntaria o involuntaria del ministro español Moratinos. La responsabilidad de este también habrá que ser dilucidada. En cualquier caso la orden de búsqueda internacional será cursada contra los dos. Pero, repito, no puedo emitir un juicio científicamente satisfactorio hasta que no pueda practicarle la incisión en Y al sujeto. Se ha agotado el tiempo*

RIPIOS DE LA GLAMOUROSE CABRA IV

A don José Bono, ministro de Defensa al mando para evacuar las tropas de Irak

"Los militares pidieron a Bono que no hable por el móvil de los planes de evacuación"

Virgen de Cortes, Bonete,
qué gente tan retorcida,
la que te pone en un brete
y quiere ponerte brida.
a ti, que eres de Albacete.
No te dejes tú, Bonico,
no hables en clave ni loco
no hagas caso de ese circo,
que no se tiren el moco,
para que cierres el pico.
No hay secreto militar
en que se vienen corriendo
en que se van a marchar
y que lo hacen huyendo
con aire poco marcial.
Zapatero, viento a popa,
y tú que pisas puntillas,
vais a dejar a la tropa
poniendo la otra mejilla,
con el culo hecho una sopa
y el honor en angarillas.

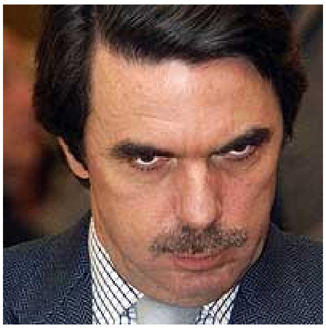
ALIMAÑA NEWS.¡ULTIMA HORA DESDE HEATHROW!



El ministro de Asuntos Exteriores español, Miguel Angel Moratinos ha llegado apenas hace una hora al aeropuerto de Heathrow acompañado por el ex-presidente de Gobierno José María Aznar. Aznar, que llevaba una mano vendada y presentaba un gesto adusto, se ha negado ha contestar a nuestras preguntas.
Moratinos, que parecía sujetar con firmeza la mano sana del ex-dignatario, ha minimizado el incidente y ha respondido con afabilidad:"*¡Ojalá los problemas de Oriente Medio fuesen resueltos de forma tan pacífica y dialogante como éste!*"

ALIMAÑA NEWS INSISTE EN LAS PREGUNTAS DE AYER:

¿Por qué se ha ocupado del caso la "Special Branch" de Scotland Yard y no el CID?
¿Por qué han estado encendidas las luces de la Embajada de España en Londres toda la noche? ¿Ha sido llamado a consultas el embajador de España en Londres?
¿Por qué el ministro de Asuntos Exteriores, Miguel Angel Moratinos ha interrumpido su estancia en Brasil, donde acompañaba a los Príncipes de Asturias en su viaje oficial, y ha salido apenas hace una hora del aeropuerto de Heathrow para "resolver un asunto de trámite"?
¿Por qué la policía británica ha solicitado la opinión de la Jefe del Instituto Anatómico Forense de Virginia?
¿Es cierto que los investigadores tienen una foto del presidente George W. Bush aupando y besando a este mismo niño, tal y como hemos sabido de fuentes cercanas a la investigación?

ALIMAÑA NEWS: ÚLTIMAS NOTICIAS

(De nuestro corresponsal en Londres)

Desmentida por fuentes oficiales y por los indignados padres del menor la noticia (que circuló esta mañana en ciertos diarios británicos) de que, el que ya se ha dado en llamar "*el misterioso niño de Clarence House*", fuera un escolar de once años y de origen paquistaní , que responde a las iniciales A.T.

-“*Siempre seremos considerados ciudadanos de segunda y sospechosos de cualquier delito*”- ha declarado Mahmud al-Jaber, presidente de la comunidad musulmana del Norte de Londres, comunidad que hoy se manifestaba contra la ley de seguridad antiterrorista (versión británica de la “Patriot Act” de Bush). El origen de la confusión lo provocó la propia policía, al emitir por las cadenas locales un retrato robot del niño (la ley inglesa de protección del menor prohíbe mostrar fotos de éstos) a fin de que alguien lo identificara. Según parece, el niño no habla inglés.
“*Algún profesor debe conocerlo. No entiende nuestras preguntas, pero intenta desesperadamente conjugar el verbo to know. Parece encolerizado.Pero es la respuesta natural de un niño a una situación de stress post-traumático*” ha declarado Sally O’Connor, psicóloga infantil, colaboradora de Scotland Yard

ALIMAÑA NEWS:LA GUERRA DE LAS ROSAS. CAMIlLLA MUERDE A UN NIÑO

(De nuestro corresponsal en Clarence House)

La que debería de ser la etapa más feliz de la vida de Camilla se ha transformado en una horrible pesadilla. Los desaires de la reina, los problemas con los grupos ecologistas y, el recuerdo, siempre vivo, de la figura de Diana de Gales están minando la entereza y serenidad de la prometida del príncipe Carlos.
Ayer noche, cuando Camilla Parker-Bowles salía de la residencia de Clarence House, para asistir a una gala benéfica patrocinada por *Intermon-Oxfam*, en medio de la habitual nube de fotógrafos, la que fue rival eterna de Diana fue abordada por un niño que portaba un ramo de rosas y que, inexplicablemente había logrado romper el férreo cordón de seguridad que rodea la mansión. Ante la prensa de media Europa, Camilla mordió a la manecita que le presentaba ilusionada la prenda floral. La Duquesa de Kent, que acompañaba a la futura Duquesa de Cornualles, y varios guardaespaldas se apresuraron a separar al niño de ésta y entregarlo a un equipo médico de urgencias de la zona.
El portavoz de Clarence House, Timothy Webster, ha leído hoy ante los numerosos periodistas acreditados el siguiente comunicado:
"*Carlos Felipe Arturo Jorge, Principe de Gales y su prometida Mrs Camilla Parker-Bowles lamentan el incidente ocurrido ayer noche en los jardines de Clarence House*."
Según el coronel Webster, Scotland Yard está investigando la identidad del supuesto niño y los responsables de su irrupción en el área de seguridad. "*No sabemos aún si efectivamente se trata de un niño o de un individuo de minúscula estatura. Por otra parte, no hemos de olvidar los funestos resultados de ciertos ramos de flores ofrecidos a personalidades de la realeza. Sentimos no poder ser más explícitos hasta que el juez encargado del caso no levante el secreto del sumario*"
Sin embargo la prensa amarilla británica no está dispuesta a renunciar a otro nuevo escándalo. Hoy ha aparecido en los tabloides del Reino Unido una recompensa por la localización del niño.
Pero sólo Alimaña News lo ha encontrado.

ALIMAÑA NEWS: “CAMILLA FUE INJUSTAMENTE ACUSADA”

Declaraciones de Mary Chattesworth, nodriza de la prometida del príncipe Carlos a nuestro corresponsal en Gloucestershire

Mary Chattesworth nos recibe en sus habitaciones de una residencia de ancianos, situada a las afueras de Cheltenham. "*El mes que viene vuelvo a mi casa de Sussex*." El *cottage* , que generosamente le cedió de por vida el mayor Shand, padre de Camilla, cuando Mary se jubiló, ha tenido que ser retejado después de las tormentas del pasado otoño. Mrs. Chattesworth es una anciana enérgica y despierta, a la que nadie supondría los noventa años que declara orgullosa. Viste unos pantalones de terciopelo azul y un cardigan rojo. Fuma con boquilla (*"para manchar menos la dentadura. A mi edad, fumar o no, poco importa"*) y no ha renunciado a su gin-tonic diario.
-*¿Ha visto últimamente a Mrs. Parker-Bowles?* (Mrs. Chattesworth nos ha pedido emplear esta fórmula para referirnos a Camilla)
- Me llamó para interesarse por mi salud este invierno y me preguntó si estaba satisfecha con mi nuevo alojamiento. También tuvo la amabilidad de comunicarme su compromiso con el Príncipe Carlos.
-¿Es Mrs. Parker-Bowles una persona afectuosa?
-*Camilla* (dice olvidándose de formalismos) *es la niña más encantadora que he criado. Annabel es dulce, pero más introvertida. Annabel es su hermana pequeña* (me ha adivinado la cara de despiste). *Mire, aquí hay una foto de Camilla con ocho meses, riéndose. Es igual que ahora* (efectivamente, es un bebe singularmente carilargo y de desarrolladas encías). *Fuera del sarampión y alguna caída, nunca estuvo enferma. Tenía una energía extraordinaria. Aún recuerdo la cara de sorpresa de una doncella cuando , habiendo tomado a Camilla en brazos para jugar con ella, recibió una patadita de la niña que le rompió dos costillas. El mayor Shand no podía contenerse la risa (y es militar).*
-*Supongo que la doncella no se rió tanto*…
-*Mire, joven, era otra época. Y mejor que ésta. Lily* –se llamaba así- *también se rió. No mucho, claro, porque uno no puede reír excesivamente con dos costillas rotas, pero se rió lo adecuado. Además la cocinera le puso una cataplasma de mostaza y se le dio la tarde libre para que descansara.*
-¿Recuerda usted la época de Queen's Gate? ¿Fue realmente una escuela tan dura? ¿Protestaba Mrs. Parker- Bowles?
- En aquel tiempo, Camilla no era Mrs. Parker-Bowles. Era Miss Camilla Shand, joven. No complique las cosas más de lo necesario. Y es mejor que aprenda a preguntar ordenadamente. No siempre va a tener las suerte de entrevistar ancianas con la cabeza clara. Tengo que decirle que Queen's Gate era una escuela magnífica. Sé que hoy critican su comida y su falta de calefacción y agua caliente, pero lo mejor de Inglaterra no surgió de la molicie.
- Al parecer, se pasaban un poco con las gachas de avena y el cordero viejo…
- Tonterías. Camilla era una perfecta, sana y sencilla niña inglesa. A los dos años ya se me escapaba a la cocina y allí devoraba nabos, mazorcas de maíz y calabacines crudos. Y la carne siempre le gusto cruda y no le preguntaba la edad…
-Si tuviera que definir con una palabra a la joven Miss Camilla Shand…
- Estoicismo. Camilla ha sido víctima durante años de la más espantosa e injusta conspiración que ha podido soportar un ser humano. Antes de volver, joven, lea y memorice bien las fechas en que ocurrieron supuestos escándalos, porque las vamos a necesitar.
Mary Chattesworth se levanta indicando que la entrevista ha terminado por hoy y añade:
-"*Por cierto, para ser exactos, mi nombre es Rosalind, pero, como ese era también el nombre de la esposa del mayor Shand, se me llamó Mary, que pareció lo más adecuado*"

ALIMAÑA NEWS: CAMILLA SE ENFRENTA A GRUPOS ECOLOGISTAS

(**De nuestro corresponsal en Gales**)

La habitual tranquilidad de la idílica campiña que rodea Highgrove, residencia habitual del príncipe Carlos cuando se halla en Gales, se ha visto alterada por numerosos grupos ecologistas y conservacionistas que protestaban por lo que llaman "*bárbara costumbre*" del exterminio a mordiscos de roedores locales. "*Entre los cadáveres de animales que Camilla abatió con sus dientes hemos encontrado cuatro mustélidos (tres hurones y una comadreja) cuyo peso y morfología no se prestaban a confusión*" ha declarado Brian Higgins, veterinario y portavoz de "*Save the Rats*". Este mismo grupo ha presentado denuncia contra la futura duquesa de Cornwall por agresiones. Según Brian Higgins: "*Mrs. Parker-Bowles se asomó desde una ventana del segundo piso del ala oeste de la mansión empuñando una escopeta y efectuó varios disparos que habrían podido ocasionar heridos, de no haber sido desviada su trayectoria por alguien del personal de la casa*." Frustrada y encolerizada, al parecer, y según las mismas fuentes, Camilla empezó a arrojar diversas piezas de mobiliario por la ventana, que se estrellaron contra el suelo, pero que no alcanzaron a los ecologistas ya que el cinturón de fuerzas de seguridad los mantenía a prudente distancia.

Bohemia (por cierto te llamas como una revista que yo leía) no sé como lo haces para comentar segundos después de que editara el artículo de nuestro corresponsal del "Alimaña News" en Gales.
Ya sabes que un director hace cualquier cosa por aumentar su audiencia menos contar la verdad, y no sé hasta qué punto la Alimaña News no habrá empujado a los ecologistas.
Yo me limito a subir a la red lo que me mandan, mi dulce Bohemia.

Ah! Gatopardo, yo tampoco lo sé, es que soy inquieta. Seguro no te lo he dicho aún, "aquel" me llamaba "resorte" :)))

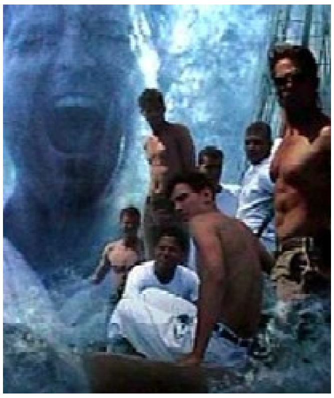
EL MILAGRO DE MONTIJO



Recuerdo que había un río, pegajoso, pequeño, con la aguas color del orín, raspas de truchas muertas, compresas flotando, pero un río. Con su puente colgante y un viejo con boina, sin pitorro, que lo cruzaba lentamente, casi levitando, y que arrastraba un burro sin esfuerzo, movidos ambos por la inercia natural del mundo que gira sin importarle nada. La luz era siempre la misma, como en un cuadro.
- *Con este inflador de la barca soy capaz de tirarme doce pedos seguidos*- gritó Montijo
Era verano. Era un campamento de verano. Era la hora de la siesta. Aburridos jugábamos al ajedrez, tumbados sobre la hierba. Montamos las tiendas en una plantación de chopos que con sus copas desgarraban la luz que caía en estrechos filamentos sobre nuestros rostros ociosos.
-*Doce pedos o más, si no lo creéis, me apuesto una caja de cervezas y un jamón*- gritó de nuevo. Era Montijo. Un joven alto, moreno, con el pelo tan negro que brillaba azul. Con la piel blanca. Perezosos lo miramos con atención, incrédulos y mediterráneos. Montijo hablaba en serio. Su terrible parecido con el actor Kyle Maclachlan protagonista de Blue Velvet y de la serie Twin Peaks nos hacía creer en él.
Un grupo de seis y el héroe nos metimos dentro de un tienda, una canadiense, doble techo y ábside al fondo. Una catedral inmunda de lona. Dentro, Montijo se metió la punta de la válvula por el ano y me ordeno ceremonioso "*pisa el inflador*", y lo pisé. Su cara se tensó un instante, durante el soplido interno no apartó la válvula, y la tripa de aire penetró en su estómago. Sonrió, arrojó la válvula a un extremo de la tienda, se colocó a horcajadas ofreciéndonos su ano en todo se esplendor. Nos ofrecía su ano como prueba de sinceridad, de amistad y de hombría, sabido es que cuando dos hombres se han contemplado mutuamente el ojete es que gozan de una profunda amistad. A pesar de la leyenda mirábamos estremecidos aquel ataque de impudicia, inusual, alocado, obsceno, en un tipo tan delgado y elegante. De ninguna manera apartamos la vista de ese agujero negro e inmundo que parecía haberse llenado de fantasía. Montijo convulsionó su tripa dos veces, ejerció los abdominales con maestría y un sonoro y largo pedo salió de su ano. Reímos. Una vez calculada la fuerza retentiva de su esfínter los pedos se hicieron más cortos, más sonoros y por tanto más numerosos. Montijo había convertido su ano en una boca bufante, contestataria y sonora, en una máquina de embutir pedos inocuos, que apenas despedían hedor, se centraba. Doce pedos en la primera tacada. Cuando Montijo se dio la vuelta aplaudimos con la boca abierta. Ni la laringe de Caruso o de Plácido domingo, podría demostrar esa técnica muscular de control de aire y de sonido. Dios mío. Seis días estudiando la apertura danesa para convertirnos en reyes del ajedrez cuando podíamos haber pasado esa semana lanzando pedos como centauros ebrios a los largo del cauce de un río

moribundo repleto de compresas. El milagro de Montijo era la camaradería. Poder enseñar nuestros anos, abriéndose, cerrándose, convertidos en una bucaramanga, un canal artístico que con la paredes salpicadas de mierda bruñiera de tal manera nuestros follos que los convirtieran en arte. Mostrar la versatilidad del esfínter a los amigos de siempre y jugar con la memoria y que nuestros pedos sonaran como la prosa de Proust. Montijo puso en nuestras manos el secreto de la amistad entre los hombres, poder compartir la vista del ano del prójimo sin sentir vergüenza, ni un ápice de asco. Montijo nos había unido por la parte más oscura e indeseable, en principio, de nuestro cuerpo. Había cuadrado el círculo universal del ano.
Uno tras otro, con un protocolo casi religioso, nos fuimos metiendo la válvula en el ano. Y Montijo pie sabio, descargaba la dosis de aire justa y proporcionada al peso y la altura del principiante. Era tal la amistad que nos imbuía aquel ejercicio de destreza anal, tal la tibieza de la temperatura de la tienda, que ni siquiera nos molestábamos en limpiar la punta de la válvula antes y después de cada operación dispuestos como estábamos a compartir la mierda sin tapujos.
La primera ronda fue un éxito. La segunda también. Los menos iniciados consiguieron dominar en tan poco tiempo, la ductilidad de su esfínter de tal manera que su cavidad ventral recibía las descargas de aire con la familiaridad con que Montijo lo conseguía. En aquel momento mágico, de creación de una santa hermandad, supe por fin lo que pudo ser la amistad templaria en los bosques de hayedos centroeuropeos, donde en sus ríos no flotaban compresas.
Montijo sonrió con placer. Eramos sus mejores alumnos. Estaba satisfecho. Había jugado fuerte. Lo lógico hubiera sido que alguno de los presentes se retrayerá con cobardía y se negara a comulgar con su trasero la hostia común en forma de inflador de barca neumática. Orgulloso, enloquecido de soberbia, Montijo quiso acariciar aquella ceremonia de éxtasis anal y ventral con una proeza. Se colocó la válvula y me permitió, me ungió con los honores de sostener con mi mano aquel pitorro mágico. Tan cerca estaba de su agujero que los pelos que rodeaban su ano me hicieron cosquillas en el dorso de mi dedo gordo e índice. Una vez colocada en su sitio, a la exacta profundidad giró la cabeza y me dijo" pisa una vez" y el aire entró por su ventrículo con tanta facilidad que casi regresa para escaparse Lo evitó expulsando con los labios de su ano la válvula y casi mis uñas. "*Pisa de nuevo*" me ordenó. Nos miramos, dos cargas parecían excesivas, el inflador era nuevo, no tenía apenas fisuras y dos viajes de aire podían reventar al más osado, pero la firmeza de la voz de Montijo, me redujo a la más dócil y frágil esclavitud, y pisé de nuevo el inflador con energía. El aire entró con tal ímpetu que el estómago de Montijo se convirtió en un odre. Una pelota abdominal de grandes dimensiones. Montijo, y no exagero, tenía el aspecto de un hombre cuya barriga se había inflamado como la de una preñada. Al contrario que las mujeres, su estómago formaba un odre redondo, prieto como el de un balón de fútbol o de una sandía, se estaba convirtiendo en una península de piel inflada que parecía querer separarse de su cuerpo. Montijo derramaba lágrimas, pero aguantó el dolor y se colocó en el ábside con la intención de regalar nuestras pupilas con el mayor espectáculo sonoro producido por un ano. Esperamos con una mirada de entrega, arrobo y esperanza pero Montijo no podía gobernar su interior. Oímos su esfuerzo, sus estertores para poder sacar aire de su estómago. La presión había cerrado los conductos. Es como si al vaciarse la bañera el tapón se hubiera atascado en la tubería. Montijo comenzó a gritar tan fuerte que nos aterró. Creía que iba a reventar, pedía a Dios que le ayudara. Y por primera vez, advertimos el peligro que corría. O soltaba amarras por el ano o el aire acumulado podía generarle lesiones mortales en los intestinos. Pálido, lloroso. Montijo, salió de la tienda a pedir ayuda. Nadie sabía qué hacer. Lo veían hinchado y como era lógico, no se podía dar explicaciones, hubiera sido compartir el secreto de nuestra recién estrenada hermandad. Un animal quiso pincharle con el abrecorchos de una navaja suiza para que expulsara el aire de golpe. Salí corriendo, sendero arriba, para buscar a un médico.

Mientras, Montijo bebía un vasito de agua para calmar el fuego de las entrañas. A los tres minutos de subida, oí un ruido cavernoso, tremendo, horripilante, era un rugido grave, seco y largo, que el valle recogió sin eco. Era un eructo gigante, el agua había abierto la tráquea y Dios sabe qué en el cuerpo de Montijo, y entonces se produjo el eructo más grande que había oído nunca. Oí aplausos y vivas a Montijo, palmadas en la espalda y suspiros de alivio. Unos segundos después, otro ruido, esta vez más sordo, más aflautado y mucho ,más largo se oyó. Como si alguien pisara un patito de plástico pero aumentado por mil. Era el pedo. El gran pedo. La madre de todos los cuescos conocidos. Era el pedo más animal y pantagruélico jamas oído. Montijo había sido capaz de expulsar por el ano, de una sola bocanada, el contenido completo de una carga y media de inflador. Su estómago se relajó como un globo desinflado y Montijo suspiró mientras un hilo de mierda le caía delgado por el interior de uno de sus muslos. El sufrimiento de Montijo lapidó nuestro secreto con sillares de prejuicios mutuos. Nadie reveló jamas cómo Montijo pudo recrear en mitad de un valle montañés, aislado de la civilización, el pedo más excelso de todos los tiempos. Todavía, cuando regreso a aquel valle para saborear las madalenas del recuerdo adolescente, me parece oír el ronco sonido de ese gran pedaco. Quizá es que el esfínter del fondo del valle, esté dosificando con periódicos ecos, el indigesto, misterioso y bronco milagro de Montijo.

Sí, qué bonito y qué bien dicho, sí señor, lo comprendo perfectamente, porque he vivido algo así: en la mili hacíamos concursos de eructos. Lo ganó uno de Bujaraloz que, profesional él, se cascó una caña de un trago, tomo aire y soltó de un solo y claro regüeldo "Caja de Ahorros y Monte de Piedad de Zaragoza, Aragón y Rioja, Oficina Principal..." Nos alucinamos al oirlo (por aquel entoces alucinar todavía era reflexivo). No fue fácil ganar, estuvo disputado; quedó segundo uno que soltó: "Albalate del Arzobispo, arre burro, mecagüen Cristo", que no es moco de pavo. Estas cosas unen mucho. ¿Las mujeres hacéis algo así, o basta con ir a mear juntas?

Si,Oz, hay que reconocer que las mujeres somos insípidas y lo escatólogico lo aplicamos casi exclusivamente hablando de los delicados procesos interiores de nuestra alma, que casi siempre confundimos con las veleidades que nos inspira el último inquilino de nuestra entrepierna.(Y observa lo fino que ha quedado el eufemismo "entrepierna")
La última juerga auténtica en una excursión fue cuando nos dedicamos a ponderar las mierdas que había a cien metros a la redonda y hubo acuerdo unánime con una que era algo más recogida que una ensaimada mallorquina, de color camuflaje y que iba adornada con unos cientos de moscas entusiastas. Y el misterio de quién de nosotros había podido dejarla ahí esa mañana: algo así como un rudo respeto impregnó las miradas y se hubiera dado la cantimplora por saber quién lo inspiraba... pero ganó la humildad y nadie dio un paso al frente.
Siempre me he arrepentido de no haber recogido aquel aplauso, que es el único que creo haber merecido en toda mi vida.

Curioso que no he sentido asco pero me ha provocado muchas cosas sobre todo tensión y temor que el final de la historia fuera el de una muerte. Muy bueno Antonio!

Espero a ver qué dicen las mujeres, no recuerdo ningún "ritual" especial que nos permita sentir esa hermandad; salvo cuando de chica, con otra amiga pasábamos horas escribiendo poemas y dramatizádolos luego. Creo que me gustaría un día algo que fuera un baile pero en trance en medio de la noche.

Sí bueno, un amigo nos hizo caer en la cuenta de que las mujeres tendíamos a hablar de La Regla como prueba de afinidad o algo de eso, sin reparar en la presencia de algún hombre.
Él nos consultó si queríamos oirle hablar de su primera eyaculación.

Y lo que dice Odalys, he pasado mucho miedo, ¡pánico! ;)

ALIMAÑA NEWS

De nuestro corresponsal destinado en Clarence House

El palacio de Buckingham emitió hoy lunes un comunicado desmintiendo ciertos detalles y noticias que atañen a la que será futura esposa del principe Carlos y duquesa de Cornualles:

"No es cierto que Mrs. Parker-Bowles haya adquirido pelucas en una tienda de atrezzos de Madrid que suministra tales artículos a la compañía de "La Venganza de Don Mendo". El peluquero de Mrs. Parker-Bowles sigue siendo Hugo & Stephen, de Mayfair."

"Asimismo, es absolutamente falso y calumnioso el rumor de que su Majestad ha ordenado poner "culottes" a las armaduras de palacio, así como a sus amados perros, en previsión de que puedan ser abordados por su Alteza Real, con "animus fotuendi" originado por la abstinencia que la Soberana ha impuesto a los novios"

"Su Majestad declara de mal gusto toda broma que implique la presencia del pony que el príncipe de Gales ha regalado a Mrs. Parker-Bowles"

El Portavoz de Clarence House , residencia oficial del príncipe Carlos, ha confirmado, en cambio, el rumor de que Camilla ha resultado ganadora de un concurso con fines benéficos celebrado esta semana en Highgrove (Gales):*"Estamos muy contentos de poder confirmar que Mrs. Parker-Bowles ha ganado el premio Rat-terrier , después de haber eliminadao a mordiscos la nada desdeñable cantidad de 300 ratas oriundas de este condado. La princesa Ana, que quedó en segundo lugar, con 240 roedores abatidos, aplaudió deportivamente a la ganadora"*.

Preguntado por nuestro corresponsal si tal deporte podria sustituir a la caza del zorro con perros, hoy prohibida por el Parlamento británico, el portavoz admitió con una sonrisa: "*Quizás*". De ser cierto, la Cámara de los Lores , tendría que autorizar el uso de esta técnica de caza, hasta hoy reservada sólo a miembros de la realeza.

Seguiremos informando.

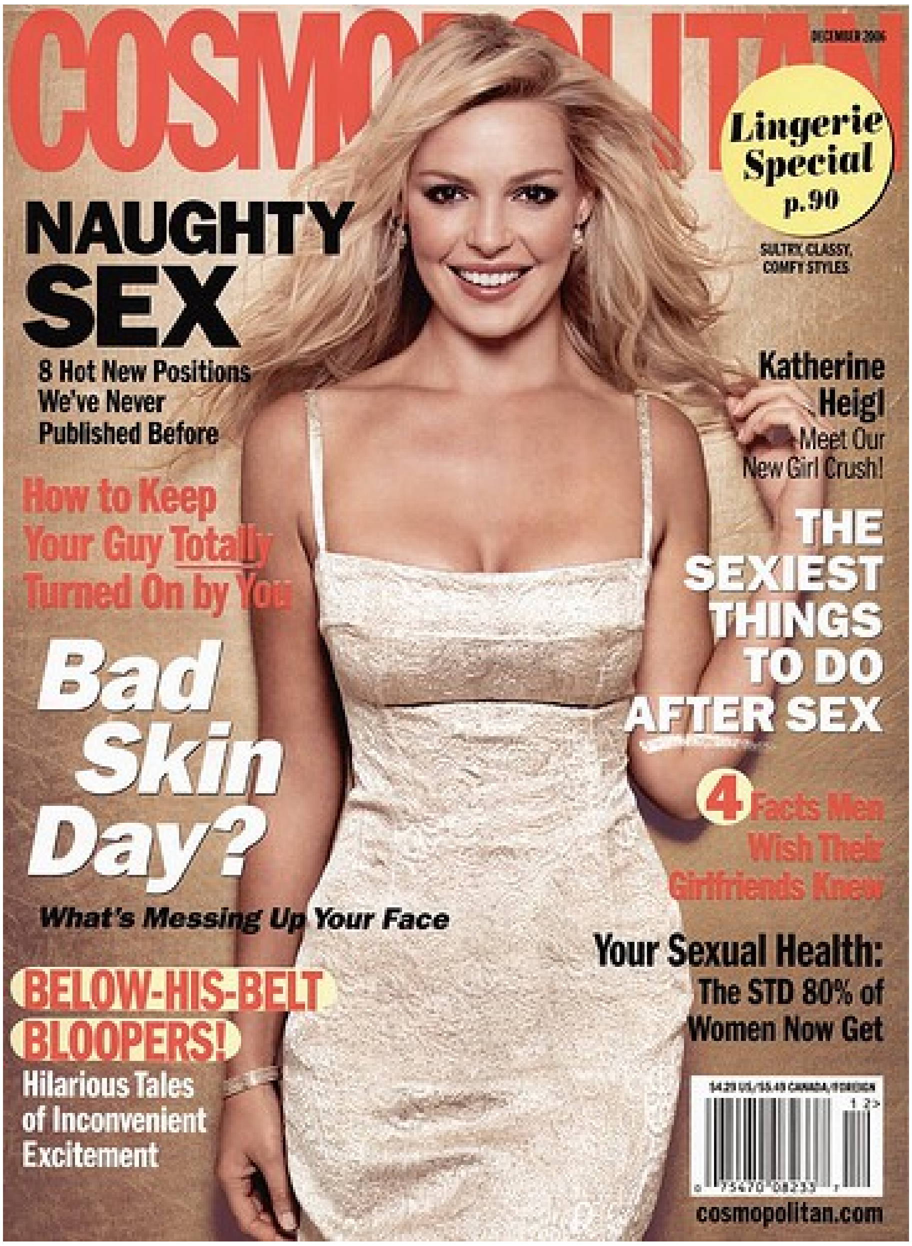
SOCIOLOGÍA DEL COSMOPOLITAN



SOLAS
Título: "Solas" Autora: Carmen Alborch Edita: Temas de Hoy, 1999. 247 páginas.

No me he acercado con más amor a un libro ni me he separado de él con una frustración tan grande. La culpa es mía por tener expectativas. "*Solas*" es una de las mayores mentiras que circulan por las librerías. Su primer capítulo, en el que Carmen Alborch diserta sobre la soledad utilizando citas de grandes autores literarios, prometía. Sin embargo, el libro se va diluyendo escandalosamente desde el primer tramo hasta el final. El título es un engaño. "*Solas*" induce a confesiones personales o experiencias de una mujer que ha tenido poder y que parecía que iba a comunicarnos sus conclusiones. Pero no. El libro es una enumeración abstracta de citas, de obras, de razonamientos lógicos y previsibles. Es un libro amasado con verborrea universitaria. Ha vendido como producto la imagen de Carmen Alborch, y no precisamente su contenido.
La escritura es completamente impersonal, salvo algún destello que no vale la pena. Es un estudio de la historia del feminismo con aplicaciones sociológicas poco científicas. La obra es aburrida y tediosa. Se convierte en una tesis donde la investigación, que tampoco es nada del otro mundo, es lo más importante. La pedagogía del libro es infantil, parece que está encaminada a universitarios y no a personas normales con

cuatro dedos de frente. Se ha dejado llevar, Carmen Alborch, por su tarea como profesora de universidad y no ha caído en que la clase universitaria es la más inculta y analfabeta del país. Dar clase a cuatrocientos sátrapas en un aula no tiene nada que ver con escribir para adultos.
Las mujeres. No creo que para las mujeres, feministas o no, ni siquiera para las más radicales, el libro de Carmen Alborch suponga algo más que un vademecum de citas y hechos históricos, archiconocidos y fáciles de hallar en un hemeroteca. El libro de Carmen Alborch es tan pobre porque no se atreve con lo personal, como valiosa experiencia práctica, ni es capaz de dar un paso adelante en lo intelectual. Lo que me inclina a pensar que en la Universidad y en la política, no hay intelectuales, sólo loritos que repiten lo que sus secretarios les escriben los fines de semana después de ver en televisión programas basura. Carmen Alborch no ha demostrado tener una postura intelectual fuerte, sino una visión sesgada de la realidad, cerrada, limitada a casos individuales, a recortes de periódicos.
Hay varias conclusiones. El lenguaje en el que está escrito "*Solas*" es pobre, administrativo y frío. Sociología barata en el sentido de que los métodos para llegar a las conclusiones no son serios, se basan en la anécdota. Además, Alborch es militante socialista, y Marx, que es el padre de la sociología, debería haberla guiado con más rigor. No quiero pensar que esta mujer es un color de pelo y una sonrisa, afirmarlo sería injusto, pero nuestras apetencias y necesidades viajan por el camino de la imagen.
El libro produce aburrimiento, pastosidad entre página y página. ¿Qué ocurre? Que los libros como "*Solas*", en vez de estar escritos desde una posición intelectual definida, han sido diseñados por ejecutivos de una editorial para dar el pelotazo del año. Las editoriales creen que lo lectores somos tontos de baba y que hay que darnos las cosas mascaditas. He hablado con mujeres feministas, con compañeros de amigas, y nadie ha sido capaz de acabar el libro. El lector ha comprado veintidos ediciones de "*Solas*" pero no lo ha leído porque es un mal libro. Y un mal libro es una estafa.
"*Solas*" es uno de los frutos demoníacos de la "*literatura*" de autoayuda y superventas. La diferencia entre "*Solas*" y cualquier reportaje de "*Cosmopolitan*" es que la revista está más cerca de la calle. Y la comparación con el "*Cosmopolitan*" la realizo porque "*Solas*" me parece un acto de frivolidad. Cualquier libro de Carmen Rico Godoy sobre mujeres, es más crítico, más punzante y está majestuosamente mejor escrito que "*Solas*". Y con un feminismo feroz, inquebrantable.
Es evidente que Carmen Alborch ha escrito una obra distante, correosa, sin fuerza ninguna, sin personalidad, como por encima, pasando de asunto a asunto conforma se acerca el final, cada vez con menos ganas y mayor dejadez. Da la sensación de que ha ido uniendo discursos y trabajos sueltos para darle forma a un tocho que no hay quien se lo trague.
Pues este libro ha estado en el primer lugar de ventas en España durante muchas semanas. Podemos sentirnos orgullosos. ¡Ea!

No he leído el libro pero me pregunto si la crítica es sobre lo escrito o sobre la escritora. Si tiene público, en todo caso habría que ver qué ganchos se lanzan que pegan tan fuerte.

Tuve un amigo pintor, vive pero ya no es amigo, excelente pintor a quien admiro muchísimo; enloquece porque no ha logrado situar su obra en el lugar "que merece" pero no quiere hacer algo comercial porque eso no es arte, prefiere morir y enloquecer a los de su entorno.

Alimentar la frivolidad con obras como la que comentan y tener público numeroso no es noticia, en la tele hay culebrones que te embotan el cerebro y son seguidos con más fidelidad que una misa, pero hay otro público del que no se habla y es del que repudia y se rebela contra eso y que pide más, buena literatura.

Sobre "soledades" (y no sé si gustan de su música) les recomiendo "echar una escuchada" a lo más reciente de Arjona.

Gusto en leerle Antonio, qué tal si la cruzada la lleva con un mejor libro? Lo que he leído de usted me va gustando y soy golosa...hay más?
Un abrazo :)

Yo si no hay rubias platino y detectives mal afeitados, o en su caso naves interplanetarias, ya es que no suelo leer.
Pero desde aquí quiero protestar por lo bajo que han caído las listas de éxitos en nuestro país. Es un escándalo que un libro así ocupe la cabecera en ellas. Qué tiempos aquellos en que triunfaban títulos excelsos como "Niñas al salón".
Ahora ya en serio ¿queréis hacerme creer que la gente lee esos libros? Pero si no tienen intriga, ni pasa nada... nunca he comprendido al que pierde el tiempo en no leer novelas, buenas novelas, novelas de esas con héroe menospreciado y mujer fatal, novelas con víctima inocente y con villano ajedrecista, novelas con crimen y pasión, con aventura y país desconocido, novelas de frontera y descubrimiento, novelas de aprendizaje y descubrimiento (eso ya lo he dicho pero es otro, eh) novelas con madre mártir e hijo pródigo que se arrepiente, novelas con damas y caballeros que viajan en simones, novelas con criaditas seducidas e hijos espurios...
El que lea cosas de Carmen Alborch se lo tiene merecido.
¿No os duele moriros y dejar todos esos libros por leer?

Quizas mereceria ser numero uno en las listas si nos hubiera contado parte de los entresijos del poder. Su trato diario con los esclavos-escoltas, la superioridad hacia su chofer, el pelotilleo que genera en su entorno para decirle lo bien que lo hace y lo mal que lo hacen los demas incluido el "jefe". Si no estuvieran donde la providencia les ha puesto, o si no hubieran comido determinadas cosas que luego hay que escupir los pelos, serian y son meros funcionarios con ganas exclusivamente de llegar a la jubilacion con la dignidad que no les dio la "cuna" o el reparto de neuronas. Solo hay que mirar el antes y el despues . Lo que cambia uno cuando se siente algo, aunque ese

algo sea un ministerio momentaneo y la vida continue.

Vaya! juraría que el otro día te había dejado un comentario en este post.... Te decía que yo me había leido su "Malas", las típicas reflexiones de que el hombre es un lobo para el hombre pero con mujeres.

Quitando alguna anécdota el libro me pareció aburrido, no consiguió engancharme precisamente porque era frío e impersonal.

Decididamente... no me gusta cómo escribe esa mujer :-)

Creo que yo leí ese libro hace años, en la primera edición. Me llamó la atención por el título y porque creí que me iba a contar algo de interés (tengo una buena impresión de Alborch). Pero sí, la verdad es que me decepcionó porque no me decía nada de nada. En cuanto a la forma de escribir... no sé si tendrá que ver con que es catedrática de Derecho Mercantil o algo así. Supongo que es un producto de consumo "literario" como los fastfood.
Oz, tienes razón, debería leer otras cosas, pero hay que leer de todo, no crees? En cualquier caso ultimamente me he enviciado con esto del internete y lo que más leo son las historias de los blogs, como el tuyo que es genial. ¿Será eso el nuevo fastfood "literario"? ummm... a veces lo parece (no el tuyo), y a veces me da pena no poder cogerlo con las manos en un libro hecho de papel, porque en una pantalla no es lo mismo.
Mira, Alborch podía escribir así sus libritos: en un blog personal sin pena ni gloria.

Y el dinerito que estará ganando...

ANTONIO MAGÁN

Yo cambiaría toda mi obra por escribir un solo folio de la obra de Antonio Magán, el autor de "Sabuesos del alma", que está a continuación. Y ya sabéis que la retórica y la humildad no son lo mío.

Gatopardo

La ración de medio pollo de la feria

No hay Feria sin ración de medio pollo. Sí, amigos, me refiero a ese medio pollo tristón, salido del sombrero de Carpanta y que ha sido el asidero culinario de los gañanes que nos visitan desde que se acabó la posguerra en 1.975. Esa media ración de pollo que miramos con indiferencia como el enterrador de Hamlet contempla a sus calaveras.

La ración de medio pollo es una comida alternativa, no porque sea jipi, o porque no lleve clembuterol. No. Es porque el medio pollo se come cuando no queda más remedio.

La oferta del medio pollo en Feria está escrita de forma huidiza y con faltas de ortografía en una pizarra no muy grande que cuelga de un palo del chiringuito. Su brevedad la hace inexplicable, indescrifable, un misterio que sólo se resuelve a golpe de cartera.

La ración de medio pollo es una comida venida a menos. De momento, los pollos actuales son del tamaño de la codorniz (algunos parecen pajaritos fritos). El capitalismo no les dejan crecer, los crían en dos meses y los matan antes de que tomen la primera comunión. La consecuencia es que la carne del medio pollo es sólo una fina capa de no se sabe qué, que tiene la misión de separar los huesos de la piel. La pechuga del medio pollo se deshace en la boca como si mascaras gazpachos dando la sensación de que el pollo más que asado está desenterrado.

Y qué me dicen del caldo. Algún día sabremos la procedencia del caldo parecido al gasóleo que le echan a los pollos mientras los asan en la máquina inquisitorial de tortura a la vista morbosa de la plebe que los huele y queda hipnotizada. La piel adquiere con tan anónimo brebaje una dureza tal, que más que crujiente, el pollo está petrificado y es imposible penetrar por esa capa de laca Nelly con la mierda de cuchillos con mango de plástico que colocan en los chiringuitos y que se doblan como floretes.

La ración de medio pollo, en el paseo de la Feria, se come mirando hacia abajo por culpa de la ristra de banderas que ondean en el techo del chiringuito. Son todas del tercer mundo, no las han podido elegir mejor. Países del África muy negra, desconocidos y presas de la más terrible hambruna, por eso hay que esconder el pollo con la cabeza, para no humillar al personal.

La ración de medio pollo es una comida poco romántica, nadie se sentaría con la novia a comerse un pollo a medias con las moscas para decirle que la amas. Sin embargo, sí con toda la familia para vengarte del cabrito del suegro que te lleva mártir.

Y el pan. El pan con el que se acompaña al medio pollo parece que acaba de llegar de tres días de viaje. Seco, duro, escaso, con poca molla y soso hasta la más aguda tristeza.

Como el medio pollo no tiene casi chicha acabas cogiéndolo con las manos y cuando le vas a hincar un bocado, un amigo de toda la perra vida te da un manotazo en la espalda, saludo sincero donde los haya, y acabas derramando la salsa y con un lamparón en la chaqueta a modo de medalla al mérito incivil (chaqueta que no te has quitado porque no hay sillas). Pero sabido es que un buen día de Feria sin manchurrones de mugre no es algo completo.

Al levantar la media ración, adviertes que hay seis patatas fritas debajo, entrelazadas como en un cuadro de Tapies, delgadas, blandas, aceitosas. Las inundas de ketchup para perderlas de vista en la boca. Junto a las patatas, tísica y grasienta también agoniza una tira de color negro que despide más aceite todavía. Está carbonizada pero deja entrever un ligero tono verdoso ¡Coño, son los restos de un pimiento! Pues p´dentro y te los tragas con un largo coletazo de vino cabezón mezclado con gaseosa caliente.

Los niños se tiran los huesos de aceitunas, las sirenas de los cachivaches hacen que todo el mundo grite, te duele la cabeza y el pollo está tan frío que es imposible arrancarle una tira de carne más sin tener que quebrar los frágiles huesos que se te pueden atravesar en la garganta. No sabes si encender un cigarro o cortarte las venas.

Acabas de comer y tienes las manos manchadas de grasa pero no te puedes limpiar porque las servilletas están contadas, diez por cabeza y ni una más. Levantas la vista en busca de un servilletero pero los que están a tu alrededor conocen esa mirada y cogen el que tienen con la mano igual de guarra que la tuya y te enseñan los dientes mientras degluten.

La broma te ha costado mil duros porque las cervezas no iban en la oferta, ni el pan, ni los restos del pimiento y acabas cagándote en los muertos de la ración de medio pollo y prometes firmemente, mientras orinas en los váteres sin luz de los Jardinillos, que jamás volverás a sentarte a comer una ración de medio pollo en Feria.

Pero vuelves y vuelves cada año, porque el medio pollo es una maldición, un potro de tortura gástrica que nos recuerda cada Feria a dónde vamos y lo peor de todo, de dónde venimos.

Inmensa esa historia del medio pollo. Aquí en Madrid, al lado de donde vivo, hay un bar que todos llamamos El medio pollo. Supongo que el mote (en realidad se llama Los dos amigos o La amistad o La Salud o algo así...) le viene de que alguna vez su plato estrella fue El medio pollo...
Este bar siempre ha sido mi test para conocer si puedo llegar con alguien a ser algo más que conocidos. Si la persona es capaz de sentirse a gusto en ese bar (nada romántico, nada moderno, nada interesante...)es que es de los míos. Sobre todo, como dice Antonio Magán, es que "fue" de los míos. El medio pollo me recuerda quién soy y, sobre todo, de dónde vengo...
Zenkiu a Antonio Magán por ponerlo tan bien en palabras.

En esta tierra mía, en épocas de feria, somos más de la morcilla pincha’ en una rodajica de pan. Pero salvando ese fútil detalle que da título a la historia y salvando también el tiempo transcurrido, me ha sorprendido reconocerme allí, bajo esas banderas horrorosas y atemporales, sufriendo por una servilleta y maldiciendo la hora en que se me ocurrió tomarme el dichoso aperitivo. Es curioso como puede hacernos reír algo que nos agobió tanto en su momento si quien nos lo cuenta, nos lo cuenta bien. Un placer leer a tu amigo, gata.

Contado así, definitivamente me he estado comiendo un "cadáver de pollo". A ver, a ver... me siento mal? culpable? un poquito, sí, pero... qué rico saben y con hambre no hay fantasmas.
Sabes? Hay un pais donde los pollos no tiene pechugas, se hace difícil que le pegues una mordida sin chocar con el tuétano de lo flacos que son los muslitos, pero lo dicho, cuando aprieta el hambre da igual si el asado es con carbón o una lámpara de keroseno o un fósforo, lo que daría cualquiera siquiera por un alita... te lo dejo de tarea, es una isla y está en el Caribe :)
Me ha encantado leerlo. Felicitaciones!

SABUESOS DEL ALMA

Camino con fiebre pisando las estrellas de un paseo vacío. Cada estrella tiene grabado el nombre de un actor y la playa está vacía. Alguno de esos actores ha muerto, los siguientes esperan y no pueden escapar de su estrella mortuoria, son columbarios anticipados y vacíos. Siento fiebre y miro hacia el mar de papel de aluminio, una pista de patinaje gris donde duermen los dioses especuladores de conchas.
Un carajillo. Otro, un paracetamol, otro.
-*Se llama paseo de las estrellas pero nunca hemos visto a ninguna*.
-*Ya veo*
-¡*Qué largas se hacen las tardes cuando no hay clientes*!
Sentados en un taburete una pareja de ingleses sin camiseta y tatuados enroscan sus lenguas, borrachos, a destiempo, tardíos, llenando de flujo una tarde invernal en una playa vacía y sin sonidos.

¿Qué escribió Miró de esta playa? ¿Qué dijo de aquel rincón? ¿Por qué he leído tanto? ¿Por qué sufro por lo que he leído?¿Qué hago en la tierra de Miró desesperado y sin forro? ¿Qué hago trabajando con una chaqueta a cuadros? Consumiendo mis lágrimas de escritor frustrado, paracetamol y carajillos, paellas precocinadas con tinta de calamar que tiñe los dientes de negro a una pareja que se besa. ¿es esto la puñetera vanguardia? ¿Para qué habré leído?
Por el mar de aluminio se acerca flotando, hierático, Gabriel Miró con sus ojeras de estudiante onanista, su levita negra y su silencio. ¿Por qué lo habré leído? Cada vez que cruzo el Barranco de Mascarat recuerdo que desde aquel puente lanzó una piedrecita al vacío para pensar en la eternidad y seguro que en el suicidio. Después aparece Ortega y Gasset hablando de sí mismo y le grito "*¿Para qué te habré leído*?" Cumplió tantos años que le dio tiempo a contradecirse, un ególatra de cojones que ignoró a Valle-Inclán y subió a los altares las zapatillas de Baroja. "¡*Qué borde que fuiste con Valle!, que me lo dijo Umbral*" le espeto en los morros. Tras Ortega, Valle–Inclán aparece con su barba blanca flotando, excelente manco anarquista, legendario. "*Gracias, por Luces de Bohemia*" le susurro con admiración pero me arrodillo a llorar y le pido piedad porque por su culpa vivo en la miseria. "¡*Dejadme en paz mal nacidos!*" les grito mientras aparece deslizándose en patines Henry Miller, va en pelotas y se ríe, tal y como lo recuerdo en las playas griegas que tanto disfrutó, acaba de echarle un polvo a Anais Nin que se ríe a su lado como un colibrí esquizofrénico. "*No os dais cuenta, necesito vivir, dejadme en paz, no puedo más, sois una puta maldición*" pero se quedan ahí, ante mí, mirándome sonrientes y crueles como turistas, en ese artificial paseo de las estrellas. "*Esta tarde tengo que trabajar, hacer una entrevista porque me pagarán dinero,¿tan degradante os parece?, es la última oportunidad que tengo para vivir sin literatura, ni pobreza, ni fiebre, ni carajillos, ni paracetamol ¡dejadme en paz¡*".
En esas que aparece sin haberlo llamado, como siempre hace, Knut Hansum con "*Hambre*" debajo del brazo, con la mirada ida, una laaaarga barba y migas de pan prendiendo de ella. "*Knut, no te ofendas pero vete a tomar por culo*" le grito desesperado mientras lloro recordando que una vez que me robaron dejaron en el suelo, abandonado "*Hambre*" y lo recogí como si fuera un tesoro. Le repito "*Han* (diminutivo) *no puede ser que todos compartamos tu locura, tengo que renunciar a tu obra, borrarla de mi mente como si nunca hubiera existido*". Pero Knut se queda a merendar chocolate.
Me tiemblen las manos, me tomo otro carajillo, otra pastilla para calmar la fiebre y pastel para regatear el hambre. ¿Qué hago aquí? En un país sin forro, con descapotables llenos de mujeres que me sonríen como sirenas cuando cruzan desnudas por el paseo de las estrellas y que nunca querrán follar conmigo.
Sábato, Bukowski, Umbral, Cabrera Infante, Arrabal, Miller, Ortega, Valle-Inclán, Anais, Gabriel Miró, Hansum, todos detrás de mi, siguiéndome por el paseo de las estrellas mientras hablan de literatura. Para despistarlos me escondo detrás de las palmeras y les hago cucamonas. Son sabuesos del alma y nadie que los ha leído los puede dejar atrás.
Decido trabajar por fin, me recompongo la chaqueta, con un caramelo de menta combato el aliento fétido a carajillo, me peino y llamó a la puerta.
-¿Es usted el periodista que me han mandado para entrevistarme?
-Sí, soy yo.
Entro y miro hacia atrás antes de cerrar la puerta, la pandilla de sabuesos literarios se descojonan de mí, sonríen mientras se quedan a escuchar detrás de la puerta para mofarse luego con los detalles.
.*-Tiene usted mala cara*.
.*-No es grave, vamos al tajo, ¿qué profesión quiere que le ponga en la entrevista diseñador o decorador de interiores*?
.*-Pues diseñador... disculpe ¿ha oído usted una carcajada detrás de la puerta?*
.*-No, son imaginaciones suyas*.

A la espalda de mí entrevistado se encuentra el ventanal de la terraza, junto a un ficus está Valle-Inclán, el muy cachondo se ha tumbado en el suelo y se parte el culo con mi primera pregunta.

Entre los locos por la literatura suele haber pocas ocasiones de confraternizar; pero cuento con unos cuantos cómplices maravillosos:nos telefoneamos a horas intempestivas para leernos narraciones, artículos, frases de los escritores que amamos, y no hay vez que no acabemos hablando de Antonio Magán y de José Luis Alvite, porque degustamos cada frase y cada metáfora, los releemos y nos emborrachamos con su precisión con la que escalpelan la realidad. No es casualidad que sean dos "outsider" en el mundo literario.

...y que mas dá si caza ratones. Y si realmente me da lo mismo ¿que hago yo en este apartado?
Pos porque se está a gusto, y vengo del "olivar de Chamartin" y me duele. Y me acuerdo de Gallardón y sus 43000 talas y me jode.
Y ahora me voy por "los derechos humanos"

El gatopardo es una especie de mamífero carnívoro parecido a la pantera. Era también un príncipe italiano en la novela de Tomás de Lampedusa.

Respecto a la verdadera identidad de quien escribe este blog, ya se la pregunté una vez pero no me quiso decir ni siquiera desde qué parte del universo mundo escribe.

Si de noche todos los gatos son pardos, el acertijo es más difícil de lo que parece. Pero como todo gato, seguramente eres sigiloso, celoso, caprichoso, libre y ronrroneas cuando te miman. Ah! y debes tener unos ojos que hipnotizan. Me he ganado un miau?

Entretenido lo de adivinar!
Gatopardo es mujer, una sola mujer, para qué más si sola puede con lo que quiere hacer.
Lúcida, solidaria y guerrera.
Alguna vez he tenido la idea de que es una firma conocida que aquí se suelta la melena y la 'sospecha' no me incomoda.
Gatopardo, ¿lo dirás alguna vez?
Un saludo, y gracias por el 'trabajo' tan bien hecho.

FREUNDENTUM
Globale Dorf
1990
""
Una de las ficciones mas corrientes del sistema humano
es el nombre, que, como construccion coneceptual, ayuda a descubrir e identificar realidades.
Quien se llama Gatopardo es realmente Gatopardo aqui, porque bajo esa cobertura es que lanza al mundo lo que leemos; si se arrepiente, Gatopardo ya lo habra fagocitado.
Es a Gatopardo (y al doppelgänger que le haya dado vida) a quien el FREUNDENTUM_Globale DORF, distingue.
Por materializar su consciencia redefiniendo un esquema propio y darnos su lectura con la correcta regencia hermeneutica; Por contraste revelador, ya que su idea, opuesta, en caso de serla, remodela la propia, y, como muestra de mi Regio Aprecio, vengo a entregarle la orden LINCOVSKY a usted y su doppelgänger sin sujecciones a legislacion alguna, sin consecuencia practica sobre el reconocimiento de los demas, salvo en todos

los componentes del Freundentum_Globale Dorf.

La pregunta no es "¿Quién es Gatopardo?" sino quiénes forman Gatopardo y a qué intereses sirve. Gatopardo es un producto mediático que está tirando de los famosos dossiers cuando y como le conviene.
Poner en la barra del navegador marioconde.com y llegaréis a donde tiene Gatopardo su sucursal

"Periodista Listo" apela a una neutralidad interesada, que desprende peligrosidad inicial en él y no en Gatopardo (grupo o individuo recientemente distinguido por el FREUNDENTUM Globale Dorf). Hablar de "intereses" con una connotacion peyorativa es subirse al Olimpo, y eso no creo que le corresponda. Primero por imposibilidad ¡Simple Mortal!. Segundo porque Ud tiene intereses bajo la cobertura del no interes.
Saludos!

uy no se, solo se que es una persona extraordinaria, que mas da el premio? si el premio lo tenemos en su blog al leer su temas, notas y comentarios, acaso podemos pedir mas? al menos yo me conformo con saber que es una persona extraordinaria.
Saludos y un abrazo Gatopardo, que es pegado y solo con la letra inicial en MAYUSCULAS, jijiji

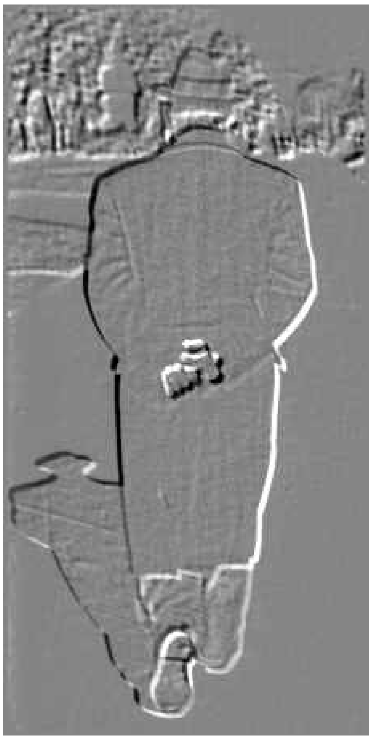
PROMESAS



Hace muchísimos años escribí en mi diario:

"Cuando sea vieja no me preocuparé por los amigos ni por los enemigos: viviré la amistad y la enemistad conforme lleguen; las despediré conforme se vayan.
No sentiré esta tristeza por la deslealtad de quien ataca sin previa declaración de guerra; no me sentiré responsable de sus descargas hormonales ni me indignare porque lo pretendan. Sentiré una piedad universal sin concreción posible y sonreiré cuando luchen contra los fantasmas que sus cerebros proyectan, pero no trataré de delegar mis convicciones, porque será hermoso vivir y equivocarse y sonreír con incredulidad ante lo que me hizo gritar hasta enronquecer… y aprender que lo realmente apasionante es espiar los gatos de tejado que no me pertenecen.
No dormiré sola como revancha, desafío, opción o convicción: simplemente dormiré sola.
Amaré a los hombres como ahora: ellos ya no me amarán.
No trataré de ser mejor de lo que soy: lo seré.
No trataré de ser más vieja de lo que soy: seré más vieja."

Y lo he cumplido.

Un día debería pensarme escribir algo así ... pero hace años escribí una cosa más corta: ... porque me merezco lo mejor y vaya, aquello funcionó. Parece que voy por buen camino y aunque no cumplo todas tus clausulas, cumplo muchas. ¿Crees que deberíamos pensarnos lo de hacernos novias?
